ABOUT TERMS, HOW BEST TO ORDER AND REMIT, ETC.

All Goods offered in this Catalogue are subject to being unsold on receipt of order, and we reserve the privilege of advancing prices without notice.

Remittances should be made either in the form of an Express Money Order, or a P. O. Money Order, Bank Draft or Registered Letter.

If Goods are wanted C. O. D., 25 per cent. of the amount must accompany the order. Such orders can only be sent by express.

Orders from unknown correspondents, without remittance, should be accompanied by New York City references, to save delay.

When goods are ordered from both seed and greenhouse establishments, we always combine, where practicable, the orders and make one shipment.

Terms: The prices quoted in this Wholesale Catalogue are subject to no further discounts excepting for cash as noted below. To parties of approved credit, accounts are payable net on June 1st and December 1st, for goods invoiced between these dates or 5 per cent. can be deducted for payment within 30 days from date of invoice—or for remittance with the order. It is, however, distinctly understood that Potatoes, Onion Sets, Grass, Grain, Clover and Bird Seeds, Tools and Implements of all kinds, Fertilizers and Insecticides are not subject to any discount and are sold strictly *net cash*.

WHEN WE EXECUTE ORDERS.

Every order is filled immediately on arrival, or is acknowledged if under rare circumstances, its shipment is likely to be delayed for a day or two. If goods, notification of shipment or acknowledgment of order is not received by the customer after a reasonable lapse of time, it may be assumed that the order has miscarried, or that the name or address was

omitted from the order. We will, when notified of such a case, use our best efforts to trace it without delay.

Give full shipping instructions on each and every order you send. To avoid chance of error, never write letters on the same sheet as your order.

We fill orders of all values from the smallest to the largest, and all receive the same careful and prompt attention.

ABOUT PACKING AND SHIPPING.

We make no charge for packing, cases, baskets, packages or barrels, and pack as lightly as possible, consistent with safety, so as to reduce the cost of carriage when paid by purchaser. In fact, we assume extra expense in supplying light, strong cases, and, where possible, we pack in baskets covered with waterproof covers, which greatly reduces weight.

Cloth bags only we charge for, and these at cost, viz.: 1 peck, 10c; 1/2 bush., 12c; 1 bush., 15c; 2 bush., 20c. All grass seed bags, excepting bags for Timothy and Clover, are furnished free.

Special packing of seeds for foreign shipments, when necessary, in tin-lined cases or double sacks we charge for at cost.

We make no charge for cartage or delivery of goods to any railroad station, steamship line or express office in New York City.

The safe arrival is guaranteed of all goods sent by express to any part of the United States or Canada. We ship plants at all seasons of the year, even in the coldest weather.

When shipped by freight we deliver all bulbs and roots properly packed and in good condition, into the hands of transportation companies. After that our responsibility ceases. Consignee then assumes all risks of heating, freezing and delays.

Special Notice

- While we exercise the greatest care to have all Seeds, Plants and Bulbs pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the goods on these conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Our Red Trade Mark

EVERY PACKAGE of our Seeds, large or small, will bear our RED Trade Mark, a fac simile of which is here shown.

SPECIAL IN REGARD TO THE SALE AND SHIPMENT OF PLANTS.

All plants sent by express, unless specially ordered otherwise.

Plants will be sent by freight if requested, but at purchaser's risk. Plants will be sent by mail if so ordered, and it is practicable to do so, but only at an advance of twenty-five per cent. on the prices quoted.

The plants are offered in this list at the rates per 100, provided (except where they are otherwise offered) that not less than five of each class or

variety are taken, nor in less amounts than three dollars for the total value of the order.

The varieties must be our own selection of sorts, unless otherwise offered. Any one wanting special kinds, not offered in this wholesale list, can order from our retail Descriptive Catalogue (The Manual of Everything for the Garden), at the prices quoted therein, from which we allow a discount of one-third.

We have secured for our customers from EXPRESS COMPANIES...

20 Per Cent.

Reduction in Express Rates on Plants.

Under the new ruling of the leading Express Companies advocated and secured by us, plants packed in closed boxes or baskets, will now be carried at the "General Specials" rate. This rate means a reduction of 20 per cent. from the regular merchandise rates to all points where no "General Specials" exists. To points where a "General Specials" rate is in force the companies made a special reduction. Shipments weighing less than 100 lbs. receive the benefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandise rate is \$4.00 per 100 lbs., a box of plants weighing 100 lbs. will be carried for \$3.20, a saving of 80c. on one shipment.

