RODS AND REELS REPAIRED

COPY OF THE AWARD
AT
World's Columbian Exposition

...
UNITED STATES

Department D—Fish and Fisheries

...
AWARD

For a good representation of fishing tackle, comprising rods, reels, lines, hooks, snells, flies, fly-books, floats, etc., of good quality, and displayed in a neat and attractive manner.

The special features of this exhibit are Bethabara-wood rods, double enamel split bamboo rods, paraffined silk and linen lines, patent fly-books, twisted leaders and snells.

The Bethabara rods show great strength, pliability and resiliency, with good balance and action.

The double enamel split bamboo rods, being made entirely of the outer coating or silicious rind of bamboo, by replacing the pith or centre of the strips with the outside enamel, are the strongest that can be made with this material, being in reality double rods, constructed both inside and outside with the enamel coating of bamboo.

The paraffined silk and linen lines are well finished and smooth, and fulfil every requirement in a water-proof line.

The patent fly-books are well made of good material, and the metal clips are of a good practical pattern for securely holding the snells and flies.

The twisted leaders and snells are cable-laid, and will not untwist by use.

The artificial flies are neat, strong and well made.

The entire exhibit is excellent and very creditable, showing commendable progress.

(Signed) J. A. HENSHALL,

Individual Judge.

Approved: L. Z. JONCAS,

President Departmental Committee.

GENUINE

Bethabara Wood Rods

AND

What People Say Who Have Used Them

Bethabara Wood Rods have now been in the market about fourteen years and have given great satisfaction, as is abundantly proved by the many unsolicited testimonials we are constantly receiving from persons using them.

We carry in stock a large variety, and will make special rods to order. They are stronger than Split Bamboo, will not take a set or curve like other wood, and are as tough and elastic.

They are all HAND-MADE, carefully adjusted and fully warranted in every respect.

Owing to the great reputation our Bethabara Rods have made for themselves, a few rod dealers have placed in the market a dark colored green heart wood and call the rods made from it Bethabara wood. Hereafter *all genuine* Bethabara Rods will have the following

on each rod.

TESTIMONIALS

It gives me great pleasure to testify to the many good qualities of your Bethabara wood rods. I bought one of you two years since, and have taken over 300 black bass with it, and on February 19th last, I took a carp of 8 pounds 1 ounce on it without a reel. The rod weighs only 9 ounces, and to-day it is as straight as an arrow, and shows no signs of the hard work I put it to. I cheerfully recommend Bethabara wood rods to any one wanting the best rod made.

JACOB ECSTEIN, Palmyra, N. J.

TRENTON.

The longer I use my No. 805 Bethabara rod made by you the better I like it. On the Susquehanna this Fall, at Conowingo, I killed an 8-pound striped bass with it in very swift water. I thought to myself as the fight waxed hot, "Well, my little fellow this will curve your back", but after the fish was boated the rod straightened up again as if proud of its performance.

DR. THOS. S. STEVENS.

GERMANTOWN, PA.

GENTLEMEN: It gives me great pleasure to write you about a Bethabara wood rod I bought from you some years ago, and I can truly say it was more satisfactory than any rod I ever owned, and I have fly-fished for nearly fifteen years with nearly every kind of rod. One of the hardest tests I gave my rod was in the celebrated Raquette River, Adirondacks, N. Y. Here I caught five large strings of black bass "in the rapids," weighing as high as two pounds or over, and nearly every large fish I caught I thought would be the last of my rod, but I finally came to the conclusion that it could not be broken, properly handled. I might also say that as a trout rod, I caught many a fine string. Yours truly,

FRANK BIRD GUMMEY, M.D.

PHILADELPHIA.

DEAR SIR: It gives me great pleasure to testify to the general excellence of your Bethabara rods. I have used one of your bait rods for a number of years, and it has given me perfect satisfaction. I have every confidence in it, and believe it will stand any legitimate use to which it may be put.

Very truly yours, THOS. T. BALTZ.

CANADENSIS, PA.

GENTLEMEN: The 4-ounce Bethabara has proved very satisfactory, and I anticipate a great deal of enjoyment out of it. It is so strong that I mean to test it on bass in a near-by lake, where I have already caught a 3-pound fish on another rod.

