Peter Henderson & Co's

WHOLESALE PRICE LIST

OF

VEGETABLE SEEDS,

VEGETABLE PLANTS,

TOOLS AND

FERTILIZERS,

FOR

MARKET GARDENERS

OR TRUCKERS.

(Wholesale List for Florists, mailed on application.)

PETER HENDERSON & CO.

Seedsman, Market Gardeners & Florists,

35 & 37 CORTLANDT ST.,

NEW YORK.

SOME REASONS WHY MARKET GARDENERS

Will find it an advantage to buy of us.

WE have now been selling seeds for many years, and at the opening of every season we have tried to give sound reasons why, as a rule, growers for market were safer in buying seeds from us than from concerns that not only lack the practical experience we claim to have, but who also have not the facilities for testing their seeds before selling, that we possess. That our arguments have been convincing our steadily increasing trade furnishes the best reply. We know, that to our friends and customers, our constant repetition of the story must seem unnecessary, but they will understand that the advantages as seedsmen, which we claim to possess and state, are intended for those who have not dealt with us before.

Every now and again competitors will unfairly make the statement that our prices are high. The best answer we can make to such a charge is, to ask a comparison of the prices in this list with those of any house you deem equally reliable, and see if we do not average as low, or lower than they. Occasionally, some varieties, we will list at seemingly higher prices than some one else may offer, but when such is the case there are always good reasons, although somewhat difficult to explain in a list such as this. Take, for instance, such an article as Cabbage. We know that of certain leading sorts we have the very best strains in the country, brought about by a constant supervision in the selection of the heads for seed purposes nearest to the true type. This selection involves not only extra labor, but also a large loss of plants, because all failing to come up to the standard are thrown out. Consequently, we do not obtain as much seed as others who do not use the same care and supervision. With such a valuable crop as Cabbage, a matter of a dollar or two per pound in the price is a small consideration, when by the use of inferior or untrue seed, you may be subjected to a loss of hundreds of dollars. Another important instance that we might call attention to is that of Peas. This season we ask \$4.50 per bushel for our best stock of Extra Early Peas (Henderson's "First of All") Some one else, perhaps, lists Extra Early Peas at \$4.00 per bushel. Now, unless we can personally meet you and explain that the extra labor entailed in removing the runners from the growing Peas, or thoroughly "rogueing" the stock, as it is called—which increases the cost but insures purity—you naturally think that we are above the market, while the fact is that the party selling at \$4.00 per bushel probably makes a larger profit on his sales than we do at the higher rate. We could give dozens of other illustrations, but we think that we have stated sufficient to show any intelligent man that if good seeds are desired, a fair price must be paid.

Postage on Seeds.—As we do a large local trade, in justice to those of our customers who buy at our counters, we have for several years based prices in this list on the purchaser adding postage when buying Seed in bulk to be sent by mail. The postage we exact is this: that when seeds are ordered to be mailed in quantities of $\frac{1}{4}$ lb. and upward, postage must be added to Catalogue prices at the rate of 16 cents per pound. As postage for Beans and Peas, please add 30 cents per quart; and to Corn, 20 cents per quart to Catalogue prices. But when ordered by the packet or ounce, either Vegetable or Flower Seeds will be sent by mail at Catalogue prices without extra charge.

ABOUT FORWARDING AND REMITTING.

Every order is executed at once on its receipt, or a reason given why it has not been sent, so that parties ordering may know that if goods are not received in proper time, it is almost certain that the letter has not been received by us. Remittances should be made either in the form of a Money Order, Bank Draft, Express Order, or Registered Letter. Remittances in any other way are entirely at the sender's risk. In regard to Postal Notes, which are likely to be largely used, we are obliged to say that, as they afford no security, and are readily negotiable into whomsoever's hands they may fall, we cannot hold ourselves responsible for letters lost in transit that may contain them.

How Our Book Premiums Can be Obtained.

The plan we adopted several years ago, of giving Mr. Peter Henderson's Books to customers, as Premiums on orders, has, we think, been mutually satisfactory; and as we shall continue the practice on a more extensive scale than ever, we ask of our patrons careful consideration to the terms detailed below, by which these different books may be obtained. Mr. Henderson's last production, "*Garden and Farm Topics*," as will be seen, can be had on orders of \$10 and upward, while for orders of \$20 and upward, the purchaser may select either "*Gardening for Profit*" "*Practical Floriculture*," or "*Gardening for Pleasure*."

