G—BROTHERS,—Colo.

Your Tulips and Hyacinths are A 1.

LILIUM • HARRISII, The TRUE Bermuda Easter Lily.

Henderson's High Grade Stock.

The True Bermuda Easter Lily is our Great Specialty. We were the pioneer introducers of it in quantities for florists' forcing purposes and have always been "*Head-quarters,*" supplying the trade generally and the large dealers in both Europe and America. Our acreage in Bermuda probably equals all others combined.

Our Bulbs are Larger, Healthier and Better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeavor to grow cheaply—to enable them to undersell.

Our Stock is True and Unmixed. Our strict selection for years secures true and unmixed stock. You cannot afford to force stock mixed with Longiflorums, even though the bulbs were given you, as they would flower so irregularly as to occupy a bench the whole winter.

REDUCED PRICES FOR SEASON 1896—FOR IMMEDIATE ORDERS ONLY.

Our mixed Hyacinths are good sized bulbs averaging 6 inches in circumference and over.

Cheap "scrubs" we do not handle.

In making up these mixtures we have the early flowering sorts, which are the ones most suitable for forcing, kept separate from the late flowering sorts, which are only suitable for bedding. Therefore, if you will kindly state what you want the bulbs for—whether for forcing or bedding—we are sure you will be better satisfied with the results than if you got bulbs of all degrees of earliness and lateness mixed together, as they are generally sold.

Henderson's "Pan" Hyacinths or "Dutch Romans."

These are growing in favor among forcers, to follow the more expensive French Romans. These Dutch Pan Hyacinths are small bulbs, averaging $1\frac{1}{2}$ to $1\frac{3}{4}$ inches in diameter or $4\frac{1}{2}$ inches and over in circumference, but they throw very fine spikes of bloom properly forced to come in not before January. The small bulbs of some varieties are far superior to others. We have carefully experimented and selected the varieties we send out as undermentioned, as being very satisfactory for florists.

HENDERSON'S PAN HYACINTHS.

HENDERSON'S NAMED DUTCH HYACINTHS.

We offer on the opposite page (No. 5) the leading Named Hyacinths, for florists' purposes.

We import a great many more varieties for our retail trade, and can, no doubt, supply almost any variety wanted. The prices in heavy type are for the Large Picked Fancy Bulbs. Those offered in smaller type as "Second Size Bulbs" are often sent out as first size—they are of the same age as the Fancy Picked Bulbs, and are really good bulbs; with the exception of three or four small budding varieties, will average about 7 inches in circumference. For forcing in quantity and bedding, they will give splendid satisfaction. The varieties prefixed with a * are the earliest flowering.

See List of Varieties on Opposite Page (No. 5.)

HENDERSON'S IMPROVED WHITE ROMAN HYACINTHS.

(For shipment in August.)

The pearly whiteness and delicious odor of the Roman Hyacinth makes it now indispensable in all fine floral work. The flowers, which are smaller than those of the ordinary Hyacinth, are produced in great profusion, each bulb producing on an average 3 or 4 spikes of delicately-scented pure white blossoms.

We regret that the prices of Roman Hyacinths are somewhat higher this season—caused by the long

continued drought in the section of France where the bulbs are grown. The growers are steadily advancing prices, and there is bound to be a short crop of the larger sizes. We advise early orders to secure bulbs.

Prices of Improved White Roman Hyacinths.

	Per 100.	Per 1000.
Usual Grade or Small Size Bulbs. 11 to 12 centimetres ($4\frac{1}{4}$ to $4\frac{3}{4}$ inches) in circumference, capable of producing 1 to 2 good spikes. \$2.00	\$18.50	
Extra Size Bulbs. 12 to 15 centimetres ($4\frac{3}{4}$ to $5\frac{1}{4}$ inches) in circumference, capable of producing 3 to 4 good spikes. 2.50	22.00	
Select Choice Bulbs. 13 to 15 centimetres ($5\frac{1}{8}$ to $5\frac{3}{4}$ inches) in circumference, capable of producing 4 to 6 good spikes. 2.75	25.00	

ROMAN HYACINTHS IN COLORS.

We only import the extra size bulbs of Colored Romans while the smaller bulbs can be sold a little cheaper, yet these large bulbs are worth more than the difference on account of the greater number of flower spikes borne.

