Our Greeting to You

DEAR CUSTOMERS:

We extend our appreciation to you for your orders and business as we enter into another year of furnishing wealth and happiness to our hundreds of thousands of satisfied customers.

About 106 years ago, John F. Shaefer started a seed business near the present location of the St. Charles Hotel. Soon after starting he moved his store to the location now occupied by our Company. D. A. Maupay succeeded the Shaefer Seed Store and was in turn succeeded by E. F. Virgin about the time of the Civil War. A few years later Mr. Jesse Fettis purchased the business from Mr. Virgin, who was his brother-in-law. Mr. Fettis ran the business until 1889 when Mr. Richard Frotscher then located on Dumaine Street, purchased the store from Mr. Fettis, placing Mr. Joseph Steckler, now President of the J. Steckler Seed Co., Ltd., in charge. In 1897 Mr. Joseph Steckler and Mr. Richard P. Steckler organized the J. Steckler Seed Co. Ltd., and purchased the Gravier Street business. About a year later the business of Richard Frotscher on Dumaine Street was purchased by the newly organized Company and later the Dumaine Street business location was discontinued. So we are over 100 years old in business.

Isn't it a pleasure to deal with a Company that has such an interesting history of service to the South? Don't you feel a great deal of confidence in dealing with a concern as old as ours?

We are proud of our history and we use the valuable information gained through these many years of business in furnishing you with the Best Seed you can buy at the Best Price.

Yours for Seeds,

J. STECKLER SEED CO., Ltd.

JOSEPH STECKLER, President

FRANK S. LOVE, Vice President

A. J. TROSCLAIR, Secretary-Treasurer

NOTE:—To our Friends and Customers. We are anxious to increase our mailing list with correct names and addresses of those interested in seed and for that courtesy, we will be glad to send 6 Papers of Assorted Flower Seeds suitable for the Season in return for this favor.

THE following prices are made on a very conservative basis, and we hope those of our friends who are in need of seed will look over our catalogue carefully and compare quality above all and price secondary.

To the Merchant, the Planter, the Farmer and Gardener, our advice is to diversify. The great misfortune that has befallen Louisiana is due to the fact that our Farmers and Planters have all stuck too closely to the three crops, Sugar, Rice and Cotton. We do not advise the discontinuance of anyone of these that you have been planting, but to reduce the acreage and start the following:

A cow for your own use, or more, if the neighborhood warrants it, not only for making Butter, Cream Cheese and supplying yourself with milk, but your neighbors as well; the same with Poultry, get the very best breed, both for Eggs and Meat. As a dual fowl, we recommend the Rhode Island Red; a few Duroc Jersey Hogs, raise your own meat. A small Pecan Grove, planting between Magnolia Figs and Satsuma Orange Trees. The Pecans are today a great revenue to our citizens of Louisiana. The Figs, a great market for the preserves, and a great demand for Satsuma Oranges. Everyone of these fruits grow very luxuriantly in any part of Louisiana. There are many other fruits that we could advise planting in Louisiana that would help the man on the farm. In addition to this of course all the different varieties of vegetables as listed in this catalogue. At a small expense you can get a canning machine to can your surplus vegetables for home use. Any further information that you desire regarding any of the above which you do not find in our catalogue, please communicate with us and we will gladly furnish it to you.

Our firm has served the South for 106 years and we feel your confidence will not be misplaced.

J. STECKLER SEED CO., Ltd.

Joseph Steckler, President.

YOU WANT PROMPT DELIVERY SO HELP US GIVE IT BY FOLLOWING THESE DIRECTIONS IN ORDERING.

ORDER EARLY. It will be greatly to your advantage to send us your orders as soon as you have had the time to make your selection. This assures you prompt shipments from our complete stocks and avoids any possible delays incident to the "Rush Season."

IN ORDERING, remember that prices quoted here are always subject to change. They include prepayment of postage on all seeds ordered by packet, ounce, quarter-pound, pound and five-pound lots, unless otherwise specifically stated. If the order is to be sent by express or freight, deduct five cents per pound from prices given. Larger quantities than five pounds will be sent by express or freight, the customer paying such charges. To figure the cost of postage on flowering plants and trees, add 15 per cent to the list price.

THE POSTAGE TO FOREIGN COUNTRIES must be added to the cost of the goods selected in this catalogue, or the order will be reduced to allow for the postage. These rules will also apply to orders from the United States where no postage allowance is made for mailing, or we will send by express.

CENTRAL AND SOUTH AMERICA: Limit Weight, 20 lbs. Postage rate, 14c per pound.

PANAMA: Limit Weight, 50 lbs. Postage Rate, 12c per pound.

CUBA: Limit Weight, 10 lbs. Postage Rate, 12c per pound, plus following Consul Fees: Invoice for less than \$5.00, a fee of 10c; \$5.00 to \$49.99, a fee of 50c; \$50.00 to \$200.00, a fee of \$2.00.

CANAL ZONE: Limit Weight, 50 lbs. Postage Rate, 12c per pound.

MEXICO: Limit Weight, 20 lbs. Postage Rate, 14c per pound.

EXPRESS RATES on shipments of 20 lbs. or more are often cheaper than Parcel Post Rates. When paying Express charges on seeds, you are entitled to second class rates. Don't let your express agent charge you "First Class" Rates on such shipments.

OUR TERMS: Cash with order. Remittances can be made in the following manner: By Post Office Money Orders, Express Money Orders, Checks, or Drafts on New Orleans or New York. Where it is not possible to secure these, Currency or U. S. Postage Stamps in good order will be accepted. If you send a check on a Country Bank, add 10c EXTRA FOR EXCHANGE. All letters containing currency or stamps should be registered to insure safe delivery. When goods are ordered C. O. D. half the amount must accompany the order. Live Stock, Plants and Trees will not be sent C. O. D.

WHEN ORDERING, write your name plainly, give correct P. O. address if by mail; if by express, give your express office or nearest express office, to avoid any delay, if by rail or boat, give station or landing, and if possible the name of the railroad or name of boat. Where no instructions are given as to how shipments should be made, we will use our own discretion; but we urge all customers to state plainly whether they want goods mailed, expressed or shipped by boat or by rail. As all shipments by boat must be prepaid, customers not known to us must remit enough to cover freight.

NON-WARRANTY. The J. Steckler Seed Co., Ltd. gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds (bulbs, or plants), it sells and will not be responsible for the crop.

We have discontinued the 5 cent packages altogether on flower and vegetable seeds, because the quantity in a 5 cent package does not give enough seed to be of any benefit. Prices on packet seeds, except where noted, will be 10 cents per packet; 3 packets, 25c; \$1.00 per dozen, postpaid.

Steckler's Garden Beans

Culture—Planting time, Southern States—Spring January to May; Fall, August to November. Plant 1 pound to 150 feet of row, 1¼ bushels to one acre; drop two beans every two or three inches in rows 1½ feet apart, cover about one inch with earth. Average production green beans about 100 bushels per acre.

SNAP BEANS, DWARF OR BUSH—GREEN PODDED BEANS

Giant Stringless Green Pod

Height of bush 15 to 25 inches. All varieties marketed as green beans except Red and White Kidney and White Navy or Boston which are left to mature.

BLACK VALENTINE. Edible condition 54 days. Pods about 5 inches long averaging 6 to 7 beans to each pod. Excellent shipper, very hardy and productive.

BOUNTIFUL. Edible condition about 53 days. Pods longer than Black Valentine and half round. A prolific bearer, absolutely stringless when young.