Have your plants...

Sent by Express.

They will reach you quicker and in better condition than by any other way.

HOUSE OF BERMUDA EASTER LILY BULBS.—Grown by Lawrence Cotter, Dorchester, Mass.—Bulbs Supplied by P. H. & Co.,
(See Mr. Cotter's testimonial below.)

HENDERSON'S SUPERIOR EASTER LILY BULBS.

Henderson's Superior BERMUDA EASTER LILY BULBS

(Lilium-Harrisii.)

	Doz.	per 100	per 1000
First Size Bulbs. (5 to 7 inches in circumference.)	\$0 75	\$4 50	\$42 00
Extra Size Bulbs. (7 to 9 inches in circumference.)	1 50	10 00	90 00
Monstrous Size Bulbs (7 to 11 inches in circumference.)	3 00	20 00	190 00

We wish to lay particular stress upon the size and quality of our Bulbs which are larger, healthier and better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeavor to grow cheaply—to enable them to undersell.

The so-called Bermuda Lily disease is primarily the result of reduced vitality caused by insufficient plant food in the soil. While there is no crop of bulbs on the island entirely free from the disease, yet we have less of it in our fields than any other grower as we have always realized the importance of proper fertilization.

WHAT FLORISTS' THINK

....OF....

Henderson's Easter Lily Bulbs

"The Bermuda Easter Lily Bulbs I got from you, (P. H. & Co.) are grand. In fact every person who has seen them say they are the best ever seen in this part of the country, they are practically free from "disease." LAWRENCE COTTER, Florist, March 23, 1900. Dorchester, Mass.

"I got 100 Harrisii Lily Bulbs from you last year and 90 of them bloomed all right, they were a nice lot." WILLIS E. HAMILTON, Florist, Belfast, Maine.

"I have been growing your Harrisii bulbs for several years. Last season I divided my order, placing one-half with you and the other half with another prominent seedsman. Yours were the true Bermuda Harrisii, while the others were badly mixed with a worthless variety which grew to enormous height with a very small flower. Your half were all of an even size with flowers of excellent quality. I had the honor of having the finest lilies in Pittsburgh from your bulbs. There were but few of your plants diseased—probably 50 in the whole batch of 6,000 bulbs. You will have my full order next season.

WM. F. LAUCH, Florist, Carrick, Pa.

"I do not hesitate to say that the lot of Harrisii I bought from you this season are the best I received for a number of years. They are the nicest looking plants that I have seen anywhere, and I am glad that it is so, as this was the first time I got my Harrisii from you and which will assure you of getting further orders. CHRIS BESOLD, Florist, Mincola, Long Island.

Henderson's Superior JAPAN EASTER LILY BULBS.

(L. Longiflorum var. Eximium.)

Monstrous Size Bulbs. (9 to 10 inches in circumference.)	1 25	9 00	80 00

These Japanese grown Lilium Longiflorum Bulbs are of great value for late winter forcing—Henderson's Superior Japanese Longiflorum bulbs are selected to the best flowered forcing type.

Henderson's New GIANT EARLY FLOWERING. LILIUM LONGIFLORUM.

Tall, healthy growing, narrow-leaved, early and many flowered, producing flowers of superior size shape and substance. We have a limited quantity of these bulbs to offer this season. Price, 7 to 9 inch bulbs, \$1.25 per doz., \$18.00 per 100.

"SILVER LEAF" EASTER LILY.

(Lilium Longiflorum Foliis Alba Marginatis.)

These make novel and elegant specimens as pot plants when well grown, and are particularly beautiful for Easter decoration on account of the foliage being distinctly striped with silvery white, in all other respects the plants and flowers are the same as Lilium Longiflorum.

Price, 20c. each, \$2.00 per doz., \$16.00 per 100.

WHAT FLORISTS THINK OF HENDERSON'S SUPERIOR ROMAN HYACINTHS.

"I get more spikes of 'firsts' from your strain of White Romans than from any I ever grew before."

A. S. WALLACE, Montclair, N. J.

"I ordered Roman Hyacinths of you in the fall and must say I never saw finer bulbs.—Some of them had as many as fifteen, and a few had seventeen spikes of flowers."