E. W. GREENOUGH.

A friend who has seen the rods you made for me, is greatly pleased with them. Of the Bethabara he said: "A better rod was never made," in which sentiment I heartily agree.

FRED D. ROBBINS, Boston, Mass.

BETHABARA WOOD RODS

The Henshall Minnow Casting Rod.

Of Bethabara wood, for black bass fishing. All put up on covered grooved wood forms ; each one in a cloth bag, and all closely silk-wrapped in two colors.

No.	Length, 8½ feet ; weight, 10 ounces. Made without tenons or dowels.

802.	Same as No. 800, but banded and milled mountings, nickel-plated, “	9.00
805.	Same as No. 802, but fine German silver mountings.....	“ 12.00
805c.	Same as No. 805, but with ivory celluloid reel seat, one agate-lined tip end on the long tip, and one 3-ring G. S. tip end on the short tip ; one agate-lined guide on the butt, and G. S. trumpet guides on the second joint and tips.....	Each, 15.00

If with one agate tip add \$1.50 to above prices.

Bethabara Bait, Trolling and Sea Rods.

All closely silk-wrapped in two colors and each rod in a bag.

No.		
340.	Three joint, celluloid butt and extra tip, overcap nickel-plated ferrules, closely silk-wrapped anti-friction guides, covered dowels, capped butts metal reel plate above hand, length 10½ ft., weight 18 oz....	Each, \$7.50
350.	Three joint, same as No. 340, but extra banded and milled, overcap brass ferrules	Each, 9.00
355.	Three joint, same as No. 350, but nickel-plated mountings....	" 9.00
360.	Same as No. 350, but fine German silver mounted	" 12.00

If with one agate tip end add \$1.50 to above prices.

Any of the above rods, 9 feet long, for sea-fishing, at same prices.

Bethabara Wood Striped Bass and Tarpon Rods.

All closely silk-wrapped in two colors and put up in a cloth bag.

370.	3 joints, 7½ feet long sea rod, nickel-plated, solid reel seats above the hand, swelled ferrules, celluloid-wrapped butt, raised anti-friction guides, metal-covered dowels, and with an extra tip of 18 inches for trolling or using a heavy sinker, weight 17 ounces	Each, \$7.50
376.	One joint, 6 to 7 feet long, German silver banded and milled mountings, swelled celluloid butt and hand grip above solid reel plate, raised anti-friction guides, agate tip end, weight 20 to 22 ounces. Each,	9.00
378.	Two joints, 7 feet long, German silver mounted, celluloid butt and hand grip above solid reel plate, banded and milled ferrules, raised anti-friction guides, agate tip end, weight 22 ounces	Each, 10 00
379.	Three joints, 9 feet long, same as No. 378, weight 24 ounces....	" 14.00

Bethabara Wood Fly Rods.

All on covered grooved wood forms and in cloth bags, and closely wrapped with two colors of silk.

- No.
400. Three joint, nickel-plated mountings, celluloid swelled butts, 8 to 11 feet long, with two tips, brass overcap ferrules, solid reel plate, weight 7 to 11 ounces, 9 to 11 feet long Each, \$7.50
403. Three joints, cork handle fine German silver mounted, with banded and milled ferrules, two ring standing guides, and closely silk-wrapped, 5 to 11 ounces, 8 to 11 feet long Each, 12.00
- 403c. As No. 403, but with ivory celluloid reel seats, velvet-covered forms and cork handles, 8 feet, $3\frac{1}{2}$ and 4 ounces Each, 15.00
 Nine feet, $4\frac{1}{2}$ and 5 ounces; $9\frac{1}{2}$ feet, 6 ounces; 10 feet, 7 ounces, " 12.00
420. Four-joint salmon rod, 14 to 17 feet long, with two tips, celluloid butt, German silver banded and milled water-proof ferrules, raised anti-friction guides and solid reel plate above hand Each, 20.00

405. Same as No. 403, but with a removable celluloid or cork, swelled butt of 12 inches, the ferrule of which is inserted in the butt (as cut). Each, \$13.50
520. Combination rod, German silver banded and milled mountings and anti-friction guides, two butts, one of 15 inches and one of $3\frac{1}{2}$ feet, two second joints and four tips, two of split bamboo and two of Bethabara wood. This rod we can confidently recommend. It can be used as a sea rod, as a bass bait, and also a trolling rod; and one of its combinations makes a perfect Pennsylvania trout fly rod. Put up on a cedar stock Each, 35.00

SPLIT BAMBOO RODS.

