**EVERYTHING FOR THE LAWN
AND GOLF COURSE.**

PETER HENDERSON & CO.

35 & 37 CORTLANDT ST., NEW YORK.

LAWNS: *Their Formation and Care.*

THERE is nothing more charming than a well-designed house surrounded by artistically treated grounds; and of the essential features of home grounds none is so important as a beautiful lawn—the rich, velvety turf of the smooth, well-kept lawn, varying in tones of green with the play of sunlight and cloud shadows, being the heart and life of all.

“The Tropics may have their delights, but they have not the turf, and the world without turf is a dreary desert. The Teutonic races all love turf; they emigrate in the line of its growth.”—CHARLES DUDLEY WARNER.

A lawn may be formed either by laying turf or by sowing seed. The gain in time by sodding is mostly in anticipation, an advantage so slight as to scarcely be worthy of consideration, while the results obtained by both methods are not to be compared. Sods, no matter how carefully cut and closely laid, often separate, leaving crevices about which the grass dies out in dry weather; then the grasses that compose a pasture or roadside sod (generally the kind used for “sodding” lawns) are not at all the best sorts for forming a perfect lawn; besides, the smooth, elegant surface, such a desirable feature of a lawn, cannot be secured by sodding.

A perfect and enduring lawn, one of luxuriant richness with closely interwoven, firm, deep and elastic turf, is only created by sowing a composition of the various kinds of grass seeds suited to the conditions and the climate. Several varieties are needed, that the lawn may be verdure-clad during all seasons, and the seeds must be sown liberally (at the rate of from four to six bushels per acre), not only that a lawn may be produced quickly, but because the kinds of grasses suitable for perfect lawns are fine-leaved and should take entire possession of the ground promptly, thus checking the development of weeds, the seeds of which are in all soils. The coarse pasture and hummock-forming grasses will not produce a fine lawn. Good, rich, deeply worked soil, either of a friable texture or else under-drained, is as necessary for the production of a perfect lawn as for garden crops, although most grasses, being accommodating plants, if they do not get the requisites for best results, will do their best with what is supplied them. Early and frequent mowing and rolling, as well as the liberal application of water through a lawn sprinkler during dry seasons, is one of the secrets of maintaining beautiful green turf from snow to snow.

Grading. We not infrequently see, after a dwelling costing five, ten, twenty or thirty thousand dollars is erected, that the grounds surrounding it are left to the tender mercy of some ignorant pretender to grade and put in shape. The educated, intelligent architect's duties in many cases end with the completion of the building, and the “garden architect” is installed to grade for the lawn; and a common consequence is that the beauty of the place may be forever marred, for this matter really in many cases requires as much intelligence and good judgment as the construction of the dwelling itself. One of the first conditions for a perfect lawn is that the land be perfectly drained, either naturally or artificially; if the subsoil is sand or gravel, so that water can quickly pass through it, then there will be no need for artificial drains, but if there is a stratum of adhesive clay for a subsoil, then drains are indispensable every fifteen or twenty feet. As the formation of the lawn is the foundation of all subsequent operations, it is imperative that it be carefully done; for if badly done at first it cannot be changed or altered, unless to the great detriment of trees or shrubs that have been planted or flower beds or walks that have been laid out.

The first thing to be done is to get the ground shaped to the desired grade, taking care in grading that when hills or rocks are removed, sufficient subsoil is also removed to be replaced with top soil, so that at least five inches of good soil will overlay the whole in all places; and where trees are to be planted there should be twice that depth of good soil. When the grading is finished, if the nature of the ground requires it, drains should be laid wherever necessary; then the whole should be thoroughly plowed, a subsoil following in the wake of the common plow, until it is completely pulverized. A heavy harrow should then be applied until the surface is thoroughly fined down; all stones, roots, etc., should be removed, so that a smooth surface may be obtained. We have used, with great effect and saving of labor, the “Disc Smoothing Harrow,” which fines and levels the land equal to a steel rake; and wherever large areas are in preparation for lawns, or in fact for any field culture requiring a fine smooth surface, this implement will be found to be of great value.

PETER HENDERSON & CO. give no warranty, express or implied, as to the condition, quantity, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Seeding. When the seed is sown a light harrow should be again applied, so as to sink the seed one inch or so in the soil, and after that a thorough rolling given, so that the surface is made as smooth and firm as possible. In the latitude of New York the seed may be sown any time from April to October. If the preparation has been good and the weather is not very dry and unfavorable, a good lawn will be in evidence in 8 or 10 weeks' time. Under very congenial conditions, new lawns are frequently ready for mowing in 6 weeks from sowing. If sown in the hot months of June and July, a sprinkling of oats should be sown at the same time, so that the shade given by the oats will protect the young grass from the sun. Lawns are very often sown during the early Fall months (September being the best) with excellent results. On lime soils Kentucky Blue Grass is sometimes used alone, but for a firm, carpet-like lawn the "Henderson" Lawn Mixture is preferable, as it contains some grasses which give quick results, and form a good turf the same year as sown, while a satisfactory turf cannot be established by using Kentucky Blue Grass alone under two or three years. For small plots, of course, digging, trenching and raking must be done instead of plowing, subsoiling and harrowing, and the surface after sowing should be patted down with the back of a spade or rolled with a roller.

Quantity of Seed Required. As a guide for the proper quantity of seed required to form a perfect lawn, we may state that one quart of Lawn Grass Mixture is sufficient to thoroughly sow an area 20 feet by 15 feet—300 square feet—or to cover an acre five bushels will be required. It should be borne in mind that, in order to produce the best results, grass seed for lawns should be sown at least twice as thick as if sown for hay. In fact, if very rapid results are wanted, a lawn will be much quicker obtained by using one-third more seed per acre—in a lawn of about an acre in extent, which we made, six bushels of the "Henderson" Mixture were sown on the 25th of April, harrowed well in, then rolled firmly with a heavy iron roller—the result was that by July 1st, or about sixty days from the date of sowing, a perfect lawn was obtained, having had to be twice mowed over by machine previous to that date.

Terraces and Slopes. On sloping banks it is often necessary to use sod, as the rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. In small yards sodding is often done so as to get immediate results; but in all such cases great care should be taken to see that the sods used are of the proper quality, otherwise it is much better to wait a few weeks for the lawn seed to produce the lawn. The "Terrace Sod" mixture which we offer is composed of deep-rooting grasses, which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizing and seeding so that the grasses may be quickly established.

Shady Lawns. When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with the "Shady Nook" Lawn Grass Mixture, which is a combination of fine dwarf-growing evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered or shady spots. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime raked into the soil is an excellent corrector and sweetener, but the moss should be first removed by means of a sharp rake.

Fertilizing. The question of fertilizers for the lawn is an important one. If the soil is naturally a deep, rich loam, it is not indispensable that manure at all be used the first season of sowing, although in every case it would be an advantage, and is really essential if the soil is poor or light. Perhaps the best way to apply *well-rotted* stable manure is to spread it thick enough to cover the ground after plowing or digging, and then harrow or rake it in; though a little more costly, the best plan to insure permanency for the lawn is to use from 2,500 to 3,000 lbs. per acre of coarse ground bone (or better still, about half the above quantity of bone and the other half of Henderson's Lawn Enricher), or in that proportion over lesser

areas, the bone decomposes slowly, giving lasting enrichment; while the Lawn Enricher gives immediate results, the combination of these two fertilizers is lasting in effect, insuring a "velvet lawn," under ordinary circumstances, for six or eight years without further application of manure.

When the land has not been fertilized before sowing, it is necessary to use some top-dressing of manure each season to keep up the fertility of the lawn, and nothing is better for this purpose than to spread over it late in the Fall (November or December) *well-rotted* short stable manure enough to partially cover the surface. On no account should *fresh* stable manure be used, or the lawn will be very apt to be ruined by the introduction of weed seeds. This should be allowed to remain on until such time as the grass shows signs of starting in the Spring, when the rough portion should be raked off and a heavy roller applied, so that the surface of the lawn be rendered smooth and firm for the mower. If the top-dressing of *well-rotted* stable manure has been omitted in the Fall, fine bone dust mixed with finely sifted wood ashes, in equal parts, may be sown on the lawn about as thick as sand is usually strewn on the floor, and rolled down, and we advise that the lawn be rolled several times during the Spring.

Stimulating. Where very quick results are required, or in case a lawn is becoming bare or patchy in spots, caused by wear and tear or otherwise, the grasses may be forced into a quick growth by applying nitrate of soda at the rate of 200 lbs. per acre. If put on in the dry state it should be applied just before a shower, otherwise it is apt to burn the grasses; but the safer plan is to dissolve one pound of the nitrate in thirty to forty gallons of water and sprinkle with the solution.

Mowing should be begun in Spring as soon as the grass is two or three inches high, and continue every seven or eight days until the cessation of growth in Fall. If the lawn is gone over with the mower once a week, the clippings are best left on, as the sun quickly shrivels them up, so that they never appear unsightly; but if mowing is delayed two or three weeks, then the grass must be raked off.

It sometimes happens that the soil contains seeds of perennial weeds; and such seeds are rarely found in the grass seed, such as dandelion, dock or thistles, which seriously interfere with the beauty of the lawn. When this occurs, there is no other remedy than the slow process of cutting them out with the knife or spud. Crab grass, known also as five-finger grass and summer grass, is one of the commonest pests to contend with, and is especially troublesome in dry seasons. It is, however, only an annual, coming up from seed each year. A mowing machine will not cut off all the seed stems, for some grow along the ground and bend before the mowing machine, and the best plan is to loosen it up with a rake and use the scythe a few times, cutting both ways so as to get all of the seeding stems. Lawn grass seed should be sown thickly on these spots and the lawn heavily fertilized in Spring. The crab grass seed does not usually germinate until warm weather, and if there is a good healthy turf at that time the seed is less likely to germinate. We therefore advise, so as to induce a good healthy growth, that when cutting the grass during May, the lawn mower be set high so that the grass will not be cut too short.

Rolling. The benefit derived from using a roller on the lawn, especially in the Spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if it is not firmly pressed back with a roller before hot weather, the grass is apt to be killed or injured, leaving the lawn full of bare spots. For use on the lawn always take a "two or three section" roller, as they can be turned without injuring the grass. A 300-lb. roller is about as heavy as one man can pull, though a 400-lb. will be better if you have two persons to operate it.