J. O. CRABB, Cedarston, Ga.

"Your Roman Hyacinths turned out very satisfactory, as always.—Send us prices for this season's bulbs and we will send you our order."

GRALLERT & CO., Colma, Calif.

"The Roman Hyacinths you sent me last fall forced grand."

C. N. JOHNSON, Louisville, Ky.

HENDERSON'S SPECIAL FORCING AND BEDDING HYACINTHS.

These bulbs are of a much larger size than those put in ordinary mixtures; in fact, most of these average as large as those often sent out as "first size Named" by some dealers. They are of the same age as the first size Fancy Named Hyacinths offered by us on page 9, from which they are the second selection. They will produce grand spikes of bloom, and each sort as offered below, being of one shade of color and blooming at one time, render them of great value for forcing or bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

SPANISH IRIS.

This type is well adapted for pot culture and forcing, blooming in the winter. The flowers are of great beauty, and cut in the bud state last from one to two weeks in bloom. If planted in boxes and placed in cold frames until they show bud, then brought into heat, they can be had in bloom from March on.

MISCELLANEOUS FLORISTS' BULBS.

AMARYLLIS JOHNSONI.

Grand Bermuda Grown Bulbs. Ready in August.

Congential conditions—climate and soil—produce a strong growing variety. The bulbs are very large, 9 to 15 inches in circumference, and produce with great certainty extra strong spikes of bloom from 18 inches to 3 feet high, bearing enormous trumpet-shaped flowers, averaging 6 to 10 inches across, of great substance, of rich and glowing scarlet, with a wide white stripe through each petal. Spikes frequently bear 4 to 8 flowers each. Often 2 and 3 spikes are produced at one time. 35c. each; \$3.50 per doz.; \$35.00 per 100.

LARGE SINGLE FLOWERED ANEMONES.

For Forcing.

Florists do not appreciate the beauty and value of these magnificently colored flowers—for cutting purposes. We have kept crowds around our show windows this spring by exhibiting vases of Anemone flowers. Very few people seemed to know what they were, and all were enthusiastic over their beauty, size and variety. Try a few bulbs; they are cheap and bloom profusely. **Anemones, Single Poppy Flowered.** *Coronaria.* Large beautiful saucer-shaped poppy-like blossoms of innumerable colors and variegations. 75c. per 100, \$6.00 per 1000.

Anemone Fulgens. The rich, dazzling scarlet flowers and light elegant growth render it most attractive. It is valuable for cutting, as it lasts a long time. \$1.50 per 100, \$12.00 per 1000.

ANEMONE FULGENS.

Cyclamen

Persicu n Giganteum.

The flowers of this magnificent strain are of extraordinary size for a Cyclamen, and of great substance. The leaves are proportionately large and beautifully marked. Our bulbs are from the most famous Cyclamen grower in Europe, and will produce flowers of rare merit.

Giganteum Roseum, rose color
" **Album**, white.
" **Rubrum**, crimson.

Prices for any of the above separate varieties, 15c. each, \$1.50 per doz., \$10.00 per 100.

Mixed colors of Cyclamen Giganteum, 12c. each, \$1.25 per doz., \$9.00 per 100.

SEED OF THE FAMOUS

"NEW YORK MARKET" MIGNONETTE.

We have arranged with the originator of this marvelous giant among Mignonettes to introduce it among our Florist Customers, and we can vouch for it as being the finest strain of florists' Mignonette we have ever seen—and some pretty good specimens come into the New York markets too. We do not exaggerate when we state that the average heads, compactly filled with delicious, fragrant flowers, measure one foot long with sturdy well-clothed stems extending a foot or more below the flowers. It is a luxuriant, healthy grower, and a continuous and abundant flowering variety.

A. MACKELLAR, Florist, Nyack, N. Y., writes:

"The photographs of this Mignonette should be burned: they don't begin to do justice to this glorious strain. I have never seen any Mignonette to compare with it."

SIEBRECHT & SON, Florists, N. Y. C. write:

"Of the several thousand dozen we have handled, we have never lost a spray. It has sold at \$2.00 and \$3.00 per dozen during the season. We regard it as the best and cleanest Mignonette on the market."

HENDERSON'S SPECIAL BEDDING AND FORCING HYACINTHS.

