THE TOLEDO SEMINAR

The September number of Mosquito News carried the program of the Toledo Seminar on "The Use of Fogs and Mists for Adult Mosquito Control." The current number has a brief account of the meetings in the "News and Notes" section on page 221. At the time the September News went to press plans had not yet been completed for the publication of the papers, and it was expected that several of these would appear in Mosquito News.

Over 100 AMCA members and others attended the meeting, and so much interest was shown that it was decided to publish all of the Proceedings and Papers together so as to lose the flavor and character of the meeting, which consisted of a blend of formal papers and informal—and very pointed—discussion. Ordinarily it would not be possible, financially, to publish such complete proceedings, but the Willys Motors Corporation offered to bear the main financial burden of the undertaking and is sponsoring the publication. The title will be "The Use of Fogs and Mists for Mosquito Control."

The title page will carry the information that the pamphlet comprises the papers and proceedings of the AMCA Toledo Seminar, edited by the Toledo Sanitary District, and published through the courtesy of the Willys Motors Corporation. It will be of the same dimensions as Mosquito News, and the contents will be substantial, as given on pages 171 and 172 of the September Mosquito News. Those in attendance at the Seminar and each mosquito control agency having employer membership in the AMCA will receive a copy free of charge. Additional copies may be purchased at nominal charge—not more than a dollar—to cover the cost of mailing and other expenses.

The Fog and Mist Seminar Proceedings will be available early in 1956. Distribution will be handled by the Toledo Sanitary District, to which inquiries should be sent in care of P. Bruce Brockway, Jr., Superintendent, 5015 Stickney Ave., Toledo 12, Ohio.