Renovating. To renovate lawns that have become worn out by neglect or other causes, and where it is not convenient or desirable to renew by plowing up, they may be greatly benefited by running a light harrow over, if the surface is large, or by a sharp steel rake for smaller areas. After stirring the surface by such means judiciously, so as not to hurt too severely the roots, lawn grass should be sown over the surface, harrowing or raking in about half the quantity advised for new lawns. After sowing, the surface should be harrowed or raked over, and firmly rolled or beaten down, but if spurious grass or other weeds have got possession of the lawn, then this way of renovation would not be satisfactory, and it had better be plowed under and sown afresh, in the manner already given for the formation of the lawn.

The Most Beautiful Lawns in America

ARE MADE WITH

The "HENDERSON"Lawn Grass Seed

It is Enthusiastically Praised by Thousands
From Maine to California.

Space Permits us to Print but a Few of the Many

LETTERS OF PRAISE

"The Lawn Grass Seed which I had from you this spring was the most satisfactory of any I ever used. In five weeks after it was sown, it was ready for cutting, and in eight weeks it was cut three times, leaving the lawn like a velvet carpet. It is the most beautiful lawn I ever had."

J. LEWIS CREW, Shrewsbury, N. J.

"We have as fine a lawn of 17½ acres grown from your seed as was ever seen. An expert in such matters said this A. M. that he never saw its equal."

THE LAKESIDE CEMETERY, Erie, Pa.,
per Wm. H. Platt, Vice-Pres.

"I do not consider I would be doing you justice if I did not thank you for the Lawn Grass Seed that I got from you last spring, and in doing so I must say it is the best seed I ever saw. I was more than surprised to see the very nice lawn that it produced. In six or eight weeks from the time it was sown it covered the ground so thick that every person who saw it thought that I must have had my ground sodded, but it far surpasses any sodding I ever saw, or any seeding. This is not only my testimony, but the opinion of every one who has seen it."

PETER FRAYNE, Exeter, Ont.

"The Henderson Lawn Grass Seed ordered of you in April was sown May 1st, and I am surprised and delighted at the results. In five weeks I have the finest grass to be seen in this city. I did not have quite enough seed so bought some here but it has not given satisfaction, so will sow more of yours."

C. C. ROSE, 3806 No. 22d St., Omaha, Neb.

"Last spring I had the most satisfactory results ever achieved with a certain Lawn Mixture obtained from you. Please look it up and send me two bushels of the same, and do not confound it with Kentucky Blue Grass, which on the advice of some parties I also purchased, but it does not compare with the mixture you sent me."

F. M. CARTER, Washington, D. C.

"A friend of mine purchased some Henderson Lawn Grass Seed from you about a year ago, and he has the finest lawn in town to-day. Please send me one bushel of the same."

W. S. GILBERT, Portland, Maine.

"The Lawn Grass which I bought of you in April gave entire satisfaction, although it had no opportunity to do its best on my place. Before planting my own lawn, I had the year before bought the same kind of seed, Henderson's Lawn Grass, for a small place I was laying out, and that bit of lawn is as perfect a piece of turf as I could wish to see. It is exposed to the full glare of the sun all the year, and the first season after it was planted it had no water for six weeks, yet did not even turn brown. I think it an excellent grass for this climate, and one of its chief merits is its being such clean seed—my lawn is absolutely free from weeds."

ELLA C. POND, Berkeley, Cal.

"Allow me to say that the lawn grass seed purchased of you in the spring has given perfect satisfaction. We sowed the seed on new ground the 3d of May, and, notwithstanding the dry, hot season, we have had a beautiful lawn all summer, having mowed it several times. It was a surprise to every one how quick we made a lawn, as they all told us we would have no grass this year. So much for Henderson's Lawn Grass Seed."

MRS. E. O. GARDINER, Clinton, Conn.

"The results from the Lawn Grass Mixture purchased of you last spring far surpass my fondest expectations, and is a wonder and surprise to all who see it. I was told by many that it would take 2 or 3 years to get a perfect lawn, but in less than 2 months from seeding I have a fine lawn, far ahead of all others in town; the sod is a perfect mat."

GEO. ROWLAND, Avoca, N. Y., Cashier Bank of Avoca.

THE "HENDERSON" LAWN GRASS SEED.

THERE is nothing more charming than a well-designed house surrounded by artistically treated grounds; and of the essential features of home grounds none is so important as a beautiful lawn—the rich, velvety green turf of the smooth, well-kept lawn being the heart and life of all.

A perfect and enduring lawn, one of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is only created by sowing a combination of various and suitable grasses. Several varieties are needed, that the lawn may be verdure-clad during all seasons, and the seeds must be sown liberally, not only that a lawn may be produced quickly, but because the kinds of grasses suitable for perfect lawns are fine-leaved and should take entire possession of the ground promptly, thus checking the development of weeds, the seeds of which are in all soils. The coarse pasture and clump-forming grasses will not produce a fine lawn.

We have made the formation of lawns a study for years, and thousands of the finest lawns and grass plots in America were obtained by following our instructions and using **The "Henderson" Lawn Grass Seed**, with which a perfect and permanent lawn may be established and ready for cutting in a few weeks' time. This celebrated Lawn Grass is composed of a thoroughly balanced combination of various native and foreign, fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained from snow to snow, without burning brown in summer, its constant luxuriance rivalling the famous lawns of Old England.

The Beautiful Lawns at the Pan-American Exposition, Buffalo, and also at the World's Fair in Chicago, were produced in six weeks' time with **The "Henderson" Lawn Grass Seed**, which was awarded the highest medal at both Expositions; but what we prize more than gold medals are the hundreds of letters of praise we have on file from the users of **The "Henderson" Lawn Grass Seed** in almost every State in the Union.

The "Henderson" Lawn Grass Seed is, relatively speaking, the cheapest seed offered, because, while other lawn grass mixtures on the market will not average over 14 lbs. to the bushel, this weighs 20 lbs. per measured bushel. It is also the **Purest, Cleanest** and **Heaviest** lawn grass seed ever offered.

Full instructions of "HOW TO MAKE A LAWN" are enclosed in every package.

If people only knew how easy it is to make a lawn with The "Henderson" Lawn Grass Seed, the days of using sod would soon be over.

THE QUANTITY REQUIRED.

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns, 1 to 2 bushels. For a plot 15x20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns.

Prices, 25c. per quart, \$1.50 per peck, \$5.00 per bushel of 20 lbs. (If by mail, add at the rate of 5 cents per quart for postage.)

"SUNNY SOUTH" LAWN GRASS SEED.

Is especially prepared for the South, and contains all the best grasses that are by nature adapted for hot, dry situations. In the South Bermuda grass is frequently used, but it remains green only in the summer months, turning brown in winter, but by using this mixture, and with some care and attention, an all-the-year-round lawn can be maintained in the Southern States.

Price, 35c. qt., \$2.00 pk., \$7.00 bush. of 20 lbs.

(If by mail, add at the rate of 5c. qt. for postage.)

"My grass, the 'Sunny South,' is just as fine as can be, although I should have put more seed on. Will put all the balance of the lawn in 'Sunny South,' it having stood the drought better than any of the others I sowed."

W. S. KEEFER, Thomasville, Ga.

"SHADY NOOK" LAWN GRASS SEED.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine, dwarf-growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slaked lime, at the rate of one bushel to each thousand square feet, or forty bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed by the use of a sharp rake.

Price, 35c. qt., \$2.00 pk., \$7.00 bush. of 20 lbs.

(If by mail, add at the rate of 5c. qt. for postage.)

"The 'Shady Nook' Lawn Grass was especially satisfactory, and we have taken pleasure in recommending it for similar places, and now order for a friend who has a fine tree in a prominent location on the college ground under which no grass is growing."

Miss ELIZABETH P. LITTLE, Oberlin, Ohio.

"Last year you furnished a bushel of 'Shady Nook' Grass Seed which did unusually well in our yard, where we have many oaks and sugar maples."

Mrs. WM. J. ROBERTSON, Charlottesville, Va.

"Terrace Sod" Lawn Grass Seed.

A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out; that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, velvety green turf throughout the season. There need be no fear of introducing coarse grasses into your lawn by sowing this mixture, for though strong-rooted, the grasses are equally as fine as those used in the "Henderson" mixture.

Price, 35c. qt., \$2.00 pk., \$7.00 bush. of 20 lbs.

(If by mail, add at the rate of 5c. qt. for postage.)

"I have used your 'Henderson' Lawn and Terrace Sod grass seeds on the lawns and banks here with most excellent effect."

P. J. DONOHUE,

Gard'r to M. K. Jessup, Belvoir Terrace, Lenox, Mass.

BESIDES THE LAWN MIXTURES OFFERED ON THIS PAGE, WE SHALL AT ALL TIMES BE PLEASED TO MAKE UP MIXTURES FOR SPECIAL REQUIREMENTS AND SITUATIONS. CORRESPONDENCE INVITED.

A VIEW IN THE
MORRIS CO. N.J. GOLF LINKS
SOWN WITH HENDERSON'S
"GOLF LINK" GRASS SEED

HENDERSON'S "GOLF COURSE" GRASS SEED MIXTURES

FOR FAIR GREENS AND PUTTING GREENS.

We have given much attention to grasses for Golf Courses. When Golf first became popular, one of our representatives visited several of the famous Scotch Links and found that most of the grasses which formed these Links can be grown here. The Mixtures we offer below are largely composed of such varieties as will thrive here with the addition of several equally fine American varieties, and are the result of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on Golf Courses sown with our grass seeds, such as the Golf Courses named below, and nearly all well-known Courses in the United States. By the use of these Mixtures, and with proper care, the finest Fair Greens and Putting Greens in the world can be successfully rivaled, and if conditions are favorable, a good playing turf may be secured in eight weeks from time of sowing and lasting indefinitely.

Several members of our establishment are golfers, and we thoroughly understand the requirements, and will at all times be pleased to correspond with and advise Green Committees.

HENDERSON'S "PUTTING GREEN" GRASS MIXTURE. Price, 30c. qt., \$1.75 pk., \$6.00 bush. of 25 lbs. Sow at the rate of 5 bushels per acre.

HENDERSON'S "FAIR GREEN" GRASS MIXTURE. Price, 20c. lb., \$18.00 per 100 lbs. Sow 40 to 50 lbs. per acre.

