ALL-AMERICA AWARD WINNER FOR 1965

Mister Lincoln (see cover)

Hybrid Tea. (Swim & Weeks) *Plant Pat. 2370*. We believe this to be the finest red rose of all time. Strong, vibrant and beautiful, Mister Lincoln produces masses of deep, velvety-rich, red blooms, 6 inches wide that stand tall on the plant. . . one specimen bloom to each stem. The fragrance is outstanding, strong and very pleasing. The bud is long, full and well pointed, becoming urn-shaped as the petals begin to curl back from their high centers. The flowers are ideal for cutting—long-stemmed beauties that hold their form and color well and look especially brilliant in a bouquet even under artificial lighting. With heavy, well-branched canes that stand strong and tall, Mister Lincoln is a rose which can be used as a specimen plant standing alone or, placed in the “back row,” lifts your garden to new heights of beauty. Large, glossy, dark green leaves are tailor-made to attractively clothe this tall, vigorous plant. Hardy, as well as disease-resistant, Mister Lincoln has all the attributes to make it a “once-in-a-decade” rose.

\$3.50 each—3 or more, \$3.10 each.

ALL-AMERICA AWARD WINNER FOR 1966

American Heritage (left)

Hybrid Tea. (Lammerts) *Plant Pat. App. For.* Here is a distinctive new rose. American Heritage is distinguished by a continuous succession of changing color; shades of cream with light canary-yellow in the opening flower, contrasting with scarlet and vermillion at the half-open stage plus a flush of crimson on the petal edges of the mature bloom. In the bud, this rose is perfection itself—long, tapering and urn-shaped. The mature flowers, containing 50 to 60 petals, are quite large, up to 5 inches across and are full-bodied and high-centered. It is a tall vigorous plant with large, leathery, semi-glossy leaves with a striking red coloration on dark olive-green. A light Tea fragrance adds the final touch of distinction to this worthwhile “new addition” to America’s gardens.

\$4 each—3 or more, \$3.55 each.

NEW FOR 1966

Villa de Madrid (below)

Hybrid Tea. (Pedro Dot) *Plant Pat. 2462.* The subtle, very beautiful variations of color in this rose produce a unique effect. From a crisp, deep orange-pink in the newly opened bud the petals slowly unfold to a bold barn-red with touches of scarlet at the edges. Villa de Madrid is ever changing its constantly beautiful color scheme. A tall, upright grower, Villa de Madrid produces free, continuous bloom on strong stems of good cutting length. The medium size blooms are of excellent substance, come usually one to a stem and consist of 50 to 60 petals. Emerald-green, scarab-like leaves and a rare, light musk fragrance add to the “Old World” beauty of this new rose from a famous Spanish hybridizer.

\$4 each—3 or more, \$3.55 each.

NEW FOR 1966

Indiana (above)

Hybrid Tea. (House of Meiland) *Plant Pat. App. For.* Indiana is one of the brightest red roses you've ever seen. It's a signal red that's sure to stop and please anyone who passes by. The bright red buds open to high-centered, fully double cup-shaped blooms of excellent form and profile. The large blooms of 35 to 40 petals are held firmly upright on strong stems of medium length. An unusually beautiful feature of Indiana is that the tremendous amounts of brilliant blooms are set so close to the compact, well-branched bush that they seem to become part of it . . . creating a rich tapestry of green and red. The foliage is heavy, large, deep green and plentiful, covering the plant in a solid mass. Indiana's fragrance is light but pleasing; a typical rose fragrance that seems just right for this fine rose named for a distinguished state.

Camelot

Grandiflora. (Swim & Weeks) *Plant Pat. 2371*. Camelot is a luminous coral-pink rose with a shimmering, iridescent, classic beauty. The large, showy buds, high-centered at first, then somewhat cupped, open to large, 5-inch fully double blooms that fill the air with a rich spicy fragrance. Appearing freely all summer long, the blooms come many times singly on the stem, but most often two or three to the stem, thus providing an abundance of bloom for cutting. Camelot is a tall, vigorous grower with very attractive large-leaved, deep green foliage.

