STRAWBERRY PLANTS.

All the varieties offered are perfect-flowering (bisexual) except where marked P. The latter are pistillate and require a row of a perfect-flowering sort planted every 8 or 10 feet to pollinize their blossom.

These, if planted in July and August, produce a large crop the next summer. Being grown in pots they may be shipped to a distance and planted with almost no interruption to their growth. The plants may be set in beds of three rows one foot apart and one foot distant in the rows, with a space of two and one-half feet between the outside rows of adjoining beds left for a pathway. They may also be planted in single rows three feet apart and one foot apart in the rows.

POT-GROWN PLANTS. From 2½ in. pots, well rooted; delivery in July and August. Per 100, \$3.50; 250, \$8.00; 500, \$15.00; 1000, \$30.00; for all varieties, except where otherwise priced.

FIRST EARLY.

Alpha. A new very early variety, producing strong, vigorous plants which are very productive. The fruit is of large size, attractive color and fine quality. \$1.25 per dozen; \$9.00 per 100.

Excelsior. This is decidedly the best early Strawberry and the earliest good strawberry. The fruit is of round conical form, glossy, dark-red color, and of mildly acid flavor.

Success. Large, round, bright scarlet, flavor always fine.

St. Louis. A very productive, early variety, with large berries, similar to Excelsior. The plant is of vigorous growth and a good sort for the home garden.

Suburban. This berry is exceedingly productive, thriving well on light land, and is considered one of the best new sorts. Fruit large, conical, firm and of good flavor. \$4.00 per 100; \$38.00 per 1000.

Texas. An extra early variety producing immense crops of large, glossy, crimson berries, which are rich and juicy. The plants appear to thrive in all soils.

SECOND EARLY.

Climax. This is an extremely popular new variety, immensely productive, the berries being slightly over medium size. Plant vigorous, healthy grower, of a peculiar shade of green that can be distinguished from other varieties.

Glen Mary. Large, conical, bright red berries; firm and of fine flavor.

Sample. P. Excellent for either market or home use; prolific, large, firm, and delicious.

Senator Dunlap. Mr. Crawford, at the time of its introduction by him, said that he doubted if he had ever sent out a berry better than Senator Dunlap. It will keep in fair condition for several days on the vines after being ripe enough to pick. The fruit is large, rich and dark red clear to the centre, with a very rich flavor.

MEDIUM.

Abington. A strong growing native variety of recent introduction. The fruit is of large size, bright red in color, very solid and of excellent flavor.

Barrymore. This new strawberry was awarded a Silver Medal by the Mass. Hort. Society in 1908, for its excellence. The plants are of strong growth and very productive. The conical shaped berries are of medium size and of a dark, glossy, crimson color; the flesh is a rich red and very juicy. Per 100, \$4.00.

Bubach. P. A well-known popular variety, with large berries of a rich, bright red color.

Nick Ohmer. Dark glossy red globular berries of superior flavor; fine for forcing.

A Pot-grown Strawberry Plant.

Texas.

Excelsior.

Alpha.

Climax.

NON-WARRANTY. R. & J. Farquhar & Company do not give as to description, quality, productiveness or any other matter, any warranty, express or implied, of any seeds, bulbs, plants, insecticides, fungicides, or fertilizers, which they send out. If the purchaser does not accept the goods on these terms, they are at once to be returned.

STRAWBERRIES.—*Continued.*

MEDIUM.

Brandywine. A large heart-shaped berry, perfect in form, bright red in color, firm flesh, red to the centre and of rich spicy flavor. A great cropper especially on heavy soils, holds its fruit well up from the ground and generally succeeds everywhere.

Golden Gate. A strong growing variety bearing rich crimson fruit without green tips and with quality similar to the *Marshall*. It blooms early and late, making it a good variety to pollinize the pistillate sorts.

Mark Hanna. P. An exceedingly prolific variety ripening in midseason. The berries are of enormous size, attractive in color and of splendid quality.

