

A LIST OF BIRDS TAKEN ON MARAGUANA,
WATLING'S ISLAND, AND INAGUA, BAHAMAS,
DURING JULY, AUGUST, SEPTEMBER,
AND OCTOBER, 1891.

BY CHARLES B. CORY.

MARAGUANA (August 5 to September 14).

<i>Larus atricilla Linn.</i>	<i>Ceryle alcyon (Linn.).</i>
<i>Gelochelidon nilotica (Hasselq.).</i>	<i>Tyrannus dominicensis (Gmel.).</i>
<i>Ardea tricolor ruficollis Gosse.</i>	<i>Loxigilla violacea (Linn.).</i>
<i>Ardea virescens (Linn.).</i>	<i>Spindalis zena (Linn.).</i>
<i>Nycticorax violaceus (Linn.).</i>	<i>Euetheia bicolor (Linn.).</i>
<i>Himantopus mexicanus (Müll.).</i>	<i>Chelidon erythrogaster (Bodd.).</i>
<i>Tringa maculata Vieill.</i>	<i>Vireo crassirostris (Bryant).</i>
<i>Tringa minutilla Vieill.</i>	<i>Cæreba bahamensis (Reich.).</i>
<i>Totanus flavipes (Gmel.).</i>	<i>Dendroica petechia gundlachi Baird.</i>
<i>Symphebia semipalmata (Gmel.).</i>	<i>Dendroica dominica (Linn.).</i>
<i>Bartramia longicauda (Bechst.).</i>	<i>Dendroica discolor (Vieill.).</i>
<i>Ægialitis vocifera (Linn.).</i>	<i>Mimus polyglottus orpheus (Linn.).</i>
<i>Ægialitis wilsonia (Ord.).</i>	<i>Mimus gundlachi Caban.</i>
<i>Arenaria interpres (Linn.).</i>	<i>Polioptila cærulea (Linn.).</i>
<i>Hæmatopus palliatus Temm.</i>	<i>Margarops fuscatus (Vieill.).</i>
<i>Columba leucocephala (Linn.).</i>	
<i>Columbigallina passerina (Linn.).</i>	

WATLING'S ISLAND (September 28 to November 9).

<i>Larus atricilla (Linn.).</i>	
<i>Phalacrocorax dilophus floridanus (Aud.).</i> — Eight specimens.	
<i>Ardea tricolor ruficollis (Gosse).</i>	
<i>Ægialitis vocifera (Linn.).</i>	
<i>Coccyzus minor maynardi Ridgw.</i>	
<i>Coccyzus americanus (Linn.).</i>	
<i>Tyrannus dominicensis (Gmel.).</i>	
<i>Dolichonyx oryzivorus (Linn.).</i> — Oct. 12, female.	
<i>Habia ludoviciana (Linn.).</i> — Oct. 20, female.	
<i>Euetheia bicolor (Linn.).</i>	
<i>Vireo olivaceus (Linn.).</i> — Oct. 5, male.	
<i>Cæreba bahamensis (Reich.).</i>	
<i>Mniotilla varia (Linn.).</i>	
<i>Compsothlypis americana (Linn.).</i> — Five specimens.	

- Dendroica tigrina (*Gmel.*).—Seven specimens.
 Dendroica petechia gundlachi *Baird*.—Common, breeds.
 Dendroica maculosa (*Gmel.*).—Six specimens, Oct. 6-21.
 Dendroica striata (*Forst.*).—Thirty-six specimens.
 Dendroica blackburniae (*Gmel.*).—Two specimens, Oct. 12.
 Dendroica dominica (*Linn.*).—Six specimens.
 Dendroica virens (*Gmel.*).—Oct. 12, male.
 Dendroica palmarum (*Gmel.*).—Oct. 20, female.
 Dendroica discolor (*Vieill.*).—Twenty-five specimens.
 Seiurus aurocapillus (*Linn.*).—Thirteen specimens.
 Mimus gundlachi *Caban*.
 Margarops fuscatus (*Vieill.*).

INAGUA.

- Gallinula galeata (*Licht.*).—July 17.
 Tringa minutilla *Vieill.*.—July 28.
 Totanus flavipes (*Gmel.*).—July 28.
 Myiarchus sagræ *Gundl.*
 Loxigilla violacea (*Linn.*).
 Vireo olivaceus (*Linn.*).—Sept. 17, female.
 Vireo crassirostris (*Bryant*).
 Cœreba bahamensis (*Reich.*).
 Helmitherus vermivorus (*Gmel.*).—Sept. 22, female.
 Dendroica petechia gundlachi *Baird*.
 Mimus gundlachi *Caban*.

NOTES ON THE RANGE AND HABITS OF THE CAROLINA PARRAKEET.

BY AMOS W. BUTLER.

THE CAROLINA PARRAKEET (*Conurus carolinensis*), whose range is now confined to quite restricted areas in some of our southern States, was formerly known as a characteristic bird of Indiana. At the time of its greatest range in that State, within historic times, it was known from New York, Pennsylvania and Maryland to Kansas, Nebraska, and possibly Colorado. It is my desire to present some evidence tending to show its distribution in Indiana and neighboring States together with some notes upon its habits.