"GOOD TURF
KINDLES A GOLFER'S HEART"
HARRY VARDON.

HENDERSON'S "GOLF COURSE" GRASS SEED

Is used on the Championship Courses.

The Finest Courses in America to-day are those on which Henderson's Grass Seeds have been used,

Among which we mention and to which we refer:

Essex County Country Club,	N. J.	Portland Golf Club,	Ore.
Chicago Golf Club,	Ill.	Spokane Golf Club,	Wash.
Chevy Chase Country Club,	D. C.	Royal Montreal Golf Club,	Can.
St. Andrew's Golf Club,	N. Y.	Quebec Golf Club,	Can.
Philadelphia Country Club,	Pa.	Merion Cricket Club,	Pa.
Shinnecock Golf Club,	N. Y.	Westchester Country Club,	N. Y.
Essex County Club,	Mass.	Newport Golf Club,	R. I.
Garden City Golf Club,	N. Y.	Lakewood Golf Club,	N. J.
Ardsley Golf Club,	N. Y.	Knollwood Country Club,	N. Y.
Tuxedo Golf Club,	N. Y.	N. Y. City Public Golf Course,	N. Y.

HENDERSON'S POLO GROUND GRASS SEED MIXTURE.

Polo Grounds require the strongest turf-forming and deepest-rooting grasses, so that the sod will be thick and prevent the horses poaching through. We supplied the seed which formed the turf at the following polo grounds: Lakewood, Newport, Meadowbrook, Rockaway Hunt, Saratoga and others. Sow 50 to 100 lbs. per acre; the larger quantity if quick and very best results are desired.

Price, "Polo Ground" Mixture, 20c. per lb., \$18.00 per 100 lbs.

To those who have preference for any one variety of Grass or desire to make up Special Mixtures of their own, we can supply Finest Recleaned Qualities of the separate Grasses as offered on page 6.

HENDERSON'S "TOUGH TURF" GRASS SEED FOR TENNIS COURTS & C.

HENDERSON'S "TOUGH TURF" GRASS SEED.

HENDERSON'S "TOUGH TURF" .. Grass Seed

FOR TENNIS, CRICKET, CRO-
QUET AND BALL GROUNDS,
BOWLING GREENS, ETC.

That outdoor games are becoming more popular in America every year is evident from the frequent applications that we receive from some newly organized outdoor club for a fine, durable grass. The turf required for these sports must be closely interwoven, firm, elastic, smooth and durable. These requirements are met in Henderson's "Tough Turf" Mixture, which is composed of native and acclimated foreign fine-leaved, fibrous, deep-rooting grasses, that spread and intermingle, the seeds of which are blended in the proper proportions to form and maintain a tough, matted, evergreen sward, even in dry weather. These varieties, being low-growing and fine-leaved, require to be sown liberally if a playing turf is desired quickly; not less than one quart should be used for 300 square feet, or five bushels per acre; half that quantity will do for renovating.

PRICE, 30c. quart, \$1.75 peck, \$6.00 bushel.
(If by mail, add 5c. per quart for postage.)

"I have had from you at different times many bushels of Henderson's "Special" Grass Seed Mixture for use on cricket grounds, and it has always given excellent satisfaction. In Lawrence we used it on the Merrimack Cricket Club grounds, and the crease had a good name all over the State. Since I have been connected with the Mohair Cricket Club, in Lowell, we have used the same seed with the same result, that our wicket is considered the best in the State. I have recommended your seed to the Lynn Cricket Club, of Lynn, Mass., and I think you might profit by sending circular or catalogue, calling attention to the seed, to the Secretary of that Club."

JOS. W. HARRISON, Lowell, Mass.

SEPARATE GRASSES.

To those who have preference for any one variety or desire to make up Special Mixtures of their own, for Golf, Polo, Cricket and other Sporting Grounds, we can supply Finest Recleaned Qualities of the following Grasses:

PRICES OF SEPARATE GRASSES:				
	Weight per bush.	Per bush.	Per lb.	Per 100 lbs.
Creeping Bent, one of the best grasses for putting greens.....	20 lbs.	\$5.25	\$0.28	\$25.00
Crested Dogtail, is the principal grass in the golf links and putting greens in Scotland. It forms a close sod and stands wear and tear. Should be used in all mixtures for putting greens.....	21 lbs.	10.00	.50	45.00
English Rye Grass, valuable where quick results are desired.....	24 lbs.	2.00	.10	8.00
Fine-Leaved Sheep's Fescue, finest bladed grass.....	14 lbs.	5.75	.45	40.00
Hard Fescue, has a wonderful root formation, forming a dense fibrous mat. Succeeds well in dry situations.....	12 lbs.	2.20	.20	16.00
Kentucky Blue Grass, fancy or double extra cleaned.....	14 lbs.	2.35	.20	16.00
Red or Creeping Fescue, forms a close, rich sod, stands wear and tear. One of the most valuable for fair greens and putting greens.....	14 lbs.	3.65	.28	24.00
Red Top, choice.....	14 lbs.	1.45	.12	9.00
Red Top, fancy or extra cleaned, silver seed.....	32 lbs.	5.25	.18	15.00
Rhode Island Bent, one of the most valuable varieties for putting greens.....	14 lbs.	5.25	.40	35.00
Sheep's Fescue, short and dense in growth. Valuable for lawns and putting greens.....	12 lbs.	2.20	.20	16.00
Various-Leaved Fescue, one of the most valuable varieties, forming a close, rich sod, and stands wear and tear.....	14 lbs.	3.65	.28	25.00
Wood Meadow Grass, useful for sowing where the ground is shaded by trees. Is of fine growth and makes a close sod. In appearance resembling Kentucky Blue Grass.....	14 lbs.	6.50	.50	45.00
White Clover, by some this is much appreciated in lawns having a nice green appearance, but it should not be used for golf links, especially on putting greens.....	60 lbs.	17.50	.30	28.00

Special Grass Mixtures for Special Purposes or Situations will be made up by Us.

EARTH WORM :: :: EXTERMINATOR.

For immediately removing Worms of every kind from Putting Greens, Tennis Courts, Lawns, Garden Plots, Flower Pots, Etc., without injury to Grass or the most delicate Plant or Flower.

An ounce of the Exterminator (about two tablespoonfuls) mixed with one gallon of water, applied with a watering can, and used freely in the ordinary way of watering, will immediately cause the worms to rise to the surface of the lawn or pot, and should at once be picked up and burned, for if left about they would injure birds or fowls.

1/2-PINT BOTTLE,	makes 10 gallons of liquid,	-	-	-	50c.
1 1/2- " "	" 30 " "	-	-	-	\$1.00
2 1/2-QUART " "	" 100 " "	-	-	-	3.00

Mr. E. B. CURTISS, Captain of the Fairfield County Golf Club, Greenwich, Conn., writes:

"Gentlemen:—I am so pleased at the effect produced by the first application of your 'Worm Exterminator' made to-day that I cannot refrain from writing you. Three quarts of the 'Worm Exterminator' mixed with 60 gallons of water sprinkled on the surface of a Putting Green, 60 feet square, covered it in a jiffy with countless squirming nuisances. We feel now that there is a way of escape from what did seem an incurable evil."

Mr. OTTO ANDRAE, of Central Valley, N. Y., states that he has used this "Worm Exterminator" with great satisfaction for destroying slugs and other insects that infested his mushroom houses.

HENDERSON'S FLUID :: :: WEED DESTROYER.

A New and Easy Way to Destroy Weeds, Moss, Grass, etc., in Garden Walks and Carriage Drives.

It completely destroys all weeds, wherever applied, and by its effect on the ground prevents the growth of fresh ones for a year afterwards, thus saving an immense amount of labor in hoeing, etc. For brick walks it is a boon. Its application is easy, being in a liquid form and only requiring to be mixed with water and applied with a watering can or sprinkling cart. If the ground is very dry it should first be sprinkled with clear water so the Weed Destroyer will not soak away too quickly. Where large weeds and docks are to be destroyed it is best to mow or chop off the tops first. Full directions for use with each package.

QUART CAN.	makes	6 gallons, sufficient for	150 square feet,	50c.
GALLON CAN.	" 25 "	" 600 "	" 1.25	
5-GALLON KEG,	" 125 "	" 3,000 "	" 5.00

"I tried your 'Weed Destroyer' and found it so good that I want to order a 5-gallon can."

Mrs. N. H. PIFFARD, Passaic, N. J.
"The tests of your 'Weed Destroyer' have been entirely satisfactory. I congratulate you upon your success in manufacturing a product that meets a public want. We have a great many brick walks in Burlington that are most unsightly, with grass and weeds growing between the bricks, but when they have been treated with your fluid compound, 1 quart to 5 gallons of water, the unsightly vegetable growth was destroyed in a few hours. My brother-in-law, and next-door neighbor, Judge Power, also use it with entire satisfaction."

J. L. WAIT, Editor Burlington Hawk-Eye, Burlington, Iowa.

TOP-DRESSING LAWN ENRICHER WITH THE FERTILIZER SOWER.

The STEVENS FERTILIZER SOWER.

ILLUSTRATED ABOVE.

For Hand Power. For Top-Dressing Lawns.

It sows the "Henderson Lawn Enricher" and all kinds of commercial fertilizers, bone meal, wood ashes, lime, etc., in large or very small quantities. It can also be successfully used for fertilizing strawberry beds, and other garden and field work; is excellent for sifting wood or coal ashes, sawdust or dry sand on icy walks; will also sow damp sand by removing two blades.

The hopper is 34 inches long and holds one and one-half bushels. Weight of machine, 83 pounds. It is well made and nicely painted. Price, \$12.00.

The Henderson Lawn Enricher

Is a clean, portable and convenient lawn dressing which we have found to be never-failing in inducing a rapid and rich green growth. It should be sown broadcast in the spring or fall, though it can be put on during the summer without injury or danger of burning the grass, and a remarkable improvement will soon be observed. It is in every way more desirable than manure, which is so often full of weed seeds. The use of "Henderson Lawn Enricher" entirely does away with the old practice of top-dressing lawns with stable manure, which was so objectionable on account of unsightliness and disagreeable odors.

QUANTITY REQUIRED. For forming a new lawn a 10-pound package is sufficient to go over an area of 300 square feet, or 1,000 to 1,500 pounds per acre, or a smaller quantity for renovating an old one.