Marshall. The fruit of this remarkable sort is of enormous size, of handsome, glossy, dark crimson color, and of delicious flavor. It is one of the best midseason berries, either for private use or market. It is a vigorous grower and requires good soil and high cultivation. As it does not thrive in all soils, it should not be planted extensively until its adaptability is ascertained.

New York. One of the best sorts for private or market gardens. The berries are large, of conical form; dark red color, firm texture and of remarkably sweet flavor. In the market they sell at sight.

Pride of Cumberland. The plant is a vigorous grower and free from rust, and ripening about one week earlier than *Gandy*; it is nearly as large, equally firm, as good a color, thriving in either high or low land, but owing to the immense crops it sets, the ground should be well fertilized to ensure best results.

LATE TO VERY LATE.

Belmont. This old favorite is still considered by many to be the finest late berry. The fruit is of handsome appearance and keeps well.

Chesapeake. The plants of the Chesapeake are large and vigorous with rich dark green foliage. The fruit is of large size, deep red in color and of a rich aromatic flavor.

Commonwealth. This is the latest of all Strawberries; bearing large conical, deep crimson fruit, sweet and of quality equal to the well-known *Bubach*. Not only an extra large berry, but also very productive, of deep rich color and solid. It is smooth and quite juicy.

Gandy. This popular old variety is probably known by most berry growers. It is more largely grown than any other late variety. On sandy soils it is unproductive.

Minute Man. P. A very productive sort, of fine quality.

New Home. As late and large as *Gandy*, fruit a bright red color that does not lose its lustre and turn dark for a long time after being picked. It is a vigorous grower, and, unlike *Gandy*, will produce a large crop on either high or low land.

William Belt. An exceptionally fine berry. In quality it heads the list. The berries are as large, with some specimens larger than the *Bubach*. Its color is a bright, glossy, deep red: season as late as *Gandy*.

Stevens' Late Champion. A new variety of the *Gandy* type, yielding large crops of beautiful berries very late in the season.

ALPINE VARIETY.

Large Red Alpine. No one who has eaten the delicious little strawberries of the Alps will ever forget their delicious aromatic flavor. We are now able to offer this large fruited variety of the Alpine strawberry. Per doz., \$1.00.

NEW EVERBEARING STRAWBERRY.

Superb. A variety of recent introduction, producing large glossy, dark red berries of good quality. The plant is of compact growth and makes runners freely. When late fruit is desired it is better to pinch off the first flowers, and also keep the runners cut, which will give vigor to the later crop. 20c. each; \$2.00 per doz.; \$14.00 per 100. Ready August 1st.

ENGLISH VARIETIES. Per dozen, \$1.25. Ready August 1st.

British Queen. A popular English variety producing large, conical, pale red berries.

President. The fruit is crimson in color and of superior flavor; good for forcing

Standard. Very early, small, dark-red berries of fine flavor; forces well.

Duke of Edinburgh. Late. Fruit irregular, but otherwise similar to *British Queen*.

Brandywine.

William Belt.

Senator Dunlap.

Gandy.

New York.

FARQUHAR'S NEW AND RARE CHINESE PLANTS.

Mostly Raised from Seeds Collected in China for the Arnold Arboretum.

GOLD MEDAL AWARDED BY THE MASSACHUSETTS
HORTICULTURAL SOCIETY.

Clematis Armandi,

SYRINGA WILSONII. A large branching bush, growing 6 to 20 feet tall, with rather thin, more or less elliptic and pointed leaves. Flowers very numerous, borne in large, terminal, erect, much-branched panicles, 10-12 inches in length. The flowers open in late June and early July, the colors varying from pure white to most pleasing rosy-lilac shades of pink. A native of the China-Thibetan borderland between 9,000 and 10,000 feet altitude, it has passed unscathed through the last three winters around Boston. This new Lilac is perhaps the finest of all the species and is a most valuable acquisition. Each, \$1.50; dozen, \$15.00.