	Per 100.	Per 1000.

White Italian or "Red Skinned" Roman Hyacinths.

(Ready for Shipment in August.)

These are a little later in blooming than the White Romans but are very floriferous. Good spikes of pure white flowers, and very satisfactory for succeeding crop.

White Italian Extra Size Bulbs. 12 to 15 centimetres ($4\frac{3}{4}$ to $5\frac{1}{4}$ inches) in circumference. \$1.75 per 100, \$16.00 per 1,000.

Henderson's

Large
Flowering

Lily of the Valley.

(Ready for Shipment Early in November.)

To make a complete success of forcing Lily of the Valley, it is absolutely necessary to have pips, that have been grown in a soil and climate congenial to their proper development; there are many pips annually offered that are late flowering, and having few and small bells, are absolutely worthless for forcing.

The past winter we had a complete trial of pips from English, Danish, French and Dutch, as well as from all German growers of repute, and we were pleased to see that Henderson's Large Flowering Hamburg Pips were by far the best. Producing robust long spikes of 11, 13 and 15 large bells each.

(For Immediate Shipment)

We have a few cases of 2,500 pips each in cold storage in the regulation temperature of 28°. We can only supply these in case lots.

Price, \$22.00 per case in May, increasing 25c. per case every month thereafter.

NOTE.—We do not care to send these further than 6 hours from N. Y. by express, as they should be thawed out by plunging in cold water—not from warm temperature in transit.

FREESIA REFRACTA ALBA.

(Ready for Shipment in July.)

We will have a large crop of extra fine bulbs to offer this season.

We now sell annually 1,000,000 of these bulbs to florists for forcing for cut flowers, our bulbs being unusually fine. Freesias produce six to eight flowers upon a stem. Are very handsome, possessing a peculiar grace of form. As cut flowers, they are extremely valuable; the un-expanded flowers open in water, fill the air with a most delicate perfume, and their endurance is really remarkable. They force very easily and should be started in succession from the end of July. Flowers pure white, with yellow blotch on lower petals. (See cut.)

NARCISSUS OR DAFFODILS.

THE MOST POPULAR BULB OF THE PERIOD.

Narcissus are now forced in immense quantities; their graceful form, soft perfume and rich colors make them much sought after for bouquets, vase and corsage flowers, by ladies during the winter months. Their ease of culture, quick and sure blooming qualities and the reasonable cost of the bulbs render them more popular each season.

NOTE.—In describing Narcissus we have referred to the "perianth" and "trumpet." The latter is the long centre, funnel-like tube, and the "perianth" is the surrounding row of petals or leaves.

The Chinese Sacred or Oriental Narcissus.

(Ready for shipment in October.)

Our own direct importation from China will be ready for shipment early in October. Bermuda and Calitonia Grown Bulbs, though they can be sold at lower prices, we do not offer, as they give very poor satisfaction and will not flower in water.

The "Shui Si, F r," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery white with golden yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese, according to their ancient customs, to be the advent of their new year and as a symbol of good luck.

The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, ensuring luxuriant growth and immense spikes of flowers; in fact, the incredibly short time required to bring bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succed in a most everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough of tiny pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. (See cut.)

PRICE, Extra Large Bulbs, 60c. doz; original baskets of 100 bulbs, \$4.25; or 1,000 bulbs (in 10 baskets) \$41.00.

MISCELLANEOUS BULBS.

Amaryllis, "The Barbadoes Spice Lily." A variety of *Amaryllis Johnsoni*. The bulbs are very large, from 7 to 12 inches in circumference, very strong luxuriant growers, producing with great certainty towards spring immense flowers of glowing scarlet intensified by a white stripe through each petal. Spikes frequently bear 4 to 8 flowers—and often 2 to 3 spikes are borne at one time. An elegant plant when in bloom for market sales. Price, \$2.50 per doz., \$20.00 per 100. (*Ready for shipment in September.*)

Amaryllis Formissima. The Scarlet Jacobean Lily. Grand bulbs—(*Ready for shipment in September.*) 60c. per doz., \$4.00 per 100.

