CURRENT LITERATURE

Compiled by ROSS H. ARNETT, JR.

This section is designed to contain all papers on the Coleoptera of North and South America which are not in the Leng (1920) catalogue or the supplements, or papers containing new species and records not included in Blackwelder's Neotropical checklist and which have not been previously listed in The Coleopterists' Bulletin.

INTRODUCTORY NOTE: The compiler of this section, now relieved of the duties of editing the entire Bulletin, is undertaking the task of making this as useful as possible to our readers. The reader is invited to assist in this work by submitting to the current literature section the omissions which are noted as each issue appears, except for papers which are in the publications in the following list. All papers which have appeared in these publications will eventually be cited.

The following is a list of the publications regularly available to the compiler, and the abbreviation used in this section in citing the reference. As additional publications become available, they will be added to the list.
