ROSA HUGONIS

CONARD
★
ROSES *BLOOM*

THE PIONEER OF A NEW RACE OF HARDY ROSES

*A New Species
Unlike Any Other Rose*

“HUGONIS”

*Recently Brought
from China. Hardy
Anywhere in U. S. A.*

SEE IN COLOR ON FRONT COVER

This Rose is a spectacular show in itself. Every branch of the previous year's growth becomes lined on both sides, to the very tip, with closely set, wide open, single flowers like dainty yellow hollyhocks (see front cover) and the branches bend over with the weight of bloom.

The long arching sprays make rare and exquisite indoor decorations in early spring when other flowers are scarce. *On a dining table they are charming, the delicate yellow crepe-like blooms, harmonizing softly with the snowy*

linen and silver, making one think of a scene in fairyland.

This unique species is fine for shrub planting and makes a symmetrical bush about 6 feet in height and the same in diameter when fully matured.

When through blooming you will still have a most beautiful bush, for the acacia-like foliage on arching branches makes a most decorative shrub.

PRICE: Strong, 2 yr. field-grown plants, \$1.75 each; \$15.00 for 10.

AMERICAN PILLAR

*Introduced by
the Conard & Jones Co.*

Decided, 1918, by a vote of The National Rose Society of England as the “Most Popular Climbing Rose in Existence.”

If ever there was a Rose constituted to stand the trying conditions of our American climate, we have it in this unique, hardy, free-blooming climber. It will thrive in poor soil as well as in rich, and insists on growing vigorously. It has stout, thick, curving branches, rather thorny, but furnished with an abundance of glossy dark green leaves. Each stem has 9 leaflets instead of the usual 7 or 5, a kind of double supply, which gives the bush a very rich effect. It is one of the first to start growth in the early spring, and here holds its leaves of lively green till far past Thanksgiving Day, and it is seldom troubled with insects. It begins blooming here early in June. Single flowers

of rich, rosy pink approaching brilliant carmine, just a glint of white in the center, and long stamens of beautiful golden yellow. The blossoms—four to six layers deep—are arranged in large-flowered clusters all over the plant. We estimated certainly not less than 3,000 flowers on one young bush. A tremendous grower, with its thick vigorous canes, it is without doubt one of the most valuable single climbing Roses in existence and is unsurpassed for planting singly or as a hedge. In the autumn it is again a brilliant show of color with its pretty clusters of bright red seed-hips which remain on the bush until well into winter.

PRICE: Strong, 2 yr. field-grown plants, \$35.00 per 100; \$5.00 for 10.

★DR. W. VAN FLEET

*See in Color on
Back Cover*

The Flesh-Pink Climbing Rose. The parentage is Souvenir du Pres. Carnot × Rosa Wichuriana. No other climbing Rose has ever created such favorable comment as Dr. W. Van Fleet, for the flowers are so perfect in every way—form, color, delicate fragrance—and borne on such long, strong stems. Cut a bouquet of this variety just before the flowers open, and you will find difficulty in procuring any other Roses to compare with them in sheer loveliness. When fully established you can expect several canes 10 to 15 feet long every season and these canes will produce masses of Roses the following June.

The splendid hearty growth, beautiful shiny bronze-green foliage, crimson thorns, and perfect hardness, added to the exquisite blooms, make this the choicest variety in this class.

Open flowers are 4 inches and over in diameter with high-built center and beautifully cupped petals. The color is a remarkably delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. Flowers full and double, delicately perfumed; buds pointed; stems 12 to 18 inches long, fine for cutting. From one plant hundreds of Roses can be cut for your friends, for selling, or for indoor decoration.

PRICE: Strong, 2 yr. field-grown plants, \$35.00 per 100; \$5.00 for 10.
