ABOUT TERMS, HOW BEST TO ORDER AND REMIT, ETC.

All Goods offered in this Catalogue are subject to being unsold on receipt of order, and we reserve the privilege of advancing prices without notice.

Remittances should be made either in the form of an **Express Money Order**, or a **P. O. Money Order**, **Bank Draft** or **Registered Letter**.

If Goods are wanted **C. O. D.**, 25 per cent. of the amount must accompany the order. Such orders can only be sent by express.

Orders from unknown correspondents, without remittance, should be accompanied by New York City references, to save delay.

When goods are ordered from both seed and greenhouse establishments, we always combine, where practicable, the orders and make one shipment.

Terms: The prices quoted in this Wholesale Catalogue are subject to no further discounts excepting for cash as noted below. To parties of approved credit, accounts are payable net on June 1st and December 1st, for goods invoiced between these dates or 3 per cent. can be deducted for payment within 30 days from date of invoice—or 5 per cent. for remittance with the order. It is, however, distinctly understood that Potatoes, Onion Sets, Grass, Grain, Clover and Bird Seeds, Tools and Implements of all kinds, Fertilizers and Insecticides are not subject to any discount and are sold strictly *net cash*.

WHEN WE EXECUTE ORDERS.

Every order is filled immediately on arrival, or is acknowledged if under rare circumstances, its shipment is likely to be delayed for a day or two. If goods, notification of shipment or acknowledgment of order is not received by the customer after a reasonable lapse of time, it may be assumed that the order has miscarried, or that the name or address was

omitted from the order. We will, when notified of such a case, use our best efforts to trace it without delay.

Give full shipping instructions on each and every order you send. To avoid chance of error, never write letters on the same sheet as your order.

We fill orders of all values from the smallest to the largest, and all receive the same careful and prompt attention.

ABOUT PACKING AND SHIPPING.

We make no charge for packing, cases, baskets, packages or barrels, and pack as lightly as possible, consistent with safety, so as to reduce the cost of carriage when paid by purchaser. In fact, we assume extra expense in supplying light, strong cases, and, where possible, we pack in baskets covered with waterproof covers, which greatly reduces weight.

Cloth bags only we charge for, and these at cost, viz.: 1 peck, 10c; ½ bush., 12c; 1 bush., 15c; 2 bush., 20c. **All grass seed bags**, excepting bags for Timothy and Clover, are furnished free.

Special packing of seeds for foreign shipments, when necessary, in tin-lined cases or double sacks we charge for at cost.

We make no charge for cartage or delivery of goods to any railroad station, steamship line or express office in New York City.

The safe arrival is guaranteed of all goods sent by express to any part of the United States or Canada. We ship plants at all seasons of the year, even in the coldest weather.

When shipped by freight we deliver all bulbs and roots properly packed and in good condition, into the hands of transportation companies. After that our responsibility ceases. Consignee then assumes all risks of heating, freezing and delays.

Special Notice

- While we exercise the greatest care to have all Seeds, Plants and Bulbs pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the goods on these conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Our Red Trade Mark

EVERY PACKAGE of our Seeds, large or small, will bear our **RED Trade Mark**, a fac-simile of which is here shown.

SPECIAL IN REGARD TO THE SALE AND SHIPMENT OF PLANTS.

All plants sent by express, unless specially ordered otherwise.

Plants will be sent by freight if requested, but at purchaser's risk. Plants will be sent by mail if so ordered, and it is practicable to do so, but only at an advance of twenty-five per cent. on the prices quoted.

The plants are offered in this list at the rates per 100, provided (except where they are otherwise offered) that not less than five of each class or

variety are taken, nor in less amounts than three dollars for the total value of the order.

The varieties must be our own selection of sorts, unless otherwise offered. Any one wanting special kinds, not offered in this wholesale list, can order from our retail Descriptive Catalogue (The Manual of Everything for the Garden), at the prices quoted therein, from which we allow a discount of one-third.

We have secured for our customers from **EXPRESS COMPANIES...**

20 Per Cent.

Reduction in Express Rates on Plants.

Under the new ruling of the leading Express Companies advocated and secured by us, plants packed in closed boxes or baskets, will now be carried at the "**General Specials**" rate. This rate means a reduction of 20 per cent. from the regular merchandise rates to all points where no "**General Specials**" exists. To points where a "**General Specials**" rate is in force the companies made a special reduction. Shipments weighing less than 100 lbs. receive the benefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandise rate is \$4.00 per 100 lbs., a box of plants weighing 100 lbs. will be carried for \$3.20, a saving of 80c. on one shipment.