\$3.50 each—3 or more, \$3.10 each.

Golden Girl

Grandiflora. (House of Meiland) *Plant Pat. 1912*. An exceptionally fine yellow rose that produces a tremendous amount of bloom all season long. Clear, solid yellow, sculptured buds open into magnificent, perfectly shaped, fully double flowers 4 to 5 inches across. It's a good, non-fading yellow that actually sparkles; lasts for days. We believe Golden Girl to be one of the best pure yellow roses for the home gardener. The bush is upright, fuller than average, vigorous and freely branched. Foliage is solid dark green and has good disease-resistance. This rose is hard to beat for color and performance.

\$3 each—3 or more, \$2.65 each.

Chicago Peace (below)

Hybrid Tea. (Johnston) *Plant Pat. 2037*. Chicago Peace is a true sport of the greatest of all roses, Peace. It has all the amazing qualities of Peace, plus a richer, more outstanding color. Shimmering pink, canary-yellow and occasional copper tones at the petal bases and undersides cover the huge blooms in dramatic fashion. The bud is large, solid and colorful . . . a lovely promise of the great flowers which are to come. The blooms, up to 7 inches across, come one to the stem; 50 to 60 large petals form a delightful, high-centered flower which curls gracefully outward at maturity. Very strong, medium long stems support the flowers easily. The bushy plant grows upright and produces good, heavy canes as well as large glossy leaves of a rich parsley-green. Chicago Peace has a fragrance which though light, is intensely sweet and reminiscent of the old-fashioned Tea rose. Here is a rose that will grow stronger and even more beautiful with each succeeding year.

\$3 each—3 or more, \$2.65 each.

Sincera (above)

The mature bloom is of excellent substance, with classic shape and form and held upright on unusually long, straight stems . . . perfect for cutting and exhibiting. The plant is quite vigorous—extremely so for a white rose—growing to middle height in fine, upright fashion and is as decorative as the splendid white blooms it bears. Foliage is medium size, light green and rugged. Sincera's outstanding blooms, fine sturdy bush, and excellent full foliage offers the gardener a full measure of satisfaction from every standpoint.

SURPRISE PACKAGE
6 ROSES—Our Selection

Only **\$6.95**

Dear Gardening Friends:

Sometimes, looking at our fast-moving, modern world, I wonder if we haven't gotten away from much of the basic simplicity, beauty and tranquility which meant so much to the peace and prosperity of the earlier, founding days of our country . . . times in which we were able to rest awhile and to enjoy things which our labors had earned for us. Today, we need to do this more than ever before and I can think of no better way to relax and enjoy life than in a garden of roses, be it large or small. It is in your rose garden where you can shut out the cares and problems of your work-a-day world . . . enjoy the wealth of quiet beauty which roses, with their constant bloom, will give you with so little leisurely care and attention. A rose garden is the greatest, and least expensive, therapy I know of and I recommend it heartily.

This rose will amaze you with its vigor and growth. The plant is sturdy, medium tall and very well branched. Apricot Nectar will produce a profusion of bloom all season long. About Floribundas

Floribundas have always been overshadowed in popularity by their stylish big sisters, the Hybrid Teas. This is perhaps as it should be. However, Floribundas do fill a big need in the rose world and give more bloom and color per square foot than the classic Hybrid Tea. Floribundas fill that need for large areas of color . . . hedges, borders, backgrounds, etc. And costing usually less than the Hybrid Teas, they afford you a more economical way to landscape. With a little imagination, there's no limit to the use of Floribundas.

(Improved—Repeat Climbing) (Kallay) This is the brilliant red seen everywhere on fences, porches, trellises and arbors. This improved strain now gives you colorful masses of flowers in June and again in fall, with some flowers in between. The bush is hardy and enormously vigorous, producing long, willowy canes which are easily trained. Bloom is medium size, 2 to 3 inches across, semi-double and slightly fragrant. Dark leathery foliage. This rose is extremely vigorous, grows like mad, but a touch of pruning will keep it where you want it.

