No. 80

NATIONAL AGRICULTURAL LIBRARY
United States Department of Agriculture
Washington, D. C.

PREFACE

The National Agricultural Library has been collecting oriental publications for nearly a century. This list has been prepared to supply bibliographic access to the Library's collection of current and non-current Chinese, Japanese and Korean serials in the zoological sciences.

Not included in this bibliography are articles on zoology, entomology and related subjects published in general scientific serials. The following bibliographies may be helpful for these serial titles:

1. Communist Chinese Periodicals in the Agricultural Sciences
(Library List No. 70, revised), May 1963;
2. Japanese Serial Publications in the National Agricultural Library
(Library List No. 72), June 1962; and
3. Korean Publications in the National Agricultural Library
(Library List No. 79), June 1963.

Titles in the present bibliography are grouped by subject. Within each group the items are arranged in alphabetical order of the titles in romanization. The following information is given for each of the publications:

1. Title in English romanization according to the Wade-Giles system for Chinese, the Hepburn system for Japanese, and the McCune-Reischauer system for Korean.
2. Title in Chinese, Japanese or Korean.
3. Title in English translation. Translations originally supplied by the editors of the publications are indicated with quotation marks.
4. Frequency of publication where known.
5. Publisher in English translation.
6. Call number at the National Agricultural Library, except for the publications which are in the process of being cataloged.
7. In some cases, a brief annotation on the general nature and contents of the publication; changes, if any, of title and frequency; availability of English table of contents and resumes; and other pertinent information.
8. Holdings at the National Agricultural Library.

An alphabetic list of publications and a list of publishers are included.