BURPEE'S STRINGLESS. Edible condition about 50 days. Pods round, 6 inches long, tender and brittle. Absolutely stringless.

EXTRA EARLY REFUGEE. Edible condition about 58 days. Pods short, round and meaty. A favorite for market gardeners.

FRENCH MARKET. About 60 days to edible condition. Pods long, slim and round. Very prolific producer.

GIANT STRINGLESS. Edible condition about 62 days, long, round pods, prolific producer and a favorite throughout the South.

HOPKINS IMPROVED RED VALENTINE. About 58 days to edible condition. Pods short, round, brittle and tender. A popular variety.

LONGFELLOW. Edible condition about 60 days. Pods round, long, very tender and brittle, a favorite.

RED KIDNEY. Left to maturity. A red kidney shaped bean, used for baking and soup.

STECKLER'S NEW PERFECTLY STRAIGHT ROUND. Edible condition about 60 days. Pods perfectly straight and round, extra heavy bearer.

WHITE KIDNEY. Left to maturity. Shape same as Red Kidney and used for baking and soup.

WHITE NAVY OR BOSTON. Left to maturity. Small white bean, known and used throughout America for soup and baking purposes.

Steckler's Garden Beets

Culture—Planting time, Southern States. Spring, January to July; Fall, September to December. Edible condition about 62 days from time of planting seed. Plant 2 ounces to 150 feet of row, 12 pounds to one acre. Sow in thick rows about 12 inches apart or sow broadcast and thin to about 10 inches apart.

CHICAGO EARLY BLOOD TURNIP. Oval shape, dark red, flesh, smooth skin, a favorite among private and market gardeners.

CROSBY'S EARLY EGYPTIAN. Beets globe shaped, center of beet light blood red, tender, excellent eating. Grown extensively by market gardeners in South for shipping.

DETROIT DARK RED. Beets oval shaped, flesh of beet very dark red, an excellent variety for shipping and eating. A favorite of many large Southern market gardeners.

EARLY BLOOD TURNIP. Beets top shaped, dark red flesh, perhaps the most popular in the South for the small and the large gardener.

ECLIPSE. Beets globe shaped, small top, dark red, sweet and fine grained flesh, very popular.

EDMOND'S EARLY BLOOD TURNIP. Oval shaped, deep blood skin, dark flesh, small tap roots and small top. Its popularity increases as gardeners plant it

EXTRA EARLY EGYPTIAN RED TURNIP. Turnip shaped, red flesh, tender and has small tops. Grown extensively and very popular.

STECKLER'S EXTRA EARLY. Globe shaped, dark red flesh, small roots and tops. The Southern gardener's favorite.

Crosby's Early Egyptian

SWISS CHARD or SPINACH BEET. Sow in rows 16 inches apart and thin to 12 inches between plants. This variety makes only tops for greens, very large leaves, grown extensively throughout the South. (As leaves are cut new ones grow.)

SWISS CHARD or PERPETUAL SPINACH. Dwarf. Used same as Swiss Chard but leaves are smaller. Grown extensively by market gardeners in the South.

Steckler's Sugar and Stock Beets

Culture—Planting time, Southern States. Spring, January to July; Fall, September to December. Sow 4 or 5 pounds to one acre in rows 2 to 3 feet apart. When 4 or 5 inches high thin to 12 to 15 inches apart in rows. Ready for harvest about 75 days after planting of seed.

Long Red Mangel

GOLDEN TANKARD. Yellow golden flesh, very nutritious, excellent for stock food. Very broad shouldered and short rooted.

LONG RED MANGEL. Flesh white with reddish tinge. Heavy yields, 18 to 24 inches long, about 6 inches in diameter. We recommend this as the best variety of stock beet.

KLEIN WANZLEBEN SUGAR BEET. High sugar content, broad shouldered with tapering root. An enormous yielder.

WHITE FRENCH SUGAR BEET. Grown extensively in the South both for stock feeding and for sugar, an excellent variety.

Steckler's Cabbage

Culture—Planting time, Southern States. Seed Spring, June to September; Fall, October to January, 1 ounce will produce about 3000 plants, 5 ounces to the acre. Sow seed 5 or 6 seeds per inch in rows about 6 inches apart in well prepared beds. Cover very lightly with earth. Keep bed moist but not wet. Transplant to field when plants are about 6 inches tall preferably on a cloudy day or in late afternoon. Frequent shallow cultivation for a short time is best. Distance between plants 12 to 15 inches; between rows about 24 inches. Approximate number of days to edible condition from time of planting of seed is given after name of each variety. This varies with weather and soil conditions.

ALL HEAD EARLY. 100 days. Large, flat compact and solid heads, few outside leaves, an excellent early cabbage.

ALL SEASON. 130 days. Large solid globular shaped heads. Resists heat and drouth, one of the best for Southern gardeners.

CHINESE or PETSAL. 90 days. Large crumpled light green leaves resembling Paris Cos Lettuce. Leaves are eaten boiled or raw as a salad. Popular throughout the South.

COPENHAGEN MARKET. 100 days. Very large compact ball shaped heads, uniform size and excellent shipping cabbage.

DANISH BALL HEAD SHORT STEM. 100 days. Medium sized, hard, ball shaped head, not as uniform in size as some other varieties but used extensively.

EARLY DRUMHEAD. 115 days. Large deep heads, compact uniform size heads, an excellent variety for Southern gardens.

EARLY DRUMHEAD SAVOY. 115 days. Large flat compact heads, excellent tasting cabbage. A favorite among the small gardeners as well as the large throughout the South.

FROTSCHER'S SUPERIOR LARGE LATE FLAT DUTCH. 130 days. Large solid flat heads, sometimes weighing 15 to 25 pounds. This is the most popular winter cabbage among Southern gardeners.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

LOUISVILLE DRUMHEAD. 130 days. Heads broad semi-flat, short stem and compact. Planted extensively.

MAMMOTH RED ROCK. 130 days. Heads very large, dark green, red ribbed leaves, red head, round, very solid.. Used extensively for cole-slaw and pickling. a favorite.

RED DUTCH. 130 days. Large globular, deep red on top, hard headed. Used for same purposes as Mammoth Red Rock, an excellent variety.

SELECTED EARLY JERSEY WAKEFIELD. 90 days. Large solid conical heads, early developed, compact. A favorite among market gardeners for early market.

STECKLER'S GOLDEN ACRE. 95 days. A very compact medium sized head, an improved variety. Heads uniform in size and in maturing. This variety is growing very rapidly in popularity.

STECKLER'S MONEY MAKING. 130 days. Truly a money maker. Heads very large, round and compact. Rust resistant and keeps well, record of producing unsurpassed. A great favorite.

STECKLER'S SPECIAL CHARLESTON WAKEFIELD. 115 days. Similar to Charleston Wakefield in shape but seed is taken from a specially selected stock. This variety cannot be grown too extensively.

STECKLER'S SPECIAL SUCCESSION. 115 days. Heads large, deep, very firm, of excellent quality. Very vigorous growing variety and popular among gardeners.

Steckler's Special Charleston Wakefield

Steckler's Golden Acre

STEIN'S EARLY FLAT DUTCH. 115 days. Heads flat, very large, compact, grows vigorously and has short stem. Many gardeners prefer this variety because of its excellent record of forming heads under unusual weather conditions.

SURE HEAD. 120 days. Named because of its certainty of making heads. Very large flat heads, weight 10 to 15 pounds, uniform and firm. Grown very extensively.

