FARQUHAR'S GIANT DARWIN TULIPS

THE colors range from the palest lilac to purplish black, including shades of rose, crimson, violet, brown, white, etc. The Darwin Tulips are the strongest race of all, their massive leaves being often four inches broad and frequently grow two to three feet in height. They bloom with the Columbines, three or four weeks after the Single Early Tulips. Clumps of them along the edge of shrubbery and in hardy plant borders are very effective. They are especially beautiful when cut for vases. The figure following the name indicates the relative time of flowering. Those marked * are the best for forcing.

FARQUHAR'S SINGLE MAY-FLOWERING OR COTTAGE GARDEN TULIPS.

If by Parcel Post add postage at zone rates; weight per 100, 7 lbs.

The May-Flowering Tulips are usually in full bloom about Memorial Day and generally last well into June. Not only do they prolong the Tulip season, but in grandeur of form and richness of their colors surpass most of the earlier classes. They are splendid subjects for natural plantations, for clumps in herbaceous perennial borders as well as for formal beds. For cutting they are even better than the early tulips—the flowers being stronger and lasting longer.

FARQUHAR'S SINGLE EARLY TULIPS.

If by Parcel Post add postage at zone rates; weight per 100, 7 lbs.

Tulips are such universal favorites that it is scarcely necessary to dwell upon their merits. In them we possess a range of colors and combination of shades which no other class affords; besides, the standard sorts are so reasonable in price that they can now be planted in quantity. For bedding, pot culture and forcing for cut flowers in Winter they are invaluable.

Mixed Single Early Tulips with Pansies.

CULTURE. The cultural directions given for hyacinths on page 9 can be applied to Tulips, except that the bulbs being smaller must not be planted quite so deep. Four to five inches to the bottom of the bulb is deep enough and a distance of 4 to 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. For pots, six to eight bulbs in a 7-inch pan is very satisfactory.

FARQUHAR'S SPECIAL RAINBOW MIXTURE. The varieties included in this mixture are grown separately, and are all popular large-flowered bedding sorts of decided merit. The colors are carefully proportioned, and include white, yellow, pink, scarlet, crimson and many beautiful shades and combinations of these colors. The sorts are selected to flower at nearly the same time and with slight variation in height. For massed beds and grouping our Rainbow Mixture is unsurpassed. The bulbs offered are of the largest size and finest quality. 70 cents per doz.; \$5.00 per 100; \$48.00 per 1,000.

SUPERFINE MIXTURE. Extra quality bulbs in many beautiful and varied sorts, flowering nearly together. 60 cents per doz.; \$4.00 per 100; \$36.00 per 1,000.

FARQUHAR'S NAMED SINGLE EARLY TULIPS.

The letters A., B., C. following the varieties indicate the relative time of flowering and the figures the average height in inches. Those marked * are the best for forcing.

DOUBLE TULIPS.

Double Tulips should be planted one sort in each bed, as grouping different varieties does not produce such a good effect. The large, double pæony-like blooms appear about two weeks after the Single Early Tulips and are remarkable for their beauty and lasting qualities. The figures following the names indicate the average height in inches. Those marked * are the best for forcing.

BOTANICAL TULIPS and SPECIES

Charming wild species, mostly native of Asia, these showy Tulips make splendid subjects for naturalizing in the Rock Garden or Herbaceous Border. In such favorable surroundings, when once established, they will increase and flower in the greatest profusion.

Clusiana. (*Lady Tulip.*) A dainty dwarf species with small brightly colored blooms. The outer petals are brilliant cherry-red, inner petals creamy-white, base violet-blue. Select a warm, sunny part of the rockery or border and plant the bulbs about seven inches deep. Height, 8 in. \$1.00 per doz.; \$7.00 per 100.

Eichleri. A rare and beautiful Tulip from Turkestan. The flowers are very large and strikingly colored fiery-crimson, and have glossy-black centers shaded orange-gold. Plant in a good sunny situation in the rockery or border and place the bulbs about six inches deep. Height, 10 inches. \$2.75 per doz.; \$22.00 per 100.

