NOTICE.

The undersigned has this season to offer an immense stock of well grown Roses; his collection embraces all the really standard varieties of merit, as well as such novelties as are likely to prove valuable, which have been sent out up to present date. The description of the new varieties are those of the raisers, in England and the Continent. They are, however, in every case Florists of the highest standing, as well as the certificates of Horticultural Societies.

The collections are on their own roots, except a few of the newer kinds which have not been sufficiently long on hand to have established plants in that way, and which can be supplied on Manetti, and such varieties as from experience have been found to do best budded. Such are marked thus*. These we shall propagate on own roots as speedily as possible; and shall have plants ready a little later. All are grown in pots, and can be shipped at any season.

After many years' experience in packing and forwarding plants to distant countries, he flatters himself he can pack both economically and safely for any distance. For which no charge is made.

We prepay packages by Mail. Large Plants, or in quantity when sent by Express, are at expense of purchaser.

Small orders sent safely by Mail to any Post Office in the United States.

Orders are expected to be accompanied with a remittance, or the articles will be forwarded C. O. D., at the purchaser's option.

This Catalogue annuls all previous issues.

****Rosa Polyantha.* (New of 1880.)**

Mad'lle Anne Marie de Montravel, a beautiful seedling from the Japanese Rose polyantha.

"I was struck with the large trusses of blooms exhibited. I found a great number of plants of it covered with blooms, and on nearly all the branches numerous clusters of flower buds. They had been continually in bloom the whole season, it is a seedling from *Rosa polyantha*, (a Japanese species.) The plant, which is dwarf, (being about 1½ feet high,) is vigorous; what is very remarkable, some of the trusses rise about 1 foot above the foliage, and consists of a considerable quantity of blooms, both open and in the bud state; on one I counted sixty-five, a number, as far as I know, very uncommon. The flowers are pure white, and last very long in perfection, they measure about 1½ inch in diameter, and are very double. Each truss will make in itself a splendid bouquet. It will doubtless make a fine pot rose."—*Jean Sisley, Lyons, France.* 75 cents each.