Steckler's Carrots

Culture—Planting time, Southern States, Spring, January to June; Fall, August to December. Plant 1½ oz to 150 feet of row. 4 lbs. to one acre. Sow fairly thick in rows 15 to 18 inches apart and thin to 3 to 4 inches apart in rows, when two inches high. Approximately number of days to edible condition is given after name of varieties.

DANVER'S HALF LONG. 65 days. Deep orange color, broad shouldered, cylindrical shaped. A favorite throughout the South.

EARLY HALF LONG CHANTENAY. 65 days. Deep red orange, about 5 to 6 inches long, stump rooted, grown extensively by market gardeners.

EARLY SCARLET HORN. 70 days. A short stump-rooted variety, fine flavor, a favorite.

HALF LONG SCARLET FRENCH. 90 days. Rich orange color, average length 6 inches by 1½ inches in diameter, blunt end. An excellent carrot for small and large gardeners.

IMPROVED LONG ORANGE. 80 days. Long tapering shape often 8 to 10 inches, deep orange color. Besides being grown by gardeners for the table it is also used for stock feeding.

LARGE WHITE BELGIUM. 100 days. Creamy white with light green crown about 7 to 9 inches in length. Used extensively for stock feeding.

OXHEART or GUERANDE. 65 days. Nearly oval shaped, rich orange color, 3 to 4 inches in diameter. One of the best and most popular varieties.

RED ST. VALERIE or THREE QUARTER LONG. 70 days. Longer than the Half Long French, reddish color, fine quality, an excellent variety.

STECKLER'S GOLDEN ROD. 65 days. Stump rooted, heavy producer, deep orange. One of the finest varieties.

Steckler's Celery

Culture—Planting time, Southern States. For bleaching celery. Seed June to August; for seasoning purposes any month. Plant $1\frac{1}{2}$ ounces to 150 feet of row. Sow seed in a bed, cover with canvas to protect from heat. Transplant to large bed when about 3 inches high to rows 3 feet apart, plant about 8 inches apart. When about matured earth is brought up around the plants or boards are placed on both sides of rows for proper bleaching. Approximate time to maturity is given after each variety, this varies with climatic conditions and soil.

CELERY FOR SOUP. 125 days. Sown broadcast in spring and fall and used extensively for seasoning the same as parsley.

CELERIAC, TURNIP ROOTED. 135 days. Forms a turnip-shaped root which is used extensively for soup, cooked and sliced or in salad.

GIANT PASCAL. 135 days. Grows about 2 feet high, forms broad, thick, crisp stalks, entirely stringless. Very desirable and planted extensively throughout the South.

GOLDEN SELF-BLANCHING (French Grown). 135 days. Solid, very tender, golden yellow color, brittle with delicious flavor. We cannot recommend this variety too highly.

LARGE WHITE PLUME. 125 days. Yellowish white color, easily bleached, crisp and tender. A popular variety among gardeners.

Steckler's Corn

Culture—Planting time, Southern States, February to July. Plant in hills about 3 feet apart in rows and rows about 3 feet apart, four or five seeds and thin out to 2 or 3. For the best success, seed corn should be planted within three days from time of receipt from Seed House to avoid trouble from weevils. A pound will plant about 400 hills. One peck to an acre. Approximate number of days to edible condition (roasting ears) on Sweet and Sugar Corn and to maturity on Field Corn is given after each variety. This varies with soil and climatic conditions. Corn is often planted some each week during planting season so that the harvest will be throughout the season.

Stowell's Evergreen

Sweet Corn

14 lbs. 1 peck; 56 lbs. 1 bushel.

EXTRA EARLY ADAMS. 63 days. Stalks about 3½ feet tall, ears about 5½ inches long. One of the best roasting ear corn that can be planted.

FROTSCHER'S ADAMS EARLY. 68 days. Average height of stalk 4½ feet. Ears slightly longer, grown very extensively by Southern gardeners throughout the South.

STECKLER'S FRENCH MARKET. 75 days. Stalks average about 7 feet in height, ears about 7 to 8 inches long, well filled. A favorite among gardeners.

ST. CHARLES RED COB. 75 days. Stalks about 7½ feet tall, heavy producer of very large white ears, well filled with red cob. Used mostly for roasting ears but makes an excellent matured ear.

Golden Bantam

Sugar Corn

BARDEN'S WONDER BANTAM. 77 days. Stalks 5 to 6 feet tall, large well filled ears 8 to 10 inches long. Grown very extensively.

BLACK MEXICAN. 77 days. Stalks about 6½ feet tall. Ear about 8 inches long. Ripe, corn blue black, very tender and sweet. Well liked throughout the South.

COUNTRY GENTLEMAN. 80 days. Stalks about 7 feet tall, ears slim, about 8 inches long. One of the most popular varieties on the market.

GOLDEN BANTAM. 70 days. Height of stalk about 4½ feet, ears about 6 inches long, medium large, very hardy, allowing early planting. Increasing rapidly in popularity every year.

STOWELL'S EVERGREEN. 78 days. Height of stalk about 7½ feet. Ears about 8 inches long, very white, excellent roasting ear variety. Market gardeners grow this variety more than any other.

Steckler's Lettuce

Culture—Planting time, Southern States. Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. If planted during hot weather, soak seed for two hours in water and wrap in damp cloth. Keep for 5 or 6 days in damp cloth until sprouted, then plant. Ants very often carry away the seed before sprouting but this treatment stops it. If weather is cool and damp the above treatment is unnecessary. When sown direct, sow broadcast, when large enough to transplant, plant about 8 to 10 inches apart in rows about 1 foot apart. Approximate time to maturity is given after each variety. This varies with soil and climatic conditions.

GRAND RAPIDS. 65 days. Non heading, leaves crisp, light green, curled, fringed. Delightful flavor. Grown extensively in home gardens as well as by market gardeners under glass.

ICEBERG. 70 days. Heading, curled, medium size, crisp, green fringed leaves enclosing crisp, white interior. A very popular variety.

IMPROVED ROYAL CABBAGE. 80 days. Forms large crisp, solid heads. Stands heat well, especially desirable for Southern gardeners.

LARGE SALAMANDER. 75 days. Heading, very large, light green, compact, often weighing from 2 to 3 pounds. Stands heat and drought well.

PARIS WHITE COS. 70 days. Loose spoon shaped leaves, loose heads. Bleached by tying up leaves. Delightful tasting, and excellent variety both for market gardeners and home gardens.

STECKLER'S NEW YORK OR WONDERFUL CABBAGE. 80 days. Crisp, large heads, dark green colored leaves. Produces most compact heads, the best and most popular variety on the market, often marketed as Improved Iceberg.

STECKLER'S SPECIAL WHITE. 80 days. Light green, compact heads, grown extensively as a winter lettuce. We highly recommend this variety.

STECKLER'S SELECTED BIG BOSTON. 70 days. Extra large, round, very firm, light green heads. Majority of market gardeners as well as home gardeners in South are growing this variety.

Steckler's Melons---Musk or Cantaloupe

Culture—Planting time, Southern States. Spring, February to June. Plant in rich, sandy loam soil. Mix well rotted manure in each hill. Plant about 10 to 12 seeds in each hill. Hills about 5 feet apart each way. When plants are nicely started, thin, to about 4 plants to each hill. About 2 ounces is required to 150 feet of row. 4 pounds to one acre. Approximate time to maturity is given after each variety. This varies with climatic and soil conditions.