THE plant treasures of Northwestern China will add immensely to the material of, and interest in, the hardy garden during the next decade or two. Hitherto the region has been unexplored and the recent expeditions of Mr. E. H. Wilson, the famous plant collector, in the interest of the Arnold Arboretum, of Harvard University, have resulted in the introduction of hundreds of most desirable plants. These will be offered to the public as fast as stocks in sufficient quantities can be produced. Of the following list, many are placed before the public for the first time.

CLEMATIS ARMANDI. A new, hardy species from the mountains of Western China of strong rampant growth and covered with a wealth of glossy, deep green, luxuriant foliage, which is evergreen. During the past three winters, it has stood in our nurseries with only a slight covering to keep off the sun. The individual flowers, of which there are often from a dozen to thirty in a cluster, are about two inches across, white, often rosy pink on the back and fragrant. It begins to flower in May. This species is a rapid grower, and should prove very valuable for covering pergolas and trellises. Each, \$2.50; dozen, \$25.00.

AMPELOPSIS HENRYANA. *Vitis Henryana.* In habit, this new climber resembles our native woodbine. The ground color of the leaves is dark velvety green, with the mid-rib and principal veins silvery white. The foliage has a very striking appearance in autumn when the ground color changes to vivid red, the mid-rib and vein remaining white. In Massachusetts, this vine requires protection during winter, but would probably prove quite hardy south of New York, or even farther north where the influence of the ocean moderates the temperature. Award of Merit by the Royal Horticultural Society of London. Plants from 24-inch pots, each, 50cts.; dozen, \$5.00. Plants from 3½-inch pots, each, 75 cts.; dozen, \$8.00.

AMPELOPSIS THOMSONII. *Vitis Thomsonii.* This charming new climber is one of the most beautiful of the Woodbine family. It requires protection during winter. The leaves are greenish purple above, and bright claret color beneath; changing in the autumn to rich red. Award of Merit by the Royal Horticultural Society of London. Plants from 24-inch pots, each, 50 cts.; dozen, \$5.00; plants from 3½-inch pots, each, 75 cts.; dozen, \$8.00.

BERBERIS BREVIPANICULATA. A bush 4 to 6 feet tall with wedge-shaped small leaves clustered together and assuming fine tints in autumn. The small yellow flowers are freely produced on erect panicles 3 to 5 inches long. These are followed by masses of salmon-red fruits in early autumn. The foliage is retained very late. Its several fine qualities make this new Barberry one of the handsomest and most distinct of its class. Now offered for the first time. Each, \$1.00; dozen, \$10.00.

EUCOMMIA ULMOIDES. *Tu Chung.* **New Rubber Tree.** This Tree grows in Western China to a height of 50 feet, somewhat resembling a Magnolia, and is of unusual interest as a park and garden tree because its leaves and the bark which is used by the Chinese as a drug are filled with a remarkable substance closely allied to rubber. This substance is shown as silky, elastic fibres on breaking the bark, leaves and fruit. The tree has proved hardy about Boston. Each, \$1.00.

VIBURNUM FETIDUM VAR. RECTANGULUM. A shrub 4-6 feet tall, with spreading habit and semi-persistent, shining-green leaves, flowers white in flat corymbs, fruits bright-red. This new Viburnum is a native of the rice-valley of Western China between 3,000 and 4,000 feet elevation. Each, \$1.00.

FARQUHAR'S NEW AND RARE CHINESE PLANTS.—Continued.

Clematis Montana Rubens.

CLEMATIS MONTANA RUBENS.