Greigii. A gorgeous species with dazzling, flaming orange-scarlet flowers, with coal-black center blotch. Plant in a good sunny situation in the rockery or border and place the bulbs about six inches deep. \$6.50 per doz.; \$50.00 per 100.

Florentina Odorata. (*Wild English Tulip.*) One of the earliest of all flowering bulbs producing exquisite, sweetly-scented flowers on long graceful stems. The blooms have a dainty drooping habit and are clear, buttercup-yellow in color. Planted in a sheltered part of the garden, this charming class will flourish for years. The delicately drooping flowers with their delicious fragrance make splendid cut-flowers. Plant about six inches deep. Height, 18 in. \$1.10 per doz.; \$8.00 per 100.

Kaufmanniana. A desirable dwarf variety with immense flowers creamy-white in color, tinged rosy-red; centre marked canary-yellow. The best situation for this Tulip is a semi-shady spot, preferably in the shelter of large rocks in the rockery, or under shrubs or trees in the border, where it should be massed for the most pleasing effect. Plant about six inches deep. Height, 6 in. \$3.50 per doz.; \$25.00 per 100.

HYACINTHS.

CULTURE OF HYACINTHS.

Hyacinths in Pots. It is important in the pot culture of the Hyacinth to have rich, light soil—if possible, a compost of one-third decayed turf, one-third old rotten cow manure, and the remainder equal parts of sharp sand and leaf-mould. This compost should be made a few weeks before being used. If the bulbs are to be potted singly, pots five inches in diameter are the proper size, and the special Hyacinth pots which are about two inches deeper than ordinary pots, are preferable. For drainage, cover the hole in the pot with a piece of broken pot, and over this place a layer of moss. Break off any offsets which appear at the base of the bulbs, and in potting place each bulb so that its top shall be half an inch below the surface of the soil and an inch below the rim of the pot. The soil should be of usual natural moisture, and should be pressed moderately firm. The filled pots may be placed in a cold frame where there is protection from frost, and well watered. An excellent plan is to place them on a bed of moist, sifted coal ashes, covering the pots to a depth of six inches with the same material. When well rooted, which will be in about six weeks, the bulbs may be brought indoors and forced. For the first two or three weeks they should be kept in a temperature not exceeding 50 degrees. Success in forcing depends much on their having strong roots before being brought to the light. The top grows rapidly, and unless the roots are started much in advance they are unable to nourish the plant, and failure results. Hyacinths for early use may be potted in September or October; late planting is not advisable, as the bulbs deteriorate; when desired for late use, it is better to pot them in October and keep them in a cold frame above freezing until it is desired to force them into bloom.

To obtain dwarf foliage and fine flower spikes, Hyacinths when being forced should have plenty of manure-water, fresh air, and should be kept very near the glass. The blooms last much longer if shaded from the sun.

Hyacinths in the Open Garden. The ground should be dug to a depth of at least fifteen inches, and enriched with plenty of well-rotted cow manure. Hyacinths may be planted from September until Winter sets in; although if the highest success is sought they should be in the ground by the end of October. Bulbs planted early develop roots in the autumn, and these, if protected from injury by freezing and thawing alternately during the Winter, enable the bulbs to produce much larger flower spikes than if the roots are not developed until Spring. Frost reaching the bulbs raises them up, thus detaching them from their roots. Protection may be afforded by covering the beds with straw or leaves to a depth of six or eight inches, which should be removed early in the Spring. Hyacinths should be set six inches below the surface of the ground and six inches apart.

FARQUHAR'S SELECTED NAMED BEDDING AND FORCING HYACINTHS.

If by Parcel Post add postage at zone rates; weight per doz., 2 lbs.

