A LIST OF OKLAHOMA MOSQUITOES

RAY E. PARSONS and D. E. HOWELL

Department of Entomology, Oklahoma State University

An excellent survey by Rozeboom (1942) revealed 40 species of mosquitoes in Oklahoma. Rothe (1945) added one additional state record. Griffith (1952) in a statewide study found 11 new state records which brought the total to 52. Carpenter and LaCasse (1955) list 54 Oklahoma species. Hill, et al., (1958) recorded 55 species in the state.

Culex pipiens and C. quinquefasciatus are considered a complex in this paper and are recorded as one species. This work records three new state records, Aedes spenceri, Ae. hensidoni and Uranotaenia longii. This brings the total of Oklahoma mosquitoes to 58.

Synonymy utilized here follows that of Stone, et al., (1959) and Stone (1961).

The following list represents species collected by the authors as well as specimens identified at various museums, U. S. Army installations and state agencies.

Aedes aegypti (Linnaeus)
Aedes atlanticus Dyar and Knab
Aedes atropalpus (Coquillett)
Aedes canadensis canadensis (Theobald)
Aedes cinereus Meigen
Aedes dorsalis (Meigen)
Aedes luteocephalus (Coquillett)
Aedes fulvus-pallens Ross
Aedes hensidoni Cockerell
Aedes mitchelli (Dyar)
Aedes nigromaculatus (Ludlow)
Aedes sollicitans (Walker)
Aedes spenceri (Theobald)
Aedes sticticus (Meigen)
Aedes taeniorhynchus (Wiedemann)
Aedes theleter Dyar
Aedes tormentor Dyar and Knab
Aedes triseriatus (Say)
Aedes vexans (Meigen)
Aedes zoosophs Dyar and Knab
Anopheles barbieri Coquillett
Anopheles crucians Wiedemann
Anopheles pseudopunctipennis franciscanus McCracken
Anopheles pseudopunctipennis pseudo punctipennis Theobald
Anopheles punctipennis (Say)
Anopheles quadrimaculatus Say
Culex apicalis Adams
Culex erraticus (Dyar and Knab)
Culex nigripalpus Theobald
Culex pectora Dyar and Knab
Culex pipiens-quinquefasciatus Linnaeus

1 Present address: Department of Entomology, University of Florida; Gainesville, Florida; 32601.
Culex restuans Theobald
Culex peus Speiser
Culex salinarius Coquillet
Culex tarsalis Coquillet
Culex territans Walker
Culex thriambus Dyar
Culiseta incidunt (Thompson)
Culiseta inornata (Williston)
Culiseta melanura (Coquillet)
Mansonia perturbans (Walker)
Orthopodomyia alba Baker
Orthopodomyia signifera (Coquillet)
Psorophora ciliata (Fabricius)
Psorophora confinis (Lynch Arribálzaga)
Psorophora cyanescens (Coquillet)
Psorophora discolor (Coquillet)
Psorophora ferox (Humboldt)
Psorophora horrida (Dyar and Knab)
Psorophora howardii (Coquillet)
Psorophora longipalpus Roth
Psorophora signipennis (Coquillet)
Psorophora varipes (Coquillet)
Toxorhynchites rutilus septentrionalis (Dyar and Knab)
Uranotaenia lowii Theobald
Uranotaenia sapphirina (Osten-Sacken)
Uranotaenia anhydor syntheta Dyar and Shannon

ACKNOWLEDGMENT. The authors wish to express their appreciation to the following persons and organizations for the use of their records and specimens: Dr. W. A. Drew, Associate Professor, Oklahoma State University; Dr. C. Hopla, Chairman, Zoology Department, University of Oklahoma; W. T. Nailon, Entomologist, Army Corps of Engineers, Tulsa; Leroy Rachels, Entomologist, State Health Department, Oklahoma City; Fourth U. S. Army Medical Laboratory, Fort Sam Houston, Texas; and special thanks to the Surgeon General's Office, U. S. Army, for making this study possible.