Have your plants...

Sent by Express.

They will reach you quicker and in better condition than by any other way.

HOUSE OF BERMUDA EASTER LILY BULBS.—Grown by Lawrence Cotter, Dorchester, Mass.—Bulbs Supplied by P. H. & Co.
(See Mr. Cotter's testimonial below.)

HENDERSON'S SUPERIOR EASTER LILY BULBS.

Henderson's Superior BERMUDA EASTER LILY BULBS

(Lilium-Harrisii.)

	Doz	per 100	per 1000
First Size Bulbs. (5 to 7 inches in circumference.)	\$0.60	\$4.00	\$38.00
Intermediate Size. (6 to 7 inches in circumference.)	0.75	5.00	45.00
Extra Size Bulbs. (7 to 9 inches in circumference.)	1.50	10.00	96.00
Monstrous Size Bulbs. (9 to 11 inches in circumference.)	\$	old	Out.

We wish to lay particular stress upon the size and quality of our Bulbs which are larger, healthier and better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeavor to grow cheaply—to enable them to undersell.

The so-called Bermuda Lily disease is primarily the result of reduced vitality caused by insufficient plant food in the soil. While there is no crop of bulbs on the island entirely free from the disease, yet we have less of it in our fields than any other grower.

WHAT FLORISTS' THINK

—OF—

Henderson's Easter Lily Bulbs

"The Bermuda Easter Lily Bulbs I got from you, (P. H. & Co.) are grand. In fact, every person who has seen them say they are the best ever seen in this part of the country. They are practically free from disease."
LAWRENCE COTTER, Florist,
Dorchester, Mass.

"I got 100 Harrisii Lily Bulbs from you last year and 99 of them bloomed all right, they were a nice lot."
WILLIS E. HAMILTON, Florist,
Belfast, Maine.

"I have been growing your Harrisii bulbs for several years. Last season I divided my order, placing one-half with you and the other half with another prominent seedsman. Yours were the true Bermuda Harrisii, while the others were badly mixed with a worthless variety which grew to enormous height with a very small flower. Your half were all of an even size with flowers of excellent quality. I had the honor of having the finest lilies in Pittsburgh from your bulbs. There were but few of your plants diseased—probably 50 in the whole batch of 6,000 bulbs. You will have my full order next season."
WM. F. LAUCH, Florist,
Carrick, Pa.

"I do not hesitate to say that the lot of Harrisii I bought from you this season are the best I received for a number of years. They are the nicest looking plants that I have seen anywhere, and I am glad that it is so, as this was the first time I got my Harrisii from you and which will assure you of getting further orders."
CHRIS BESOLD, Florist,
Mineola, Long Island.

WHAT FLORISTS THINK OF HENDERSON'S SUPERIOR ROMAN HYACINTHS.

"I get more spikes of 'firsts' from your strain of White Romans than from any I ever grew before." A. S. WALLACE, Montclair, N. J.

"I ordered Roman Hyacinths of you in the fall and must say I never saw finer bulbs. Some of them had as many as fifteen, and a few had seventeen spikes of flowers." J. O. CRABB, Cedartown, Ga.

"Your Roman Hyacinths turned out very satisfactory, as always. Send us prices for this season's bulbs and we will send you our order." GRALLERT & CO., Colma, Cal.

"The Roman Hyacinths you sent me last fall forced grand." C. N. JOHNSON, Louisville, Ky.

HENDERSON'S SPECIAL

FORCING AND BEDDING HYACINTHS.

These bulbs are of a much larger size than those put in ordinary mixtures: in fact, most of these average as large as those often sent out as "First Size Named" by some dealers. They are of the same age as the first size Fancy Named Hyacinths offered by us on page 8, from which they are the second selection. They will produce grand spikes of bloom, and each sort as offered below, being of one shade of color and blooming at one time, render them of great value for forcing and bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

"The Christmas Valley I had from you were very fine—better than any I have handled in 18 years experience, and I have kicked myself because I did not order more. Will want a large quantity next season; can't compete now-a-days unless you have something a little better than the other fellow—and the extra price received more than pays the difference in cost between No. 1 stock and ordinary, and there is a satisfaction outside of dollars and cents that goes a long way."