BANANA. 78 days. Yellow flesh, about 18 inches long, 3 to 4 inches in diameter, curved end, ribbed, a popular variety in the South.

EARLY HACKENSACK. 70 days. Flesh and skin greenish color, large size, ribbed, excellent tasting. Grown extensively throughout the South.

FROTSCHER'S NEW ORLEANS MARKET. 80 days. Greenish yellow flesh, large, ribbed, in great demand wherever grown, very popular.

GOLDEN BEAUTY CASABA. 80 days. Very large, golden yellow flesh, ribbed, one of the best on the market, we recommend this variety very highly.

HONEY BALL. 80 days. Greenish yellow flesh, large, ball shaped, flesh can be eaten to the skin. An excellent shipper and a general favorite in the South.

HOODOO. 78 days. Orange fleshed, medium size, hard skin. Grown extensively for market as well as table.

Steckler's Watermelons

Culture—Planting time, Southern States. Spring, February to June. Plant in light sandy soil, mix well rotted manure in each hill before planting. Plant 8 to 12 seeds in each hill about 7 feet apart, each way. About 2 ounces to 150 feet of row and 4 pounds to one acre. When plants are about 3 inches high, thin to about 3 to 4 plants per hill. Approximate time to maturity is given after each variety. This varies with climatic and soil conditions.

ALABAMA SWEET. 90 days. Oblong, very sweet, dark green, faintly striped, entirely stringless, very prolific, a very popular variety in the South.

EXCEL. 80 days. Oblong, dark green with faint stripes, red flesh, tough rind. An excellent shipper and market gardener's favorite.

FLORIDA FAVORITE. 80 days. Long, dark green with lighter stripes, red flesh to the rind. Excellent tasting, grown and used extensively in the South.

HALBERT'S HONEY. 80 days. Oblong, dark green with irregular mottled striping, one of the best tasting melons on the market, a favorite.

ICE CREAM. 80 days. Oval shaped, medium size, flesh bright crimson to the rind, delicious flavor, melts in your mouth. An excellent variety.

IRISH GREY. 80 days. Long oval, light grey color, flesh bright red, prolific producer, used both for home and market. A favorite variety.

JEFFERSONIAN. 80 days. Almost round, rich dark green, under favorable conditions, weight 50 to 65 pounds; a new variety.

KLECKLEY'S SWEET. 80 days. Rind very dark green and thin, flesh deep scarlet, one of the best for home market and family garden.

PERFECTION. 85 days. Large dark glossy green and thin, flesh dark red and sweet, an exceedingly popular variety both for table and market.

PRESERVING CITRON. 90 days. Small round, light and dark green striped. Used only for pickling and preserves, grown extensively.

RATTLESNAKE (Georgia). 85 days. Light green color, lightly mottled and striped, flesh scarlet, thin rind, an excellent shipper, very popular.

STECKLER'S ANGEL KISS. 85 days. Silver grey color, deep red flesh, often weighing 40 to 50 pounds, excellent flavor, in great demand.

Kleckley's Sweet

STECKLER'S MONARCH. 85 days. Largest melon on the market, dark green striped, few seeds, solid hearts, very prolific, often weighing 70 to 80 pounds, excellent shipper.

STECKLER'S SELECTED TOM WATSON. 85 days. 15 to 24 inches long, compact, deep red flesh, free from core, special selected seed of the Tom Watson variety.

TOM WATSON. 85 days. Oval shape, very compact dark green rind, deep red flesh. Excellent shipper. We recommend this highly.

WONDER. 75 days. New variety, larger and heavier than Tom Watson, very prolific, excellent flavor, one of our best varieties.

Steckler's Onions

Culture—Planting time, Seed, Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. Onions grow best in rich, loamy soils, when young plants are about size of a goose quill, transplant to open ground about 4 inches apart and 12 to 18 inches between rows, cultivate sufficiently to keep out weeds. Approximate number of days from time of planting seed is given after each variety. This varies with climatic and soil conditions.

AUSTRALIAN BROWN. 130 days. Large, rich brown onions, when matured, thick skin, excellent keeping variety, an excellent variety for all purposes.

CRYSTAL WAX BERMUDA. 120 days. Large flat, pure white onion, mild and delicious flavor, one of the finest and most popular varieties grown.

DANVER'S YELLOW GLOBE. 130 days. Large globe shaped, brownish yellow bulbs, grown extensively for sets, an excellent variety.

FROTSCHER'S RED CREOLE. 130 days. Very large, semi-globe shaped, reddish colored bulb, excellent tasting, good keeper and heavy producer. This variety constitutes one of the important crops in Louisiana.

RED WETHERSFIELD. 130 days. Large, broad flat reddish colored bulbs, keeps excellently, good producer, well liked wherever grown.

WHITE PORTUGAL. 120 days. Medium sized white variety, used extensively when young as a salad onion or bunching onion and for pickling.

YELLOW BERMUDA. 120 days. Large flat yellowish colored onion, very popular for market as well as home garden. Grown extensively throughout the South.

YELLOW PRIZETAKER. 120 days. One of the largest size. Yellowish red color, excellent mild flavor, a favorite.

Australian Brown

Steckler's Onion Sets

Onion sets are largely for planting home gardens for early greens and also for market. Plant in rich, well cultivated ground in rows 10 to 12 inches apart and 2 inches apart in the row. 8 bushels to the acre. Plant for spring from January until April. Fall, September to November.

Steckler's Parsley

Culture—Planting time, Spring, January to April; Fall, September to November. Plant one ounce of seed to 150 feet of row. Plant in rich, mellow soil. Parsley seed starts growth slowly. We suggest soaking seed in water for 10 to 12 hours before planting. Sow thickly in rows about 1 foot apart; when about 3 or 4 inches high, thin to about 5 or 6 inches apart. Number of days to edible condition given after each variety.

DOUBLE CURLED. 90 days. Leaves curled and crimped, grown very extensively for market as well as home use.

PLAIN LEAVED. 75 days. Dark green foliage, very hardy, strong flavor. A favorite for Southern tables.

Steckler's Garden Peas

Culture—Planting time, Southern States. Spring, January to May; Fall, August to November. Plant 3 pounds to 150 feet of row, 1½ to 2 bushels to one acre. Sow in rows about 2 to 3 feet apart and cover about 2 inches. Distance in rows and between rows is governed by the height of the different varieties. Approximate number of days to edible condition is given after each variety, this varies with climatic and soil conditions.

Wrinkled Varieties

14 lbs. 1 peck; 56 lbs. 1 bushel.

AMERICAN WONDER. 60 days. Height of vine about 1½ feet, pods full and about 3½ inches long. A prolific producer, an excellent variety both for home and market gardens.

CARTER'S STRATAGEM. 85 days. Height of vine about 2½ feet; pods about 4 inches long. Well liked by many Southern gardeners.

CARTER'S IMPROVED TELEPHONE. 70 days. Pods about 4½ inches long; height of vine about 4 feet, an excellent producer. A favorite among many gardeners.

CHAMPION OF ENGLAND. 78 days. Height of vine about 4 feet, pods about 3½ inches. Excellent eating; excellent producer.

DAISY OR DWARF TELEPHONE. 70 days. Pods about 4½ inches long; height of vine about 2 feet, prolific, one of our best varieties.

DWARF GREY SUGAR. 78 days. Vine about 3 ft. tall, pods about 4 inches long. Pods can be eaten same as green beans after string is drawn from back; a Southern favorite.