Machine-made. (Hexagonal, 6 strips).

These rods are not warranted, but are made to meet the demand for a low-priced split bamboo rod, but the bamboo of which they are made is good, clear, fresh wood.

No.

550.	Three joint, Henshall pattern, $8\frac{1}{4}$ feet long, nickel-plated mountings, solid reel plate above hand with extra tip, and cork handle, put up on a grooved wood form	Each, \$1.25
551.	Three joint, bait, $9\frac{1}{2}$ to $10\frac{1}{2}$ feet long, solid reel plate above hand, extra tip, finished same as No. 550	Each, 1.25
552.	Three joint, fly, 9 to 10 feet long, two tips, solid reel plate below hand, finished same as No. 550	1.25

Finest selected split bamboo, 6 strip swelled bamboo butt, covered with cork nickel-plated, banded and milled ferrules, closely silk-wound in two colors and on covered grooved wood form, cloth bags and two tips with each rod.

553.	Three joint, Henshall pattern bait rod, solid reel plate above the hand, $8\frac{1}{3}$ feet long, raised anti-friction guides	Each, \$5.00
554.	Three joint bait rod, solid reel plate above the hand, raised anti-friction guides, 9, $9\frac{1}{2}$ and 10 feet long	Each, 5.00
555.	Three joint fly rod, solid reel plate below the hand, rings and keepers, 9, $9\frac{1}{2}$ and 10 feet long	Each, 5.00

SPLIT BAMBOO RODS—Continued.

The following split bamboo rods are **HAND-MADE**. The bamboo is the best we can obtain, and carefully selected, and the rods very finely balanced. They have banded and milled nickel-plated ferrules, very closely silk wound, in two colors; the butt is inlaid with cedar and covered with cork; they are put up on covered wood form, and cloth bag, and have two tips to each rod, and are fully warranted against defects in material or workmanship.

No.		
560.	Three joint, Henshall pattern, $8\frac{1}{4}$ feet long, solid reel plate....	Each, \$7.50
561.	Same as No. 560; but bait rod, $9\frac{1}{2}$ to $10\frac{1}{2}$ feet long.....	" 7.50
562.	Same as No. 560, but fly rod, solid reel seat below hand, 9 to 10 feet long	Each, 7.50

Split Bamboo Trunk and Valise Rods.

Six Strip.

900x.	Four joints of 29 inches each, nickel-plated ferrules, standing wire guides, silk-wrapped, black-fluted, butts solid reel plate above the hand	Each, \$2.00
170.	As No. 900x, with reel plate below the hand.....	" 2.50
900c.	Fine quality, five joints, 25 inches long and extra tip, nickel-plated banded ferrules, closely silk-wrapped in colors, solid reel plate above the hand, cork hand grip	Each, 5.00
900.	Finest quality selected bamboo, six joints, 21 inches long and extra tip, and with style and finish as No. 900c	Each, 7.50

Select Bamboo Striped Bass and Tarpon Rods.

Six Strip.

565.	Two joints, strictly hand-made, $7\frac{1}{2}$ feet long, nickel-plated mountings, closely silk-wrapped anti-friction guides, double guides on the tip, celluloid-wrapped butts and solid reel plate	Each, \$7.50

A NEW DEPARTURE IN SPLIT BAMBOO RODS

Shipley's Double "Enamel" Rods.

Calcutta bamboo, from which all first-class split rods are made, grows in the shape of a hollow tube, with knots varying from eighteen inches to two feet apart. The wood which forms this tube is from one-eighth to three-eighths of an inch thick, and is composed of an outer shell of enamel or flint, and an inner portion of soft pithy wood, the latter largely predominating. In the ordinary split bamboos both the pith and enamel are used. (See cut.)

In making our double enamel rods, we split off all the pith or soft part and cement two pieces of the enamel together, breaking joints—i. e., not allowing one knot, which is the weak portion of split bamboo to come directly over the other.