S. A. E. LYMAN, Essex Greenhouses,
Coe Ridge, Ohio.

"We see from the style of bloom that you have a fine strain of Lily of the Valley and you may book us for 30,000 pips for fall delivery."

HENDERSON'S SPECIAL BEDDING AND FORCING HYACINTHS.

The bulbs under this heading are of a much larger size than those put in ordinary mixtures; in fact they are the second size Named Sorts. They will produce grand spikes of bloom, and the different sorts, as offered below, all being of one shade of color and all blooming at one time, render them of great value for forcing or bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

THE CRIMSON RAMBLER ROSE.

Plants from Open Ground Ready October 20th.

This grand rose improves upon acquaintance. The better it is known the more popular it becomes. It is of rapid, vigorous growth; plants in our grounds attained a height of *fifteen feet* the past season. The flowers are produced in trusses pyramidal in shape, good specimens measuring *nine inches from base to tip and seven inches across*, fairly covering the plant from the ground to the top, so that it is *one mass of glowing crimson*. The color is superb, and remains strong and vivid to the end; plants in our grounds retained the bloom for two months. The profusion of bloom is marvelous, *over three hundred blooms having been counted on one shoot*.

THE YELLOW RAMBLER. AGLAIA.

It is perfectly double, **very fragrant**, entirely hardy, having withstood, unprotected, a prolonged temperature of from zero to two degrees below. It is related to the Crimson Rambler, and, like it, blooms in large trusses. The flowers last three to four weeks without fading. It is a very vigorous grower, making shoots 8 to 10 feet in one season when well established.

THE WHITE RAMBLER. THALIA.

This variety bears clusters of pure white flowers, which are deliciously fragrant. The flowers remain on the plant a long time—from three to five weeks—and keep a long time when cut. The plant is perfectly hardy, equal in this respect to the Crimson Rambler, and where one is planted the other should be also. By growing this in a pot and training it to a pyramidal trellis, a fine plant may be had in bloom for Easter.

THE PINK RAMBLER. EUPHROSINE.

This beautiful variety is fit to rank with the two above mentioned. It is from the same source as the White Rambler, fully the equal of both in hardiness, vigor, size and profusion of flowers and blooming qualities.

Prices for the four "Rambles" above, plants from the field ready October 20th, \$2.00 per doz., \$15.00 per 100; plants from 4-inch pots, now ready, \$2.00 per doz., \$15.00 per 100.

NOTE.—The Crimson Rambler is undoubtedly superior to the others, but they are very useful climbing roses.

THE MEMORIAL ROSE. ROSA WICHURAIANA.

The grandest plant for cemetery decoration in existence. It grows flat on the ground, like an ivy, and blooms in grand abundance throughout July and intermittingly the balance of the season, pure white, sweetly fragrant flowers, with a golden yellow disc. It is perfectly hardy, and if planted this fall should bloom next season. Price, strong plants from open ground, \$2.00 per doz., \$12.00 per 100. Ready October 20th.

HENDERSON'S SWEET PEAS.

SWEET PEAS HENDERSON'S CREAM OF THE SWEET PEAS

FIFTY GIANT NAMED VARIETIES.—All small flowering and inferior sorts have been discarded.

SPECIAL NOTICE

of our New Departure in Offering
ONLY THE CREAM
OF THE
SWEET PEAS.

There are too many so-called varieties of Sweet Peas—nearly two hundred—offered to the public. Many of them are alike, or so nearly so that experts can scarcely distinguish them apart. So we have culled out inferior older varieties that have been improved upon, the newer sorts that have been improved upon, and the sorts that have been offered under different names by different firms which we have proved at our trial grounds to be the same thing.

If we do not offer the variety you are looking for on the next page, refer to this discarded list, which tells what better variety of same color to select in place.

OUR LIST OF DISCARDED SWEET PEAS.

WITH THE SUPPLANTING VARIETY WE RECOMMEND AS BEING SIMILAR AND SUPERIOR.

Mammoth Rock Red. This is the finest of all the red cabbages, especially for the market gardener. The seed we now offer was grown especially for us by a Long Island market gardener from a select stock, which had brought the top price in the New York market for many years. This will account for its higher price, but to the market grower it is well worth the extra cost.

Thousandfold.	\$1.50 bush., 10 bush. lots \$1.40 per bush.

VETCH, SAND OR WINTER (Vicia Villo sa.) 15c. lb. \$3.25 peck. \$8.00 bush. of 60 lbs., 100 lbs. \$13.00.