GRADUS OR PROSPERITY. 62 days. Pods about 4½ inches long and vine about 3 feet in height, grown extensively.

THOS. LAXTON. 64 days. Height of vine about 4½ feet, pods about 4 inches long. Market gardeners are growing this variety very extensively.

MELTING SUGAR. 78 days. Very large pods, about 4 to 5 inches long, height of vine about 5 feet, eaten both shelled and pod. One of our best varieties.

WORLD'S RECORD. 54 days. Height of vine about 2½ feet, length of pod about 4 inches, heavy producer, an excellent variety.

American Wonder

Steckler's Parsnips

Culture—Planting time, Southern States. Spring, January to April; Fall, September to November. About 2 ounces will plant 150 feet of row, 8 pounds to the acre. Sow in deep mellow soil in rows 12 to 18 inches apart. When plants are 3 inches high, thin to about 3 inches apart in the row.

Steckler's Peppers

Culture—Planting time, Southern States. Seed, Spring, December to March in hot beds, in open ground March to June; Fall, August to November in open ground. 2 ounces will produce about 1500 plants, 6 ounces to one acre. Open ground planting $1\frac{1}{2}$ feet apart and about $1\frac{1}{2}$ to 2 feet between rows. Do not plant two varieties close together as they mix easily. Production of peppers in the South is one of our large industries. Approximate time to edible condition is given after each variety. This varies with climatic and soil conditions.

BIRDS EYE. 110 days. Very small red pepper, plant about 2 feet high, very hot, used for seasoning, grown in home gardens extensively.

CHINESE GIANT. 130 days. Very large scarlet red peppers, mild and thick meated, about 4 inches in diameter, plants about 2 feet high, one of our best and most popular varieties for market and home gardens.

FROTSCHER'S TOBASCO. 125 days. Small pointed red peppers, bush about 3 feet high. Prolific producer, very hot, the nationally known Tobasco Sauce is made from this variety, an excellent variety.

LONG RED CAYENNE. 110 days. Pods about 4 inches long, twisted and pointed. Very pungent, bush about 2 feet tall, a favorite with many Southern gardeners.

PERFECTION. 110 days. Pimiento type pepper, bush about $2\frac{1}{2}$ feet high, grown extensively for canning, very popular.

RUBY GIANT. 110 days. Bright scarlet color when ripe, very large and mild tasting, bush about $2\frac{1}{2}$

Ruby King Peppers

feet high. Many gardeners will plant no other. An excellent market and home garden variety.

RUBY KING. 110 days. A vigorous and productive plant about $2\frac{1}{2}$ feet high. Peppers bright scarlet color when ripe, a very large and excellent variety, a general favorite among gardeners.

STECKLER'S ROYAL KING. 110 days. A very large variety, bright scarlet color when ripe, bush about $2\frac{1}{2}$ feet, one of the best and highly recommended by us. A favorite.

WORLD BEATER. 90 days. A large red pepper, thick meated, mild tasting, used extensively and well liked.

Steckler's Irish Potatoes

Culture—Planting time Southern States, Spring, January to April; Fall, (small seed potatoes), August and September. Potatoes thrive best in a light dry, rich soil. For spring planting large potatoes are cut so that a good sized piece will contain about 3 eyes. The pieces are planted in rows about 2 to 3 feet apart and hills about 2 to 3 feet apart in row. Fall seed potatoes are small and are planted whole, all varieties listed mature in about 85 to 100 days.

Dust plants with Arsenate of Lead, powdered form, every 2 weeks after plants are 6 inches high for control of Potato Bugs.

Certified Triumph Potatoes—Write for Prices

EARLY RED TRIUMPHS, selected stock. Light red, medium size, round, uniform shape, eyes slightly depressed, an excellent variety for shipping. Grown very extensively both for home and market.

IRISH COBBLER, selected stock. Shape similar to Triumph. Color, white, a vigorous grower and good producer. A very popular variety.

WHITE STAR, selected stock. Long, oblong shaped, white variety, an excellent producer and very popular. Keeps well and is one of our best varieties.

Steckler's Pumpkins

Culture—Southern States, planting time, Spring, March to July. Usually planted in corn fields; when grown as separate crop, plant in hills (about 10 seeds to the hill) about 8 to 10 feet apart each way, when started, thin to 3 or 4 plants. When leaves die, cut pumpkins from vines, leaving about 3 or 4 in. of stem and store in dry place, avoid bruising. One pound to 300 hills, 4 pounds to an acre. Approximate number of days to edible condition is given after each variety. This varies with climatic and soil conditions.

CONNECTICUT FIELD. 80 days. Large, smooth oval, shaped, orange yellow color, very productive. Grown extensively throughout the South, mainly in cornfield.

FROTSCHER'S GREEN STRIPED CASHAW. 90 days. Large white with green stripes, with crooked neck; flesh light yellow, thick, coarse, but sweet. Planted more extensively in the South than any other variety, very popular.

Connecticut Field Pumpkin

GOLDEN YELLOW MAMMOTH. 100 days. Bright golden yellow skin, thick flesh, excellent quality, splendid keeper. Weight 50 to 80 pounds, cannot be beaten as a pie pumpkin.

JAPANESE PIE. 80 days. Color when matured, dark green, similar shape to Cashaw but larger. Yellow flesh, very productive, an excellent variety for all purposes.

LARGE CHEESE. 80 days. Bright orange color, shaped like a cheese, very large and indented top and bottom. Excellent quality, well liked wherever grown.

SMALL SUGAR. 75 days. Deep orange yellow skin, averaging 10 inches in diameter, flesh fine grain, sweet and excellent keeper, a favorite among many gardeners.

YELLOW CASHAW. 100 days. Shaped like green Cashaw, often weighing 40 to 50 pounds. A favorite for pie making.

YELLOW SWEET POTATO PIE. 80 days. Golden yellow skin, pear shape, flesh thick and white, excellent keeper, grown extensively and popular.

Steckler's Radishes

Culture—Planting time, Southern States. Spring, January to June; Fall, August to December. Plant 3 ounces to 150 ft. of row; 8 lbs. to the acre, about 10 inches apart, cover lightly. If too thick radishes do not form properly but crowd each other. Plants should be about 2½ inches apart, allowing proper space for development of Radish. Radishes constitutes a very large crop for Northern markets. Approximate time to edible condition is given after each variety. This varies due to climatic and soil conditions.

BLACK SPANISH (Winter). 30 days. Outside color black, flesh white, about 8 inches long. Planted very extensively for winter production.

BRIGHTEST SCARLET OR THREE QUARTER LONG. 25 days. Bright scarlet color, average about 6 inches long, a favorite.

CHARTIER. 35 days. Bright scarlet color, about 7½ inches long, excellent tasting, grown extensively.

CHINESE ROSE (Winter). 30 days. Stump-rooted bright deep rose color, about 5 inches in length, one of the best winter radishes on the market.

COOPER'S SPARKLER TURNIP WHITE TIP. 20 days. Small, round, scarlet with white tip; one of our best and most popular varieties.

FRENCH BREAKFAST. 22 days. About 1½ inches long and about ¾ inch in diameter, deep scarlet color, except a little white around root. We recommend this variety very highly.

GLASS OR CINCINNATI. 25 days. Small tops, 6 to 7 inches long, bright scarlet color, a very popular market variety.

ICICLE. 25 days. About 5 inches long, white, brittle and has mild flavor, well liked and grown extensively in South.

