Four New and Beautiful Winter Blooming Flowers

Shown on our
Front Cover Page

New Blue Flowering Coleus

Our leading novelty for this season is the wonderful **New Blue Flowering Coleus** (*Coleus Thyrsoides*), recently introduced from South Africa, and recommended by leading authorities to be a "**perfect Gem among Winter Flowering Plants.**" Has dark green leaves and bears a great profusion of lovely sky-blue flowers which, on large plants, are borne in splendid spikes, sometimes over a foot long and two to three inches in diameter. A plant in full bloom is a sight to be remembered. It is a grand plant for the house and conservatory, as it blooms freely all the Winter and Spring, and can be planted out in the flower bed in Summer. It is as yet very new and scarce; but we make price as low as possible and hope our friends will give it a liberal trial. Will do best kept in a pot until fully established, then set out; it likes plenty of heat and moderate moisture. Price, 25 cents each, postpaid.

New Impatiens—"Evening Star"

The well-known **Impatiens Sultana**, see page 36, is a very favorite house plant, highly valued for its constant bloom and bright rose-colored flowers. "**Evening Star**" is an entirely new variety, having all the good qualities of the old Sultana, but of an entirely different color; the flowers being pure white with deep crimson centre, very beautiful and borne in great profusion all over the plant, which is quite bushy and has handsome foliage. Will grow nicely in an ordinary living room window and continues covered with its lovely star-like flowers nearly all the time, Winter and Summer. No other house plant we know will bloom quicker or more continuously than this beautiful **New Impatiens, "Evening Star."** Price, 15 cents each.

New Fuchsia—"Autumn Leaves"

This grand **New Fuchsia** always attracts attention by its brilliant colored leaves and stems, which are deep rich carmine red, as shown in the picture, which is taken from natural growing plants, which are quite as bright and striking as the most brilliant colored autumn leaves. The flowers are extra large and elegantly formed, with rich royal purple sepals and bright fiery red corolla. It is entirely new and will make a very handsome addition to any collection. Price, 20 cents each.

New Selaginella Emiliana

The beautiful moss fern is a very pretty and interesting little fern with bright green moss-like foliage, delightful for fern dishes, wardian cases, etc.; likes moderate heat and moisture and partial shade. 15 cts.

SPECIAL OFFER::: The above set of four new and beautiful Winter blooming and house plants, only 50 cts., postpaid, or three collections for \$1.25. The two colored plate collections (front and back cover page), when ordered together, only 85 cts., postpaid.

Primula Sinensis Fimbriata (Splendid Fringed Chinese Primrose.)

PRIMULA SINENSIS FIMBRIATA

THE CHINESE PRIMROSE is well known as one of the most beautiful and satisfactory Winter blooming plants for house culture. They are quite hardy and will thrive and bloom beautifully in a cool room where there is not much sunshine and few other flowers would grow. We offer strong vigorous plants, some in bud and bloom, fine mixed colors, including pure white, rose pink, scarlet, spotted and striped—**also white crimson and blue separate.** 15 cts., each; 2 for 25 cts.; 6 for 65 cts.; \$1.25 per doz., postpaid.

EVER BLOOMING PRIMROSE (*Primula Obconica Grandiflora.*) This is truly a grand flower for the house and conservatory; grows 8 to 10 inches high and bears enormous masses of flowers the whole year; never out of bloom; many different shades of pink,

white and rose.

BULB planting time is here again and we ask your kind attention to our splendid stock of lovely Easter Lilies, Hyacinths, Tulips, Narcissus, Crocus, and all the nicest bulbs for Winter flowering in the house and for garden planting in beds and borders. Bulbs are among the sweetest and most beautiful flowers we have, also the easiest to grow and the surest to bloom. All flower lovers want bulbs. **Prices are greatly reduced this year and we expect a large demand.**

Bulbs for House Culture and Winter Bloom should be Planted as Early as Convenient, from September to January.