This highly decorative class of Hyacinths is of unsurpassed excellence for producing fine color effects in public parks and private grounds. Being of distinct and decided shades, of almost uniform height, and blooming at the same time, they admit of the most artistic grouping. They are also very desirable for forcing singly in pots or grouped in bulb pans.

These are well developed, sound flowering bulbs, superior in size and strength to the Mixed Hyacinth usually offered. They are specially adapted for groups in borders and informal beds, where they will give a brilliant display of very handsome flowers and on account of their low price are also extensively forced for Winter-blooming and cutting. Care is exercised to include only sorts which bloom at the same time and are of nearly uniform height.

EARLY ROMAN HYACINTHS.

These beautiful Hyacinths are indispensable to the florist in his Autumn and Winter cut-flower work; while to the amateur they are among the most easily cultivated and most satisfactory of flowering bulbs. If planted early in September and gently forced, they will bloom in November.

When grown in pots or pans they are most effective planted in groups of six or more bulbs in each.

FARQUHAR'S POLYANTHUS NARCISSI.

(Ready in November.)

If by Parcel Post, add postage at zone rates; 2 lbs. per doz., 12 lbs. per 100.

A very decorative class of bulbous plants for greenhouse and window cultivation, but not hardy out-of-doors in our climate. They produce enormous trusses of delicately fragrant flowers.

Early Large Flowering Paper White. The largest and most vigorous form of the *Paper White*; the best of all for very early forcing; pure white. They can be grown in water with pebbles in shallow bowls, and may be planted at intervals throughout the season for a succession of bloom.

Extra Large Bulbs. \$1.25 per doz.; \$10.00 per 100.

Polyanthus Narcissus, Paper White.

DOUBLE DAFFODILS OR NARCISSI.

If by Parcel Post, add postage at zone rates; 2 lbs. per doz.; 12 lbs. per 100.

Von Sion. (*Telamonious Plenus.*) The renowned "Old Double Yellow Daffodil." Flowers deep golden-yellow; large and very decorative; the most extensively grown of all Daffodils for florists' use. They are seen to great advantage when planted in clumps in permanent borders or shrubberies, where they can be left undisturbed for several years.

Double Nosed Bulbs, extra large	\$2.00	\$15.00
Single Nosed Bulbs, extra large	1.75	14.00

Incomparabilis Plenus. (*Butter and Eggs.*) Large double, yellow flowers, with orange centre; excellent for forcing, for Winter cutting and for Spring flowering in the open ground

Primrose Phoenix. Large lemon-yellow; very large, double rose-shaped blooms, excellent for cutting or pot-culture.	1.50	12.00
	1.75	12.00

CROCUSES.

The bulbs should be set two inches deep and should be planted in October or early in November to insure success. They are very effective when combined with Daffodils, and other Spring flowers. For a natural effect they can be scattered in handfuls and planted where they lie. Crocuses may also be grown indoors either in pots or bulb pans in loam or in dishes filled with wet moss in which the bulbs are set closely, half an inch below the surface.

If by Parcel Post, add postage at zone rates; weight 3 lbs. per 100.

Crocuses in the Rock Garden.

WILD CROCUSES and CROCUS-SPECIES.

These charming flowers may be divided into two classes, Spring-blooming and Autumn-blooming. They are equally valuable for rock gardens or borders.

AUTUMN-BLOOMING SPECIES.

The following varieties make a welcome addition to the few late-flowering plants available for the border or rock garden. The brightly colored blooms appear in October followed in the Spring by the foliage. It is well to plant these bulbs as soon as possible after arrival from Holland. Set bulbs about 2 inches deep.

Sativus. (*Saffron Crocus*). Showy blooms of purplish-lilac with a deep pencilling of violet ornamented by the rich orange stigmas. Will make a brilliant showing after a season or two, in which to become established. 60 cts. per doz.; \$4.00 per 100.

Speciosus. Bright violet-blue handsomely feathered; orange anthers and pure yellow throat. Decidedly attractive in the rockery or border. 75 cts. per doz.; \$5.00 per 100; \$48.00 per 1000.