City of York

(Tantau) **BACK BY POPULAR DEMAND.**

Because we've had so many requests for this "best of the white climbers" we are again making it available to America's gardeners. First, you must realize that the City of York is *not* a repeat bloomer. However, in the spring this fine rose is a solid mass of lovely, very fragrant, creamy white blooms. Flowers are semi-double, measure 3 inches across and are nicely cupped. The foliage is excellent, a dark glossy green. The plant is very vigorous and trouble free. This rose has been awarded the top honor of the American Rose Society Gold Medal, the only climber to be so honored.

NEW DAWN

New Dawn

(Everblooming) (Somerset Rose Nurs.) The soft, lovely, blush-pink blooms of this rose are 3 to 4 inches across and come in huge clusters. This climber is a rampant grower and needs plenty of room. The canes go up and out 12 to 20 feet. The plant is very hardy, the canes unusually strong. An absolutely dependable and foolproof climber that is everblooming.

\$2 each—3 or more, \$1.75 each.

Blossomtime (not pictured)

(Everblooming) (O'Neal) *Plant Pat. 1240*. This is a fine climber with two-toned pink flowers that come in profusion—one of the most continuous blooming of all climbers. Perfectly formed bud and bloom, double and with a pleasant fragrance. Medium-height plant.

\$2.50 each—3 or more, \$2.20 each.

Climbing Peace (not pictured)

(Repeat Bloomer) (House of Meiland) *Plant Pat. 932*. Has splendid yellow and pink-tinged flowers just like the famous Hybrid Tea (see page 32). Up to 7-inch gorgeous blooms. Needs plenty of room to grow in and don't expect a great many flowers until the plant is well established—2 to 3 years.

\$2.50 each—3 or more, \$2.20 each.

Coral Dawn (not pictured)

(Everblooming) (Boerner) *Plant Pat. 1117*. Coral is one of the most intriguing of all rose colors. There is a soft beauty about this coral-pink climber that makes it outstanding. The colorful 4½-inch flowers cover the bush in clusters of from 3 to 20 and open from dainty pointed buds. A very vigorous plant with lustrous foliage.

\$2.75 each—3 or more, \$2.40 each.

White Dawn (not pictured)

(Longley) Though this is perhaps one of the best white repeat-blooming climbers, it is rather shy on bloom. It is a medium grower, with good canes and foliage. Blooms are pure white, semi-double and come in clusters.

\$2 each—3 or more, \$1.75 each.

The Fairy

(Bentall) If you are not familiar with The Fairy, you have a real treat in store! An absolutely foolproof plant, it has almost every good quality. Planted alone it is a beautiful 3 to 4-foot shrub that bears hundreds of appealing, seashell-pink flowers and makes an excellent individual lawn specimen. Planted in a row it is a colorful hedge. Grows vigorously and will eventually be as broad as it is high. It will provide blooms all season long, something most flowering shrubs will not give you. Its foliage is similar to boxwood—small, shiny and beautifully green. The Fairy is so vigorous and hardy that it will flourish most anywhere, even in partial shade. It needs no special soil preparation and very little spray or dust, as it is resistant to disease and insects. The delightful little flowers make attractive bouquets; hold up well indoors. For trouble-free beauty, The Fairy can't be beat when used as a hedge along property lines, around a pool, patio or almost anywhere.

OTTO LINNE
SEA FOAM
THE FAIRY

\$5.95

Otto Linne

(Lambert) A rose we've had the pleasure to bring back from obscurity, and our own enthusiasm has been more than matched by appreciative gardeners. Otto Linne grows to about 3 to 4 feet, its strong canes carrying enormous trusses of deep rose-pink flowers. Foliage is a light, clear green color, glossy and very full. Plant is exceptionally vigorous, grows upward and arches out gracefully. One truss of flowers makes a whole bouquet. It too, is a carefree, disease-resistant rose.

\$2 each—3 or more, \$1.75 each.