Anemone Fulgens. The rich, dazzling scarlet flowers and light, elegant growth render it a most attractive flower. It is invaluable for cutting, as it lasts a long time in water; valuable for pot culture and a splendid forcing variety. Pot up in September or October, place in cold frame, and bring on in gentle heat in early spring. Admirable for selling in bunches. 25c. per doz.; \$1.50 per 100; \$13.00 per 1,000. (*Ready for shipment in August.*)

Allium Hemitti Grandiflorum. A splendid winter-flowering and forcing variety; the flowers last a long time after being cut. The flowers are large, of immaculate whiteness, and continue to bloom from December to the end of April. 15c. per doz.; 75c. per 100; \$6.00 per 1,000.

GLADIOLUS, THE BRIDE. Pure white.

(*Ready for shipment in September.*)

Thousands of these are sold by us annually to florists for forcing, for early spring sales. The spikes are very light and graceful and are very popular cut flowers in the London and Paris markets. The bulbs are perfectly hardy, and if planted in frames in the fall, will give a profitable crop of flowers in June. (*See cut.*) Price, 60c. per 100; \$5.00 per 1,000.

SPANISH IRIS. For Forcing.

These almost equal orchids in beauty of coloring and delicacy of perfume—the flowers are of great beauty and cut in the bud state, last from one to two weeks in bloom—longer than any other cut Iris. One root bears one stem bearing two flowers in succession a week apart; the faded flower does not show a mark on the stem when removed. All growers of cut flowers should try these this season; they are low priced, and if planted in boxes and placed in cold frames until they show bud, then bring into heat they can be had in bloom from March on, and will give great satisfaction. (*Ready in September.*) **The Best Pure White**, 65c. per 100, \$5.00 per 1,000. **The Best Pure Yellow**, 75c. per 100, \$6.00 per 1,000. **The Best Light Blue**, 60c. per 100, \$5.00 per 1,000. **Mixed Colors**, 40c. per 100, \$3.00 per 1,000.

WHITE CALLAS. Dry roots. (*Ready for shipment in September.*)

The dry bulbs are superior for forcing purposes, as they come into bloom quickly and require less room—making less foliage. Dry bulbs planted in 4-inch pots will flower nearly twice as abundantly as plants in 6-inch pots that have been kept growing or only semi-dormant. Extra large roots, per doz., \$1.25; per 100, \$9.00. First size, per doz., \$1.00; per 100, \$6.00.

Little Gem Calla Lily. (*Ready in October.*) This little pigmy rarely exceeds 12 inches in height, and blooms most abundantly. The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every way superior as a house plant to the larger varieties. \$1.00 per doz.; \$6.00 per 100.

THE BERMUDA

BUTTERCUP OXALIS.

SPIREA ASTILBE JAPONICA.

(Ready for shipment in November.)

We offer large imported clumps, grown especially for winter forcing.
50c. per doz.; \$3.00 per 100; \$28.00 per 1,000.

SPIREA ASTILBODES FLORIBUNDA.

(Ready for shipment in November.)

This new variety is a great improvement over *Spirea Japonica*. The flowers are borne in large, feathery panicles of purest white, and last a long time in bloom. It is dwarfer in habit, earlier and more profuse in bloom. This is undoubtedly one of the most beautiful and graceful subjects grown, its foliage and flowers combined making it one of the finest gems for winter and spring decoration in the house and conservatory, while for grace and elegance as a cut flower it is unequalled. The few florists who have tried it are enthusiastic in its praise. Fine clumps,

BERMUDA BUTTERCUP OXALIS.

(Ready for shipment in July.)

We do not claim the Bermuda Buttercup Oxalis to be strictly a new plant, but a greatly improved selection from Oxalis Cernua, grown in the congenial soil and climate of Bermuda until the bulbs have attained great strength, producing bulbs, plants and flowers larger and more luxuriant in all parts than the type. It is one of the finest winter-flowering plants for pot culture that we have ever seen ; it is such a strong, luxuriant grower that one bulb will be sufficient for a 6 or 8 inch pot. The great profusion of bloom produced in uninterrupted abundance for weeks will astonish you. The flowers are of the purest bright buttercup yellow. Well-grown plants have produced as high as 70 flower stems at one time, and over 1,000 flowers in one season. Genuine Bermuda Stock direct from the originator. 35c per doz., \$2.50 per 100, \$23.00 per 1000.