PRICES—by Express or Freight—purchaser paying transit charges:

5-pound package,	-	-	\$.25	50-pound bag,	-	-	\$ 1.75

RIANT, RICH GREEN GROWTH IN A FEW
WEEKS' TIME.

Henderson's Ideal "Ball-Bearing" Lawn Mower

Will cut a lawn in one-half the time required with old style, narrow-cut Mowers.

THE HENDERSON "BALL-BEARING" LAWN MOWER is superior to all other Mowers in the following respects: The axes of the revolving cutter, like the axes of a bicycle, work in "ball-bearing" journal boxes or cups, which reduces the friction enormously. These parts are made of the finest case-hardened steel, and will last for years, though we have provided against wear should there be any—so that anyone, by simply loosening one screw and tightening another, can force the cup and balls higher up the cone-shaped ends of the revolving shaft, thereby taking up all possible wear. This adjustment is so simple, yet positive, that it can be set to a hair. Our Mower is also built scientifically correct in other respects, resulting in a phenomenally light running Mower. The castings are lathe-turned and bored, and the journals machine-trimmed, which insures trueness in fitting and smoothness in working, with no rattle and play. The knives, of the finest steel and temper, are sharp and cut like razors, and will keep so if the under knife is kept tightened up to the revolving knives; for then the blades wear to the same bevel, and, in consequence, are self-sharpening.

THE HENDERSON "BALL-BEARING" MOWER has high drive wheels, both of which are connected by gearing to the large, open, non-clogging cylinder placed far enough back to prevent any "kicking up" of the Mower when it strikes heavy grass. The spiral of the knives is correctly proportioned to give a continuous cut, leaving the lawn as smooth as if shaved, entirely free from the corrugated surface left by other Mowers. The handles are braced and reinforced to prevent twisting and breaking when one side of the Mower is held off the ground, and besides the handle is equipped with improved "grips," which keeps the hands in a natural position, gives more power, and is less tiresome than a continued grasp, with wrists twisted, on a horizontal grip. We wish to reiterate that our Henderson "Ball-Bearing" Mower is made without regard to cost—to be the best, most durable and the easiest-working Mower on the market, and while the prices are necessarily a little higher than those of Mowers simply made to sell, yet in the end our Mower will prove much cheaper, aside from annoying delays and repairs experienced with cheap Mowers.

GRASS CATCHERS for the Henderson "Ball-Bearing" Lawn Mowers are of superior heavy duck; bottom of galvanized iron that will not sag nor drag on the ground when filled; they are quickly attached, removed or dumped.

FOR CUTTING TERRACES, Henderson "Ball-Bearing" Mower is unequalled; it being a "train gear" Mower, the cutters remain close to the sod, without bobbing up and down; consequently, for cutting terraces it works just as well when the handle is removed. The "terrace iron" is attached to the roller hangers, then a rope is connected, which allows the operator to stand on the top of the terrace and guide the Mower, as its momentum carries it down the hill, operates the knives and cuts the grass, when it is pulled back by the rope for another swath. **Terrace Iron** are extra, 60c. each.

PRICES FOR HENDERSON'S IDEAL BALL-BEARING LAWN MOWERS.

(Strictly net; no charges for packing or cartage.)

24-inch cut,	11.00;	Grass Catcher Extra,	2.50

HENDERSON'S IDEAL "BALL-BEARING" LAWN MOWER =:-

Has received hundreds of encomiums similar to the following:

"Your 21-inch Ball-Bearing Lawn Mower more than pleases me, and it has so excited the jealousy of my neighbor that he wishes me to order one for him exactly like mine. Please ship it by, etc."

DR. CHAS. R. SMITH, Tioga, Pa.

"Your 24-inch Ball-Bearing Mower I find exactly suited to my use. My man tells me that it runs easier than our old 16-inch Mower."

HORATIO R. NIGHTINGALE,
Providence, R. I.

"We used your Henderson Ball-Bearing Mower all last summer, and must say that it is the best machine we have ever tried on our lawns, and we have about every make in use, but the men all agree that yours is the 'boss'."

WM. H. PLATT,
Comptroller, Lake Side Cemetery, Erie, Pa.

"I have just had my lawns cut with the 24-inch Mower (Henderson Ball-Bearing) that you shipped me. The ease with which it runs and the quality of the work done delights me. I have had several machines prior to this one, but none could compare with the Henderson."

JAMES HART,
Christopher, King Co., Washington.

"I have used the Ball-Bearing Lawn Mower all summer, and it is the best machine I have ever used. It lays close to the turf in long grass, while other machines bob up and down, and the knives never clog up."

WILLIAM STEWART,
Springfield, Mass.

"I am convinced that your Ball-Bearing Lawn Mower is not only constructed on scientific principles, but is superior to all others. In actual work it saves about half the time, and works easily and charmingly."

JOHN V. N. STANDISH,
(Pres. Lombard University), Galesburg, Ill.

"We have thoroughly tested, your most admirable Ball-Bearing Lawn Mower. It walks right through our wiry, tough Bermuda grass, cutting it as easily as if blue grass."

JAS. E. JOUETT,
Rear Admiral, U. S. Navy, Orlando, Fla.

The above illustrates the "Henderson" Ball-Bearing Lawn Mower with Grass Catcher attached.

The 24-inch machine drawn by pony. Mowing terraces.

THE HENDERSON "PUTTING-GREEN" MOWER.

THE LATEST AND BEST. CLOSE AND SMOOTH CUTTING.
BALL BEARINGS. EASY RUNNING. SEVEN BLADES.

We offer this new mower to Golf Clubs as the very best mower ever devised for smooth, close work on putting greens. It has a seven-bladed revolving cutter working in ball-bearings and speeded high, thus leaving the cut surface of the "green" absolutely free from corrugations, and almost as smooth as a billiard table. The knives can be set so low that they will fairly shave the ground if desired; though on a level, well-rolled green, with close, fine turf, a quarter to a half-inch clip leaves the surface in the nicest condition for putting. The aggravation experienced by many golfers after driving off in good shape and coming through the fair green equal to Col. Bogey, only to fall down in putting on account of the uneven surface of the "green," impresses the victim with the importance of having a mower used that will leave the surface as smooth as possible. Two of our firm are "golfs," and have been all through it, and this special new mower of ours is the result of our experience and experiment. We gave three or four of these mowers to various Golf Clubs for trial the past summer and all have reported on them in enthusiastic terms. Alexander Finlay, the well-known instructor and greenkeeper of the Newark Athletic Club, also of the Eagle Nest Golf and Country Club in summer, says: "It is the best mower for putting-greens that I have ever seen either in this country or in Scotland. It cuts the turf so short and even that it is like putting on a carpet."

Henderson's "Putting-Green" Mower is a thoroughly high-grade machine, carefully built of finest material, the knives especially being of finest steel. It runs easy considering the number of knives and fine cut. Guaranteed satisfactory.

HENDERSON'S BORDER AND TERRACE MOWER.

Especially designed to cut the grass on borders—the narrow strips of sod, sometimes only a few inches wide—between flower beds and walks, where a side-wheel mower would have one wheel down in the gutter, and in consequence the mower would cut into the sod. In our Border Mower a large light cylinder extends the full width of the mower and keeps the machine level with the surface and does perfect work. This machine is also useful for regular lawn work. It is very light running, and will give thorough satisfaction.

AND OTHERS TOO NUMEROUS TO MENTION.

The New Henderson Horse Lawn Mower

FOR LARGE LAWNS, GOLF COURSES, PARKS, CEMETERIES.

A COMBINED MOWER and ROLLER.

FULLY WARRANTED. THE LATEST AND BEST.

Knives can be raised or lowered instantly. Side draught (applicable to either side) keeps horse off uncut grass.

THIS is the best horse-power mower manufactured, simple in construction, very durable; nothing but the very best steel and iron are put in it. It is quickly adjusted to cut high or low, and the arrangement for throwing in and out of gear and for raising the knives when passing over stones, rough places or roads is operated from the seat. The side draught (applicable to either side) keeps the horse on the cut grass and prevents trampling down that which is to be mown. The revolving knives are "high speeded," making a continuous cut and leaving the surface of the lawn as smooth as velvet. These mowers are fitted with a two-section roller and weigh, exclusive of shafts, 30-inch cut, 445 lbs.; 35-inch cut, 490 lbs.; 40-inch cut, 540 lbs.; to this may be added the weight of the man if he rides, thereby rolling the lawn with a very respectable weight at the same time it is cutting; or the cutter may be thrown out of gear by the movement of a lever and the machine be used for rolling alone. The benefit to a lawn from rolling is not sufficiently appreciated. The action of freezing and thawing causes the ground to heave; moles and other pests loosen the roots of the grass, and if the sod is not kept pressed back the grass is apt to be injured or killed, leaving the lawn full of bad spots. Moles will not trouble lawns where frequently rolled. The most beautiful lawns in this country were improved and are now maintained with our horse mowers.

PRICES for the HENDERSON HORSE MOWER, complete with seat, shafts and side draught. Strictly net; no charge for cartage or boxing.

30-in. cut, \$60.00.

(Packed weight, with shafts, 610 lbs.)

35-in. cut, \$67.00.

(Packed weight, with shafts, 660 lbs.)

40-in. cut, \$75.00.

(Packed weight, with shafts, 690 lbs.)

HENDERSON'S IMPROVED HORSE BOOTS.

THESE boots attach to horses' hoofs to prevent them from cutting into and marring the surface of the lawns, which is very apt to happen with naked feet when the ground is moist or soft. The leather used in these boots is of the very best quality, and will not stretch out of shape like that used in cheap boots. The soles are two thicknesses of best sole leather, well riveted together. The straps draw the upper part of the boot tightly around the average-sized hoof. If boots are wanted for a very large-footed horse, it should be so stated in ordering. Tall boots that fasten around the leg we no longer sell, for they often chafe the hair off.

PRICE: Henderson's Improved Horse Boots, per set of 4, \$9.00.

HENDERSON'S "CHAMPION" SOD-CUTTER.

A horse-power machine for cutting sod in long strips; an important and valuable implement for golf grounds, parks and other places which have much sod laying or repairing to do. It cuts the sod of uniform width and thickness, in any length, so that it is particularly adapted to giving solidity to slopes in cuts and on embankments, working equally well on level or uneven surface, cutting both ways with the land, and leaving no sod uncut, being light of draft, easily managed, strong, neat and durable. It is the best and cleanest sod-cutting machine in America. Has a REVERSIBLE KNIFE made of one piece of steel. While one side dulls, the opposite edge is getting sharpened; cannot get choked. An Adjustable Roller regulates the thickness of the sod from one-half inch to two inches; the front roller swings back under the guide-shoe and takes the weight when the machine is not cutting. The guide-shoe can be changed to either side in a minute; no friction or injury to the grass. The knife can be cleaned without turning over the machine.