Is perfectly hardy throughout the United States, remaining green all winter, and should be sown during August and September, mixed with Rye, which serves as a support for the plants, or in spring with oats or barley.

Being much harder than Scarlet Clover, this is the forage plant to sow in the Northern States where Scarlet Clover winter-kills, though it is equally valuable in the South. Every dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it.

Sow one bushel per acre with one-half bushel of Rye or Wheat.

RAPE, DWARF ESSEX. 10c. lb., 100 lbs. \$7.00.

Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of Rape excels all other plants we know of. Sow 6 lbs per acre broadcast, 2 to 3 lbs. per acre in drills.

TURF FOR POTTING SOIL.

FLORISTS' SOD GRASS MIXTURE.

Every Florist knows that the best potting soil is made from turf cut from old pastures, but with Timothy in almost universal use, really good turf is difficult to procure, for Timothy, though excellent for hay, does not make a fibrous turf. For some years past we have for our own use and at request of other Florists, made up a mixture of strong fibrous rooted turf-forming grasses which has given the greatest satisfaction. This mixture of grasses will in two or three years produce a fibrous mat several inches thick, just the thing for potting soil. Sow during September or in spring three bushels per acre.

Price, Florists' Sod Grass

Mixture, \$2.50 per bushel of 14 lbs.

20 bushel lots, \$2.45 per bushel.

"For the past year we have been cutting sod for potting soil from the four acre field sowed three years ago with the grass mixture you recommended me. We have been using it on the benches for Roses and for potting, and it is everything that can be desired. It fills a long felt want, as for a number of years back it has been a difficult matter to get good sod."

August 8th, 1901.

AWNLESS BROME GRASS. (*Bromus Inermis*.) Will stand long droughts and produce heavy crops in dry sections where other grasses would perish. It has also proved one of the hardiest grasses. Will succeed in a wider range of temperature than any other grass. Will also grow and produce satisfactory crops on soil too poor to support Timothy and many of the other grasses.

BERMUDA GRASS. (*Cynodon Dactylon*.) Of great value in the Southern States, but does not thrive north of Virginia.....

Canada Blue Grass. (*Poa Compressa*.) Useful for sowing on hard clay and poor soils.....

Creeping Bent Grass. (*Agrostis Stolonifera*.) Excellent for lawns, succeeds well in most situations.....

ENGLISH RYE GRASS. (*Lolium Perenne*.) A valuable grass where quick results are desired, as it grows rapidly and makes a good showing within a month from time of sowing.....

Fine-Leaved Sheep's Fescue. (*Festuca Ovina Tenatifolia*.) The finest bladed grass and valuable only for lawns.....

HARD FESCUE. (*Festuca Duriuscula*.) A dwarf-growing grass of great value, succeeding well in dry situations. Has a wonderful root formation, forming a dense fibrous mat.....

HUNGARIAN GRASS. (*Panicum Germanicum*.) Is a valuable annual forage plant. 1 bushel to the acre.

ITALIAN RYE GRASS. (*Lolium Italicum*.) Thrives in almost any soil and yields early and abundant crops. Sown in the fall will produce an excellent hay crop the following season, but lasts only one year.....

Johnson Grass. (*Sorghum Halapense*.).....

KENTUCKY BLUE GRASS. (*Poa Pratensis*.) Fancy or double extra clean. Though offered at the standard weight of 14 lbs. per bushel, the natural weight of this fancy seed is 20 to 25 lbs. per measured bushel.....

MEADOW FESCUE. (*Festuca Pratensis*.) Of great value in mixtures for permanent pasture.....

MEADOW FOXTAIL. (*Alopecurus Pratensis*.) One of the best grasses for permanent pasture. Is the earliest grass, and of rapid growth.....

ORCHARD GRASS. (*Dactylis Glomerata*.) One of the most valuable grasses, and should be one of the main varieties in mixtures, either for pasture or hay.....

Red or Creeping Fescue. (*Festuca Rubra*.) Forms a close, rich sod, and is valuable in lawns.

RED TOP GRASS. (*Agrostis Vulgaris*.) Choice Fancy or extra recleaned seed.....

Rhode Island Bent Grass. (*Agrostis Canina*.) A very fine variety for lawns.....

ROUGH-STALK MEADOW. (*Poa Trivialis*.).....

SHEEP'S FESCUE. (*Festuca Ovina*.) Short and dense in growth, excellent for sheep pastures. Valuable also for lawns and pleasure grounds.....