While the selling price of these four works is \$1.50 each, we ourselves publish only one of them, "*Garden and Farm Topics*," which enables us to offer it as a premium on a smaller order. We make this statement to explain, what might otherwise appear contradictory. In the information given, these various books do not conflict with each other, as most of our costumers perhaps know. Here are the conditions: On all orders from this catalogue to the amount of \$10 and upward (in one order) we will include, without charge, a copy of Peter Henderson's new book, "*Garden and Farm Topics*," a work of 250 pages, handsomely bound in cloth, and containing an excellent portrait on steel of the author. The subjects this book embrace will be found below. When the order is to the extent of \$20 and upward, purchasers may choose any one of Mr. Henderson's three books, "*Gardening for Profit*," "*Practical Floriculture*," or "*Gardening for Pleasure*," the price of which is \$1.50 each; and when the order amounts to \$40 and upward, we will send the buyer his choice of any two of the above four books, or, instead, a copy of our late work, "*Henderson's Handbook of Plants*," the value of which is \$3.00, but it is understood that any book or books desired *must be selected at the time of ordering. This last condition is imperative, and under no circumstances can we deviate from it*; and customers must not be disappointed if we fail to honor subsequent demands made upon us for the books as Premiums.

Of the Books offered above as Premiums,

Garden and Farm Topics,—Contains portrait of Peter Henderson and embraces within its scope the following subjects:

Popular Bulbs and their culture. — Window Gardening, and Care of Plants in Rooms. — Propagation of Plants.—Rose Growing in Winter. — Green-house Structures, and Modes of Heating. — Formation and Renovation of Lawns.—Onion Growing.—How to Raise Cabbage and Cauliflower.—On the Growing and Preserving of Celery.—The New Celery "White Plume." — Strawberry Culture.—Root Crops for Farm Stock.—Culture of Alfalfa or Lucerne.—Manures and their Modes of Application.—Market Gardening around New-York —The Use of the Feet in Sowing and Planting.—Popular Errors and Scientific Dogmas in Horticulture.—Humbugs in Horticulture.—Draining.

Gardening for Profit.—Price \$1.50.—Gives in comprehensive detail our twenty-five years' experience in *Market Gardening*. If you wish to grow vegetables for sale, you need this book. (In cloth, illustrated.)

Practical Floriculture.—Price \$1.50.—Gives up to date our whole experience in the *Propagation and Growing of Plants* during the past thirty years. This work is a complete guide for those intending to become *Commercial Florists*. (In cloth, illustrated.)

Gardening for Pleasure.—Price \$1.50.—Is a concise compendium, giving plain details for the culture of *Fruits, Flowers, Vegetables, and General Gardening*. For the use of *Amateur Cultivators*. (In cloth, illustrated.)

Henderson's Handbook of Plants.—Price \$3.00.—Is a condensed encyclopedia of 412 pages, giving botanical classification, propagation and culture of nearly every known plant in cultivation, either ornamental or useful. Invaluable as a book of reference. (In cloth.)

American Grown Turnip Seed.

Please notice our exceptionally low rates on all varieties of Turnip, either for single pound or five pound lots.

White Egg Turnip.

Yellow Stone Turnip.

Purple Top White Globe Turnip.

Improved Am. Ruta Baga.

If by mail, in quantities of $\frac{1}{4}$ lb. and upwards, postage must be added at the rate of 16c. per lb.

General List of Vegetable Seeds.

Below will be found a full list of all the Vegetable Seeds that we have to offer, and we think that the prices attached will be found extremely low in almost every instance. There are a few things this season, however, which are quite scarce, notably Beans, which are almost an entire failure. Cucumber and Squash Seed are also very short, and we also have to say that some varieties of Sweet Corn are quite a light crop. Please understand that the prices quoted are based on customers paying delivery charges when sent either by express or freight, but as our prices on most heavy seeds, (notably Peas,) are very low, it will be found even after paying delivery charges, customers will have received their supplies at exceedingly favorable rates. Whenever desired, we will send by mail, but when this is to be done postage must always be added at the rate of 16 cts. per lb., or 30 cts. per quart for Beans and Peas, and 20 cts. per quart for Corn. Half a pound will be supplied at pound rates; half pecks at peck rates; half bushels at bushel rates. From this list no less a quantity than half an ounce in vegetable seeds will be supplied. When packets are wanted and they are not here priced, we will furnish, but at Retail catalogue prices.

RURAL BRANCHING DOURA, 30c. per lb.

5 MILLION CELERY PLANTS, FOR PLANTING OUT IN JULY AND AUGUST.

We are the largest raisers of CELERY PLANTS in the world. The leading kinds now grown are described and priced in this circular. In ordering, customers should bear in mind that we never make any charge for boxes, packing or delivering to Express Offices in New York, and also that we guarantee safe arrival of all Vegetable Plants shipped by express, if the time in transit does not exceed three days.

