We take pleasure in recommending this charming new hardy Japanese shrub for bedding and general planting. It is certainly one of the neatest and most satisfactory plants of its kind ever seen. It grows erect and bushy, 18 inches to two feet high and nearly the same in diameter; blooms the first season and is entirely hardy. It has pretty light green foliage and bears a profusion of lovely deep lavender blue flowers during September and October. The flowers have an elegant fringed appearance, are very sweet, and are borne so thickly that the whole plant appears a mass of bloom for many weeks. Is not hurt by the early frosts and keeps on blooming bright and cheerful to the last. It is sure to please and attract a great deal of notice and we advise all to plant it who can. Price, fine mailing plants, 15 cts. each, 3 for 40 cts.; Larger, 20 and 25 cts. each, according to size.

The flowers are from two and one-half to three inches across; very beautiful and fragrant. Will thrive in grass or shade if not too dense, and their charming flowers are always greatly admired.

NEW DOUBLE ANEMONE, WHIRL-WIND. Fine, large, double white flowers two and one-half to three inches across. Continues in bloom a long time, exceedingly handsome and showy. 15 cts. each; 3 for 40 cts.; \$1.20 per doz.

NEW HARDY PERPETUAL BLOOMING CLIMBING ROSE, EMPRESS OF CHINA.

There was so much inquiry last year for this new hardy perpetual blooming climbing rose that we have added it to our lists, but, as we have not tested it ourselves, we give the description of the introducers, who say "the Empress of China is a true perpetual bloomer and was originally brought from China. It begins to bloom in this latitude about the first week in May and blooms continuously on until late in the Fall, besides this it blooms the first year, which no other hardy climbing rose does. The flowers are of medium size, very graceful in form and highly fragrant. It blooms profusely the first season and every successive year. The buds are very pretty and borne on long stiff stems. The open flower is nearly double, and strongly resembles a tea rose. The color is soft dark red, passing to light pink or apple blossom. It is entirely hardy, needs no protection, and will thrive in any locality." Price, strong, well-rooted plants, 35 cts. each; 3 for \$1.00, postpaid.

THE TWO—One Crimson Rambler and one Empress of China, postpaid, for 50 cts.; Larger size, 60 cts.

NEW TEA ROSE FIRE PEARL. (Perle de Feu.)

This is a perfect little gem; flowers are only of medium size, but the buds are large in proportion and of beautiful perfect form, and the color is so remarkable and intense that its name "The Fire Pearl," is a better description than any we can write. The French description calls the color poppy red, shaded vermilion and nankeen yellow with chamois tints in the reflex of petals. A most captivating little rose. 25 cts. each.

NEW ROSES are always very interesting and are sure to have some good points.

"Mrs. Pierrepont Morgan is the most beautiful rose in form, color, and substance that I have ever seen." — New Pedigree Rose--PINK SOUPERT. —

This lovely Rose is the result of a cross between the well known Clotilde Soupert and Lucullus; it is the same compact and regular form as Clotilde Soupert and is perfectly full and double; flowers not quite so large, but an equally free and constant bloomer, and entirely unsurpassed in this respect; the color is much deeper than Clotilde, being a fine, rosy pink, and somewhat variable, which really adds to its beauty, as the same bush frequently bears flowers of different shades of rosy red and pink at the same time; in fact, it is almost identical with Clotilde except in color, which is so much brighter; they make a beautiful contrast when planted together. It is a vigorous grower, very fragrant, and quite hardy, and destined to become very popular at once. Price, 20 cts. each; or 1 Pink Soupert, 1 Corinne, and 1 Crimson Rambler—the three for 50 cts., postpaid.

CONARD'S BEAUTIFUL EVER-BLOOMING ROSES.

Grow and Bloom Where Others Fail.

Our Roses are strong, thrifty plants, all grown on their own roots in pots. Being healthy and vigorous and well matured, they grow and bloom abundantly in all

ordinary situations, and can be safely planted at any time during the growing season. They require no petting or nursing, are not easily injured by unfavorable weather, begin to bloom very quickly, and continue bearing lovely roses from June to November. If it is desired to keep them over winter, they should have a good coat of leaves or straw just before severe weather begins. Moderate freezing does not hurt them.

The Many Colored Rose. Bears Pink, Red and Yellow Roses on the Same Bush.

This is a lovely, new, ever-blooming Rose, which has the remarkable quality of bearing different-colored roses on the same bush. Hardy Hybrid Perpetual Roses.

The Hybrid Perpetuals are considered the most valuable of all Roses, because they bear the largest, sweetest, and most brilliant colored flowers, and are so hardy and vigorous they live over winter without protection, and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson, scarlet, pink, and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the summer and fall months. Though called "Perpetual" they are not constant bloomers but are the finest and most beautiful of all Hardy Roses. We offer the choicest and most beautiful varieties in cultivation. Persons who order at the single rate may select to value of 20 cts. additional on every dollar sent.

THE NEW LOGAN BERRY

(or Blackberry Raspberry.)

This grand new berry was thoroughly tested here last season and proved fully up to the representation. It originated in California, on the grounds of Judge Logan, from whom it takes its name. It seems to be a true hybrid, between a blackberry and raspberry, partaking of the nature of both in quality and appearance, but of finer and more delightful flavor. The color is a rich dark purplish-red, and the size about the same as the largest blackberries. The bush is a strong, vigorous grower, an enormous bearer, and entirely hardy. The fruit has very few seeds, ripens early—before blackberries, and besides being very beautiful, is of surpassing quality for eating and cooking; has brought four times the price of other berries in the San Francisco market, and is so very promising that all lovers of fine new fruits should give it an immediate trial. The price is as low as the limited stock will permit this year. Price, 50 cts. each; three for \$1.20; \$4.50 per doz., postpaid.

