A LIST OF THE LAND SHELLS OF LEE COUNTY, FLORIDA.

BY E. G. VANATTA.

The following species were collected in Lee County, Florida, by Mr. Clarence B. Moore. The smaller forms were picked from leaf-mould sent in bags, each with the exact locality carefully marked on it.

Practically nothing has been known hitherto of the land-snail fauna between Key Marco and Cape Florida, the Ten Thousand Island region being accessible only to the collector cruising in his own boat.

It is interesting to note the occurrence of *Bifidaria rhoadsi* Pils. and *Vertigo variolosa* Gld. on the west coast of Florida; also that many of the shells of *Zonitoides minuscula* Binn. have internal

laminæ or teeth. The use of the name *Euglandina rosea* Fér. instead of *Glandina truncata* has been explained by Dr. Pilsbry in the last number of the Manual of Conchology, p. 191. All the specimens listed are in the collection of the Academy of Natural Sciences of Philadelphia.