TALL MEADOW FESCUE. (*Festuca Elation*.) Very early, nutritive and productive. Should form a portion of all pastures on wet or clay soils.....

TALL MEADOW OAT GRASS. (*Avena Elation*.) Recommended for soiling, being rapid and luxuriant in its growth, also of great value in permanent hay mixtures.....

TIMOTHY. (*Phleum Pratense*.) We offer a particularly "choice" sample, free from weed seeds. Large quantities of Timothy seed are on the market which are so foul with noxious weed seeds as to be dear as a gift, and there is no sound reason for farmers to sow such seed when we offer pure seed of high germinating power at such reasonable prices. Price subject to change without notice.....

Various-Leaved Fescue. (*Festuca Heterophylla*.) Valuable for permanent pasture, and is also desirable in lawn mixtures.....

Wood Meadow Grass. (*Poa Nemoralis*.) Of early growth and thriving well under trees.....

...CLOVERS...

ALFALFA, or LUCERNE. (*Medicago Sativa*.) A permanent clover of great value on all soils which contain lime in any form, and should be much more extensively grown. One of our customers in Logan Co., Ohio, cut four crops in one season. The aggregate length of the four cuttings was over ten feet, and made six tons of cured hay per acre. Alfalfa should be cut every time it comes in blossom, whether the growth is short or tall, for if allowed to form seed, it shortens the life of the plant. Sow in drills, 12 lbs. per acre; broadcast, 18 to 20 lbs. per acre.....

ALSIKE, or HYBRID CLOVER. (*Trifolium Hybridum*.) Equal in nutritive value to the Red or Pea Vine Clover, and excellent for land that is clover-sick.....

Bokhara Clover. (*Melilotus Alba*.) Affords excellent food for bees throughout its season.....

Japan Clover. (*Lespedeza Striata*.) A low-spreading perennial, much like white clover, of great value in the Southern States.....

Mammoth Red, or Pea-Vine Clover. (*Trifolium Pratense Perenne*.).....

RED CLOVER, Medium. (*Trifolium Pratense*.)

CAUTION.—Every care should be exercised in buying Red Clover, for there is always on the market at a cheap price, large quantities badly infested with weed seeds, which in size and appearance closely resemble Red Clover, and cannot be cleaned out. When pure seed is expensive, as it is this year, Red Clover is frequently purposely adulterated with Yellow Trefoil (a small yellow-flowered annual clover of little or no value and apt to become a weed), sold to the unsuspecting farmer by country merchants who do not have the expert knowledge to detect it, and upon whom it is foisted by unscrupulous dealers. Our seed is of high germination, pure and free from weed seeds and foreign matter.

Price subject to change without notice.....

SCARLET CLOVER. (*Trifolium Incarnatum*.) Of great value for sowing in the fall for plowing under the following spring.....

WHITE CLOVER. (*Trifolium Repens*.) Should be used in all mixtures for permanent pasture and for lawn.....

SOW "THE HENDERSON" LAWN GRASS SEED

THIS
FALL

AND HAVE A
PERFECT LAWN
EARLY NEXT SPRING.

THE "HENDERSON" LAWN GRASS SEED

Will form a close, thick turf in a few week's time; with no tendency to stool or grow in clumps. It roots deeply and withstands severe droughts without turning brown, maintaining its beautiful deep green color throughout the season. We have made the formation of permanent lawns a study for years, and the **Finest Lawns in this Country To-day were obtained by using The "Henderson" Lawn Grass Seed**, which is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England.

If people only knew how comparatively easy it is to make a lawn with the "Henderson" Lawn Grass Seed, the days of using Sod, with all the attendant expense, would soon be over.

The beautiful Lawns at the World's Fair in Chicago we produced in six week's time with the "Henderson" Lawn Grass Seed. Not one of the charming features of the Exposition was so universally admired as our "setting of emerald velvet," which, notwithstanding the long continued drought of the summer, retained its verdure throughout the entire season. Besides being the only lawn grass seed granted a medal, we exhibited the separate grasses used in the mixture and received **Seven Awards** for superior quality and purity of samples.

THE "HENDERSON" LAWN GRASS SEED is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs. per measured bushel.

THE QUANTITY REQUIRED.

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns 1 to 2 bushels. For a plot, 15x20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns. Full printed instructions in every package and bag.

PRICES. Per qt. 20c., per peck, \$1.25; per bush., \$4.50. [If by mail, add at the rate of 5c. per quart for postage.]