ROSY GEM. 25 days. Deep scarlet on top and white on bottom, perfectly round, excellent taste. A favorite.

SCARLET HALF LONG FRENCH. 25 days. About 3 inches long, bright scarlet color, very brittle and tender, an excellent variety.

WHITE STRASSBURG. 25 days. Oblong shape, white, firm, brittle and tender. About 4 inches long and 1½ inches in diameter. A very popular variety wherever grown.

White Strassburg

French Breakfast

CRIMSON GIANT TURNIP RADISH. 25 days. Very large, round, scarlet color, good shipper, grown very extensively and very popular.

EARLY DEEP SCARLET TURNIP. 22 days. Small, round, deep scarlet color, mild taste, very popular for home garden as well as market.

EARLY LONG SCARLET SHORT TOP IMPROVED. 25 days. Carmine red color, about 7½ inches long. Grown extensively by Southern gardeners.

STECKLER'S RHUBARB or Pie Plant Roots

Culture—Planting time, Southern States, November to February. Plant roots 2 feet apart each way. Mix plenty of well rotted manure in each hill. Used extensively for pies and sauce. Delicious flavor.

STECKLER'S ROQUETTE or Rocket Salad

Culture—Planting time Southern States, Spring, January to June; Fall, August to December. Plant 1½ ounces to 150 feet of row. Sow about 15 inches apart each way. Leaves are used for salad similar to mustard. Ready for cutting about 45 days.

STECKLER'S SALSIFY or Oyster Plant

Culture—Planting time, Southern States, Spring, January to April; Fall, August to December. Plant 2½ ounces to 150 feet of row, 8 pounds per acre. Taste similar to oysters. Used for soups and flavoring. Spade ground deeply and mix with well pulverized manure, sow in rows about 10 inches apart. Grown in both large and small Southern gardens. Edible condition about 150 days after planting.

STECKLER'S SORREL (Broadleaved)

Culture—Planting time, Southern States, Spring, January to April; Fall, September to December. Plant 2½ ounces to 150 feet of row. Sow in rows about 1 foot apart. Used like Spinach as well as in salad and in soup. Edible condition about 85 days after planting. Planted in many small gardens throughout the South.

STECKLER'S SPINACH

Culture—Planting time, Southern States, Spring, January to June; Fall, (main crop), September to December. Plant 3 ounces to 150 feet of row. 30 pounds per acre. Sown broadcast in fields, or in rows about 12 inches apart (small gardens). There is no better greens produced than Spinach. Rich, moist ground is best and grows better when season has cool nights. Approximate time to edible condition is given after each variety. This varies with climatic conditions and soil.

BROAD LEAVED FLANDERS. 70 days. Very large, broad leaves, grows erect, very extensively grown, fine flavor.

EXTRA LARGE LEAVED SAVOY. 60 days. Very large, thick leaves, slightly curled. The best and most extensively grown variety for market.

KING OF DENMARK. 70 days. Long, very thick leaves, dark colored, an excellent variety and very popular.

Monstrous Viroflay OR THICK LEAVED. 58 days. Monstrous leaves, the largest of all varieties. Requires rich soil, an excellent sort.

NEW ZEALAND. 90 days. Dark green, thick succulent, heat resistant, grows well all summer, very popular.

STECKLER'S FULLBASKET. 60 days. Leaves often 20 inches across, very tender and of excellent flavor. We recommend this variety very highly.

Steckler's Squash

Culture—Planting time, Southern States, Spring, March to July; Fall, August to November. Plant 1½ ounces to 150 feet of row, 3 to 4 lbs. per acre. Prepare hills by mixing well rotted manure in each hill and pulverizing thoroughly. Plant about 6 to 8 seeds in each hill, summer varieties, hills should be 3 to 4 feet apart each way; winter varieties 6 to 8 feet. When well started thin to about 3 plants to each hill. Do not bruise when gathering. Approximate number of days to edible condition is given after each variety. This varies, due to climatic and soil conditions.

EARLY WHITE BUSH OR PATTY PAN. 70 days. Vine dwarf in habit, produces round scalloped squash about 4 inches thick and about 9 inches in diameter. The most popular variety in the South.

GOLDEN CUSTARD. 80 days. Large golden yellow, fine quality squash. Excellent keeping, none better for home use. No garden complete without it.

LARGE YELLOW OR SUMMER CROOKNECK. 80 days. Produces crooked shaped yellow squash. Thick, fine quality flesh. Very popular.

MAMMOTH CHILI. 70 days. The largest of all squash. Rich orange yellow, skin smooth, excellent keeper, almost every garden has some of this variety.

Steckler's Tomatoes

Culture—Planting time, Southern States. Seed, Spring, December to March in hot bed; in open ground to June; Fall, September to November in open ground. Plant 1/2 ounce in 150 feet of row. One ounce will produce about 3000 plants. Transplant from hot bed when plants are about 6 in. high to open ground, about 3 to 4 ft. apart each way. Tomatoes require rich, well pulverized soil. If danger of frost is not over when transplanted, plants must be covered at night whenever there is danger of frost. To protect from insects dust with Arsenate of Lead, powdered form, about 2 weeks after transplanting and at about 2 week intervals thereafter. Approximate number of days from time of planting seed to edible condition is given after each variety. This varies due to climatic and soil conditions.

AVON EARLY. 100 days. Deep scarlet color, smooth, free from cracks, round or slightly flattened. Excellent quality, one of our best varieties.

BONNY BEST. 100 days. Bright, deep scarlet color, ripens uniformly, very hardy vine, a first class market variety.

CRIMSON PONDEROSA. 125 days. Very large, very firm, crimson color, few seeds, prolific producer, one of our best varieties.

DWARF CHAMPION. 120 days. Bright red, medium size, upright and vigorous growing vine, hence can be planted closer together than other varieties. An excellent sort.

EARLY DETROIT. 110 days. Large solid purple color, globe shaped, smooth fruit, heavy producer. A favorite among many Southern gardeners.

GOLDEN QUEEN. 110 days. Medium size, golden color, smooth, prolific producer. Excellent taste, grown extensively.

GREATER BALTIMORE. 120 days. Round, red solid fruit, medium size, heavy producer. We highly recommend this variety.

GULF STATES MARKET. 120 days. Purple, globe shaped, excellent quality fruit. Good shipper, a favorite for Southern gardeners.

JOHN BAER. 110 days. Scarlet, very large, nearly round, firm fruit. Vigorous producer, grown extensively, a fine variety.

JUNE PINK. 100 days. Purplish pink, prolific producer, hardy vines, an excellent variety.

John Baer

LIVINGSTON'S FAVORITE. 120 days. Bright red, wonderful shape and flavor, very large, good producer, truly a favorite variety.

LIVINGSTON'S GLOBE. 120 days. Smooth, purplish red color, good size, firm flesh. Prolific producer, an excellent variety.

LIVINGSTON'S STONE. 100 days. Bright red, good size, smooth tomato. Solid flesh, excellent for canning, recommended highly.

NORTON'S WILT RESISTANT. 135 days. Heavy bearer of large smooth, red fruit. A favorite variety for home gardens.

RED ROCK. 120 days. Very solid, red color, large, smooth fruit, no superior in quality and flavor. Planted extensively.

RED AND YELLOW PEAR SHAPED. 100 days. Pear shaped, good size fruits, good quality, grown in many Southern gardens.

SPARKS EARLIANA. 100 days. Large red, smooth tomato, medium size, nearly round, foliage small, grows extensively for canning. We recommend this variety very highly for all purposes.