By this method we can make joints **SOLID**, in place of a hollow tube, as *all* split bamboo rods are in the butt joint, and frequently in the second and tip.

Rods made in this manner are the *strongest* and best that can be produced of bamboo. They are all finished in the finest possible style. Finest German silver, banded and milled ferrules, solid reel plates, very closely silk-wrapped in two and three colors. The cork handle grips are made of solid cork, not a thin sheet glued around the handle. Each rod is carefully hand-made and fully warranted, and finely balanced. All have two tips and are put up on a velvet-covered grooved wood form.

Fine Hexagon "Double" Enamel Split Bamboo Bait, Fly and Salmon Rods.

- No.
598. Three joint, Henshall pattern, $8\frac{1}{2}$ feet long, celluloid or cork butt, German silver, solid reel plate above hand, banded and milled ferrules, raised anti-friction guides . . Each, \$15.00
599. Three joint, bait 9 to $10\frac{1}{2}$ feet long, German silver, solid reel plate above hand, celluloid or cork butt, banded and milled ferrules, raised anti-friction guides Each, 15.00

5900.	One joint, 6 to 7 feet long, celluloid swelled butt, nickel-plated mountings	Each, 5.00

What a few people who have bought Bethabara Wood of us have to say about it.

SEYMOUR, CONN.

I bought Bethabara wood from you twelve years ago, and made a rod which has always been ready for business, and always done its share of the work in landing the fish. I now wish to make another light one, also a heavy one, for I intend this winter to have a try at tarpon.

Respectfully yours,

R. A. HAMILTON.

EVANSTON, ILL.

The Bethabara wood ordered from you on the 10th instant, received, and proves to be all that can be desired. Some time ago I tried several other dealers with deplorable results. In very few cases was the wood worth the freight I paid for getting it here. I have come to the conclusion that you are the one and only firm in the country that carries a first-class article in Bethabara wood. I shall use yours only in the future.

Truly yours, JNO. R. SCHNEIDER.

PLAINFIELD, N. J.

GENTLEMEN: Will you kindly send me two pieces of Bethabara wood. I think it can't be beat. Both my butt pieces are Lance wood, and I am going to make the rods all Bethabara wood.

Yours respectfully,

E. J. VAN NAME.

INDEPENDENCE, MO.

GENTLEMEN : Some time since I bought Bethabara wood enough to make a rod, which I have used two seasons. Its weight is $6\frac{1}{2}$ ounces, and I can land an 8-pound fish with it. Now I want the very best Bethabara you have—straight grained and tough.

Yours,
JOHN A. FANN.

EVANSTON, ILL.

I have been getting my wood from Utica, N. Y., but find it very unsatisfactory; in fact some of it turned out to be green-heart.

Respectfully yours,
JOHN R. SCHNEIDER.

From the Bethabara wood sent to me I made an 8-ounce fly rod. Well, to say I was pleased would be "drawing it mild". I found I could cast off further, more accurately and easier than with any other rod I ever used, not excepting the old reliable split bamboo.

ASA P. STEWART, Grand Rapids, Mich.

NEW YORK.

GENTLEMEN : Enclosed find measurements for a tip which you will kindly turn out for me of Bethabara. If you remember it was about a year ago that you made a heavy butt joint and tip, and a light first joint for me, and I have never been better pleased in my life.

Yours truly,

D. D. SCHMIDT.

ASBURY PARK, N. J.

I take great pleasure in expressing my opinion of Bethabara. I have now three rods made from wood purchased from you, and in each case they have given me the highest satisfaction. One rod that I have had made for river-fishing, I have used frequently for sea-fishing, casting from the beach, using as heavy as six ounces of lead. Every angler knows that the strain on a light rod, occasioned by this method of fishing is enormous, yet my Bethabara, is as straight as when first built. In point of resiliency, I consider this is to woods what steel is to metals, "The King". Enclosed find order for wood for two more rods.

Respectfully,

LEONARD HULIT,

Vice-President Fish Protective Assn., Monmouth Co., N. J.

PALMYRA N. J.