NEW CELERY—HENDERSON'S WHITE PLUME.

It affords us great pleasure in being able this season to offer plants for the first time, of this most valuable new variety, and at such prices as will enable everyone to make an extended trial of it. We feel satisfied that this new kind of Celery will so simplify its culture, that the most inexperienced can now grow Celery blanched in the proper condition for the table, just as easily as a Cabbage or Lettuce. The peculiarity of the Celery known as "White Plume" is, that *naturally* its stalk and portions of its inner leaves and heart are white, so that, by closing the stalks, either by tying them up with matting, or by simply drawing the soil up against the plant and pressing it together with the hands, and again drawing up the soil with the hoe or plow, so as to keep the soil that has been squeezed against the Celery in its place, the work of blanching is completed; while it is well known that in all other kinds of Celery, in addition to this, the slow and troublesome process of high "banking" or earthing up with the spade is a necessity.

Another great merit of the "White Plume" Celery is, that it far exceeds any known vegetable as an ornament for the table, the inner leaves being disposed somewhat like an ostrich feather, so as to suggest the name we have given it of "White Plume."

It is well known that one-half the value of a Celery, particularly in our best hotels and restaurants, is held to be its fitness as a table ornament, and for this purpose this new variety is admirably fitted. In addition to this, its eating qualities are equal to the very best of the older sorts, being *crisp, solid*, and having that nutty flavor peculiar to the "Walnut" and some of the red sorts. Altogether, we cannot find words sufficient to describe its many merits as it deserves.

The great bugbear in the cultivation of Celery, by those

engaged in growing it for market, has been the labor entailed in the "banking" to whiten or blanch it; and with the unskilled amateur growing a few hundred for private use, the troublesome process of "banking" has usually been a detriment sufficient to prevent him from trying. Now he can grow this new sort just as simply as any other vegetable. In the first week of October of 1882, the Celery banks in Hudson County, New Jersey, must have cost at least \$15,000 in labor to erect; but a rain storm of twenty-four hours' duration washed the banks down and destroyed the work of weeks. Had this new Celery been under process of blanching no high banks would have been needed, and the storm would have been nearly harmless, as the "wash" would have done but a trifling injury. In size and weight it is very similar to those popular kinds, the "Golden Dwarf" and "Henderson's Half Dwarf;" in fact it originated in what is known as a "sport" from "Henderson's Half Dwarf;" that is, a single plant showed the whiteness of stem and peculiar feathery leaves, which fortunately, were permanently reproduced from seed, and gave us this entirely new type of Celery. Its culture is in all respects the same as that directed for the other sorts, with the exception that we are saved the trouble of high "banking" or earthing up.

In our general Catalogue issued January 1st of this year, we gave it as our opinion, that from its delicate structure the White Plume Celery would not be likely to keep as well as some of the other sorts, but we were agreeably surprised to find that it kept with us in perfect condition until middle of February.

Price, - - - - -	\$4 50 per 1000
Extra strong transplanted plants, -	7 50 " 1000

STANDARD VARIETIES OF CELERY.

Henderson's Half Dwarf Celery.

Except, perhaps, the Golden Dwarf, this variety is now grown more extensively than any other by the market gardeners who supply the New York City markets, and is the kind now found on the tables of all first-class hotels. When blanched it is of a yellowish white, making it very ornamental for the table, is entirely solid, possessing a rich nutty flavor, while it has much vigor of growth, surpassing most of the large-growing sorts in weight of bunch when grown under the same conditions. \$3.00 per 1000.

White Walnut Celery.

It is of dwarf habit, seldom attaining a height of more than 20 inches. It is solid and heavy, and has a peculiar, rich walnut-like flavor. A novel and valuable quality of this variety is its graceful and feather-like foliage, which, when blanched, makes it a most beautiful Celery for the table. \$3.00 per 1000.

Golden Dwarf Celery.

In size and habit of growth it is much the same as the Half Dwarf and Dwarf White kinds, except that when blanched the heart, which is large and full, is of a waxy golden yellow, rendering it a most striking and showy variety for either market or private use. It is entirely solid and of most excellent flavor, and one of the best keepers during winter we have ever known. \$3.00 per 1000.

London Red Celery.

We have tried to impress upon our customers, for years, the superiority of the Red Celery over the White. Not only

that, as a rule, they are better flavored and more crisp, but that they are hardier and keep better during winter. The variety London Red is one of the best we have ever seen having every requisite good quality. \$3.00 per 1000.