One machine will cut from 30,000 to 40,000 square feet per day, thus doing the work of forty men; the expense saved between cutting by hand and with horse power in one day to pay the price of our machine. Instructions for operating furnished with every machine. **Price, \$25.00.**

The Apollo Rotary Lawn Sweeper.

A thoroughly satisfactory machine for sweeping the lawn after mowing. It gathers up and throws into the large collecting box all cut grass, leaves, small stones, sticks, etc.; nothing escapes. When the box is full it is quickly dumped by pulling a cord. It works something like a carpet sweeper, having revolving flexible fibre brushes. It can be set low or high, as desired. It is simple, strong, and easily pushed by a man or boy, leaving the lawn in beautiful condition, clean, bright and green. While essentially a lawn sweeper, yet it is equally valuable for sweeping walks, stables, warehouses, etc., for which rubber-tired wheels can be supplied at an extra cost. **Prices, 20-in. sweep, \$10.00; 28-in. sweep, \$12.00.**

HORSE-POWER LAWN . . . SWEEPER.

A revolving brush in front sweeps the sod clean and throws the sweepings backward into a large box in the rear. This box can be dumped without stopping. Sweeps 40 inches wide.

The sweeper gives you a perfect lawn as soon as the sweeping is finished instead of looking gray for several days owing to the withered cut grass.

If the sweeper and lawn mower are run in opposite directions, the lawn will be the same shade of color all over. **Price, \$67.00.**

Henderson Patent Water Ballast Rollers.

For Lawns, Golf Grounds, Driveways, Etc.

Weight May be Increased
or Lightened
at Will.

THE advantages of a Roller, the weight of which can be increased or lightened at pleasure, can scarcely be overestimated. Often on light or sandy soil, or on newly-made lawns, or in early spring when the ground is moist, or after a rainy spell, a lighter weight Roller is a necessity; then on thick sward or on hard soil, on walks and roads, a heavy Roller is needed. With a **Henderson Water Ballast Roller** one can secure any weight desired, between minimum and maximum, by simply removing a thumb-cap from each end and filling the two hollow sections with as much water or sand as may be needed, which is easily and quickly done with a hose or through a funnel; and the Roller is as quickly emptied. The inside being heavily galvanized, it will last for years.

These are perfect Rollers, and do perfect work on lawns, tennis courts, golf grounds, roads, walks, etc. They are high grade in every respect, being carefully manufactured of best materials. They will be found practically noiseless and very durable. The rolling surfaces are very smooth and will not gather grass or soil; the sections fit closely, leaving no mark, and the diameters are large, insuring a lighter draft for a given weight than is usual with equivalent weight.

THE HENDERSON
PATENT WATER
BALLAST ROLLER—
MAN POWER.

THE HENDERSON PATENT WATER BALLAST ROLLER—HORSE POWER.

THE HENDERSON PATENT Water Ballast Roller.

FOR MAN POWER.

Weighs 300 lbs.; loads with water or sand up to 600 lbs.; tracks, 24 inches; diameter of drums, 24 inches; counterbalanced handle, stands erect when not in use.

Price, \$26.00.

THE HENDERSON PATENT Water Ballast Lawn Roller.

FOR ONE HORSE.

Weighs 900 lbs.; loads with water or sand up to 1,500 lbs., or with driver and extra weights in box up to about 1,800 lbs.; tracks, 3½ feet; diameter of drums, 28 inches.
Price, complete with seat, shafts and singletree, \$90.00.

HENDERSON'S SUPERIOR IRON HAND ROLLERS.

These are very superior Rollers; the edges are beveled to prevent marking; the faces are ground smooth so they will not pick up and carry lumps of earth; the axles are of steel; the sections fit closely and the handles are of our improved design, will not break and are counterbalanced so they always keep up from the ground, clean and out of the way.

The weights given are actual, which fact should be taken into consideration in comparing prices with rollers of manufacturers that run 15% to 25% less than advertised weights.

The benefit derived from using a roller on the lawn is inestimable. Freezing and thawing causes the ground to heave, and if not firmly pressed back with a roller before hot weather, the grass is apt to be killed or injured, leaving the lawn full of bare spots. A lawn on which a roller is frequently used is never troubled with moles.

From 300 lbs. to 500 lbs. is the weight chosen for one-man power for average level lawns. Remember that the heavier the roller used on your lawn the finer sward you will have.

WEIGHT BOXES (see illustration) can be supplied on any roller larger than number 3, at an extra price according to the size of roller, as quoted in column to the right. The weight box weighs about 50 lbs. and may be loaded with stone or iron to any desired weight.

HORSE POWER ATTACHMENT

FOR OUR HAND ROLLERS.

This attachment (illustrated on the right) is sold as an extra. It can be applied to any of our Hand Rollers, but will only be needed on the heavier styles—on which it will often be found of service, especially on hilly lawns.

Price (not including roller), complete with whiffletree, \$5.50.

"SPECIAL" LAWN
AND GOLF GROUND
ROLLER.

HENDERSON'S SUPERIOR One-Horse Iron Rollers.

"LOW PRICE"
ONE-HORSE
ROLLER.

HENDERSON'S
SUPERIOR

ONE-HORSE IRON ROLLERS.

For use on Lawn, Field, Golf Courses, Driveways, etc.

These rollers are of superior quality and finish, having smooth machine-turned faces and attractively decorated woodwork. They are the lightest draft rollers of equal weight on the market, being perfectly balanced and pulling directly from the axle, which is of steel. The weights given are actual, which fact should be taken into consideration in comparing prices with rollers of manufacturers that run 15% to 25% less than advertised weights.

"SPECIAL" LAWN and GOLF GROUND ROLLERS.

For One Horse—Illustrated above.

This style is especially adapted for use on lawns, golf grounds, etc., where a heavy roller is desired. Outer edges beveled; can be loaded to increase weight. Price includes shafts, seat and weight box.

No.	Diameter	Sections	Track	Actual Weight	Net Price

Henderson's Superior Iron Rollers

Are of best quality iron, free from blow holes, and have smooth machine-turned faces; the axles are of steel, and they are the lightest draft rollers on the market, pulling directly from the axle, and so perfectly balanced that no weight is thrown on the horses' necks. The woodwork is handsomely painted and decorated.

The weights given are actual, which fact should be taken into consideration in comparing prices with rollers of manufacturers that run 15 to 25 per cent. below advertised weights.

The weight boxes on rollers allow them to be loaded with iron or stones when extra weight is required.

STEEL ONE-HORSE ...and... TWO-HORSE ROLLERS

Especially designed to smooth and keep in perfection
Lawns, Drives, Walks and Grounds of
Golf, Tennis, Athletic and Country
Clubs and Gentlemen's Places.

The drums are of rolled sheet steel. Of light draught and turn with the utmost ease. Axle of polished steel, Babbitted and self-oiling bearings; drums revolving independently on the shaft when turning corners; practically indestructible. Substantial weight box, by this means the weight can be increased 25%. It can be used lighter than the lightest or heavier than the heaviest, thus suiting the varying requirements.

IMPORTED SCOTCH CHAIN HARROW.

FOR SURFACE
PULVERIZATION . . .
and
. . . LEVELLING.

FOR SEED
COVERING.

FOR SMOOTHING
DRIVEWAYS and
RACE TRACKS.

The Scotch Chain Harrow is being now so much sought after for undermentioned purposes that we have imported and carry in stock a few of each size to prevent delay in filling hurry orders. It is one of the best implements for pulverizing the surface of the soil, levelling and smoothing, and is also splendid for covering grass seeds, etc., being superior to the Brush Harrow for this purpose. Used on driveways and race tracks, it smooths the surface, eliminating ruts and footprints. It is made of wrought-iron links, as illustrated above, and is very durable.

PRICES AND SIZES.

One-horse size, 5 x 6 feet,	- - - -	\$18.00
Medium two-horse, 6 x 7½ feet,	- - - -	25.00
Full two-horse size, 7½ x 7½ feet,	- - - -	30.00

Whiffletrees and neck yoke, extra, \$3.25.

LIGHTNING ROAD SCRAPER.

LIGHTNING ROAD SCRAPER.

A popular and handy light road scraper and leveler for private places. It is also used extensively for shaping highways where the work required is not too heavy, being easily operated by two horses and one man. It has a solid steel blade and steel frames and can be quickly adjusted for any pitch or angle. The blade is 5 feet long by 17 inches wide. Weight of the machine, 206 lbs. Price, \$35.00.

SURFACE GRADER.

The Surface Grader is used for removing the plowed ground from the sides of the road. The steel blade measures 30 inches long by 15 inches wide. Light and handy. Weight, 60 lbs. Price, \$8.50.

SHUART LAND GRADER

Especially adapted for Fine Grading, producing a beautifully even surface, paring down knolls and evenly distributing the earth in depressions.

This machine is borne on three wheels, the front one being a caster wheel, allowing the machine to be turned short about. The blade is raised and lowered by a hand wheel and can be locked at any point by a spring bolt operated by the foot.

The blade is sharpened on both pole holds the machine off the to the king bolt of the caster the draft chain and subjects the ever in turning.

For ordinary work but one management of team and maplatform, holding the reins in other hand upon the wheel, the

edges and is reversible. A horses, the bolt attaches frame, is independent of team to no strain whatman is required for the chine. Standing upon the one hand and with the operator scans the surface

as he proceeds and adjusts the blade to the cut required. The scraper filled, he carries the load to its destination, and without stopping the team, readjusts the blade for spreading the earth, which passes beneath the blade in a smooth sheet as the machine proceeds. The earth can be denoed in a heap or can be spread as desired.

The blade is 5½ feet long by 14 inches in width, and as the fenders prevent the earth from escaping at the ends of the blades, the capacity of this machine for moving earth is much greater than that of other scrapers of equal blade area. The lightness of draft in view of the amount of earth moved is accounted for by the smooth, even cut with which it gathers its load and the fact that the load is in a measure borne by the wheels.