GENTLEMEN : Kindly make me a Bethabara tip to fit enclosed ferrule. My old tip just "busted", but I guess I can stand it, as I built this rod in '84, and it has seen severe service every season since; often on perch grounds with heavy sinker, and is to-day as straight as when made.

Yours truly,

EDW. D. STEWART.

Square Wood for Fish Rod Makers.

Selected Best.

(Genuine) Bethabara Wood.

To those persons who know this wood nothing need be said of it. To those who do not we can only say we are the *only* importers of it in the country, and for rod purposes it is far superior to any material we know of, being *stronger*, more *elastic*, and will not take a *set* or curve like other woods, and for fly rods especially, has a *mellowness* of action *truly unattainable* in any other material now used for fine rods, as our many unsolicited testimonials attest. All genuine wood will have trade mark on each piece. (See page 5).

Sole Leather Rod Rests.

These rests are almost a necessity for striped bass, salmon or tarpon-fishing to those who do not wish to tire themselves out with one day's sport.

Price, \$2.00 Each.

Shipley's Hand Support

FOR FLY AND BAIT RODS.

Will give perfect command over the rod; can cast further and strike more quickly; it relieves the strain on the wrist and arm, and in fly-fishing prevents the hand sliding down on to the reel. They are very light, being made of German silver and hard rubber. All have an adjustable screw clamp, which allows it to be put on or taken off in a minute. They are made in three sizes, to fit either $\frac{3}{4}$ -inch, $\frac{7}{8}$ -inch or 1-inch reel plates.

Price, 50 Cents; or by Mail, 55 Cents.

Hall's Rod Holder.

Made of Tinned Malleable Iron, and can be packed in a space $4\frac{1}{2}$ x 4 x 2 inches, and weighs 15 ounces.

No. 5.— $\frac{1}{8}$ -inch Fine Mesh. Linen Net, 30 inches square ; put up in a muslin case, 32 inches long by 2 $\frac{1}{2}$ inches diameter.

Price Each, \$1.25

OMAHA, NEB.

GENTLEMEN: Last year I purchased from you one of your folding minnow nets. I tied a weight to the middle of the net, and the first haul I made landed me at least 200 minnows, and from that time on my net was a daisy.

Yours truly, JOHN D. PEABODY, M.D.

--------------------	--------------------

“Artificial Flies and How to Make Them.”

BY M. A. SHIPLEY.

This book, containing 33 pages and bound in cloth, gives practical, clear and concise directions, illustrated with wood cuts, in the beautiful art of fly-making, and the directions in it are so plain and simple that any one may easily learn to tie his own flies. Will be sent post-paid to any address for \$1.00.

This is one of the most practical works on the subject of fly-making that has ever been issued in either the United States of America or Europe. Each process, from that of tying the hackles on a "spider" or palmer fly to the elaborate and artistic work on wing flies is plainly illustrated, so that the merest tyro can become an expert.—*American Angler.*

	Brass watch spring swivels							"	.50

Shipley's Patent Fly Books.

Patented September 22, 1885.

We desire to call your attention to our improved *Spring Clasp* in these books, as by its use the *gut* is kept *straight* and at *full length*, and each fly in its place, *regardless* of the *length* of the *gut*, and its use *does not increase the bulk* of the book nor add to its weight. Flies can be placed in position and be removed far more readily than in the old style.

This improvement has been used by many of our best Fly fishermen, who pronounce it the most perfect fly book in the market.

Price List and Description.

No.		
405.	7½ x 3½ inches, leatherette cover, with 4 parchment paper leaves and wool drying leaves, to hold 3 dozen flies	Each, \$0.50
005.	6½ x 4 inches, sheep skin cover, with 2 leather pockets, 4 parchment paper leaves and 2 wool drying leaves, to hold 3 dozen flies	Each, 1.00
14.	7 x 3½ inches, fine grain leather, imitation of Russia, 4 water-proof ivory celluloid leaves, with stitched leather bound edges, 2 leather pockets in cover and 2 celluloid pockets; will hold 3 doz. flies	Each, 1.50
15.	Has 3 polished ivory celluloid flexible water-proof leaves, 7 x 3½ inches, with leather bound edges, fine hog skin cover and nickel spring clasp, 2 pockets and leather lined felt leaves between each fly leaf; will hold 42 flies	Each, 2.25
16.	4 leaves and extra flannel dry leaf, American seal skin, and 2 pockets, to hold 56 flies	Each, 3.75
17.	Same as No. 16, but 8 leaves, to hold 112 flies	Each, 6.00

Old Style Fly Books, With Clip, But Without Patent Clasp.