See illustration. This beautiful hardy, new Clematis begins to bloom early in June when a profusion of soft rosy-red blooms resembling those of the Japanese Anemone are produced. As the flowers are borne on the young wood, they appear more or less freely until frost. A First Class Certificate was awarded to this plant by the Royal Horticultural Society of London,

Mr. A. E. Thatcher of the Arnold Arboretum, writing of this plant, says:—"During the last few years we have received from China, through the exploration of Mr. E. H. Wilson, many remarkable and beautiful new hardy climbers, but up to the present time none of them surpass this wonderful rosy-red variety of our old friend Clematis montana. Every one knows well the value of C. montana and the red variety is in every respect, except the color of the flowers and foliage, an exact counterpart. It is perfectly hardy, and for any position where the best hardy climbers are desired no plant is better suited. It will grow successfully in any good garden soil, fully exposed to the sun, and needs but little attention. The flowers, about 2 inches across, are produced in thousands on an established plant, which presents one of the most beautiful objects possible to obtain in our gardens. Clematis montana rubens is one of the most beautiful hardy climbers it is possible to grow and should be in every garden."

Plants from 3½-inch pots, each, 75 cts.; dozen, \$8.00.

Plants from 2½-inch pots, each, 50 cts.; dozen, \$5.00.

THALICTRUM DIPTEROCARPUM.

This elegant and graceful plant is easily the finest of all the Meadow Rue family. In a wild state it grows 5-6 feet tall but under cultivation it occasionally grows as much as 10 feet tall. The foliage is much divided and resembles closely that of the Columbine. The stems terminate in July and August in a much-branched panicle of flowers, bright rosy-lilac in color and about an inch across. The whole plant is very unlike an ordinary Meadow Rue and extremely ornamental. Good rich loam and a well drained sunny situation are the essentials for its successful culture. Each, 75 cts.; dozen, \$8.00.

SCHIZOPHRAGMA INTEGRIFOLIUM.

A sub-scandent shrub, 5 to 10 feet tall, with ovate glossy green leaves, and trusses of flowers 15 to 20 inches across. These flowers are surrounded by large, pure white bracts, making the plant extremely ornamental.

A free-flowering sun-loving shrub, this new Schizophragma is eminently suited for planting in rocky situations. Its habit at first creeping, ultimately becomes erect and bushy. Each, \$2.50; dozen, \$25.00.

LILIUM MYRIOPHYLLUM. See page 23.

DEUTZIA DISCOLOR. A fine flowering and most attractive shrub, growing 4 to 5 feet tall with large cymose clusters of pure white flowers produced in early June. It is quite hardy and one of the largest flowered Deutzias known. Each, \$2.50; dozen, \$25.00.

DEUTZIA LONGIFOLIA. An elegant and striking species, 4 to 5 feet tall, with arching branches, and cymose clusters of flowers, very freely produced. These flowers are an inch or more across and vary in color from white to rosy-lilac. This new Deutzia is one of the handsomest and most desirable of its family. Offered for the first time. Each, \$2.50; dozen, \$25.00.

COTONEASTER HORIZONTALIS. Though by no means a new plant, this rare and perfectly hardy Cotoneaster deserves to be most widely planted. It is decumbent or semi-prostrate in habit, grows 3 to 4 feet tall, forming a dense bush many yards through. The fruits are bright scarlet changing to crimson and the small leaves, which are dark green and almost round are retained late into the fall, and even up to Christmas. It is suitable for planting in rocky positions and anywhere and everywhere that dwarf-growing shrubs are required. Each, \$1.00; dozen, \$10.00.

NEPETA WILSONII. A delightful plant of easy culture, growing about 2 feet tall with stems terminating in close trusses of deep indigo-blue flowers. These flowers are produced freely in late July and August and the plant continues to bloom until late in the fall. A welcome addition to the list of blue-flowered herbaceous plants. Each, 50 cts.; dozen, \$5.00.

FARQUHAR'S NEW and RARE CHINESE PLANTS.—Continued.

Deutzia Discolor.

Sorbaria Globberata.

SPIRAEA ROSTHORNII. A shrub 4 to 6 feet tall with laxly-arching branches and large much-branched auxiliary corymbs of pure white flowers. The leaves are deeply incised and add much to the charm and elegance of the plant. It is quite new to cultivation and promises to be a most useful summer-flowering shrub. Offered for the first time. Each, \$1.50; dozen, \$16.00.

