## CURRENT LITERATURE

---

THE BIRDS OF SIMCOE COUNTY, ONTARIO, *By* O. E. Devitt, 1943, 44. *Trans. Roy. Can. Inst.*, Vol. 24, pp. 241-314, Vol. 25, pp. 29-116, map + 5 photographs.

A well-done, annotated list; the area between Georgian Bay and Lake Simcoe is described, and the history of its birds and bird study sketched. It is in the transition Life Zone and the list contains 257 species of birds

(236 substantiated by specimens) plus 5 more that are considered hypothetical. Annotations include status, migration dates, specimens taken, and occasional historical and life history data. The birds for the most part are identified to species only. The illustrations consist of a useful map and 5 photographs showing habitats. There is a 3-page bibliography and a species index.—A. L. RAND.