STECKLER'S NEW STONE. 125 days. Bright red, solid, smooth fruit, prolific producer, excellent quality. One of the best and most extensively grown varieties.

YELLOW PONDEROSA. 125 days. Rich golden yellow color, similar in size and shape and growth to Crimson Ponderosa. Very popular.

Steckler's Turnips

Culture—Planting time, Spring, January to June; Fall, September to December. Plant $1\frac{1}{2}$ ounce to 150 foot rows, 4 pounds to one acre. Sow broadcast, or in rows, about $1\frac{1}{2}$ to 2 feet apart. Cover about a half inch, thin out as overcrowding hinders proper development. Turnips grow better in a light, rich soil. Turnips and Rutabagas are also used quite extensively for feeding stock, however, do not feed them to milk cows as it affects the taste of the milk. The approximate number of days to maturity is given after each variety. This varies with climatic and soil conditions.

Amber Globe

AMBER GLOBE. 70 days. Globe shaped, large, attractive color, very productive. Used extensively, both for shipping and table use.

EARLY PURPLE TOP STRAP-LEAVED. 50 days. Medium size, flat, fine grained and tender, an excellent variety.

EARLY WHITE FLAT DUTCH. 50 days. Flat, white, medium size. Excellent quality, one of our best varieties for table and market.

EXTRA EARLY PURPLE TOP MILAN. 40 days. Flat, smooth, medium size, bright purple top. A favorite wherever grown.

EXTRA EARLY WHITE EGG. 60 days. Egg-shaped, white, thick skin, firm flesh. A good keeper, a popular variety.

IMPROVED PURPLE TOP RUTABAGA. 80 days. Oblong shape, yellow flesh, very solid, used extensively for feeding stock as well as table.

LARGE COW HORN. 90 days. Large white horn-shaped turnip, average about 9 inches long, very large producer, an excellent variety.

LARGE WHITE GLOBE. 80 days. Globe shaped, pure white skin. In rich soil sometimes weighs 12 pounds, a very popular variety.

PURPLE TOP WHITE GLOBE. 60 days. Large, globe shaped, white turnip with purple top. One of our best and most popular varieties.

PURPLE TOP YELLOW ABERDEEN. 70 days. Medium sized, round, yellow flesh, firm, very hardy and productive. A popular variety among many Southern farmers.

SEVEN TOP. 70 days. Tops very large and makes excellent greens and salads. Very hardy roots, an excellent variety for the South.

STECKLER'S JAPANESE. 70 days. Large White, semi-flat, heavy producer, good keeper, used both for table and stock.

STECKLER'S VEGETABLE PEAR, Chayote or Merlito

Culture—Planting time, Southern States, Spring, March to May. The Vegetable Pear makes an excellent dish whether creamed, fried, stuffed, baked with cheese or salad. It is grown on a long ornamental vine similar to the gourd to which family it belongs. The vine is usually trailed on a trellis or fence. Plant the whole pear with broad end down, leaving small end slightly exposed. Never plant less than two for successful results of production.

Steckler's Field Seeds

All prices are subject to market fluctuations. Prices on larger quantities than quoted will be given upon request.

NOTE:—The Field Seeds listed are selected, after over 100 years of study and experience, for their special adaptability to the climates of the South and are of the best quality.

Steckler's Beans, Velvet and Soy for Fertilizer

Planting time, Southern States, March to August.

BILOXI (Soy). Bush grows upright about 5½ feet with very heavy foliage, besides producing excellent food for grazing and for hogging down with corn and for ensilage, it is one of the best fertilizing plants in existence. We recommend this variety very highly. 6 to 8 pounds will plant one acre in rows about 3 feet apart. 1 to 2 inches deep. 60 lbs. per bushel.

EXTRA EARLY SPECKLED VELVET. Produces very long vines and very heavy foliage. Heavy producer of short, well filled pods. No better soil fertilizing plant can be found. This variety is known and recognized as the best for all purposes. Plant about 1 peck to 1 acre in rows 4 to 5 feet apart. 60 lbs. per bushel.

MAMMOTH YELLOW (Soy). Vines bushy, vigorous, erect habit. Sow broadcast about a half bushel to one acre or about 1½ feet apart in rows about 3½ feet apart. An excellent and popular variety. 60 lbs. per bushel.

O-TOO-TAN (Soy). A fast growing, erect bush, 4 to 5 feet high. Half peck will plant one acre, 2½ to 3 feet between rows. Heavy yielder of small black beans, grown very extensively throughout the South. 60 lbs. per bushel.

Steckler's Cotton Seed Selected Varieties

Planting time, March and April. One bushel is required to plant one acre. Thoroughly break and prepare the ground early. Rows should be 3½ to 4 feet apart and hills about 12 to 14 inches apart in the row. When the cotton comes up it should be off-barred deep while it is small in order to let the heat of the sun strike the beds. As the plants get larger, shallow down and towards the last, cultivate very shallow. Always keep the top crust of the ground broken in dry weather, as it prevents it from losing its forms. Never stop plowing for wet weather until the ground turns in slices; then quit immediately until it dries off. Never lay-by until the middle of August. The first week in April has been found to be the best time for planting cotton.

NOTE:—All of our Cotton Seed is free from Boll Weevils. These are all good varieties which have been thoroughly tested and recommended by Agricultural Colleges and Experiment Stations of the Southern States.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Cotton Seed--continued

DELFO 6102 (Long Staple). Dwarf plant, small leaves and square foliage. Very long limbs. Length of staple 1 1/8 to 1 3/16 inches. One of our best and most widely grown varieties. 30 lbs. per bushel.

EXPRESS (Long Staple). About 1 3-16 inch staple. Heavy producer, very early and excellent quality. Recommended highly and grown extensively. 30 lbs. per bushel.

KING'S EARLY IMPROVED (Short Staple). Extra early, wonderfully prolific, small seed, lint 36 to 40%, a fine variety. 30 lbs per bushel.

WANNAMAKER-CLEVELAND BIG BOLL (Long Staple). Vigorous plant, with low, close-jointed pro-

ducing limbs. Easily picked, large bolls, 34 to 38% lint, 1 3/8 to 1 1/2 inch staple. Highly recommended 30 lbs. per bushel.

Steckler's Cow or Field Peas

Planting Time, Southern States, March to August.

BRABHAM. Grows upright, very heavy producer, retains foliage very well while being cured. Very vigorous growing. An excellent variety, very popular. 60 lbs. per bushel.

BROWN SUGAR CROWDER. Very prolific producer, upright growing, bush form. This variety planted extensively for table use, very popular. 60 lbs. per bushel.

CANADA FIELD. This variety is grown extensively for pigeon feed. When mature the pea is perfectly round and smooth. 60 lbs. per bushel.

CLAY. Produces heavy foliage as well as pods. Very vigorous growing. The Clay is the most popular field pea in the South, excellent forage crop. 60 lbs. per bushel.

LADY. Small round, pure white pea. Generally planted between corn and used extensively for the table. 60 lbs. per bushel.

LARGE WHITE BLACK EYE. Large vines, excellent for forage crop, used also for the Southern table. 60 lbs. per bushel.

MIXED PEAS. Often thousands of bushels of field peas become mixed and often farmers request a mix-

ture of good varieties. These mixtures are becoming very popular. 60 lbs. per bushel.

NEW ERA. This variety is the most widely planted for hay production of all varieties. We highly recommend this. 60 lbs. per bushel.

