A DESCRIPTIVE CATALOGUE
OF
Orchids, Nepenthes, &c.
For 1880.

Cultivated for Sale

BY

JOHN SAUL,
Nurseryman, Seedsman and Florist,
WASHINGTON, D. C.

SEED and FLORAL STORE—621 Seventh Street, Opposite U. S. Patent Office.
NURSERY and GREENHOUSES on Seventh Street Road.

This Catalogue will be found to contain many of the finest Orchids in cultivation. Natives of the American continent, as well as the East Indies. To this I expect to be constantly adding, as I have perfected arrangements with collectors in Mexico, South America, as well as the East Indies, from whom I expect constant shipments. Cultivators will find my prices much lower than the same species can be purchased at in Europe. All cultivators of Orchids know how greatly they vary in value in proportion to the size of the plant. The prices given are for nice plants, the sizes usually sold by Nurserymen—larger specimens of most can be supplied at a proportionate advance.

(T) Distinguishes the Tropical species such as require the temperature of a hot-house.

(I) Intermediate or warm greenhouse.

(C) Cool, or such as may be grown in an ordinary greenhouse.

ORCHIDS.

		Per plant.
(T)	<i>Aerides Odoratum</i> . A fine species from India, flowers white, stained with pink, having a delightful fragrance.....	\$2 50 to 5 00
(T)	<i>Crassifolium</i> . This species is one of the most beautiful of its class; the growth is compact, produces its long spikes of pink and white flowers in May and June, and continues in bloom a very long time.....	
(T)	<i>Lobbii</i> . A free flowering and handsome species from India, flowers pink in long branching spikes; a very fine species,.....	\$2 50 to 5 00
(I)	<i>Fieldingii</i> . "A magnificent free flowering Indian Orchid; the spikes sometimes attain a length of three feet and are branched; flowers white and rose color, unusually large, and continue in bloom three or four weeks.".....	5 00
(T)	<i>Roseum</i> . A beautiful species from India, producing leaves a foot long, spotted with brown; flowers light rose color, spotted with a darker shade of the same color; it blooms in June.....	\$2 50 to 5 00
(T)	<i>Virens</i> . "A lovely plant from Java; the flowers are a light peach color, spotted with purple, the lips spotted with crimson; blooms in May and June, and continues long in perfection.".....	\$3 00 to 5 00
(I)	<i>Warnerii</i> . This charming Orchid has dark purple stems, leaves short and narrow, raceme nearly erect, much longer than the leaves, sepals and petals pure white, lip large, rich deep rose color.....	5 00
(T)	<i>Angræcum Sesquipedale</i> . "A wonderful plant from Madagascar; foliage dark green, about ten inches long, blooms beautiful ivory white and very large, with a tail or spur hanging from the bottom of the flower from twelve to eighteen inches in length; it blooms during winter, and last three weeks in beauty; a very beautiful plant.".....	
(C)	<i>Arpophyllum Spicatum</i> . A pretty evergreen Orchid from Guatemala; flowers dark red on upright spikes, which continues in beauty three or four weeks during the winter months.....	1 50
(C)	<i>Brassavola Glauca</i> . An evergreen Orchid from Mexico; flowers creamy white with a pink mark on the upper lip, blooms in February or March, and lasts two or three weeks in perfection.....	2 00
(C)	<i>Grandiflora</i> . A very fine new species.....	2 50
(C)	<i>Barkeria Spectabilis</i> . A charming plant; the flowers are produced from top of the bulb, on a spike bearing eight or ten flowers, of a rosy pink or blush dotted with deep crimson, blooms in May, and lasts three or four weeks in perfection.....	3 00
(I)	<i>Calanthe Veitchii</i> . Flower spikes eighteen inches high, blossoms a rich rose color. This has proved one of the best and most useful for winter decoration.....	2 50
(I)	<i>Vestita Nivalis</i> . Flower spikes about eighteen inches high, blossoms pure white, blooms during winter, and fine for decoration.....	2 00
(I)	<i>Vestita lutea oculata</i> . Blooms from October to February, long drooping flower spikes, sepals and petals white, lip of the same color with a yellow blotch in the centre; fine for winter decoration.....	2 00

Per plant.