Strawberry Raspberry.

THE STRAWBERRY RASPBERRY. A remarkable novelty from Japan; tried here last year; grows low and bushy, having the appearance of a dwarf raspberry, with white flowers and leaves like a wild rose. Blooms soon after planting, and fruits early the first season; berries the size and shape of a large strawberry, but entirely different from either strawberry or raspberry, and appear to be a combination of both. Price, 25 cts. each; 3 for 60 cts.; \$2.25 per doz.

NEW GOLDEN JAPANESE MAYBERRY. Novelty of 1895. Belongs to the Raspberry family, but grows in tree like form, entirely different from other berries; as we have not seen the fruit, we give the description of the introducer, who says "It bears pretty bell-shaped blossoms and great luscious golden-yellow berries, exceedingly sweet and delicious; ripens very early before strawberries, and a month before the earliest raspberries; its extreme earliness, excellent quality and beautiful appearance, make it one of most promising new fruits. 25 cts. each; 3 for 60 cts.; \$2.25 per doz. Two year plants 35 cts. each; \$3.50 per doz.

NEW LOUDON RASPBERRY. Originated by F. W. Loudon, of Wisconsin, and considered superior to all other red raspberries on account of its vigorous growth, large size, beautiful rich crimson color, excellent quality, marvelous productiveness and perfect hardiness, recommended as the best Red Raspberry for family use. Price 40 cts. each; three for \$1.20; \$4.50 per doz.

New Dwarf Bismarck Apple.

Delicious Quality, Beautiful Color, Wonderfully Prolific.
Fine for Planting in Garden or Yard, or in Boxes or Pots.

This wonderful new dwarf Apple is said to have come from New Zealand, and wherever tested in this country has proved an astonishing revelation in early fruiting; beautiful color and appearance, excellent quality and perfect hardiness; nothing like it was ever seen before. A little tree not over a foot high, and grown in a pot, has been known to bear a large apple a few months after planting, and it seems certain the trees will bear profusely the first, or, at least, the second year from planting. They can be grown in pots or boxes, if desired, but are particularly recommended for planting in gardens and small yards where fine fruits are desired but not room for large trees. The apples are of very large size and beautiful rich golden-yellow color. They ripen early and are of the most distinct and delicious flavor. This remarkable apple has been highly praised by the Horticultural Journals of this country and Europe, and though known for some time is just now being introduced to the public. Price, nice one-year trees, 40 cts. each; three for \$1.20; \$4.50 per dozen. Five Novelties described above. \$1 65 postpaid.

DOUBLE NEW LIFE GERANIUM.

This remarkable New Geranium comes from England and is highly recommended as a novelty of surpassing beauty. As there has not been time to test it fully, it is offered on the recommendation of the introducer who says the illustration above is a faithful representation of the bloom as it really appears. The flowers consist of two distinct sets of florets, one within the other. The florets are of large size and brilliant red color, and in the centre of each of these there appears a smaller semi-double pure white floret, producing such a remarkable contrast that it is difficult to believe the flower is not made artificially. The whole effect is very beautiful as well as exceedingly novel and surprising; probably the most sensational Geranium ever sent out in this country. Fine vigorous plants, 25 cts. each, postpaid.

Conard's Velvet-Green Lawn Grass Seed

The Best Brand for Seeding Down New Lawns and Renovating Old Ones.

Our Velvet-Green Lawn Grass Seed is not excelled by any for producing a smooth, even, velvety green sward that will withstand drought and hard usage and always make a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: first, to prepare the ground so as to have a fine, smooth seed-bed; second, to put on plenty of seed, never less, but rather more, than the directions call for; third, to start the lawn mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet) or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a close, even growth of fresh, lively green.

Price by mail, postpaid, 30 cts. per quart; two quarts for 50 cts. In bulk, Purchaser paying express charges, \$1.25 per peck; \$4.00 per bushel.

THREE CHARMING FLOWER SEED NOVELTIES.

NEW IMPERIAL MORNING GLORIES. These are a grand novelty and just new this season; the flowers are nearly twice as large as the old morning glories, sometimes nearly six inches across and mostly all of entirely new colors, such as bronze, red, brown, shades of sea-green, blue bordered with red, purple mantled with black, white spotted with blue, flamed, variegated and mottled, some with fringed edges, and all surprisingly beautiful; they grow quick and strong and the leaves are finely variegated with silvery white. Pkt. 8 cts.

NEW YELLOW COSMOS A charming novelty for beds and borders; grows only ten to twelve inches high and covers the ground with its handsome, lively green leaves; begins blooming very quickly and continues covered with pretty, golden-yellow, Cosmos-like flowers the whole season, until killed down by severe frost; nice for beds and borders, and the flowers are fine for cutting all through the season. Pkt. 8 cts.

NEW YELLOW SWEET PEA. Not a real sweet pea, but looks enough like it to be one; the flowers are pea-shaped and bright, shining yellow; seed grows easily, comes into bloom quickly; continues blooming several weeks and is a delightfully fresh and charming novelty; entirely out of the usual and sure to be greatly admired. Pkt. 8 cts.; the three novelties for 20 cts.