PRICES (including double trees and neck yoke):

No. 1, for lawn grading and simple levelling, - - - - \$80.00

No. 2, with digger attachment, - - - - 90.00

SURFACE GRADER.

Lawn and Stable Barrow.

Extra Large
and
Extra Strong.

Our **Lawn and Stable Barrow** is designed for extra heavy work and has a large capacity, adapting it for manure, lawn litter, etc.; box 25 inches wide by 32 inches long by 18 inches deep.

Price, \$5.00.

THE Regulation

Garden Wheelbarrow.

A superior barrow, handsomely painted and striped; iron leg braces, bolted, not screwed on, run under the legs, forming a shoe to slide on, avoiding racking the barrow; iron bands shrunk on hubs. No pine used in these barrows.

Steel Garden and Farm Barrow with Tubular Steel Frame.

This style is especially adapted to wheeling dirt, manure, etc., having a deep steel tray, made in one piece, with the edges turned over a ½ inch steel rod; the frame, of tubular steel, is so constructed that in dumping forward the barrow does not run back. Size of tray, 27x33 inches; weight of barrow, about 70 pounds.

Price, \$6.00.

CART HARNESS, No. 275.

Bridle, ¾ in.; pigeon wing blinds; lines, ¾ in.; saddle, kersey bottom; breeching, 2½ in.; collar, hogskin. **\$18.00.**
Heavier Grade (No. 280), **\$22.00.**

CART HARNESS, No. 275.

The "Henderson" Barrow.

This barrow is light, strong and durable, has a steel wheel and axle and oil-tempered springs, and we do not hesitate to say that it is the best barrow on the market and as well painted, striped and varnished as a buggy. While its carrying capacity is from 300 to 500 pounds, its weight is less than 40 pounds; fully warranted to stand the roughest usage.

The tire being wide makes it more desirable for lawn and garden use and a stronger wheel for the pavements. The shoe brace, running from the rear of the body to the foot of leg, is a great protection to the leg against breakage, and prevents it from sinking into soft ground. The barrow is made of selected material, and will outlast several of the cheaper, heavy, clumsy barrows. Weight, 39 pounds; body, 26 inches by 22½ inches by 12 inches deep; diameter of wheel, 20 inches; width of tire, 1½ inches.

Price, \$5.00.

Steel Tray, Wood Frame, Steel Wheel Canal Barrow.

Frame of selected hard wood; iron braces form a shoe so the barrow slides when set down, without racking it. Heavy steel wheels 17 inches in diameter; tread 1½ inch. Trays of one piece of sheet steel, about the size of an ordinary wood canal barrow, 28 inches long by 31 inches wide; the edges are turned over a ½ inch steel rod, passing entirely around the tray; painted one coat of heavy paint.

Price, \$4.00.

Bolted Wooden Canal Barrow with Steel Wheel.

One of the strongest canal barrows made. The front of tray is supported by a wooden cleat, bolted as well as by the heavy iron braces; handles and legs of hard wood. Tray full size with edges shaved; steel wheel that will not fall to pieces like the common wooden wheel.

Price, with steel wheel, \$2.25; with wooden wheel, \$1.85.

HORSE DUMP CARTS.

For Farms and Private Grounds.

These are first-class Carts in every particular; made entirely from hard wood; running gear is painted red and the body blue; iron axles; wood hub wheels; the shafts are fitted with back and draft chains, complete.

HENDERSON'S . . .

Lawn and Leaf Hand-Cart.

Especially adapted for carrying large quantities of light material, such as cut grass, leaves and litter; the box is deep and flaring—measures at the bottom 28 inches wide by 48 inches long, 10 inches wider at the top; it is 24 inches deep; nicely painted green and vermilion, striped and varnished; 30-inch wheels.

Price, \$15.00.

LEAF RACK.

HAND-CART BOX.

SPRINKLER.

"GEM" SPRAYING PUMP.

COPYRIGHT
1897 BY
PETER HENDERSON & CO.

HENDERSON'S Water Barrel Trucks and Accessories.

The Barrel is raised from the ground, carried to the place desired, and can be readily disconnected from or attached to the truck while barrel is either full or empty. We supply as extra attachments the following: A Box with trunnions and spring catch, making a very superior dumping Hand-cart. A Sprinkler, invaluable for watering lawns and sprinkling walks. Water is turned on and off by hand wheel and ball valve. A Leaf Rack, very useful for removing leaves and litter. A "Gem" Force Pump for spraying, etc. Prices:

Truck and barrel, 1½ in. tire, \$10.00	Truck and barrel, 3½ in. tire, \$12.00	Extra trunnions, per pair, \$0.50	Leaf Rack, \$5.00
" " " 2½ " 11.00	Extra barrel, with trunnions on, 2.75	Hand-cart box, 3.00	Sprinkler Attachment, 3.25

(If truck and trunnions without barrel are wanted, deduct \$2.25 from prices of trucks with barrel.)

The "Henderson" HAND BUCKET PUMP.

This is the best and most durable portable hand pump in the market. Working parts are made of solid brass with large air chamber, and is double acting, throwing an absolutely continuous stream, either solid or in a fine spray, as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing liquid insecticides and fungicides on low trees, shrubs, plants, etc., and by altering the nozzle it can be used for washing carriages, windows, etc. (See cut.) Price, with 4 feet of hose and combination spray and stream nozzle, \$3.75; or, with extra 7 feet section of hose and pole connection for tree spraying, \$4.75.

"LITTLE GEM" Horse Power Sprinkler.

For Sprinkling Lawns, Driveways,
Trees, Gardens, etc.

Will spread water 18 feet wide, or the spread may be reduced to any desired width, down to 1 foot, at the will of the operator; or it can be readily adjusted to apply one or two narrow streams at one time, directly onto vegetables or other plants in rows, thus sprinkling two rows at one time.

"LITTLE GEM"
HORSE POWER SPRINKLER.

The "Little Gem" Horse Power Sprinkler is the only sprinkler adapted for spreading liquid manure, as it will not clog. The valves are operated from the driver's seat, thus giving him perfect control of the flow at all times, each side working independently of the other. Capacity, 150 gallons; tire, 4 inches wide; wheels, 4½ feet high; tracks (outside), 4 feet 10 inches wide; gear, painted red; tank, green; weight, about 800 pounds.

Price, \$95.00.

Henderson's "GEM" Spray Pump.

Clamps to the chine or side of any barrel, and is intended to fill a want for a low-priced pump. It has not the power or capacity of the larger and more expensive spray pumps, but where there are only a few trees, bushes, vines, etc., to be treated, it will answer admirably for both applying insecticides and fungicides, and by altering the nozzle it is adapted for sprinkling walks, watering flower-beds, washing windows, carriages, etc. The pump can be quickly removed from the barrel.

PRICES (without barrel or truck):

Gem Outfit "A." Pump fitted with two feet of suction pipe and brass strainer; 5½ ft. ½ in. hose and nozzle, \$5.00.

Gem Outfit "B" is the same as "A," excepting the hose is 12½ feet long, fitted with pole connection to spray trees, \$6.00.

The Henderson DOUBLE HOPPER Wheelbarrow Seeder.

SOWS GRASS SEED MIXTURES
AS WELL AS
HEAVY SEEDS OR LIGHT CHAFFY SEEDS.

This is a superior seeder. One side of the seed box is adapted for all such heavy seeds as clover, timothy, millet, alfalfa, Hungarian, etc. The opposite side handles the light chaffy seeds, as Red top, Kentucky blue, orchard grass, etc., as well as grass seed mixtures for golf, pasture, hay, lawns, etc. The machine may be easily regulated to sow any desired quantity per acre, sowing it accurately and evenly the whole length of the hopper—14 feet—and it does not clog up. The total weight of the machine is only 40 pounds. The hopper is perfectly balanced and is close to the large wheel—giving greatest force with least exertion, and leaving light weight on the operator. Every machine warranted to do good work, and of especial value on a windy day. Full directions with each seeder. Price, \$10.00.

THE HENDERSON
WHEELBARROW SEEDER

FOR SOWING
GRASS SEEDS.

LAWN SPRINKLERS

HENDERSON'S

4-Arm Lawn Sprinkler
(with Ball and Basket
attachment.)

A GOOD Lawn Sprinkler is a necessary adjunct to all well-kept lawns and grass plots. The water is distributed finely and evenly, and by leaving a sprinkler in one position long enough the grass can be thoroughly saturated, thereby insuring a luxuriant, fresh greenward during the hottest summer drought. All of the sprinklers that we catalogue work satisfactorily with a water pressure of 30 lbs., excepting the **Henderson 8-Arm Lawn Sprinkler**, which should have a pressure of not less than 40 lbs. The "**Water Witch**" and "**Niagara**" sprinklers work under a very low pressure than any other sprinklers we know of. All sprinklers are fitted to attach to the regulation $\frac{3}{4}$ -inch bore garden hose.

We are frequently asked if a tank or pond of water at a certain elevation will work a lawn sprinkler. The following rule is applicable to all such cases, viz.: Water at every foot of elevation gives half a pound pressure. The force to work a sprinkler requiring 20 lbs. pressure, the tank or body of water would have to be elevated 40 feet, etc.

"COMMON SENSE" SPRINKLER.

HENDERSON'S ("4-ARM" and "8-ARM") LAWN SPRINKLERS.

The most popular lawn sprinkler made. It can be attached to hose and placed anywhere on the lawn, where it serves the double purpose of a beautiful fountain and of thoroughly saturating the grass or garden. The water is distributed in fine drops over an area of 60 to 100 feet in circumference, according to the pressure on the water. An ornamental standard, about four feet high, is surmounted with long perforated arms, which revolve, so the beautiful sprays are constantly changing. **Prices:** for a 4-arm sprinkler, \$3.00; for an 8-arm, \$3.50.

BALL and BASKET. This fits on top of the Henderson Sprinkler, and the stream of water keeps the silvered ball dancing on its summit up in the air. When the ball falls the basket catches it, and it rolls into the centre and is again raised by the water. **Price, \$2.75 extra.**

COMMON SENSE LAWN SPRINKLER.

There are no moving parts to get out of order, no arms to get bent, stopped up, etc. The Sprinkler may be cleaned in a moment, should it become choked; by simply loosening the nut, the force of water will drive out any dirt that has accumulated.