Zonatus. Rosy-lilac with bright yellow center and orange zone, a color combination of unrivalled beauty. Plant bulbs in groups in a favored spot of the garden and the flowers will appear in a surprisingly short time. 60 cts. per doz.; \$4.00 per 100; \$38.00 per 1000.

SPRING-BLOOMING SPECIES.

These have flowers a trifle smaller than the Dutch varieties, but are desirable for naturalizing in Rock Gardens and Borders. If given a good sunny place they will bloom very often before the snow is gone. Plant the bulbs about two inches deep.

Susianus. (*Cloth of Gold*) Deep golden-yellow with rich brown markings on outer petals. Given a suitable sunny situation this bulb will bloom for years with little or no care. 60 cts. per doz.; \$4.00 per 100.

Thommasinianus. A charming, distinct species with a slender deep throat. The color varies from delicate mauve to deep purple in charming variety. The bulbs should be planted in a warm exposure where they will increase rapidly. 60 cts. per doz.; \$4.00 per 100.

Pan of Lily of the Valley (See page 19.)

MISCELLANEOUS BULBS.

FREESIAS.

The gracefully branched, fragrant flowers are of long duration, and being freely produced are profitable for commercial purposes, and satisfactory to amateurs. If planted early they may be had in bloom by Christmas. Plant eight or ten bulbs in a six-inch bulb pan, covering them one inch. The soil best suited is a mixture of rich loam, leaf-mold or humus and sharp sand. For a succession of blooms, bulbs may be potted from August to November. It is essential that root-growth be encouraged by placing the potted bulbs in a cool temperature for several weeks, when they may be brought to bloom in a gentle bottom heat.

ACHIMENES.

(February and March delivery.)

NEW VARIETIES.

These grand new seedlings were raised in New England by a noted hybridizer and far surpass the older varieties in size and beauty of bloom. The plants are very vigorous in growth and exceedingly free-flowering.

Magnifica. Tall, with magnificent flowers of sky blue with white throat.

Purity. Pure white; the finest white variety yet produced.

Swansoni. Mauve, mottled blue with a white throat.

Dainty Queen. Pure white with lavender eye; one of the most charming of the new hybrids.

Supreme. Mammoth flowers of light blue, white eye.

Margherita. Pure white, large-flowered.

Ambroise Verschaffelt. White veined with lilac.

Galathea Improved. Violet, large-flowered.

Each of the above varieties, \$4.00 per doz.; \$30.00 per 100.

AMARYLLIS.

Plant bulbs in pots filled with rich loam, after the flower buds appear. Water sparingly at first, increasing the amount as growth progresses.

Hippeastrum, New Hybrids. (*Vittata*.) The finest race of Amaryllis in cultivation; exceeding in the size and fine form of their flowers, as well as in the diversity of colors and markings, all former hybrids. The segments are of nearly uniform size, giving the flowers a regular trumpet form. \$1.25 each; \$12.00 per doz.

Hallii. (*Lycoris squamigera*.) Bright rosy-lilac flowers, fragrant, 3 or 4 inches across, blooms in August. The foliage appears in Spring, disappears in June, and is followed two months later by the naked flowers. Absolutely hardy and may be planted effectively in the herbaceous border or amongst shrubbery. \$1.00 each; \$10.00 per doz.

Belladonna. Magnificent pure white flowers, tipped with deep rose. 50 cts. each; \$5.00 per doz.

ANEMONES.

None of the Spring flowers surpass the Anemone in brilliancy of color and profusion of bloom. They are very lasting and are very popular for cut-flower use and for table decoration. Plant in October or November, six roots in a six-inch pot or bulb pan covering them one inch. They may be kept in a cellar or frame protected from frost until Spring when they may be placed in the greenhouse or window to bloom.

Single De Caen. (*Giant French Poppy-flowered*.) These produce an abundance of very large flowers of brilliant and varied colors. \$5 cts. per doz.; \$6.00 per 100; \$55.00 per 1,000.