Major Clarke's Pink Celery.

Of late years we have found more of a disposition to grow the pink or red varieties of Celery, which is as it should be, for so far as flavor goes the red and pink varieties are, as a rule, much superior to the white sorts. In our trials of many varieties we have considered this, Major Clarke's Pink, to be a desirable acquisition to our existing list of Celeries, which, as our customers know, is a leading specialty with us. This variety is of medium growth, of stiff, close habit, large heart, remarkably solid and crisp, and of fine walnut flavor. \$3.00 per 1000.

Giant White Solid.

Of the largest size, color ivory white, solid and of fine flavor. \$3.00 per 1000.

Boston Market.

A dwarf growing white variety, much esteemed in Boston and vicinity. Fine flavored, crisp and tender. \$3.00 per 1000.

Henderson's Dwarf White.

A favorite market variety. \$3.00 per 1000.

CABBAGE PLANTS.

EARLY AND LATE VARIETIES.

The following are the leading sorts, which should be planted at distances of two feet between the plants, and three feet between the rows. Set out between June 15th and August 1st.

FERTILIZERS, ETC.,

At following low rates, we will deliver **FREE** on board to any Freight Depot or Steamboat here in New York. Freight charges of course to be paid by the purchaser.

BLOOD AND BONE FERTILIZER.

We desire to call special attention to this fertilizer, which is prepared especially for us, and which we have sold very largely with the most satisfactory results to all sections of the country. That it has met with such unanimous approval is undoubtedly due to the fact that the article manufactured is pure blood and bone. As a great many of our inexperienced customers frequently make inquiry as to the quantity we use of this fertilizer and how to apply it, we would state that when applied broadcast for such crops as Spinach, Cabbage, Beets, Onion or Celery, from 1 to 2 tons per acre is used, according to the condition of the land. The ground being well plowed the fertilizer is sown on over the surface and then harrowed in thoroughly. For seed beds for Cabbage, Lettuce, etc., the same ratio of quantity is used, applied in the same manner. When, however, this fertilizer is used in rows or in hills for such crops as Celery, Cabbage or Early Corn, from 100 to 200 lbs. per acre will be enough, taking care to have it well mixed with the soil in the rows or hills.

In Bbls. of about 250 lbs., \$2 75 per 100 lbs., or \$47 00 per ton (of 2,000 lbs.)

Pure Crushed Bone. A coarse article, particularly well adapted for use in the preparation of grape vine borders; perfectly pure. In bbls. of about 250 lbs., \$2 75 per 100 lbs., or \$47 00 per ton of (2,000 pounds.)

Pure Bone Meal. This Bone Meal is ground very fine, and is well adapted for mixing with soil for potting purposes, for which one part of meal to fifty of soil is about the right proportion. It is the same article we use for mixing with moss in our "Moss Mulching" process, and it is the best for top-dressing lawns. Price, per 5 lb. package, 40 cts.; 10 lb. package, 70 cts.; per 25 lb. package, \$1 50. Quantities of 50 and 100 lbs. and over, at 3 1-2 cts. per lb.; or \$55 00 per ton (of 2,000 pounds.)

Pure Ground Bone. This is coarser in appearance than the above, and adapted for general fertilizing purposes. The sample we offer is of very fine quality and pure. In bbls. of 200 lbs. \$4 50 per bbl., or \$40 00 per ton (of 2,000 pounds.)

Peruvian Guano, of the "Guaranteed" brand, which is the purest to be obtained. 25 lbs. for \$2 00. Per bag of 200 lbs., 4 cts. per lb. Price, \$65 00 per ton (of 2,000 lbs.)

UNIVERSAL FOUR BLADE HOE.

Indispensable for either florists or market gardeners who plant close, say at from nine to twelve inches; and is among the very best tools lately made; the past season, in our own practice, we used it with the most satisfactory results, and found it most effective, and suitable for general work in our grounds of twenty-five acres in close crop. We believe that the four we have in use save us from \$1,000 to \$1,200 per annum in labor, than if we did the work with the ordinary fork or scuffle hoes. Besides this the cultivation is deeper, and in all respects preferable to any kind of hand hoe.

We can supply sheet iron wings, to be applied when very small plants are to be hoed; these prevent any dirt from being thrown on them.

PRICE.....\$4 00
Wings, per Pair, extra..... 60

CULTIVATOR HARROW.

An implement much used in garden crops and lands where there are few weeds. It is a thorough pulverizer of the soil, and by placing a weight on it a depth of several inches can be reached. The frame can be widened or narrowed, to suit various widths of rows.

PRICE.....\$5 75