- (I) *Calanthe Vestita Alba*. Similar to the last, flowers pure white, blooms at the same season, and like it fine for winter decoration..... 2 50
- (I) *Vestita rubro oculata*. Long drooping flower spikes, flowers more than two inches across, the sepals and petals delicate white, the lip of the same color, with a blotch of rich crimson in the centre; blooms from October to February. No collection should be without the varieties of *C. Vestita* as they are all fine for winter blooming..... 2 00
- (I) *Turneri*. Longer flower spikes, larger flowers and in greater profusion than the other kinds; flower compact pure white, with rose-colored eye; a handsome variety.....\$3 00 to 5 00
- (I) *Chysis Bractescens*. Flowers on a short spike, sometimes six together, each flower measuring two to three inches across, sepals and petals white, the lip has a blotch of yellow in the centre, flowers in April and May..... 2 00
- (I) *Cattleya labiata*. A very free flowering species; flowers large, often six or seven inches in diameter, and three or four on a spike; sepals and petals rose color, labellum rich crimson, blooms in October and November, and continues in perfection three or four weeks; very scarce.....
- (I) *Mossia*. A magnificent and free flowering Orchid from La Guayra. The flowers are very large, a single one being four or five inches across, and three or four on one spike, sepals and petals rich violet, labellum rich crimson, flowers during summer, and remains in perfection three or four weeks; a grand plant.....\$2 00 to 5 00
- (I) *Speciosissima*. A magnificent species, flowers large, sepals and petals deep violet, labellum crimson, a vigorous grower with grand spikes of flowers.....\$2 50 to 5 00
- (I) *Skinneri*. A beautiful and free flowering species, which blooms during the spring months; the blooms are rose and purple, and remain two or three weeks in perfection; a free grower..... 2 50
- (I) *Citrina*. A beautiful species from Mexico, with large bright yellow flowers; blooms during summer..... 2 00
- (T) *Superba*. Flowers of a deep rose color with a crimson lip, remains in bloom three or four weeks, produces four flowers on a spike; a very distinct and beautiful species, 5 00
- (I) *Trianae*. This blooms during the winter months, and measures several inches in diameter; sepals and petals blush, lip blush, or pale rose color outside, throat orange or yellow, and front rich purple. A charming Orchid.....\$2 50 to 5 00
- (I) *Warneri*. One of the finest of *Cattleyas*; flowers large, more than six inches across; sepals and petals beautiful rose, lip of a rich crimson, and finely fringed.....\$2 50 to 5 00
- (I) *Cœlogyne Cristata*. A magnificent Orchid of dwarf habit; flowers proceed from the base of the bulb, on a drooping spike, six or eight together, each flower three or four inches across, color a beautiful white, with a blotch of yellow on the lip, blooms in February, and will continue in perfection four or five weeks..... 2 50
- (C) *Cœlia Macrostachya*. Flowers in spikes, color red..... 2 00
- Sp. With large purple spikes..... 2 00
- (I) *Cypripedium Barbatum Superbum*. A fine variety, in the way of *Barbatum*, but the foliage is more variegated, and the flowers handsomer, the lip being very dark, and the upper petal having more white, will last six weeks in perfection 2 50
- (I) *Boxali*. An extremely pretty novelty from Burmah, in the way of *C. villosum*, but color of the flower is much darker, and the dorsal sepal is profusely spotted with purplish brown..... 2 50