Sea Foam

Hybrid Shrub Rose (Ernest Schwartz) *Plant Pat.* 2463. Brand new—and one of the most adaptable, most remarkable and most useful roses of all time. It is unique. The bloom, first of all, is very beautiful in itself. The small, well-formed, pointed buds open to 2 to 3-inch double blooms of pure white that ages gradually to a delicate, lovely cream color. Sometimes in cool weather, the edges of the petals are tinged with pink. This is a “carefree” rose requiring no special attention, for it is tough, hardy, vigorous and almost completely free of any disease. You simply plant it and forget it—except to admire its beauty all season long. Sea Foam grows 2 to 3 feet high and as many feet wide. The blooms come continuously all season in foam-like clusters on a sea of green. There is also an intriguing fragrance of spice. Sea Foam’s use is limited only to your imagination. Use it as a specimen plant in a featured spot; as a border or a broad low hedge; tied to a trellis or fence it makes a fine white pillar; perfect for ground cover in sunny locations or on a bank. You can even plant it at the top of a wall, draping over, to make a graceful weeping rose. There’s just no end to the uses or beauty of Sea Foam.

\$3 each—3 or more, \$2.65 each.

Pillar of Fire

(not pictured)

(Shamburger) *Plant Pat.* 2329. Here is a very tall-growing shrub or pillar rose that is superb as an individual accent plant on the lawn and/or is also dramatic in a row in the background or as a tall hedge. Pillar of Fire grows to 8 feet or more and is always bright with vivid flowers of a sparkling coral-red. Blooms come in clusters from top to bottom of the plant, forming, in effect, a pillar of fire. It is strong enough to stand alone or can be easily trained as a climbing rose.

\$3 each—3 or more, \$2.65 each.

AURELIAN HYBRIDS

LILIES of the

Lily Culture. Lilies take a location in the sun and with air around them; they don't like competition with trees and shrubs; they must have, above all, a well-drained soil. Set them in the ground with 4 inches of soil above them. Planting distance between bulbs should be at least 8 inches. For best effect, lilies ought to be planted in groups of 3 or more. Blooming time given here is for fall-planted bulbs in Eastern Pennsylvania. Farther south, it would be earlier and north a little later. We will ship your bulbs at the proper time for planting them in your area.

Aurelian Hybrids

A most beautiful group of lilies—all of true hybrid origin. These lilies offer new colors, with broader petals and often more trumpet-like habit. Come in mixed colors only, as illustrated. Late July flowers. They stand 3 to 6 feet tall.

UNUSUAL *African Amaryllis*

So easy to have huge, 7-inch, flaming blooms from this Hybrid Amaryllis, even a child can do it. Comes to you already growing in a pot. Nothing more for you to do other than water occasionally. The most rewarding winter-blooming plant you've ever seen.

TREMENDOUS BLOOMS, YEAR AFTER YEAR

Huge, brilliantly striking, up to 7 inches across . . . this is what you get with no trouble at all from these wonderful African Amaryllis. Plant grows to about 18 inches high, producing heavy stalks each bearing 3 or 4 or 5 huge, 7-inch exotic blooms. This Amaryllis flowers easily in fall or winter, because these special bulbs are grown in South Africa where the long season produces the finest bulbs.

DEAR CUSTOMERS:

I am pleased that we are able to offer Amaryllis to you this year, particularly these fine hybrid varieties. Several years ago, while searching for a good flowering plant which I could enjoy growing during the winter months, when roses are not in bloom, I purchased several of these special bulbs from friends in Europe and later discovered the African strain to be one of the most rewarding plants I have ever known. In fact, I'm afraid I've gotten to the point of having the Amaryllis bug, for my collection has now grown to over 100 and I keep them year after year. I especially like them for their ability to bloom with so very little care and attention. I have found that about $\frac{3}{4}$ of the time the bulbs will produce two-bloom stalks at different times. I suggest that you try one or more of these choice African Amaryllis. I'm sure you will find them to be as satisfying as I have.