Any soil that is suitable for other plants will grow nice bulbs; old well-rotted manure is one of the best fertilizers, **but when this cannot be had, we can send you Walker's Improved Plant Food, a highly concentrated fertilizer, specially prepared for bulbs and flowers, by mail or express at any time.** Pots or boxes of any convenient size may be used. Small bulbs can be set very close together, sometimes several in a pot; larger ones need room in proportion to their size. Do not plant too deep, one inch under ground is about right for house culture. When potted, water thoroughly and set away in a cool dark place for two or three weeks to rest, and give the roots time to start, then take to the living room or wherever they are to remain; they do not require much heat; an upstairs room suits them nicely. Water only when they need it, but be sure they do not get dry at the bottom. They will soon begin to bloom and then their lovely flowers and exquisite fragrance will surprise and delight all who see them.

BULBS IN OPEN GROUND. Tulips, Hyacinths, Narcissus, Crocus, Snow Drops, Scillas, Ixias, Sparaxis, etc., are the finest bulbs for Fall planting in the flower bed, as they are entirely hardy and make a splendid display of gorgeous flowers very early in Spring, almost before the snow is gone. Their flowers are exquisitely beautiful and always highly valued for their beauty and fragrance. Culture is very simple, and what is better, **they are absolutely sure to bloom.**

Other flowers may fail but bulbs never.

Bulbs do not require very rich soil and will succeed well in any ordinary ground; when convenient, it is well to spade up the ground, so that it will be a little higher than the surrounding surface, and keep water from collecting on it. If the soil is poor, a liberal quantity of old, well-rotted manure should be spaded in or applied to the top as a mulch.

TIME TO PLANT. September, October, November and December are the best months for planting bulbs in the open ground. Set them from one to six inches apart, and from one to five inches deep, according to size and variety, and firm the earth well around them.

WINTER PROTECTION. These bulbs are entirely hardy and will do without any protection, but if convenient to give the bed a light covering of leaves or litter after planting, the flowers will come earlier and be finer. The covering should be removed gradually as soon as the plants show through in the Spring.

TREATMENT AFTER BLOOMING. When pot bulbs are done blooming they can be set away in any cool, dry place and left a few weeks to mature, after which they may be shaken out of the soil and stored away until time to plant again in the Fall. They may not make as fine flowers the second season as the first, but will usually do quite well for two or three years. Bulbs in open ground, when done blooming and well matured, may be lifted and dried off, and then treated exactly like those from pots.

LUXURIANT HOUSE PLANTS

Produced by Using

SULPHO=TOBACCO SOAP.

The application is simple. Dissolve two ounces of Soap in a gallon of warm or cold water. For plants, apply the liquid when cold, using garden syringe, atomizer, a common sprinkler, or the plant may be gently sponged. Care must be taken that the liquid reaches insects underneath the leaves. One or two thorough applications will generally rid plants of the pest for the entire season. For animals, use the solution, or make a good lather and apply with hand or a sponge.

WHAT FLORISTS SAY.

JAMES VICK'S SONS, Florists, Rochester, N. Y.: “We regard Sulpho-Tobacco Soap as a most valuable Insecticide for use in greenhouse and on window plants. We and our customers use it with great satisfaction.”

THE DINGEE & CONARD CO., Rose Growers, West Grove, Pa.: “After many years’ use of Sulpho-Tobacco Soap, we can say it has given uniform satisfaction to our customers, and for our own use has proved to be one of the best Insecticides known.”

RICHARD FREE, Florist, Stamford, Conn.: “I believe Sulpho-Tobacco Soap to be the best insect-destroying article there is in the market.”

L. P. LORD, Florist, Owatonna, Minn.: “Sulpho-Tobacco Soap is used in our greenhouses with very satisfactory results.”

THE IOWA SEED CO., Des Moines, Iowa: “In our estimation, the most effective of any Insecticide is Sulpho-Tobacco Soap.”

E. A. BUTLER, Niagara Falls, N. Y.: “I have used Sulpho-Tobacco Soap from its invention, and keep it constantly on hand. It is an excellent Insecticide.”

A Well-Known Authority.

Eben E. Rexford, Floricultural Editor of The Ladies' Home Journal:

“Dear Sirs: You are to be congratulated on having ‘a good thing’ in your Sulpho-Tobacco Soap. It is reliable, effective, easy to prepare and apply, and while death to insects, is harmless to the most tender plant. It must take its place in the market as a leading Insecticide for general use, and the Insecticide *par excellence* for the amateur flower-grower. Very truly yours,
 “EBEN E. REXFORD.”

A Trial of Sulpho-Tobacco Soap will give highly gratifying results. You cannot afford to be without it, if you desire to be successful in plant-culture.