		Per plant.
(C)	<i>Cypripedium Insigne</i> . A fine species, sepals and petals yellowish green, upper tipped with white and spotted with brown, labellum orange and brown, flowers freely during winter, lasting six weeks in bloom.....	0 60
(C)	<i>Insigne Maulei</i> . A handsome variety of the preceding; the dorsal sepal has much more white, this color being continued half way down, and the spotting is purplish.....	5 00
(C)	<i>Venustum</i> . Leaves dark green with spots and blotches of a darker color, flowers green and purple; a very fine and distinct species.....	0 75
(T)	<i>Lawrenceanum</i> . A grand species, leaves about a foot in length, which have on their inner surface a dark mosaic on a light ground. Upper sepal is very broad and round, white, with thirteen dark purplish shining veins which run to the edge. It is of a yellowish white, waxy color, with a purplish edge and green reticulations.....	
(I)	<i>Niveum</i> . Leaves dark green marbled with white. The flowers are white, marked with minute delicate violet spots, and have a deep yellow blotch on the staminode; a perfect little floral gem.....	2 50
(I)	<i>Pearcei</i> or <i>Caricinum</i> . A very distinct species, with long creeping rhizomes; flower spike rises above the foliage, producing from four to seven flowers of a pale green, sepals and petals have a white margin, the ends blotched with brown.....	2 00
(I)	<i>Sedeni</i> . A beautiful hybrid with shining foliage, flowers white, beautifully mottled and striped with dark rose, the spikes bear several flowers and continue a long time in bloom.....	5 00
(I)	<i>Harrisianum</i> . A beautiful hybrid between <i>C. barbatum</i> and <i>C. villosum</i> , and it is exactly intermediate. Flowers larger than those of <i>C. barbatum</i> , sepals and petals shining purple; lip claret color tinged with green.....	2 50
(T)	<i>Superbiens</i> (<i>Veitchianum</i> .) A beautiful species, with very finely variegated foliage. It blooms in June, and continues a long time in flower; it makes a grand plant.....	
(I)	<i>Villosum</i> . A fine E. Indian species, grows about a foot high; flowers singly, often five inches across; having a fine glossy appearance, color orange red, intermixed with light green and purple, flowers in spring, and continues six or eight weeks in perfection,.....	2 50
(I)	<i>Cyrtopodium Andersonii</i> . Pseudo bulbs, very long, producing in spring fine spikes of yellow flowers.....	2 50
(C)	<i>Cyrtochilum Maculatum</i> . Flowers during winter and spring months, spikes of green and purple spotted flowers.....	1 50
(I)	<i>Dendrobium Aggregatum</i> . A very pretty dwarf species from East Indies, produces its handsome yellow flowers in March and April, and last two weeks in bloom; a very desirable species.....	\$2 50 to 5 00
(I)	<i>Alba Sanguineum</i> . A charming plant, with stems about a foot high, and producing its large flowers from nearly the top, sepals and petals creamy white, lip of the same color, with a crimson blotch in the centre; it blooms in May, and lasts a long time in perfection...\$2 50 to	5 00
(T)	<i>Barbatulum</i> (<i>Fytchianum</i> .) A charming epiphyte from Moulmein; it grows about a foot or more long, and produces clusters of flowers of the most delicate white, with a few spots of crimson.....	5 00

		Per plant.
(T)	<i>Dendrobium Bensonii</i> . A lovely species, producing large creamy white sepals and petals; the lip is orange, with two large black spots at the base; a very beautiful plant, \$3 00 to 5 00	
(T)	<i>Crassinode</i> . Pendulous habit, with vigorous stems strongly knotted, flowers during winter, petals and sepals white, tipped with magenta, the labellum orange, margined with white and crimson spots; last a long time in perfection; a lovely species.....	5 00
(T)	<i>Crassinode Barberianum</i> . A splendid variety of the last, the flowers are very highly colored.....	6 00
(I)	<i>Calceolus</i> (<i>Calceolaria</i>). A large growing plant, making pseudo bulbs about four feet high, flowers on a raceme twelve or more together from the top of the stem, of a bright yellow; flowers during summer.....	2 50
(T)	<i>Crystallinum</i> . A beautiful sweet-scented species, with stout stems covered with whitish striated sheaths, and marked with transverse blackish bars; flowers milk white, tipped with purple, and the disk of the lip, in addition, rich orange. Native of Burmah...\$2 50 to	5 00
(T)	<i>Chrysotoxum</i> . Growth upright, a foot or more in height; it produces its pale yellow flowers on a spike from the top of the stem, blooms during winter and spring, and lasts three weeks in bloom; a charming Orchid.....\$2 50 to	5 00
	<i>Cucullatum</i> . A magnificent <i>Dendrobium</i> from Burmah.....	5 00
(I)	<i>Chrysanthum</i> . A charming species, flowers of a bright yellow, with a dark red spot on the lip; lasts two weeks in perfection.....	2 50
(I)	<i>Devonianum</i> . This is one of the finest of the genus, a pendulous growing species, the blossoms proceed from nearly the whole length of the bulb, which is very long and slender, the flowers are two inches across, sepals cream color, shaded with pinkish purple, petals pink, with a deep purple stain, the lips broad and fringed with rich purple on the ends, with two spots of rich orange on the column; blooms in May, \$2 50 to	5 00
(T)	<i>Dalhousianum</i> . Bulbs grow three or four feet long, it blooms from the old growth with numerous flowers on a spike, during spring; the flowers are large, of a pale lemon color, with a pink margin and two dark crimson spots in the centre.....\$2 50 to	5 00
(I)	<i>Densiflorum</i> . A magnificent species of erect growth; it produces its beautiful spikes of rich yellow flowers, from the side of the bulb near the top; it blooms during the spring months.	\$2 50 to 5 00
(T)	<i>Eburneum</i> . A very beautiful species from Moulmein; white with purple lips.	\$2 50 to 5 00
(I)	<i>Fimbriatum Occulatum</i> . Bulbs grow from two to three feet high, producing flower spikes on top of the bulbs; the flowers are large, of a rich orange yellow, with deep brown spot on the lip; blooms in spring, \$2 50 to	4 00
(C)	<i>Falconerii</i> . A magnificent Orchid, a pendulous grower; the flowers are beautiful white and purple; remains in perfection two or three weeks; blooms in spring, \$3 00 to 5 00	
(I)	<i>Formosum</i> . A handsome compact evergreen Orchid; blooms on the top of the bulb three or four together; the flowers are white, with a bright yellow centre; they last six weeks or more in perfection.....	\$2 50 to 5 00
	<i>Formosum Giganteum</i> . A grand variety.....	\$2 50 to 5 00

		Per plant.
(I)	<i>Dendrobium Gibsonii</i> . A very pretty species about two feet high; the blooms are produced on the ends of the old bulbs; sepals and petals rich orange, the lip bright yellow, with two dark spots on the upper part; blooms during autumn.....	5 00
(I)	<i>Heterocarpum</i> . A very pretty species, blooms freely during winter, and last several weeks; flowers white, margined with magenta.....	2 50
(T)	<i>Hedyosmum</i> . A beautiful sweet-scented Orchid, and of easy culture; flowers white, except the lip, which is shaded with green and yellow and striped with orange, and yield a delicious perfume.....	\$3 00 to 5 00
(I)	<i>Moschatum</i> . A handsome species, grows three or four feet; blooms from top of bulb in a raceme, color bright orange, lip chocolate, edged with yellow.....	2 50
(C)	<i>Moniliforme</i> (<i>Japonicum</i> .) A pretty Japanese species, of upright growth, blooms all up the stem, color lilac and white, flowers during winter, lasting ten weeks in beauty	2 50
(I)	<i>Nobile</i> . A magnificent Indian Orchid, a free growing, free flowering species, color pink and white, with a spot of crimson in the centre of the lip; it blooms during the winter and spring months, lasting three or four weeks in good condition.....	75 cents to 3 00
(T)	<i>Nodatum</i> . A pretty Orchid, readily distinguished by its thick joints, a free grower, sepals and petals white, clouded with yellow, lip bright orange, margined with white, and a large blood red spot at the base, \$2 50 to	4 00
(I)	<i>Parishii</i> . A beautiful Dendrobe, with long thick stems; flowers in pairs, which are a beautiful dark rose, lip light, with dark purple markings on each side of the throat.....	\$2 50 to 5 00
(I)	<i>Paxtonii</i> . Bulbs about three or four feet long; it blooms at different times of the year from the top of the old bulb, on a spike of a beautiful orange color, with a dark centre; remarkably handsome	\$2 50 to 5 00
(I)	<i>Pierardi</i> . A useful species, flowering during the winter and spring months; it is of drooping habit, flowers of a beautiful white and yellow, and lasts three weeks in beauty.....	\$1 50 to 3 00
	<i>Pierardi latifolium</i> . A very fine variety of the last, \$2 50 to	5 00
(T)	<i>Tortile Roseum</i> . A pretty species, grows about two feet high, and flowers in the way of <i>Nobile</i> ; flowers of a delicate rose, shaded with yellow; blooms in May....	5 00
(T)	<i>Thyrsiflorum</i> . A fine showy species, with the apex of the bulbs slightly yellow, and producing splendid clusters of golden and white flowers.....	\$2 50 to 4 00
(T)	<i>Wardianum</i> . A magnificent species; it is pendulous in growth, making strong knotted stems two to three feet long, on which the flowers are produced, each flower measuring upwards of three and a half inches in diameter; the color is white, tipped with magenta, the lower part of the lip a rich orange, spotted on each side with crimson; blooms in spring.....	5 00
(C)	<i>Disa grandiflora</i> . This fine plant is a native of the Cape of Good Hope, it attains the height of a foot to eighteen inches, bearing on the tops of the stems from two to five of its beautiful scarlet flowers in June and July, which continue a long time in perfection, \$2 50 to	5 00
(C)	<i>Epidendrum bulbifolium</i> . A very interesting species.....	1 50
(C)	<i>Cinnabarinum</i> . A tall growing plant, which blooms on the top of the bulb, color bright scarlet, blooms in summer.....	2 00

Per plant.

- (C) *Epidendrum Cochleatum*. Flowers in spikes, bright purple showy, 1 50
- (C) *Falcatum (Parkinsoniana)*. A lovely species, flowers pure white, yellow centre..... 2 00
- (C) *Gracile*. Flowers in spikes, color red..... 1 50
- (C) *Oncidoides*. Flowers in spikes, bright yellow..... 1 50
- (C) *Odonatum*. Flowers in spikes, greenish white, very fragrant..... 2 00
- (C) *Vitellinum*. A small orchid, but one of the finest of the genus from Mexico, sepals and petals rich orange scarlet, lip bright yellow, flowers during winter, lasting six weeks or more in good condition..... 2 00
- (C) *Lælia anceps*. A remarkably beautiful Orchid from Mexico; sepals and petals rose lilac, the lip a beautiful deep purple. It blooms during winter. The flowers are three or four inches across, and last a month in perfection..... \$2 00 to 5 00
- (C) *Albida*. A lovely species, sepals and petals white; lip pink with stripe of yellow down the centre; a profuse bloomer during winter..... \$1 50 to 3 00
- (C) *Autumnalis*. A lovely Orchid. It produces its blooms on a spike, twelve inches or more high, and often as many as nine flowers on a spike; sepals and petals are of a beautiful purple, lip rose and white, with yellow in the centre, flowers four inches across..... \$2 00 to 3 00
- (C) *Acuminata*. Another pretty Mexican species; sepals and petals white, lip white with a dark blotch on the upper part. Blooms in winter and last three weeks in beauty..... 2 50
- (C) *Cinnabarina*. A charming species, flowers reddish orange, produced on upright spikes many together; blooms in spring... 2 50
- (C) *Majalis*. Flowers large, four inches across, of a delicate rose color, the lip is striped and spotted with chocolate. It blooms with the young growth, and last five or six weeks in beauty..... 2 50
- (I) *Superbiens*. A magnificent Orchid. It is a large growing plant, but one of the finest. The flowers are produced on a spike five feet long, having sometimes from fourteen to twenty flowers on a spike, each flower nearly four inches across. The flowers are of a beautiful deep rose, variegated with dark red, lip rich crimson striped with yellow. \$2 50 to 5 00
- Species from Mexico; fine..... 2 00
- (I) *Limatodes rosea*. A charming winter flowering Orchid. Few plants are more interesting or decorative during the dull season, and they may be had in flower for months together. The flower spike proceeds from the base of the bulb and attains a height of ten inches, bearing many flowers which are of various shades of pink and rose..... 2 00
- (C) *Lycaste Aromatica*. Flowers in spikes; yellow; extremely fragrant, 2 00
- Aromatica et in Odora*..... 2 00
- (C) *Cruenta*. Blossoms yellow, with a dark spot in the centre of the lip, flowers in abundance in March and April, and last three weeks in perfection..... 2 00
- (I) *Harrisoniæ (Maxillaria)*. The flowers are large, measuring some three inches in diameter, sepals and petals large and fleshy, waxy white, lip deep purplish lilac. Its flowers last an immense time in perfection..... 2 00
- (C) *Prismatocarpum*. Grows about a foot high with short bulbs. Flowers on spikes from the top of the bulb, sepals and petals creamy white, spotted with black, lip pink, blooms in summer..... 2 50
- (C) *Skinnerii*. A beautiful free flowering Orchid; sepals and petals pure white, tinged at the base with rose, lip same color, spotted with crimson; blooms during the winter months, and last a long time in beauty; should be in every collection. A glorious plant..... 2 50

		Per plant.
(C)	<i>Odontoglossom Bictoniensis</i> . From Mexico, long spikes of flowers, white with lilac lips; a very lovely Orchid; a free bloomer during summer.....	\$1 50 to 3 00
(C)	<i>Bictoniensis Alba</i> . A white variety of the last, and like it; very beautiful, and a profuse bloomer.....	2 00
(C)	<i>Cervantesii</i> (Membranaceum.) A beautiful small species; sepals and petals pure white, lip white, barred with brown; blooms during winter, and continues in bloom four weeks.....	2 50
(C)	<i>Cirrhum</i> . This superb new <i>Odontoglossom</i> is a much more handsome species than the still rare <i>O. naevium</i> , which it somewhat resembles in color and character, but infinitely surpasses; it produces fine strong branched spikes of blossom, each flower three or four inches across, white, marked and spotted in the way of <i>O. naevium</i> ; exceedingly chaste and beautiful.....	
(C)	<i>Citrosium</i> . A charming Orchid; it produces long pendulous flowers in summer, color white, the flowers measuring two inches across, fifteen to thirty on one spike; continues in perfection four or five weeks; very fragrant.....	2 50
(C)	<i>Cordatum</i> . A beautiful species, grows ten inches high, sepals and petals yellow, barred with crimson; lip white, spotted around the edge with crimson....	2 00
(C)	<i>Grande</i> . A very handsome species; it produces its large flowers on upright spikes during autumn; flowers mottled and striped with brown and yellow like the back of a tiger, the lips white and purple..	2 00
(C)	<i>Nebulosum</i> . A handsome species; the flower spike comes up with the young growth, bearing five or six large flowers, clear white, studded with spots of reddish brown; a rare species.....	2 50
(C)	<i>Pulchellum</i> . A nice species; the flowers are white, with the exception of the crest of the lip, which is spotted with crimson; blooms during winter, and continues a long time in good condition.....	2 00
(C)	<i>Pescatorei</i> . A magnificent species, grows about ten inches high; it produces branching spikes of richly ornamental flowers during spring; sepals and petals white, shaded with rose, lip white, yellow and rose, producing as many as a hundred flowers on a spike	
(C)	<i>Roetzlii</i> . One of the most beautiful; blooms twice a year; flowers large, two to three inches in diameter, sepals and petals pure white, purplish at base, lip white, with a purplish blotch; the flowers last in perfection four or five weeks.....	
(C)	<i>Rossii</i> . A very desirable Orchid; flowers one to two inches across, white, barred with brown, sepals white, with brown spots at base.....	\$2 00 to 3 00
(C)	<i>Warnerianum</i> . A very rare and beautiful species, of dwarf habit, the scape, which is longer than the leaves, bearing four or five flowers, sepals and petals pure white, with a few brown spots, lip white, shaded with rose, with a yellow blotch at the base.....	
(C)	<i>Oncidium Alatum</i>	2 00
(T)	<i>Ampliatum Majus</i> . One of the finest species in cultivation; it produces its large yellow flowers in abundance on a branching spike in April, May and June, and continues in bloom a long time.....	2 50
(C)	<i>Baueri</i> . Long spikes of yellow flowers.....	2 00

Per plant.

(C)	<i>Oncidium Cavendishii</i> . A magnificent species, with large broad leaves; its bright yellow flowers are produced in great abundance from strong branching spikes during the winter months.....	2 50
(C)	<i>Divaricatum</i> . Flowers yellow orange and brown, produced on long branching spikes during summer; very handsome.....	1 50
(C)	<i>Incurvum</i> . A pretty species, produces white and brown flowers during autumn and winter.....	2 50
(T)	<i>Kramerianum</i> . A very fine Orchid, somewhat in habit like <i>O. Papilio</i> ; pseudo bulbs, dark leaves, brightly spotted, flowers yellow, spotted profusely with rich dark brown spots; it keeps blooming from the top of the spike for years, and are often in great beauty.....	2 50
(T)	<i>Lanceanum</i> . Remarkably handsome and distinct, with beautifully spotted foliage; flowers large, produced on a stiff spike a foot or more high, sepals and petals greenish yellow, blotched crimson, lip rich purple violet; blooms during summer, and last four or five weeks in good condition.....	\$3 00 to 5 00
(C)	<i>Lavenderii</i>	2 00
(C)	<i>Multiflorum</i>	1 50
(C)	<i>Ornithorynchium</i> . A charming free flowering Orchid from Mexico; produces graceful, drooping spikes of flowers during the autumn and winter months, color delicate rose, and beautifully scented.....	2 00
(T)	<i>Papilio</i> . A magnificent Orchid; flowers the shape of a butterfly; it continues in bloom from the old flower stems for years, as soon as one flower fades another appears in its place; color a dark brown, barred with yellow.....	2 00
(C)	<i>Stramineum</i> . Long drooping spikes, of a delicate straw color.....	1 50
(C)	Species from Mexico. Long spikes of yellow flowers.....	1 50
(T)	<i>Peristeria elata</i> , (Holy Ghost Flower.) A noble Orchid, sends up tall spikes of waxy white flowers. The central parts of each flower presents a very striking resemblance to the figure of a dove; blooms during summer.....	2 50
(I)	<i>Pescatoria Flora de Espiritu Santo</i> , (<i>O. Pescatorei</i> .) A magnificent plant from Mexico, produces branching spikes, richly ornamented with flowers during April and May, sepals and petals with a shade of rose; lip white, yellow and rose.....	2 50
(T)	<i>Phajus Albus Superbus</i> , (<i>Thunia</i> .) A stately East Indian plant. The flowers pure white, except the lip, which is pencilled with purple; blooms during summer, and continues in bloom five or six weeks.....	\$2 50 to 5 00
(I)	<i>Grandifolius</i> , (<i>Bletia Tankervilleæ</i> .) This is a superb plant for winter blooming, produces flower spikes two to four feet long, color of flowers white and brown, a free bloomer, 0 50	
(I)	<i>Wallichii</i> . An East Indian Orchid, and one of the finest, a large growing plant, producing long upright spikes of flowers during spring, flowers orange yellow, tinged with purple.....	3 00
(T)	<i>Phalænopsis Schilleriana</i> . A magnificent species from Manilla. The foliage is beautifully variegated; the flower spikes are two to three feet long, individual flowers two and one-half inches across; sepals and petals beautiful light mauve, edged with white, lip the same color with dark spots, upper part yellow, spotted with reddish brown.....	
(C)	<i>Pleione Maculata</i> . A beautiful Orchid from the East Indies, leaves about six inches long; sepals and petals delicate white; lip white, beautifully barred with crimson. It blooms in October and November.....	2 00