Henderson's ==

"TERRACE SOD" LAWN GRASS.

A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out, that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich velvety green turf throughout the season.

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bush.

"SUNNY SOUTH" LAWN GRASS.

Specially prepared for the South or for very dry sections, and contains the best grasses adapted for hot, dry situations.

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bushel.

Henderson's ==

"SHADY NOOK" LAWN GRASS.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty.

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bush.

Henderson's ==

"GOLF LINK" GRASS SEED.

A mixture of grasses that will produce a sward equal to those of the "GOLF LINKS" of Scotland.

While the outlying portions of the "links" can be seeded with less expensive grasses, the "putting greens" for about twenty yards around the "holes" must be sown with the very finest grasses.

For Putting Greens, we can supply a special mixture of grasses. Price, 25c. per qt.; \$1.50 per bushel of 25 lbs.

For the Outlying Grounds or Fair Greens we can supply a suitable mixture of grasses. Price, 15c. per lb.; \$16.00 per 100 lbs.

FOR TYING

MASTICA FOR GLAZING.

Greenhouses, sashes, etc., new and old. It is Elastic, Adhesive and easily applied; it is not effected by dampness, heat or cold.

MASTICA
GLAZING
MACHINE
\$1.15 Each.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is, putty is not adopted for greenhouse work.

After much study, the inventor of "Mastica" decided that the composition must be of different material, and the qualities must be elastic and tenacious to admit of expansion and contraction without cracking. "Mastica" when applied, in a few hours forms a skin or film on the entire mass hermetically sealing the substance and preventing evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a Mastica machine on the outside of sash as it makes it perfectly tight and saves the expense of relaying the glass. One gallon is sufficient for about 300 lineal feet used either for bedding or over glazing.

Prices for Mastica, soft for machine application, 45c. per quart; 65c. per half gallon; \$1.25 per gallon.

Make Moist Smoke.

Eureka Fumigator.

This fumigator will last for years; it has a water tank between the fire and the outside, preventing burning out. The tank should be filled with tobacco water, from which a vapor arises and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious to delicate foliage than from any other fumigator made. Outside fumigating can also be done with the Perfection; the cast-iron lid is made so a hose can be attached, and all the outlets for the smoke (except through the hose) can be closed off. No. 1 holds one peck of stems \$2.70; No. 2 holds half bushel of stems, \$3.35; No. 3 holds 3/4 bushel of stems, \$4.00.

ROSE LEAF EXTRACT OF TOBACCO. INSECTICIDE.

This insecticide has been now most thoroughly tested, and has been proven one of the most effectual articles ever used for the destruction of all insects and scale on plants, that did not injure in some degree the affected plants. **Rose-Leaf Insecticide** is a perfectly pure, highly concentrated extract of tobacco, always of uniform strength of nicotine. It can be applied in various ways, either spraying through a spraying bellows or syringe with spray nozzle, after it has been diluted with from 30 to 150 parts of water, according to the delicacy of the plants to be treated; it can also be used as a vapor, by boiling on small kerosene stoves or in "Evaporating Pans" attached to the pipes, or by dropping red hot iron in diluted extract, or by painting the pipes. Send for pamphlet giving full instructions for using. Also testimonial from many leading florists. Price pint can, 25c.; quart can, 50c.; one gallon can, \$1.25; five gallon can, \$4.25.

HENDERSON'S PICTURESQUE GARDENS.

THIS unique new book mirrors the charms of the prettiest parks lawns and gardens of Europe and America. The picturesque, the natural and the gardenesque adornments are reflected in about two hundred magnificent photographic illustrations from nature—many of these views are 5 x 7 inches, some larger, few smaller; they are grouped and printed in a most artistic manner on heavy-coated paper, with just enough text matter to describe the view and name the plants, vines, trees and shrubs needed to produce a similar effect or design.

There are in this country many lawns, gardens and grounds which the owners would improve and embellish, but they do not know exactly what they want, what would look well, nor how to go about it, and it is for the benefit of such that we have prepared this book; for, although there are countless works of exhaustive *precept* on landscape and gardening, there have been none issued so rich with illustrations of *example* as in HENDERSON'S "PICTURESQUE GARDENS." In it we force no particular styles or fashions, but describe and picture such a great variety of lawn and garden creations that some fruitful suggestions must be found adaptable to the environment of every home, whether pretentious or modest. Price, postpaid, \$2.50.