SPIRAEA HENRYI. A bush 4 to 6 feet tall with rather stiff spreading branches and corymbose masses of pure white flowers produced from the leaf-axils in June. This fine Spiraea is perfectly hardy, free-growing and most floriferous and certainly one of the finest of its family. Strong plants, each, \$2.50; dozen, \$25.00.

SORBARIA GLOBERATA. This is an extremely ornamental autumn-flowering shrub, growing 6 to 15 feet tall, with pinnately divided, dark green leaves. The flowers are snow-white, abundantly produced in terminal much-branched panicles 15 to 18 inches long, during September and continuing to flower until the advent of sharp frosts late in the fall. It is perfectly hardy, free-growing and a most valuable addition to the list of autumn-flowering shrubs. Though botanically regarded as a variety of Sorbaria Arborea for garden purposes, it is abundantly distinct from the type. Each, \$1.00; dozen, \$10.00.

Spiraea Henryi.

FARQUHAR'S NEW AND RARE CHINESE PLANTS.—*Continued.*

Clematis tanguticus.

CLEMATIS TANGUTICUS. Fine Chinese variety of free and rapid growth; foliage dense and bright green. A good climber and one of the best ground-covering plants. Flowers bright yellow. August–October. 2-inch pots, 30 cts. each; \$3.00 per dozen.

HYPERICUM PATULUM VAR. HENRYI. A new hardy St. John's Wort, growing 2½ to 4 feet with masses of clear yellow flowers produced in great profusion during July and August. The leaves are elliptic-ovate about 1½ inches long and are retained late into the fall. A very desirable yellow-flowered shrub. Offered for the first time. Each, \$2.50; dozen, \$25.00.

PHILADELPHUS INCANUS. Bush growing 6 to 10 feet tall, much branched and twiggy in habit and exceedingly floriferous. The flowers are pure white 1½ inches or more across and produced in early July. The leaves are woolly, ovate and retained well into the late fall. A very desirable and useful shrub. Strong plants. Offered for the first time. Each, \$2.50; dozen, \$25.00.

PHILADELPHUS SERICANTHUS VAR. REHDERIANUS. A fine Mock-orange growing 10 to 12 feet tall with large handsome flowers freely produced in July. It is very distinct from the type and a very valuable addition to the shrubbery. A great acquisition, never before offered. Each, \$3.00; dozen \$32.00.

PHILADELPHUS MAGDALENÆ. One of the prettiest and neatest of all the Asiatic species of Mock-orange. It forms a much-branched bush 6 to 8 feet high and flowers as freely as any of its family. It is perfectly hardy around Boston and never fails to produce a wealth of blossoms about mid-June. Each, \$2.00; dozen, \$20.00.

PHILODENDRON CAINENSE. A small hardy tree, growing 25 to 30 feet tall with rough ornamental bark and fine pinnate leaves, which assume a brighter yellow color in the autumn. In China its bark is valued as a tonic medicine. An interesting addition to the Arboretum. Each, \$2.50; dozen, \$25.00.

CLEMATIS KOREANA. In habit this resembles *C. tanguticus* but differs from that variety in having glaucous foliage and flowers of a coppery-yellow. This, as its name implies is Korean, not Chinese. 2-inch pots, 30 cts. each; \$3.00 per dozen.

HYDRANGEA PETIOLARIS. This splendid hardy climber, hitherto, has been but little known, although it was introduced from Japan a generation ago. Once established, it climbs rapidly, clinging by its little rootlets like English ivy. The foliage is bright green, quite massive, and numerous flat flower-cymes are produced which average 8 to 10 inches in diameter. The flowers are white, coming in the early summer. 3½-inch pots, 75 cts each; \$8.00 per dozen.