- No.
10. Imitation seal cover, parchment paper leaves and pocket, 6x3½ inches, to hold 36 flies Each, \$0.35

Patent Spring Clasp Tackle Books.

50. Has 3 patent ivory celluloid flexible water-proof leaves, with bound edges, 9x4 inches, to hold hooks on gut, keeping each hook separate and gut straight, imitation alligator cover; will hold 42 hooks Each, 3.50
55. Same as No. 50, but 5 leaves, cover of American seal skin, with 2 pockets; will hold 70 hooks Each, 5.00

Leather Tackle Books.

15. Leather and canvas, 6x3¼ inches, with four double pockets Each, 0.75
20. Fine red grain leather, 7x3½ inches, with strap; has six double pockets Each, 1.50
25. Same as No. 20, but 8x3¾ inches, with 9 double pockets, " 2.00

Tin Tackle Boxes.

Handsomely Japanned and striped and made of extra heavy tin.

- No.
1. With hasp and staple, 11 inches long, 8 inches wide, 4 inches deep Each, \$1.50
2. With fine tumbler lock and key, 11 inches long, 8 inches wide, 4 inches deep Each, 2.25

A Perfect Tackle Bag.

Cut represents No. 94.

No.

93. This bag is the shape of cut, and is made of good brown grain leather, with a pocket on inside; has a Japanned frame colored to imitate leather; the lock and trimmings are nickel-plated. Size, outside, 13 inches long, $7\frac{1}{2}$ inches wide, 9 inches high, and fitted with two dove-tailed cedar partitioned trays like cut Each, \$4.50
94. Is of fine selected brown grain leather, hand-sewed, English frame. The inside lock, clasp and spring catches are fine polished and lacquered brass. Heavy hogskin leather lining and pocket on each inside end. Size, outside, 13 inches long, $7\frac{1}{2}$ inches wide and 9 inches high . . . Each, 7.50
- In either of these the partition trays can be removed and the bag used as a hand satchel.
3. With fine tumbler lock and key and covered partition tray (no partitions in bottom of case), 13 inches long, 9 inches wide, $5\frac{3}{8}$ inches deep Each, 2.50
10. Tin pocket tackle case, 8 inches long, $4\frac{1}{2}$ inches wide, 2 inches deep, made to hinge in the middle, with tin partition between, one side arranged for gut snood at full length, the reverse side partitioned for small tackle, etc Each, 1.00
15. Round cover tin pocket fly and tackle box, $6\frac{3}{4}$ inches long, $3\frac{1}{2}$ inches wide, $\frac{7}{8}$ inches deep, hinged in the middle—by placing strips of cork across the inside makes the best arrangement for carrying eyed flies. Can also be used for hooks on gut Each, 0.75

Sole Leather Tackle Case.

No.

- 2 Has handle on top, contains one large tray, space for two reels, etc., and has a hinged partition in the top for fly or tackle book, lined with green linen. Size of case, outside, $10\frac{1}{2}$ inches long, 9 inches wide, $6\frac{1}{2}$ inches high, and has nickel-plated spring, lock and key Each, \$5.00

Wood Tackle Case.

Made of polished hard wood and all dove-tailed corners.

12. Same style and arrangement as the No. 2 leather tackle case, with nickel-plated spring, lock, key and hinges, with partitioned tray. Size of case, outside, $10\frac{1}{2}$ inches long, 9 inches wide, $5\frac{1}{2}$ inches high Each, 2.25

Something New! Shipley's Fish Hook Holder.

Made of metal, handsomely Japanned and striped, $9\frac{1}{2}$ inches long by 4 inches wide, with cork inserted and cut to hold **three dozen** hooks at full length.

A single hook can be inserted or removed in a moment.

It will hold any size hook, either on single or double gut.

Free by mail for 60 cents.

Shipley's Extra Quality Imperial Gut Leaders.