In use the most beautiful water effect is produced, there being a large umbrella spray, very fine, as well as jets nearly upright; these jets not only add to the beauty of the fountain, but by falling upon the umbrella spray break it up more and dash the water over all parts of the large circle. The parts all being rigid, there is little loss of pressure.

While the area covered is very large, yet the spray is so fine that comparatively little water is used; not only this, but the spray being very fine, the sunshine produces most beautiful rainbow effects.

The diameter of the circle will vary with the pressure; good to heavy pressure will wet a circle 20 to 30 feet in diameter. **Price, \$1.25 each.**

THE "COMET" LAWN SPRINKLER.

Will Sprinkle an Area FOUR TIMES Greater than any other Sprinkler.

By means of the swiftly revolving arms and intermediate gears the upper part of the body is made to revolve slowly around, carrying the hose nozzle, from which a large stream of water is thrown far out beyond that thrown by the arms, thereby covering four times the space of any other stationary sprinkler. With an ordinary force of water it will thoroughly sprinkle a space of 80 feet in diameter. The hose nozzle and tips on ends of arms are adjustable, so that it can be adapted to as small a space as desired. Excepting the legs, it is made of solid brass and nicely nickel-plated. Most substantial and durable as well as the most attractive and useful sprinkler ever made. **Price, \$5.00.**

THE "COMET" SPRINKLER.

THE "WATER WITCH" LAWN SPRINKLER (without stand).

The ... "WATER WITCH" Lawn Sprinkler.

(With or without Stand.)

An effective device for sprinkling lawns, gardens of flower beds. The water flows with unimpeded force, and is divided and deflected by the two lips of the swivel piece, which it causes to revolve rapidly, scattering the water in fine drops and evenly over a circular area of 25 to 40 feet diameter. It works more satisfactorily with a very low pressure of water than any sprinkler we know of.

Price, without stand (i. e., with spur to stick in the ground) (see cut), 50c. each; by mail, 60c. each.

Price, with stand (cannot be mailed), \$1.00 each.

THE "ARC"
SPRINKLER.

The "ARC" LAWN SPRINKLER.

Will sprinkle either a half or full circle.

We consider this one of the most durable and satisfactory sprinklers ever placed on the market; it sprinkles either a full or half circle. When set to sprinkle a half circle it can be placed close to a walk and while wetting the lawn yet allows one to pass on a dry walk. The distributing channels of this sprinkler are large and thus there is no chance to clog. It will sprinkle a circle from two to forty feet, according to water pressure. The operation of changing from a whole to a half circle is so simple that a child can work it. (See cut.) **Price, with spur to stick in the ground, \$1.50, or by mail, \$1.60.**

... The "NIAGARA" LAWN SPRINKLER.

An unequalled low pressure Sprinkler. Under a pressure as low as 5 pounds it will distribute a spray of uniform density over an area 15 feet in diameter, and with a water pressure of 25 pounds or over it will cover an area of 30 feet or over in diameter. It is very unique and simple—with no revolving parts to wear or get out of order—and by simply turning a knurled sleeve any desired density of spray can be obtained. **Price** (with spur to stick in the ground), 45c. each, or by mail, 50c. each.

"MAID OF THE MIST" Three-Arm Lawn Sprinkler.

This fills the want for a low-priced arm Sprinkler; it is compactly and strongly made with phosphor-bronze bearing, and will cover a space 48 feet in diameter with suitable pressure of water. The top and arms are brass, nickel plated, stand and legs of iron, handsomely japanned. The water flows freely through an unobstructed channel, so there is no clogging—it stands 12 in. high. (See cut.) **Price, \$1.25.**

MAID OF THE MIST.

THE "FROG" LAWN SPRINKLER.

The "Frog" LAWN SPRINKLER.

The "Frog" Lawn Sprinkler is an attractive novelty for watering lawns; it is handsomely enameled in green and mottled; it sprinkles an area of 20 to 40 feet in diameter, according to the water pressure; fits on 3/4-inch garden hose. (See cut.) **Price, 50c. each, or mailed for 75c.**

The Traveling Lawn SPRINKLER.

The Traveling Lawn Sprinkler, under an ordinary pressure of water, will roll itself slowly and steadily in any direction, either in a straight line or in a circle of any diameter desired. It can be set to travel anywhere from 15 to 500 feet per hour, as preferred. Can be changed from the lowest to the highest speed in a moment. It can be gauged to throw the water over a swath anywhere from 5 to 50 feet in width. It can be used as a stationary sprinkler by throwing it out of gear. With a pressure of water as low as 20 pounds it will drag 75 feet of hose, while with a pressure of 60 to 70 pounds, it will carry 200 pounds extra weight and drag as many feet of hose.

It is as indispensable to any well-kept lawn as water, and it reduces the application of that much-needed element to a pleasure. It works to perfection—in fact, doing the work more thoroughly and in less time than a person could do it—needs less attention—set the machine and there you are. The Traveling Sprinkler, even when stationary, is equal to all others; and its ability to move itself over the lawn makes it of the greatest utility. (See cut.) **Price, \$14.00.**

THE TRAVELING LAWN SPRINKLER.

BASS BROOM WITH SCRAPER HOE.

For lawns and walks. It can be used to push, pull, sweep, chip or dig.

ENGLISH BILL HOOK.

Very handy for trimming shrubbery, hedges, etc., where a long-handled hook cannot be used. Price, \$1.35.

HENDERSON'S SOD PERFORATOR.

An invaluable tool to aid in renovating bad spots in lawns, grass plots, putting greens, etc. It is operated like a rammer, the lower surface being provided with spikes which puncture the sod, leaving small holes into which much of the seed or fertilizer drops when broadcasted, thus preventing its being blown or washed away. The holes are filled with soil by the first rain, which covers the seed so it can germinate. Price, \$3.00.

BRUSH AXE.

This is an excellent tool for trimming out underbrush, cutting down old hedges, etc. Price, handled, \$1.00.

ENGLISH TURFING SPADE.

For lifting sod evenly, rapidly, and without breaking. \$5.00.

Turf-Cutting
Axe,
\$2.25.

**INDESTRUCTIBLE TREE PROTECTOR.
(THE ARNDT PATENT.)**

This Tree Protector is the most sightly, most indestructible and the most effective.

One band is sufficient to protect a tree for years, making them cost almost nothing.

It consists of a strip of thin brass, 1 1/4 inches wide, the lower edge slashed into fringe with tooth-like perforations above. When tacked around the tree no crawling insect can pass the protector. It will absolutely prevent Canker Worms, Caterpillars and all climbing and creeping insects from getting up the tree. Price, 15c. per foot, 10 feet and over, 14c. per foot.

WHEEL SCUFFLE HOE.

Works very easily; cuts off all weeds in garden walks and roads. 9-inch blade, 7-foot handle, 2 wooden wheels, with scraper, \$1.50.

"HALF MOON" GRASS AND TURF-EDGING KNIFE.

For trimming the sod around borders of walks, etc. Price, with handle, 50c. each.

"PLANET" LAWN AND TURF EDGER.

This little tool trims the turf around the edges of the flower beds, walks, roads, etc.; the revolving cutter does perfect work, either on a curved or straight border, edging accurately at just the correct angle, and at the speed of a mile an hour, while the hoe cleans the bottom of walk. The hoe can be removed if desired. It is invaluable in giving a finished appearance to the lawn. Weighs 26 pounds. Price, complete, \$6.00.

**IMPORTED
ENGLISH RIVETED-BACK
GRASS HOOKS.**

Thin, sharp blades, strengthened by a riveted back, light and rapidly handled.

Small, 50c.
Medium, 55c.
Large, 60c.

**COMMON GRASS HOOK
OR SICKLE.**

A good American hook that we offer to meet a demand for a low-price hook. Medium size, 25c.; full size, 30c.

REVOLVING SOD TRIMMER OR BORDER CUTTER.

A splendid tool for trimming the turf around the edges of walks and flower beds. A revolving knife enables the work to be done with rapidity.

TO OPERATE:—The forward hand, holding the tool, should rest against the forward leg just above the knee, and the knee should assist in pushing the trimmer (as is sometimes done in shoveling earth); this prevents the knife from cutting in too deep.

Price, \$1.25.

SERRATED GRASS HOOK.

The peculiar wavy cutting edge makes it a very rapid and easy grass trimmer.

Price, 50c.

**IMPORTED ENGLISH
RIVETED-BACK
LAWN
SCYTHE.**

Light and thin broad blades, strengthened by a riveted back. 32 inches, \$1.40; 34 inches, \$1.50; 36 inches, \$1.60; 38 inches, \$1.70.
SCYTHE SNATHS OR HANDLES.
With patent fastening. Price, 8c. ea.

GRASS EDGING OR BORDER SHEARS.

For trimming overhanging grass around edges of walks, etc. Price, 9-inch blades, \$2.50; or with wheel, \$2.85.

"Trowel Shank" Grass Shears.

Solid steel, of finest quality and temper; 7-inch blades. The raised, trowel-like handles keep the knuckles off the ground and allow smoother cutting, \$1.00.

HEDGE SHEARS.

Used for both trimming hedges and cutting grass; English manufacture.

8-inch blades...\$1.25; with notch...\$1.50
9 " " ... 1.50; " " ... 1.75
10 " " ... 1.75; " " ... 2.00

The notch is at the heel of the blades and is for cutting small branches.

AUTOMATIC SELF-CLEANING LAWN RAKE.

A backward motion of the operator will clean all the teeth at once, thus avoiding cleaning the teeth with the fingers. Made of best hickory.

20-teeth, 90c. each. 38 teeth, \$1.15 each. 52-teeth, \$2.00 each.

LAWN SHEARS.

For cutting grass under shrubs, fences, etc. Price, with two wheels, 9-inch blades, \$3.00.

The Perfection MOLE TRAP.

The best and most complete Mole Trap, easy to set, and cannot "startle" or injure the operator. It will catch moles when quite deep in the ground, and there being no pin or other obstruction projecting into the run, there is nothing to frighten or disturb the mole as it passes, and in doing so raises the ground over the "run" just enough to spring the trigger, which must firmly rest on the soil over the "run." The points of the pins being constantly in the ground, it cannot catch or injure chickens or other domestic animals. Being made of metal it cannot warp or get out of order. It can be set close to plants without injuring them, and it can also be set touching a wall, fence, etc. \$1.25 each; 3 for \$3.50; \$13.00 per dozen.

HENDERSON'S LIFTING WEEDER.