The bulbs under this heading are of a much larger size than those put in ordinary mixtures; in fact they are the second size Named Sorts. They will produce grand spikes of bloom, and the different sorts, as offered below, all being of one shade of color and all blooming at one time, render them of great value for forcing or bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

HARRISII, The True Bermuda Easter Lily.

Easter Lily.—We wish to lay particular stress upon the size and quality of our Liliu Harrisii Bulbs which are larger, healthier and better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeavor to grow cheaply—to enable them to undersell.

AMPELOPSIS VEITCHII.

Sometimes called "Boston Ivy" and "Japan Ivy."

Entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in two or three years, clinging to stones, brick or woodwork with the greatest tenacity. For covering dead trees, gate posts, boundary walls, verandas, etc., it has no equal. In the summer the foliage is a rich shade of green, but in fall it assumes the most gorgeous tints of *scarlet crimson* and *orange*, so dazzling as to be seen at a great distance. Price, strong one year old plants from pots, \$6.00 per 100.

NEW CANNA, GOV. ROOSEVELT.

An entirely new and distinct variety. It is a "sport" from a scarlet flowered sort, and instead of being only mottled or spotted like all other variegated sorts, in addition to the usual spotting or speckling, it is strongly and distinctly striped like a camellia. The variation in the striping is remarkable in the highest degree. In some petals the coloring matter runs in even bands of red and yellow, others on the same stem will be all red, some flowers will be entirely red, and even some spikes will have only a small proportion of yellow coloring while the others on the same plant will show remarkable variegation. The red stripes on the face of the petals are generally backed by yellow and the yellow by red. In rare cases there may be plants that for a time may not show any variegation. In the whole range of flowering plants it stands a unique figure and is worthy of the name we bestow upon it. Height, 3 feet, green foliage. A plant covered with spikes of these flowers is indeed a novel sight.

Price, ready in October, 25c. each, \$2.25 per doz., \$15.00 per 100.

ERICA MELANTHERA.

NEW GIANT BROWALLIA

The flowers are indigo blue, fully 2 inches across, and cover the plant when in bloom. Invaluable for summer beds of flowers or for pot plants in the winter for the greenhouse and window garden. (See cut.) Price, \$1.00 per doz.

SWEET PEAS

SPECIAL NOTICE—

of our New Departure in Offering

Only the Cream of the Sweet Peas,

There are too many so-called varieties of Sweet Peas—nearly two hundred—offered to the public. Many of them are alike, or so nearly so that experts can scarcely distinguish them apart. So we have culled-out inferior older varieties that have been improved upon, the newer sorts that have reverted back or are not improvements and the sorts that have been offered under different names by different firms which we have proved at our trial grounds to be the same thing

If we do not offer the variety you are looking for, refer to the "Aid in Selecting any Desired Color," which tells what better variety of same color to select in place,

"Your list of Sweet Peas is, in our judgment, a very satisfactory and comprehensive collection and we are naturally pleased to see so prominent a firm as your good selves take the lead in the important matter of list-pruning, for the retention of the best varieties only."—SUNSET SEED AND PLANT CO., San Francisco, Cal.

Henderson's Famous Globe-Shaped Onions.

There is such a marked superiority in the Eastern-grown types of the Globe Onions, commonly known as the Southport strain, over the Western-grown types, that we have concluded to offer both types separately, so as to prevent any misunderstanding as to what is being offered by our competitors.

Diamond Grit or Winter Saskatchewan (Bearded). The hardest winter wheat known and a worthy rival to the hard spring of the Northwest. 75c. peck, \$2.25 bush., 10 bush. lots, \$2.00 per bush.

Fortyfold (Bald.) Of vigorous growth, remarkably hardy and stands severe winters and dry weather better than any other variety. 75c. peck, \$2.25 bush., 10 bush. lots, \$2.00 per bush.

Pedigree Giant. (Half bearded.) Is a wonder for thrifty fall growth, is early and strong stooling and is a champion in productiveness. 75c. peck, \$2.25 bush., 10 bush. lots, \$2.00 per bush.

SPECIAL QUOTATIONS TO LARGE BUYERS.

RURAL NEW YORKER NO. 6.
**MISCELLANEOUS
FARM SEEDS**
FOR
Autumn Sowing.
TRUE DWARF ESSEX
English Rape.