ILEX CARALLINA. A very pretty evergreen Holly, growing naturally, 10 to 12 feet tall and bearing almost sessile clusters of coral-red fruit. The leaves are ovate, shining green and though spiny in the juvenile stage are nearly smooth in adult specimens. It is probably quite as hardy as the European Holly. Now offered for the first time. Each, \$1.00; dozen, \$11.00.

Hypericum patulum var. Henryi.

BULBS FOR EARLY FORCING.

Early White Roman Hyacinth

EARLY ROMAN HYACINTHS.

These beautiful Hyacinths are indispensable to the florist in his autumn and winter cut-flower work, while to the amateur they are among the most easily cultivated and most satisfactory of flowering bulbs. The white variety, if planted early in September and gently forced, will bloom in November; the others require from two to three weeks longer.

White. Extra Large. 60c. per doz.; \$4.50 per 100; \$40.00 per 1000.

White. Mammoth. 80c. per doz.; \$6.00 per 100; \$55.00 per 1000.

Pink. 50c. per doz.; \$4.00 per 100; \$35.00 per 1000.

Light Blue. 50c. per doz.; \$4.00 per 100; \$35.00 per 1000.

White Italian or Parisian. These are about a fortnight later than the Early White Roman Hyacinths and the blossoms somewhat larger. 50c. per doz.; \$4.00 per 100; \$35.00 per 1000.

MINIATURE HYACINTHS.

These are most fascinating both for forcing in pans and for outdoor bedding, and are gaining in favor each year.

La Grandesse, white. **Gertrude,** pink. **Garibaldi,** red. **Grand Maitre,** light blue. **King of the Blues,** dark blue.

King of the Yellows, golden yellow. Each variety, 50c. per doz.; \$3.50 per 100; \$30.00 per 1000. If by mail, add 10 cents per dozen for postage.

ALLIUM.

Neapolitanum. Large heads of pure white flowers, very hardy. \$1.00 per 100; \$8.00 per 1000.

CALLA LILIES.

Freesia Refracta Alba Odorata

LILIES FOR FORCING.

The bulbs may be potted from August onward in a compost of equal parts turfy loam, leaf mold, rotted cow manure, and sand. It is best to start them in pots not exceeding twice their own diameter, in which they may remain until started eight inches or more. They should be transferred then to larger pots in which to bloom, exercising great care not to disturb the roots or break the soil from about them, and setting them considerably deeper in the larger pots. This method prevents the soil from becoming sour, and enables the roots forming at the base of the stem to become feeders, greatly increasing the number and size of the blossoms. *If Lilies are wanted by mail, add 5 cents each for postage.*

Lily of the Valley.

PANSIES.

Culture of Pansies.—Pansies thrive best in a cool, moist, but well drained soil, enriched with well rotted barnyard manure, or fine ground bone. Seeds sown in spring in a partially shaded situation will produce fine plants for autumn flowering. The finest blooms are to be obtained, however, by sowing in July or August, giving the plants protection during winter, when they will bloom profusely in the spring and summer.

FARQUHAR'S HARDY PERENNIAL FLOWER SEEDS.

Mailed free at catalogue prices to any address in the United States. In ordering it is unnecessary to write the names—the numbers are sufficient. The minimum charge for seeds by weight is 10 cents. Fractions of an ounce where not quoted will be charged at a slight advance over the ounce rates.

Hardy perennials are easily raised from seeds; they may be sown during the early summer. The simplest method is to sow them in a frame, protecting the seedlings as they appear above ground from the sun. The soil should be kept evenly moist but not saturated. Transplant the seedlings once or twice if necessary to prevent crowding.

LAWN MOWERS.

COLDWELL GASOLINE MOTOR LAWN MOWER.

For use on large lawns, such as are found on golf grounds, parks and large estates, we recommend motor lawn mowers. Besides being great savers of time and expense the beneficial and beautifying results to the lawn obtained by the constant rolling of the heavy rollers is in itself sufficient to warrant their use.