A chisel blade cuts off the weeds; the trigger holds them so they can be pulled out. 60c. each.

Henderson's Cane Weeding Gouge.

A very useful and convenient tool for cutting weeds out of lawns without marring the surface. Price, 50c. each.

Chisel Blade Weed Cutter.

With foot-rest so it can be pressed, cutting off roots of weeds without marring the lawn. Price, 50c. each.

REVERSIBLE STEEL LAWN RAKE.

Heavily tinned steel teeth. The arched teeth for leaves and

litter, and the opposite side for fine cut grass. Twenty-four teeth closely set in a 21-inch head. Price, 50c. each.

WOODEN LAWN RAKE.

Best selected three bow, 24 teeth varnished head. 35c. each, \$3.50 per dozen.

WHEEL LAWN RAKE.

The wheels enable it to ride over the lawn smoothly, without digging into the sod. The pointed teeth being adapted to grass and the back of rake reversed on handle, forming a perfect set of bowed teeth principally adapted to raking leaves and rubbish; 25 1/2 inches long and has 28 teeth, tinned to prevent rusting. Price, 35 cents.

ENGLISH DAISY RAKE.

For running over lawns, tearing off, disfiguring daisy and dandelion flowers which are carried in the deep hooded head.

16-inch head, \$3.00.
20-inch head, \$3.50.
24-inch head, \$4.00.

LAWN AND PIAZZA LAMPS.

These superior Lawn Lamps take most of their air supply from above through the tubes; in consequence, the combustion is perfect. The oil never heats and they are absolutely safe. They will endure the strongest wind, and burn steadily. Never smoke, and give a brilliant white flame, far better than gas at 1-3 of the cost. The reservoir holds sufficient oil to burn 24 hours. No chimney. Outside wick regulator. Automatic extinguisher. Durably made of heavy tin, painted green.

SQUARE PIAZZA LAMP.

IMPROVED TUBULAR, IN THREE SIZES.

No.	Height Inches	Width Inches	Depth Inches	Wick Inches	Re- flector Inches	Price
1	19	8 1/2	9	1	6	\$4.50
2	21 1/2	9 3/4	10 1/2	1 1/2	10 1/2	5.50
3	26	13 3/4	13	1 1/2	12	7.25

LAWN LAMP BRACKET.

GLOBE LAWN LAMP.

FOR EITHER POST OR BRACKET. Improved tubular, can be filled, lighted, regulated and extinguished without removing globe with the new globe lifter. Number 3 burner. 1 1/2-inch wick. Casts no shadow. Fits either bracket or post. One size only, price, \$5.25.

IRON BRACKET (short or long), Japaned black \$1.00
TURNED WOOD POST, 6 1/2 feet above and 2 feet below ground 2.00

GLOBE HANGING LAMP.

FOR PIAZZA OR LAWN.

This lamp is practically the same as the above, except that it is not fitted at the bottom to go on post or bracket, but in place has a wire bale or handle to swing from. Price, \$5. EXTRA GLOBES for either of the above two "Globe Lawn Lamps," viz.: clear glass, 50c. ea.; green or blue, \$3.25 each; ruby, \$4.25 each.

GLOBE LAWN LAMP.

SQUARE PIAZZA LAMP

Anchor Tree Guards.

Expanded Metal.

TREE GUARDS.

Anchor Tree Guard, constructed of No. 8 and No. 9 galvanized steel wire, the horizontal wires being locked to the uprights by the patent "Anchor" clamp. They cannot slip. Any one can put the "Anchor" Guard in place and it will last for years.

Size A. Diameter 8 inches; height 5 feet, 8 inches. \$1.25 each; \$12.00 per doz.

Size B. 10 inches diameter, 5 feet 8 inches high. \$1.50 each; \$14.00 per doz.

EXPANDED METAL TREE GUARDS.

Made of two sheets of 2-inch Mesh, *Expanded Metal*, forming a cylinder 10 inches in diameter and 68 inches high. The two parts being bolted securely in place by malleable clamps. With this guard the best protection from vandals is given the tree, with good circulation of light and air. Price, \$2.25.

WIRE CROQUET OR GARDEN BORDER.

Placed around croquet grounds prevents balls from rolling beyond limits; placed around flower beds excludes dogs, chickens, etc. Galvanized.

2 in. 1 1/2 in. mesh. mesh.
12 inches wide. Per bale 150 running feet. \$1.00 \$1.35

WOODEN PLANT STAKES.

KEEP OFF THE GRASS

EVERLASTING SIGN,
ENAMELED.

"Keep off the Grass."

Name Plate of iron; enamelled green with white letters; size 20 inches long by 4 inches wide; iron rod 26 inches long. Will last for years. Price, \$1.50 each; \$15.00 per doz.

WICKET LAWN GUARD.

A rigid, substantial and ornamental guard for bordering and protecting flowerbeds, walks, etc. The wickets, painted green, are 15 inches high and are made of two heavy steel wires twisted together, leaving a loop through which the next wicket is thrust and interlocks; they are easily placed in position by any person to conform to any desired outline, circular, straight, square, etc; the height is regulated to suit by the distance the wickets are placed in the ground. It requires 12 wickets to 8 running feet.

Price, 18c. each, \$2.00 per doz., \$16.00 per 100.

STEEL PLANT STAKES.

Made of stiff steel wire, double galvanized and practically indestructible. Tips looped for safety; bottoms A-shaped for stiffer support. They are suitable for roses and similar plants.

Henderson's Giant Lawn Umbrella.

Eight feet across. Alternate stripes of bright colors. Very showy on a green lawn.

These giant framed umbrellas are the strongest and most durable umbrellas in the world. They are not only very useful but very attractive on a lawn; they spread 8 feet. The centre pole is thrust into a large hollow iron screw, which is easily turned into the ground; the screw can remain, if desired, and the umbrella can be closed and removed in a moment. It can be quickly set up in any soil with ease. The umbrella has 16 strong steel ribs covered with heavy cloth, in alternate bright colors, usually red, yellow, blue and buff; the edge is finished with an 8-inch curtain. Price complete, with ground fastenings, \$7.50.

GIANT LAWN UMBRELLA.

Price.....\$7.00

TREE TUB NO. 4.

ESTABLISHED 57 YEARS.

BOOKS

HENDERSON'S
NEW BOOK.

"PICTURESQUE GARDENS"

(Ornamental Gardening Illustrated),
By CHARLES HENDERSON.

160 pages, 9¼ x 12 inches; 340 photographic illustrations. Price, \$2.50, post-paid.

THIS unique new book mirrors the charms of the prettiest parks, lawns and gardens of Europe and America. The picturesque, the natural and the gardenesque adornments are reflected in **over three hundred magnificent photographic illustrations from nature**—many of these views are 5 x 7 inches, some larger, few smaller; they are grouped and printed in a most artistic manner on heavy-coated paper, with just enough text matter to describe the view and name the plants, vines, trees and shrubs needed to produce a similar effect or design.

"To say this is one of the most useful and beautiful works of the times on practical landscape gardening is no more than due to Mr. Henderson. There are several hundred illustrations of beauty spots in large and small gardens that afford admirable hints for those who would make beauty where plainness only ruled before."
MEEHAN'S MONTHLY.

"I have received 'Picturesque Gardens,' with which I am much pleased, having, from it, received many valuable hints as to the beautifying of a place of seven acres, on which was some bog land that I did not know what to do with. It is a handsome and valuable book, and one which I appreciate for its practicability."
J. T. BULLARD, Mt. Lake Park, Md.

"This is a notable book, both for the variety and excellence of its photographic illustrations and as a practical contribution to the growing love of Americans who delight in making the surroundings of their homes beautiful, etc."
THE CONGREGATIONALIST.

"To say that I am pleased with your book, 'Picturesque Gardens,' is stating it lightly. It is a magnificent work of art, a valuable guide to the gardener, carrying one, as it were, through the world's beautiful gardens and suggesting, from time to time, beautiful effects in plant grouping and color blending."
JOHN COCHRAN,
Gardener to Mrs. J. E. Addicks, Claymont, Del.

"The book will be found of the greatest assistance to those whose mission is to make home surroundings beautiful, etc."
THE FLORISTS' EXCHANGE.

There are in this country many lawns, gardens and grounds which the owners would improve and embellish, but they do not know exactly what they want, what would look well nor how to go about it, and it is for the benefit of such that we have prepared this book, for, although there are countless works of exhaustive *precept* on landscaping and gardening, there have been none issued so rich with illustrations of *example*. In it we force no particular styles or fashions, but describe and picture such a great variety of lawn and garden creations that some fruitful suggestions must be found adaptable to the environment of every home, whether pretentious or modest.

Those who are fond of improving and embellishing their gardens, lawns and grounds, or who are planning new ones, will get many valuable ideas from this beautiful book.

The Range of Henderson's "PICTURESQUE GARDENS":

FLOWER GARDENS AND BEDDING.—Geometrical bedding and bedding designs—Formal gardens—Sunken and terrace garden—Gay parterres—Walled gardens—French, Italian, English and Japanese gardens—American gardens (city, villa and suburban)—Topiary and old-fashioned gardens—Subtropical gardens—Aquatic gardens—Rosariums, ferneries, rockeries—Herbaceous borders—Flower-fringed paths, etc.

LAWN VIEWS.—Lawn gardens—Park lawns—Shady nooks—Vista and landscape—Avenues, walks and drives—Terraces, steps and balustrades—Vases and statuary—Sun dials—Fountains—Entrance gateways—Ornamental and flowering trees, shrubs and plants, specimen or grouped—Ponds, lakes, streams, cascades, bridges.

UNIQUE AND ARTISTIC EFFECTS WITH PLANTS, VINES AND TREES.—Verdure arches and festoons—Rose bowers and arches—Screens and fancy hedges—Old trees, etc., embowered with vines—Vine-clothed rocks and banks—Vine-covered arbors, piazzas, windows, columns, arcades, pergolas, summer houses, etc.—Garden rests and retreats—Seats of stone, rustic, etc., old-fashioned and modern—Floral clocks—The Maze—Veranda decoration and decorative plants in tubs, etc., and numerous garden adornments.

HENDERSON'S NEW BOOK, "Picturesque Gardens," is handsomely bound, and will grace any library table, even as an album of the beautiful in gardens. Price, \$2.50, post-paid.

**EVERYTHING FOR THE LAWN
AND GOLF COURSE.**