Rape may be sown broadcast at the rate of 6 lbs. per acre and harrowed in or the land may be thoroughly harrowed and the seed sown in drills, 18 to 24 in. apart, at the rate of 2 to 3 lbs. per acre. Under favorable conditions it is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average one acre will carry twelve to fifteen sheep six weeks to two months. In the Northern States it should be sown from May to August for fall pasturing, but as it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. Its fattening properties are probably twice as good as those of clover, and for sheep the feeding value of Rape excels all other plants we know of, fattening and putting them in excellent condition for marketing without the addition of grain or other purchased feeds. 10c. lb.; \$7.00 per 100 lbs.

PETER HENDERSON & CO.

SOW "THE HENDERSON" LAWN GRASS SEED

AND HAVE A
PERFECT LAWN
IN SIX WEEKS.

THE "HENDERSON" LAWN GRASS SEED

Will form a close, thick turf in a few week's time; with no tendency to stool or grow in clumps. It roots deeply and withstands severe droughts without turning brown, maintaining its beautiful deep green color throughout the season. We have made the formation of permanent lawns a study for years, and the **Finest Lawns in this Country To-day** were obtained by using The "Henderson" Lawn Grass Seed, which is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England.

If people only knew how comparatively easy it is to make a lawn with the "Henderson" Lawn Grass Seed, the days of using Sod, with all the attendant expense, would soon be over.

The beautiful Lawns at the World's Fair in Chicago we produced in six week's time with the "Henderson" Lawn Grass Seed. Not one of the charming features of the Exposition was so universally admired as our "settling of emerald velvet," which notwithstanding the long continued drought of the summer, *retained its verdure throughout the entire season*. Besides being the only lawn grass seed granted a medal, we exhibited the separated grasses used in the mixture and received **Seven Awards** for superior quality and purity of samples.

THE "HENDERSON" LAWN GRASS SEED is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs. per measured bushel.

THE QUANTITY REQUIRED.

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns 1 to 2 bushels. For a plot, 15 x 20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns. Full printed instructions in every package and bag.

PRICES. Per qt. 20c., per peck, \$1.25; per bush., \$4.50. [If by mail, add at the rate of 5c. per quart for postage.]

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bush.

"GOLF LINK" GRASS SEED.

A mixture of grasses that will produce a sward equal to those of the "GOLF LINKS" of Scotland.

While the outlying portions of the "Links" can be seeded with less expensive grasses, the "putting greens" for about twenty yards around the "holes" must be sown with the very finest grasses.

For Putting Greens, we can supply a special mixture of grasses. Price, 25c. per qt.; \$1.50 per pk.; \$5.00 per bushel.

For the Outlying Grounds or Fair Greens we can supply a suitable mixture of grasses. Price, \$2.25 per bushel; 20 bushels and upwards, \$2.10 per bushel.

LAWN GRASS SEEDS we do not deliver free, but will do so in the U. S., if 5c. per quart is added, to above prices.

BURLAP HOT-BED AND COLD FRAME MATS.

These are made of strong Burlap bagging, warmly lined with waste wool and cotton which is quilted in to hold position. They are excellent substitutes for straw mats, being, if anything, warmer than straw, more easily handled, less bulky, and they do not harbor mice or other vermin. We were afraid that they would hold moisture, and either rot or mildew, but our trial for two winters proves them to be far more durable than straw mats.

Henderson's Superior Brass Florists' Syringe.

With Vermorel
Spray Nozzle.

X
A large syringe, the barrel measuring 17 inches long by 4 1/4 inches in circumference; made of heavy solid brass, highly finished, with one spray rose and one jet, with attachments to fit on the side and patent quick-filling valve and an elbow joint to spray under the foliage. In addition to its value as an ordinary Syringe there is a 3-inch detachable chamber (see Fig. X), intended to hold Insecticides, such as Whale Oil Soap, Fir-tree Oil Soap or Tobacco Soap, through which the water is forced, thus automatically mixing and spraying at one operation. The Syringe, of course, can be used either with or without this chamber. We also supply with this syringe a vermorel spraying nozzle—the best nozzle for mist like spray—such as is required with fungicide mixtures. Price, complete, \$5.00 each.

MASTICA FOR GLAZING.

