The copy filmed here has been reproduced thanks to the generosity of:

Library
Agriculture Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Ontario Department of Agriculture

FRUIT BRANCH

Bee-Keeping in Ontario.

ARRANGED BY MORLEY PETTIT, PROVINCIAL APIARIST.

DETAILED REPORT ON THE HONEY PROSPECTS IN THE VARIOUS COUNTIES.

For the purpose of reporting on the condition of bees in Ontario, and the Honey Crop prospects for 1911, blanks were sent to five thousand beekeepers last month by the Fruit Branch of the Department of Agriculture. Six hundred replies were received, from which this report has been summarized.

The total number of colonies reported for the Fall of 1910 was 23,730. For May, 1911, it is 20,414. This represents a winter loss of fourteen per cent., which is five per cent. more than that reported a year ago. This also means that the remaining colonies are weaker in proportion, and are less fit for the work of gathering honey which the clover fields, weather permitting, will provide. On the other hand, the condition of clover is reported almost uniformly good. A few counties report "poor" and "below the average," and some "extra good."

While a spring report is of value in determining the present prospect of the honey crop, there is no other farm crop so entirely dependent on weather conditions from day to day during harvest time. Any sudden change from hot to cold will often check the secretion of nectar in the flowers and reduce the expected honey crop by hundreds of thousands of pounds.

The following is the detailed report arranged by counties:
