SPRINGFIELD, O.:
GLOBE PRINTING & PUBLISHING CO.
1886.

P R E F A C E.

In preparing the present edition of our Seed Catalogue; our desire has been to give a selection of the most choice flowers, avoiding the long list of names usually given in catalogues, a great part of which are of no value in our climate.

Having been engaged over thirty years in growing and harvesting seeds—flower and vegetable,—we flatter ourselves we can safely select the finest varieties, and such as cannot fail to please amateur cultivators, as it is very difficult for an inexperienced person to select from the long lists usually given. Being extensively engaged in importing and growing the new and rare plants and florist flowers, it will be readily seen that our facilities for saving seed of the choicest description are unsurpassed. The seeds are of a quality which growers alone can offer; whilst such articles as it is necessary to import are received direct from the first growers in England, France and Germany.

We guarantee that all seed sold by us shall prove to be as represented, to this extent; that should they prove otherwise, we will replace them or send other seeds to the same value. But we cannot guarantee the crop any further than the above offer, as there are so many causes which operate unfavorably in the germination of seeds and maturity of the crop, over which we have no control. Among the causes of failure may be mentioned unfavorable weather, which is one of the most important. The soil may be in proper condition when the seed is planted, but the weather which follows may be cold and wet, which will cause the seed to rot; or it may be hot and dry, which destroys the germ before it shows itself. The soil may also be unfavorable for the variety of seed planted. The seeds may be and are frequently destroyed by vermin of various kinds. And, lastly, changes not unfrequently occur, especially among new hybridized varieties, by which frequent sports are produced which give the planter the idea that his seeds are badly mixed. Such occurrences are beyond the power of man to prevent, and for such we cannot be responsible.

Forward money with the order.—Please send money with the order, sufficient to cover the whole bill, to facilitate the execution of your orders. During the busy season, to make out bills for customers, mail, charge, and in a few days receive the money, make the proper credit and send receipt, requires more work than we can possibly perform during the great press of business in the spring.

The safe arrival of all seeds is guaranteed, If a package is injured or lost, we will replace it as soon as informed of the fact.

Please write the orders legibly in a list apart from the body of the letter, to facilitate execution and prevent errors. Orders for plants should be on a separate sheet.

This Catalogue annuls all former prices.

CULTIVATION.

Flowering plants are from various parts of the world, temperate and tropical, and their habits are as various. Some are found on mountains, others in rich moist valleys, and again on arid plains. It follows that their treatment must be very dissimilar, and that it is not in the province of a catalogue to give any lengthened cultural directions. We will only offer a few general remarks on seed sowing.

In this latitude (Washington) nearly all the Hardy Annuals can be sown in April—say from first to middle—considering the season and the condition of the ground; whilst the more tender varieties—natives of warmer climates—should not be committed to the ground before the middle of May. Such tender plants as Double Zinnias, Clianthus, Dampierii, Cypress Vine, etc., should not be sown before the latter season, as they are natives of warm climates; and when sown early, and the ground is cold, they frequently perish. When this occurs, the blame is, of course, placed on the seedsman; when, had they been sown in proper season, success would be certain.

HARDY PERENNIALS—The common and large-seeded kinds may be sown in the open borders any time in April, but the rare and more delicate species will succeed with greater certainty if raised in a closed frame, with or without bottom heat. Thus treated, nearly all will flower the first season if sown early and planted out the early part of May. All those with very small seeds should be sown under glass. Amateurs will do well to bear in mind that though many Perennial seeds vegetate as quickly as those of Annuals, there are some others which usually remain dormant for weeks and even months. To this class belong the Cyclamens, Pæonies, Fraxinella, etc. Our native Perennials are best sown in autumn, or as soon as gathered, and they will then vegetate the following spring. As this is not always practicable, the plan of steeping the seeds before sowing, for twenty-four hours, may be adopted with great advantage in many cases. Half-hardy Perennials require the same treatment as hardy Perennials, differing only in their need of winter protection.

Green-house and hot-house seeds need a moist, warm temperature, such as the propagating-house or hot-bed frame. All seeds sown in frames or houses require shading, in bright weather, during the middle of the day, especially as spring advances. For all seeds sown in pots, under glass, a compost composed of well decomposed leaf mould, sand and sandy loam, will answer very well. Sow very thinly; cover the seeds with about their own thickness of soil. After germination has once commenced, the surface of the soil should on no account be allowed to become dry. Very small seeds, such as Mimulus, Lobelia, Calceolaria, etc., should not be covered with soil, but be sprinkled thinly on the soil, which should be previously watered from a fine rose. Chinese Primula germinates best when covered with a layer of damp moss. This seed often fails to grow from being too deeply covered with soil, and many other failures are attributable to the same cause.

A writer in The "Garden London," makes the following remarks on the germination of seeds: "I have, at the present time, two kinds of shrub seeds just appearing above ground, that have been sown, as nearly as possible, two years. In the ordinary course of affairs, many people, not understanding their nature, would have thrown them away at least eighteen months ago and blamed their seedsman for sending them bad seeds. Primula Japonica, if kept till spring, or until it has become thoroughly dry, will not germinate for at least a year, and some times two; and the same holds good in the case of many hardy plants."

ALL FLOWER SEEDS SENT BY MAIL, POSTAGE FREE.

For the convenience of persons unacquainted with plants, we have, for some years, put up the following collections, which are varied to suit different latitudes; among which are seeds of our own finest strain, which cannot be excelled. They have invariably given the greatest satisfaction.

Seeds of Beautiful New and Rare Plants.

AMARYLLIS . (Saul's). From my unrivalled collection. Saved from the finest named flowers, which have been carefully hybridized. Seed should be sown as soon as gathered. Ready May 1st.....	Per pkt. \$ 50
BELLIS perennis fl. pleno "Longfellow." A new variety with very large and very double flowers of a lovely dark rose color, which are borne on unusually long and stout flower stems, being therefore a great acquisition for cut flowers; nearly constant from seed.....	25
Alba Pleno . Saved from extra double white flowers, very handsome; constant.....	20
ACROCLINIUM Roseum, New Double . A distinct double form of this pretty Annual possessing all the delicate tints and shades of color peculiar to the single variety.....	25
AQUILEGIA Chrysantha . This is unquestionably one of the finest Perennials. Its large, golden yellow, long-spurred flowers are produced in great abundance from densely-tufted plants which maintain a long succession of bloom.....	05
Chrysantha Cœrulea . A seedling from the above, raised in our nursery. A counterpart of the last, with flowers of a beautiful blue.....	10
Wittmaniana . This is a remarkably fine new species, with very large purplish-blue flowers. The finest of all Aquilegias.....	10
ABUTILON . (Saul's). Saved from my fine collection of new flowers.....	20
BEGONIA , (Saul's) Tuberous-rooted . These novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the garden, for they produce in the utmost profusion magnificent flowers of very large size, and great variety in color. The tubers rest during the winter months, similar to Gladiolus, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of color of their blossoms, render them extremely showy and effective. Saved from our rich collection.....	20
New Hybrid Tuberous , blooming during fall and winter. Fine mixed.....	25
Schmidtii , very handsome free flowering.....	15
CHRYSANTHEMUM , (Saul's) "Paris Daisy or Marguerite." Etoile d'or, a fine yellow... White varieties, mixed.....	10
CLEMATIS , (Saul's) Jackmanii (Strain) . The seed offered was saved with care from our magnificent collection of these lovely climbers. Should be sown when ripe in fall; if kept till spring it frequently will not vegetate until the following autumn or spring.....	25
CLARKIA , "Mrs. Langtry." A novel and exceedingly beautiful form of Clarkia. The petals have an even edge (i. e. are wholly petaled), the color of the flower being purest white, with an evenly defined disc or center of brilliant carmine crimson.....	10
CANDYTUFT, Dobbies' White Spiral . Very remarkable for its vigorous growth and large pure white bloom; forming a very compact spike like that of the old White Rocket, measuring from 4 to 6 inches in length and 2 inches in diameter...	10
Carmine , a very beautiful rich colored variety.....	10
COLEUS . (Saul's). This has been saved with care from our rich collection, which embraces all the fine new American varieties, as well as European.....	10

	PER PKT.
CYCLAMEN, Persicum. Very fine strain, mixed.....	25
Albun. White.....	25
Atrorubens. Dark red.....	25
Giganteum. Much larger than Persicum, fine mixed.....	50
White and Purple. Separate colors.....	50
This is a beautiful new strain of very large flowers and rich and varied colors.	
CALECEOLARIA. Of these very lovely plants we offer the richest strains.	
Hybrida. From the most beautiful varieties.....	50
" A very fine strain.....	25
Shrubby. Fine mixed.....	25
CINERARIA hybrida plenissima. New double, saved from the finest double flower.....	50
Saved from the finest strain in cultivation.....	25
Hybrida. Large flowers, pure white.....	50
" Brilliant blue.....	50
" Red, lustrous.....	50
" Dwarf, large flowered.....	50
DAHLIAS, (Saul's), Single. Having imported and flowered the past season all the finest single Dahlias in cultivation, seed has been saved from the same with great care. The colors consist of shades of mauve, pink, cerise, orange, crimson, yellow, purple, and striped varieties.....	20
Paragon Strain. Saved from my fine varieties of "Paragon." Many extremely chaste and most beautiful varieties.....	20
DAHLIAS, (Saul's), Double. Our collection of this magnificent flower is unsurpassed in this country or Europe. Saved with care. Mixed.....	10
Pompone. Mixed. Saved with great care from our prize collection.....	10
Dwarf Bedding. From our fine collection.....	10
DIANTHUS, New Japanese. Eastern Queen and Crimson Belle. These are beautiful forms of <i>D. Heddeggii</i> . Eastern Queen is beautifully marbled; the broad bands of rich mauve upon the paler surface of the petals are very striking and pretty. Crimson Belle, as its name implies, is of a rich vivid crimson lake color; flowers of extraordinary size and substance, evenly and finely laciniated.....	10
DRACOCEPHALUM RUYSCHIANA, Var Japonicum. This is a hardy herbaceous perennial, 18 to 24 inches in height, branching from the base. The violet-blue flowers, $1\frac{1}{4}$ inches in length, are in terminal verticillasters, intermixed with numerous obovate acuminate leafy bracts. It is a very pretty and effective herbaceous plant. We strongly recommend it to all lovers of hardy plants.....	20
EXACUM affine. "New biennial species from Socotrana, forming small, compact bushes about 6 inches high, and having dark green ovate three-nerved leaves and terminal clusters of violet purple, beautiful Cyclamen-scented flowers." It succeeded well with us during summer in the open border, as well as being a good pot plant.....	50
ERYSIMUM Pulchellum. A dwarf spreading plant, very hardy, covered with an abundance of yellow flowers in the early spring and during summer.....	10
ESCHSCHOLTZIA Crocea flora pleno. A beautiful bright orange scarlet, shading off to salmon red color. The flowers are very double and of great substance, the appearance of the plant in growth being particularly distinct and charming. It is quite as hardy as <i>E. Crocea</i> , and the flowers are produced in the greatest profusion.....	10
Flora pleno alba. Double white.....	10
Mandarin. A distinct variety; the outer side of the petals brilliant scarlet, the inner side rich orange; very brilliant in color; and most desirable.....	10
FERNS. Spores of the finest species.....	15
GODETIA Cavannillesi. New species from Chili, 15 to 18 inches high; leaves linear-lanceolate, flowers nearly 1 inch in diameter, of a brilliant dark blood-red color, which does not exist amongst the whole collection.....	20
Lady Satin Rose. "This charming hardy Annual is admitted to be the most unique introduction. Whether grown in groups in the garden or in pots in cold frames for ultimate conservatory decoration, it is unequalled for brilliancy and general beauty.".....	25
Duchess of Albany. New white. The plants are about one foot high, branching from the bottom, and producing large clusters of <i>Ceanothra</i> -like flowers of a beautiful glossy, satiny white, each about 4 inches across when fully expanded. Profusely covered with trusses of flowers which entirely hide the foliage.....	15
Spotted Carpet. A charming <i>petite</i> variety of this popular genus; the plant is very dwarf, forming a curious carpet-like bush (hence its appellation), and bearing myriads of exceedingly chaste and pretty flowers of a pure white ground, but with a bright carmine rose spot at the base of each petal.....	10

GAILLARDIA, New Double (Lorenziana). The "Garden" speaks of it as follows: "A variety of a popular hardy plant, remarkable for the florets of the head being tubular and colored orange and red. The flowers are some 2 inches or 3 inches across, semi-globose and dense—therefore very showy."	15
GLOXINIA gesnerioides . This splendid novelty has been raised by fecundation of Gloxinia and Gesneria Donkelaari. In habit and foliage it is like a Gesneria, but the flowers are bell-shaped like the Gloxinia and as large, the color a bright red.....	75
Mixed Gloxinia seeds, hybridised with care from our rich collection.....	25
GERANIUM Zonale . (Saul's). From the latest novelties. Mixed.....	15
Apple Scented. Pure seed, own saving.....	20
HELICHRYSUM . Fire ball, new double crimson, a very brilliant everlasting.....	20
IMPATIENS Sultana . Very pretty new Balsam, introduced from Tropical Africa, of neat dwarf habit of growth. The flowers, which are produced most profusely and in perpetual succession, are of the richest carmine red, and appear in axillary corymbs; the spur is narrow, about 1¼ inches long, and flesh-colored.....	25
IRIS Kempferri . A beautiful hardy Japanese Iris.....	10
Siberica. Mixed.....	10
MIGNONETTE, Golden Queen (Carter's). "A remarkably distinct yellow-flowered variety was recorded as Golden Queen. The Floral Committee, when recently visiting Chiswick, signified their appreciation of this variety by awarding a first-class certificate to it; and this honor it well deserves, for without doubt it is one of the most distinct Mignonettes in culture. The habit is dwarf, sturdy and compact, with flowers closely set to form a good head.....	10
Crimson King . A new, distinct, and desirable variety for pot culture, throwing up numerous stout flower stalks, terminated by extremely broad spikes of delightfully scented bright red flowers.....	50
New Hybrid Spiral (Mile's). A variety of robust growth and long, elegant spikes....	10
Pyramidal . Large-flowered. This is a grand variety of the old Mignonette, with large, long, grand spikes.....	10
Machet . A new variety, of fine dwarf habit and pyramidal growth.....	10
NASTURTIUM, Empress of India . Splendid brilliant crimson scarlet, dwarf and compact.....	10
Lady Bird . Rich golden yellow, each petal barred with a broad vine of bright ruby crimson.....	10
Chameleon . (New.).....	10
PANSY, or Heartsease . The seed offered is from one of the finest collections in England. A magnificent strain of fine varieties, producing large, handsome flowers of great substance and variety of coloring.....	50
Very fine mixed . From a choice English collection.....	25
Fancy . Nothing can exceed in beauty and attractiveness these Fancy Pansies. Flowers are large and of good substance. They have a bold quaintness and marvelous variation of color. Fancy Pansies are the most free in growth and most gorgeous in color—gorgeous, but not gaudy, for many of them are extremely chaste. <i>Extra selected</i>	50
Very fine Fancy	25
Striata Perfecta . Improved striped and variegated kinds of great beauty.....	50
New Hybrid Viola or Bedding Pansy (mixed). This is an entirely new strain of Viola from anything hitherto introduced, and consists of the Viola with all the well-defined markings of the Fancy Pansy, from deep black to bright bronze, and striped and spotted in an extraordinary manner.....	50
Very fine selected	25
Candidissima (Snow Queen or Snow Flake). Flowers of a pure satiny white; very pretty.....	20
Lord Beaconsfield . Splendid novelty. Flowers large, of a deep violet purple, shading off on tops of petals to a white hue.....	20
Odiors or Blotched . Superb large-eyed flowers. The favorite Odier Pansies have been of late more and more improved. The flowers are of very good shape, and beautifully blotched with rich and varied colors. My strain has no superior.....	50
TRIMARDEAU PANSIES . <i>Viola tricolor maxima</i> . Distinct and beautiful new race; the flowers are marked with three large blotches or spots. They are a size hitherto quite unattained in this genus. The seed now offered was saved exclusively from finely-formed flowers of the richest and most varied shades of color.....	50

PETUNIA, Hybrid Grandiflora Superbissima. The flowers of this new class of Petunias are of a remarkable size, very regular in shape, with a large open center, making it quite distinct from others.....	50
Grandiflora violacea. New and fine.....	50
Grandiflora alba. Very fine, large pure white flowers.....	25
Henders strain. Very beautiful strain.....	25
Large flowering. Striped, mixed. Very fine strain, with large and perfect flowers...	50
Large-flowering. Fringed and stained.....	50
Large-flowering. Brilliant red.....	50
Dwarf. Compact, striped, inimitable.....	25
Double. Finest, mixed. Very fine strain.....	50
Double. Large-flowering (new). Very fine strain of large double flowers.....	50
Double fringed. Very finest strain of these very beautiful flowers.....	50

The above varieties are the finest of this beautiful flower.

PETUNIA, DOUBLE LILLIPUT. New double varieties of the much-admired Petunia nana compacta forming, like the latter, quite dwarf and dense bushes studded with very numerous and exceedingly pretty small double flowers of the most charming colors; they are in part spotted, in part striped, and also self-colored and give to the plants an uncommonly pleasing appearance.....	50
Dwarf Inimitable. Bushy little plants, 5 to 8 inches in height by as much in diameter, studded with regular striped flowers; very effective.....	25

PRIMULA Sinensis. (Saul's). Rich Magenta; a very beautiful and bright Primula; not fringed.....	50
Embrata. Fine Magenta. A bright and beautiful flower.....	50
Rosy Purple. A very rich color, distinct and beautiful.....	50
Very Bright Red. A magnificent flower.....	50
Alba. Finest Strain.....	50
Rubra. Finest strain.....	50
Violet red.	50
Bright Carmine very rich.....	25
Filicifolia. Mixed.....	50
Double mixed. Imported; a fine strain.....	75
Double, Red, Pink and White. Separate, each.....	75

The above Primulas may be relied upon, as they have been saved from finest hybridized flowers in my establishment.

PHLOX DRUMMONDI GRANDIFLORA STELLATA SPLENDENS. The "grandiflora splendens" is generally admitted to be the richest colored and most effective of all the large-flowered Phloxes. An exact idea of the present novelty can be formed by picturing to one's self that variety, but with the difference that the centre of its vivid crimson flowers is occupied by a clearly defined pure white star.....	50
---	----

PAPAVER "Danebrog." New single-flowering Poppy of striking effect. The flowers are of a brilliant scarlet color, bearing on each of the four petals a large silvery white spot, forming thus a white cross on scarlet ground, similar to the Danish or Swiss national banner. A very desirable, showy novelty.....	15
---	----

VICTORIA CROSS POPPY. This is a selection from the new Danebrog, and it is impossible to fitly describe the brilliant beauty of the flowers. The centre represents a Maltese cross of white with an outer zone of amber stamens, the disc radiating in yellow bars upon a bed of green. The larger surface of the petals is of a rich vermilion crimson.....	50
---	----

SALVIA Greggii (new). A pretty new species which I have just introduced from Texas. This has long spikes of rosy purple flowers; a continuous bloomer, very compact habit, and nearly or quite hardy in this latitude.....	10
---	----

SWEET PEA, Violet Queen. It is dwarfer in habit than the other varieties, the flowers ranging in color from deep mauve of the keel to light violet of the guard petal, suggestive of the beautiful Bougainvillea.....	10
--	----

Adonis (new). A charming rose pink.....	20
--	----

TORENIA Fournieri. A very fine new Annual, with large sky-blue flowers, having three large spots of a dark indigo blue, and a bright yellow stain in the center of the flower. Continues blooming during summer and autumn.....	10
--	----

Bellonii. A very beautiful and distinct species, from Cochin China, bearing bright yellow flowers with a purplish brown tube, similar in habit to <i>T. Asiatica</i> . Continues flowering during summer and autumn.....	15
---	----

WALLFLOWER. Blood, good extra fine dark.....	10
Old Gold. Deep rich golden yellow.....	10

CLITTORIA Cœrulea. A climbing plant of moderate growth, which flowers freely during summer; flowers in clusters of deep mazarine blue, pea-shaped flowers.....	20
---	----

General List of Flower Seed.

AND BIENNIALS.

Abronia Umbellata. Rosy lilac blossoms, very fragrant, trailing.....\$ 10

Abronia Umbellata.

Ageratum Mexicanum. Blue..... 05
 Album. White..... 05
 Duchess of Edinburgh (new). Bright blue..... 05
 Imperial dwarf. Very deep, extra white..... 05

VEGETABLES.

SELECT VEGETABLE SEEDS.

IN offering to the public my stock of Garden Seeds, I do so with great confidence; all are new, fresh and of the finest description. Special attention is given to the selection of such varieties as succeed best in the Middle and Southern States, which, from my long and extensive experience, I can select with confidence. Such varieties as are best grown in this country are either grown by myself or by experienced growers by contract for my trade; whilst those varieties it is found necessary to import I receive from the most reliable growers in England and the continent. All Garden Seeds by the ounce will be prepaid by mail—when $\frac{1}{4}$ pound and upwards are ordered, 16 cents per pound and 25 cents per quart must be added for postage—as well as on all articles marked thus*; when this is omitted, an amount equivalent to the postage will be deducted from the order.

PAMPAS PLUMES.

These are received direct from California, are of a beautiful silvery appearance, 12 to 30 inches long. Price 10 to 50 cents each.

These can be sent safely by mail. When ordered this way 10 cents extra should be added for postage.

CAMPANULA MEDIUM CALYCANTHEMA ALBA,
PURE WHITE.
CAMPANULA MEDIUM CALYCANTHEMA CÆRULEA,
DARK BLUE.
CAMPANULA MEDIUM CALYCANTHEMA LILAC.

These splendid biennials are almost unrivalled for their brilliant effect in the flower garden, and as single specimens for conservatory decoration, it is scarcely possible to over-estimate their value. In habit the plant differs but little from the well-known form of the old blue and white Canterbury Bell, but while the corolla is much larger, the calyx, in addition, is enlarged to nearly four inches in diameter, presenting the form of a saucer, and changed from its ordinary green color to the same as that of the corolla, thus adding considerably to its beauty. The fact of its coming true from seed renders it easy of access, placing it within the reach of amateurs and lovers of their garden.

Price per packet of each variety, 10 cents