LILIES.

Lilies are indispensable for planting in borders, formal gardens or amongst shrubbery.

The Regal Lily.

LILIES FOR FORCING

If by Parcel Post add postage at zone rates; weight per dozen bulbs, 10 lbs.

The bulbs may be potted from August onward in a compost of equal parts turfy loam, leaf mold, rotted cow manure and sand. It is best to start them in pots not exceeding twice their own diameter, in which they may remain until started eight inches or more. They should be transferred then to larger pots in which to bloom, exercising great care not to disturb the roots or break away the soil from about them, and setting them considerably deeper in the larger pots. This method prevents the soil from becoming sour, and enables the roots forming at the base of the stem to become feeders, greatly increasing the number and size of the blossoms.

LILIUM HARRISII. (The Bermuda Easter Lily.)

August and September delivery.

“Fairy Isle.” Choice, thoroughly ripened bulbs, from the finest stock in Bermuda.

Extra Large Bulbs. 7 to 9 in. circ., 60 cts. each; \$6.00 per doz.; \$48.00 per 100.

Mammoth Bulbs. 9 to 11 in. circ., \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

LILIUM LONGIFLORUM. (Japan Grown.)

Giganteum. (October and November delivery.) The flowers of this type are of a large size, perfect in form and of superior substance; stems marked black. 9 to 10 in. circ., \$6.00 per doz.; \$45.00 per 100.

Formosum. (September to November delivery.) An early flowering type, blooming as early as the Harrisii. 9 to 10 in. circ., \$6 50 per doz.; \$50.00 per 100.

LILIUM REGALE. (The Regal Lily.)

If by Parcel Post add postage at zone rates; weight per dozen, 7 lbs.

This grand new species is acknowledged to be the finest lily in cultivation. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the centre of the trumpet. It is delightfully fragrant, reminding one of the Jasmine and lacking the heavy oppressive odor of most lilies. In this section it blooms early in July. It is absolutely hardy and when established increases rapidly. Plant the bulbs 5 or 6 inches deep, and after the ground is frozen, cover over with leaves or other litter to prevent alternate freezing and thawing. (October and November delivery.) **Large Bulbs**, \$1.00 each; \$10.00 per doz.; \$75.00 per 100.

LILIUM CANDIDUM. (The Madonna Lily.)

If by Parcel Post add postage at zone rates; weight per doz., 10 lbs.

This beautiful lily of the purest satiny-white, borne majestically on tall straight stems, is one of the first of all to bloom, the flowers opening in June just at the time when the hardy blue Larkspur is at its best. The two may be interplanted, producing a contrast in blue and white of unrivalled beauty. Plantings in the hardy border and amongst shrubbery is equally effective. The bulbs should be set in a handful of sand, slightly tilted on their sides, to ensure perfect drainage. Set them about 5 or 6 inches deep, and protect during winter with a mulch of leaves and other coarse litter. The bulbs we offer are grown for us in France and are the large variety, producing pure white, deliciously fragrant flowers. (September and October delivery.)

Mammoth Bulbs, 40 cts. each; \$4.50 per doz.; \$35.00 per 100.

Extra Large Bulbs, 30 cts. each; \$3.25 per doz.; \$25.00 per 100.

Lilium Candidum. (Madonna Lily.)

HARDY LILIES for the GARDEN.

Special Notice. Many of the late flowering Lilies cannot be shipped from Japan until October, and to save our customers the annoyance and expense of shipments as they mature, we have decided to send all the early varieties approximately September 15-30. The late sorts, being subject to delays of steamers, etc., will be forwarded early in November, or as soon thereafter as they arrive. We advise the preparation of the Lily-beds or borders early in Autumn, covering them with four to six inches of leaves or other litter, to prevent the ground freezing until the bulbs arrive. The late sorts comprise the following: *Auratum*, *Batemanni*, *Henryi* and *Speciosum*. *Lilium Candidum* will be shipped on arrival, as it is essential that they should make a Fall growth to insure perfect blooms the next season.