Style D. Weight 2,000 pounds. Equipped with 2-cylinder, 4-cycle, latest improved automobile motor, consumes three-quarters of a gallon of gasoline per hour, cuts 40-inch swath; guaranteed to negotiate 25 per cent grades; cutting part can be lifted free from the ground by means of a single lever. Price, \$1,300.00, f.o.b., Newburg, N.Y.

We have supplied these motor mowers to the Park Department of the City of Boston and to a number of private estates in various parts of the country. They have given satisfaction and their use is becoming more general each year. Wherever there are a number of acres of lawn to be mowed each week, great economy and despatch may be effected by the use of a motor mower.

NEW EXCELSIOR HORSE LAWN MOWER.

No Risk. Every mower fully warranted to give satisfaction.

These mowers are used exclusively by the government and on the largest public parks and lawns in the country.

Cobb Park and Farm Sprayer.

Cobb Park and Farm Sprayer. This machine consists of a 100-gallon, 20-gauge galvanized iron tank, with non-corrosive dressing, supplied with a Cobb mechanical ratchet rotary agitator, connected to a two-cylinder Gould double-acting force pump. This pump is powerful enough to supply four leads of hose, of which three are connected to two openings on the pump, with a brass "Y" connection. An extra long lever and large air chamber gives a very high pressure, which will hold for some time after the pumping ceases. The pump generates a pressure of 100 pounds to the square inch. Price, \$100.00.

Empire Queen Pump, Style "B." This pump is complete with rotary agitator, 10 feet of best 3-ply hose, Niagara spray nozzle and couplings, nicely mounted on 50-gallon barrel. The whole apparatus ready for use. Price, \$15.00; additional hose, .15 per foot; 5-foot extension pipe, bamboo, brass lined, \$1.00 extra.

Empire Queen Truck and Barrel Sprayer. This machine consists of our Empire Queen Pump mounted on a barrel having a capacity of 32 gallons, together with the cart. The cart has strong iron wheels, 34 inches in diameter, with tires 3 inches wide. It is a very convenient machine for use in small orchards or gardens where it is impracticable to drive a horse. Price, \$23.50.

Paragon Sprayer No. 3. This machine is mounted on a strong, metal truck and can easily be wheeled to any desired place. The tank is made of galvanized iron and holds 12 gallons. All liquid passes through the automatic, self-cleaning strainer before entering the pump, and cannot clog the nozzle when spraying. Each pump is equipped with 10 feet of rubber hose, extension pipe 7½ feet and 2 spraying nozzles. Price complete, \$15.00.

Paragon Sprayer No. 1. The mechanical construction is the same as in No. 3, and is equipped with a 12-gallon tank, 5 feet of rubber hose, 5 ft. extension pipe and 2 spraying nozzles. Price, \$10.00.

Nutmeg Sprayer. A desirable sprayer for the suburban garden, being available for a great variety of uses. The outfit consists of a 12-gallon copper tank and pump, 5 feet of hose, extension rod, and 2 nozzles, also 1 sanitary tip for forcing pipes. Additional hose can be coupled on so that larger trees can be sprayed. Price complete, \$10.00.

ENGLISH AND JAPANESE GARDEN CONSTRUCTION.

Rustic work is now regarded as an indispensable element in natural garden composition.

Each situation calls for its own particular treatment, and we, therefore, aim to adapt our work to its environment. For this reason, we rarely build two Pergolas or Summer Houses alike.

We are prepared to furnish estimates on contemplated work. In our construction we use red cedar, white cedar, black Canadian spruce and laurel.

Awarded the Gold Medal of the Mass. Horticultural Society.

Landscape Gardening.

We now make a specialty of this work, furnishing plans and estimates for the improvement and planting of private estates and public grounds. We have a large assortment (over 100 acres) of the best Hardy Nursery Stock, suitable for the Northern States, embracing trees, shrubs, vines and perennial plants. We have also competent gardeners in our permanent employ for the carrying out of such work. We invite correspondence from those contemplating improvement of their estates.