		Per plant.
(T)	<i>Saccolabium Blumei</i> Majus. A charming Orchid. It has very long flower spikes, color violet and white, blooms during summer, and continues three weeks in perfection.....	
(T)	<i>Ampullaceum Moulmeinense</i> . A grand Orchid with deep green leaves, flowers in erect spikes, which are long and dense, and of a uniform rich deep rose, \$2.50 to 5 00	
(T)	<i>Curvifolium</i> . A handsome compact dwarf species, attains a height of six to twelve inches, a very free flowering species with orange scarlet blossoms; flowers in May and June.....\$2 50 to 5 00	
(T)	<i>Giganteum</i> . A very beautiful free flowering species; it will last in beauty for six weeks during the dull weather in winter. Leaves very stout and broad. It produces long racemes of thickly set flowers, sepals and petals white, the latter spotted with lilac; lip lilac and violet; deliciously sweet..... 5 00	
(T)	<i>Guttatum</i> . A remarkably handsome species. It blooms from May to August, and remains three or four weeks in perfection. The flowers are closely set upon the spike, which is upwards of a foot in length, and forms massive wreaths of bloom; sepals and petals waxy white, spotted with deep rosy purple, lip purple\$2 50 to 5 00	
(T)	<i>Reedii</i> . A charming new species 5 00	
(T)	<i>Sobralia Macrantha</i> A remarkably beautiful Orchid; the flowers are large, of a beautiful rich purple and crimson; blooms in summer 2 50	
(I)	<i>Stanhopea Martiana</i> . The sepals and petals are straw color, spotted with red, the labellum white; blooms during autumn... 2 50	
(C)	<i>Oculata</i> . A fine Mexican species. Has long drooping spikes of flowers, color of flowers pale yellow, spotted with purple, blooms during summer, fragrant..... 2 50	
(C)	<i>Tigrina</i> . From Mexico, the most beautiful of the genus, the flowers are very large, pale yellow, barred and blotched with deep chocolate, very fragrant, blooms during summer..... 2 50	
(C)	<i>Tigrina lutescens</i> . A very fine variety, flowers are brilliant yellow, inclining to orange, and barred with deep chocolate. 2 50	
(C)	<i>Tigrina Atrata</i> . A grand flower, has larger flowers and more richly marked than any other species or variety,	
(I)	<i>Wardii</i> . A handsome plant, color golden orange and yellow, and dark purple at base of the lip. Produces many flowers on a spike 3 00	
(C)	<i>Maculata et Oculata</i> . Species from Mexico; fine..... 2 50	
(C)	<i>Trichopilia tortilis</i> . A pretty species from Mexico. The sepals and petals are twisted like a corkscrew, they are brown and pale yellow, the lip white, spotted with red..... 2 00	
(T)	<i>Vanda Gigantea</i> . A fine massive plant; flowers in long spikes, color yellow, with brown blotches and crimson spots. It continues a long time in perfection..... 5 00	
(T)	<i>Teres</i> . A handsome, curious growing and distinct Orchid. Its large red and yellow-tipped flowers are produced during summer, and last four or five weeks in beauty.....\$2 50 to 5 00	
	<i>Utricularia Montana</i> . This plant should be grown in peat and sphagnum moss, in such a way as to allow the peculiar ovate bladders which cluster round the neck of the plant to be near the surface; the flowers are large, freely produced, and pure white, stained in front with bright yellow. Though not an Orchid, it succeeds best in the Orchid-house..... 2 50	

NEPENTHES.

Per plant.

- Gracilis Major.** This is a plant of free growth and somewhat compact habit; its pitchers are produced very abundantly; the ground color is dark green, over which is a profusion of dark reddish-brown spots, \$1 50 to 2 50
- Phyllamphora.** This plant is of very free growth, producing in great profusion moderate sized pitchers of a bright green.....\$1 00 to 2 50
- Lævis.** Of very free growth, producing its pitchers freely, of moderate size, of a bright green, shaded with reddish-brown.....\$1 00 to 2 50
- Courtii.** A hybrid pitcher plant of exceptional merit. The plant, although free growing, is dwarf in habit. The leaves are coriaceous, and margined with hairs. The pitchers, which are freely produced, are flask-like, deep green in color, densely spotted or clouded with deep crimson, and attain a length of from six to eight inches. The membranous texture of the pitcher is remarkably firm and durable.....
- Hookerii.** A magnificent species, of robust habit; the leaves are long and broad, supporting fine large pitchers upwards of four inches in length and two inches diameter. The ground color is dark green, which is profusely streaked and blotched with dark red..... 2 50
- Rafflesiana.** Of robust growth, producing very large pitchers of great beauty, which measure from six to twelve inches in length; ground color dark green, mottled and blotched with red. Its handsome pitchers render it a general favorite..... 3 00
- Sedeni.** The pitchers are produced freely even on very small plants; they are of medium size, oblong, dilated at the base, narrowed above the centre and again slightly expanded towards the top and provided with two ciliolate wings; in color a dark green, densely covered with dark red spots. It is of dwarf and very neat habit..... 2 50
- Hybrida Maculata.** It is of free growth and produces its pitchers in great profusion; they are cylindric, slightly contracted above the middle, and winged, the wings being ciliated; they are stained with purplish red spots of a peculiar tint by which this variety may be recognized... 2 50
- Dominii.** A very beautiful pitcher plant, producing its large pitchers freely; color green, marbled and spotted reddish brown 2 50

To persons wishing a good work on Orchids, I can recommend "The Orchid Grower's Manual," by B. S. Williams. It can be procured of C. H. Marot, 814 Chesnut street, Philadelphia, Pa.