Greenhouses, sashes, etc., new and old. It is Elastic, Adhesive and easily applied; it is not effected by dampness, heat or cold.

MASTICA
GLAZING
MACHINE
\$1.15 Each.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is, putty is not adapted for greenhouse work.

After much study, the inventor of "Mastica" decided that the composition must be of different material and the qualities must be elastic and tenacious to admit of expansion and contraction without cracking. "Mastica" when applied, in a few hours forms a skin or film on the entire mass hermetically sealing the substance and preventing evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a Mastica machine on the outside of sash as it makes it perfectly tight and saves the expense of relaying the glass. One gallon is sufficient for about 300 lineal feet used either for bedding or over glazing.

Prices for Mastica, soft for machine application, 45c. per quart; 8cc. per half gallon; \$1.40 per gallon.

VAN REYPER "PERFECT" GLAZING POINTS.

The finest glazing points on the market; the glass cannot slip; they are quick and easily put in with special pincers; no "rights and lefts" to bother with.

Price, per box of 1,000, 6c.; or by mail, 75c. Pincers, price per pair, 45c.; or by mail, 50c.

CHEAP GLAZING TOOL.

For the price this is a very satisfactory little implement—cuts with a little steel wheel.

Price, 6c. each, 65c. per doz. Postage 2c. each extra.

IMPROVED RUBBER PUTTY BULBS.

An excellent article for glazing. A pressure with the hand ejects the putty prepared as per directions accompanying each, and by running it along the sash bars the work is done quickly, and makes a durable, tight and neat joint. Does not daub the glass nor stick to the hand.

Price, 95c. each, by mail, \$1.00 each.

WOODASON'S BELLOWES FOR
POWDER AND FLUID.

WOODASON'S VAPORIZING BELLOWES.

This throws a spray as fine as mist, rendering the use of strong solutions perfectly safe on tender foliaged plants. (See cut.) Price, large size, \$1.85. Small size, \$1.10.

Woodason's Double Cone Powder Bellowes.

This bellows is the best article ever invented for destroying insects in the Conservatory, Garden or field; under the leaves as good as on top; can be held in any direction without wasting powder and does not clog up. (See cut.) Price, \$2.50.

Woodason's Single Cone Powder Bellowes.

Price, large size, \$1.65. See cut. Small size, 95c.

GREENHOUSE FUMIGATORS

For Smoking Plants.

EUREKA FUMIGATORS.

For fumigating greenhouses with dampened tobacco stems; made of galvanized sheet iron; a damper regulates the draft; no danger of fire; no ashes or litter. No. 1, 12 ins. high, \$1.40; No. 2, 16 ins. high, \$1.60; No. 3, 20 ins. high, \$1.85; No. 4, 24 ins. high, \$2.50.

Perfection Fumigators.

Make Moist Smoke.

This fumigator will last for years; it has a water tank between the fire and the outside, preventing burning out. The tank should be filled with tobacco water, from which a vapor arises and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious to delicate foliage than from any other fumigator made. Outside fumigating can also be done with the Perfection; the cast-iron lid is made so a hose can be attached, and all the outlets for the smoke (except through the hose) can be closed off. No. 1, holds one peck of stems \$2.70; No. 2, holds half bushel of stems, \$3.35; No. 3, holds 3/4 bushel of stems, \$4.

CELEBRATED

"Rose-Leaf"

(Extract of Tobacco.)

Insecticide.

ROSE LEAF EXTRACT OF TOBACCO. INSECTICIDE.

This insecticide has been now most thoroughly tested, and has been proven one of the most effectual articles ever used for the destruction of all insects and scale on plants, that did not injure in some degree the affected plants. **Rose-Leaf Insecticide** is a perfectly pure, highly concentrated extract of tobacco, always of uniform strength of nicotine. It can be applied in various ways, either spraying through a spraying bellows or syringe with spray nozzle, after it has been diluted with from 30 to 150 parts of water, according to the delicacy of the plants to be treated: it can also be used as a vapor, by boiling on small kerosene stoves or in "Evaporating Pans" attached to the pipes, or by dropping red hot iron in diluted extract, or by painting the pipes, etc., etc.

Full Instructions for the Various Methods of Applying, including many testimonials from our leading Florists, who have used it and state their methods of application, are given in our "Rose-Leaf" pamphlet, which will be mailed on application.