POT-GROWN STRAWBERRY PLANTS

Cultural Directions. The Strawberry is easily cultivated: abundant crops can be obtained from a variety of soils, differing widely in character, from a light sand to a heavy clay. The best soil is a deep sandy loam, but any soil suited to the growth of ordinary field or garden crops may be trusted to successfully grow the Strawberry. The soil should be broken up and pulverized by spade-trenching or subsoil-plowing, enriching with good stable manure to a depth of fully two feet, the quantity of manure to be determined by the condition of the soil. The plants may be set in beds of three rows one foot apart and one foot distant in the rows, with a space of two and a half feet between the outside rows of adjoining beds left for a pathway. They may also be planted in single rows three feet apart and one foot apart in the rows.

FARQUHAR'S "SELECT" VARIETIES OF STRAWBERRIES.

These are strong pot-grown plants, which can be safely shipped to any reasonable distance. If planted early, they will produce a large crop of fruit next year. All varieties offered are perfect flowering, needing no fertilization by another variety.

EARLY.

Arabine. Extra early, very large, bright red, of high quality, heavy cropper and vigorous grower.

Howard 17. This is undoubtedly one of the finest early strawberries; fruit is of attractive conical form, bright red in color, and delicious, mildly acid flavor; hardy and ships well.

Glen Mary. Large conical berry, bright red in color, and finely flavored.

Premier. A wonderfully productive variety bearing large bright red berries of beautiful form and delicious flavor. Early and a good keeper, fine for shipping.

Senator Dunlap. The fruit is large, dark red clear to the center, of very rich flavor. Does not readily rot on the vines.

MEDIUM.

Big Joe. A magnificent new Strawberry of robust growth and very prolific. The mammoth berries are light crimson in color and of fine quality.

Brandywine. A large heart shaped berry, of perfect form, firm and bright red clear through, and pleasing spicy flavor; it is a great cropper and generally succeeds everywhere.

Marshall. The fruit is enormous, of glossy dark crimson color, and delicious, unexcelled flavor. As it does not thrive in all soils it should not be planted extensively until its adaptability is ascertained.

New York. One of the best sorts for Private or Market Gardens. The large berries are of conical form, deep red, fine texture and sweet and melting.

LATE.

Commonwealth. The latest of all Strawberries, bearing large conical crimson fruit, extremely sweet and of delicious flavor.

Gandy. Large, well formed, deep red and agreeably flavored; requires a fairly heavy soil; very late.

Judith. Large, luscious berries of deep-red color clear to the core. Uniform in size; pointed; prolific.

William Belt. An exceptionally fine berry, very late, deep glossy red and delicious in flavor.

Pot-grown plants of the above "Select Varieties" \$1.00 per doz., \$7.00 per 100, \$60.00 per 1000 (250 or over at 1000 rate.) August and September delivery.

EVER-BEARING STRAWBERRIES.

A fine late crop may be assured from this class of Strawberries by keeping the blossoms picked off the plants until July, and cutting away the runners during Summer.

Superb. One of the best of this class, the fruit being deep red, firm, and finely flavored.

Progressive. This variety produces an abundance of fruit, deep red in color, of good size and flavor.

Pot-grown plants of the above "Ever-bearing Varieties" \$1.25 per doz., \$8.00 per 100. August and September delivery.

Strawberry, William Belt.

FARQUHAR'S SUPERB PANSIES.

Culture of Pansies. Pansies thrive best in a cool, moist, but well drained soil, enriched with well rotted barnyard manure or fine ground bone. Seeds sown in Spring in a partially shaded situation will produce fine plants for Autumn flowering. The finest blooms are to be obtained, however, by sowing in July or August, giving the plants protection during Winter, when they will bloom profusely in the Spring and Summer.