WHIPPOORWILL. Upright, bushy growth of plant. A great favorite because of early maturity and because they are easily harvested. 60 lbs. per bushel.

WHITE SUGAR CROWDER. Same as Brown Crowder in growth and use. Slightly more popular. 60 lbs. per bushel.

Steckler's Grass Seeds---Field and Lawn

We have the finest and best assortment of Field and Lawn Grass Seeds offered in the South. These selected varieties are grown for us by the best growers in the United States. Our 100 years of experience is behind our selection of seeds and growers.

BERMUDA GRASS. Plant from February to September, about 8 pounds per acre for lawns and thicker for Golf Courses. Bermuda is used more extensively than any other grass on Southern lawns and Golf Courses. It has a narrow, thin leaf of dark green color. Spreads quite rapidly and grows very well in the South. It dies down with a heavy frost in the fall but comes up in the Spring. It does not do well in the shade but is very hardy where it has sunshine. Takes from 20 to 30 days to start.

CARPET GRASS. Plant from February to September, about 10 pounds per acre for lawn and thicker for Golf Courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the Fall. It is a natural perennial grass in Louisiana. It is used very extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes 20 to 30 days to start. Carpet Grass is also used extensively for meadows and pastures in the South.

CLOVER--Alfalfa or Lucerne. This is the most widely planted of all clovers. It produces an extremely long root, stands drought exceedingly well. It will produce 4 or 5 crops of hay a year and it enriches the soil. Its very long branching roots loosen the subsoil. A very profitable field crop for the farmer. Plant January to April for Spring and September to November for Fall at the rate of about 30 pounds per acre.

Alsike Clover

WHITE DUTCH. This is a very common variety in the South, although small for hay production, it is one of our best pasture clovers. Sow in Spring or Fall about 12 pounds per acre.

YELLOW BLOSSOM SWEET (Melilotus Indica). Sometimes called Sour Clover. Grows about 10 to 15 inches high. Early producer. A popular variety among many farmers. Sow in early Spring or Fall 20 pounds per acre.

JOHNSON GRASS. Perennial with cane like roots. Tender roots are excellent for hogs. If cut while tender, stock will eat all of it but if permitted to get coarse and tough, stock will not eat it. Sow during March and April, 1 to 1½ bushels per acre; exceedingly hard to eradicate when once planted.

KENTUCKY BLUE. The standard grass in America for pastures. Growth is slower than many other varieties but when once established it is permanent. Sow about 20 to 30 pounds per acre in Spring or Fall.

ORCHARD. One of the best varieties for hay and pasture in the South. Very hardy, starts early in Spring and continues well into the winter. Bears close grazing and is very long lived. Grown very extensively in the South for pasture and hay. Sow from September to June about 45 pounds per acre.

RED TOP. Perennial, height 1 to 2 feet. Does well on low, wet lands. This is an excellent pasture and hay grass. An excellent variety, about 30 pounds per acre. Sow from October to February.

RYE, ENGLISH. The winter lawn for Southern homes. Southern winter lawns are greatly admired and enjoyed and are produced with very little expense. The summer lawn grasses die out when frosts and cold weather come. Rye Grass is planted from September 15th to about April 1st. It comes up very quickly. English Rye is slightly lighter in color and some prefer it to the Italian. Sow about 250 to 300 pounds to the acre, for lawn and golf courses and about 150 pounds per acre for meadows.

English Rye Grass

CLOVER—Alsike. Sow in Spring, about 6 pounds to the acre. This is exceptionally good for wet lands, very similar to Red Clover, except smaller plant and leaves. Makes excellent pasture and hay. Succeeds in impoverished and acid soils. This is a Perennial Clover.

HAIRY PERUVIAN ALFALFA. Sow about 30 pounds per acre, from January to April for Spring and September to November for Fall. Withstands colder weather better than Alfalfa or Lucerne and usually produces a heavier yield of hay. A perennial plant. We highly recommend this variety for hay and pasture.

JAPAN OR LESPEDeza. One of the best and most valuable Southern Clovers, growing well on rich or poor soil. Grows in bush form 12 to 16 inches high, vigorous plant with long and wide root system. Harrow into a depth of 1½ to 2 inches and roll land to pack. Sow in Spring or Fall. Very widely planted throughout the South. A very valuable crop.

MEDIUM RED CLOVER. Sow in spring or Fall about 12 to 15 pounds to the acre. This variety is most universally grown throughout the country. On fertile soil and especially where hay is desired, it has only one superior and that is Alfalfa.

WHITE BLOSSOM SWEET (Melilotus Alba or Bokhara). Sow about 20 pounds per acre from February to April for Spring, and September to December for Fall. Resembles Alfalfa in appearance and will grow luxuriantly on soils rich in lime and of insufficient depth for successful growing of either Alfalfa or Red Clover.

RYE, ITALIAN. This variety of Rye Grass some gardeners claim is a little harder than the English. It is slightly darker and stays green a little longer in the early summer. It is planted as extensively as the English and is as well liked. About 250 to 300 pounds per acre is required for lawns and golf courses and about 150 pounds per acre for meadows.

STECKLER'S SUNNY SOUTH (Mixture). Plant September to April about 150 pounds per acre. Great success has been reported from the planting of this mixture.

SUDAN. An excellent forage crop. Grows vigorously and hardy. Yields more tonnage per acre than any other forage crop. Plant 10 to 15 pounds per acre, March and April for Spring; August and September for Fall.

TIMOTHY. For a hay crop, Timothy is probably unsurpassed by any other grass. It is also an excellent grass for grazing. Planted extensively. Sow 10 to 12 pounds per acre, September to October.

Early Winter Turf Oats

STECKLER'S OATS

EARLY WINTER TURF. Sow from October to March, 1 to 1½ bushels to an acre. Stools more than any other variety; can be pastured all winter and is as hardy as wheat. Planted extensively by Southern planters. It is claimed to produce more and heavier grain than other varieties.

STECKLER'S LOUISIANA RED RUST PROOF OATS. Planted from October to March, about 2½ bushels per acre. This variety is very vigorous growing, heavy producing and is especially adaptable to this section. Its rust resistant feature makes it dependable for production.

TEXAS RED RUST PROOF OATS (Recleaned). This is an excellent variety, very popular throughout the South and Southwest. Produces large heavy heads, full of excellent quality oats.

Southern Grown Rye.....	.25	1.50	2.75

Southern Grown Rye

STECKLER'S SORGHUMS AND MILLETS

Especially adaptable to the South.

EARLY AMBER SORGHUM. Exceedingly popular for forage, relished greatly by stock, because of sweetness. Makes good syrup but not quite as good for syrup as the Orange because of the small stock. Plant March to July in rows 3 feet about 12½ pounds per acre, about 6 to 10 seeds, 12 to 18 inches apart in rows. If sown broadcast about ½ bushel per acre.

German Millet

EARLY ORANGE SORGHUM. Equally as valuable as the Amber for forage but on account of the longer growth it is better for syrup making. About 10 days later than the Amber. Planting and culture same as Amber.

EVERGREEN BROOM CORN. One acre will produce about 500 lbs. of brush and nearly 40 bushels of seed which is used for feed. Plant and cultivate similar to corn. Sow March and April in rows about 3½ feet apart, plant 6 inches apart in rows. Requires about 20 pounds per acre. We recommend planting of more Broom Corn.

GERMAN MILLET. This is the favorite variety. Heavy producer of excellent hay. Sow April to June, 15 to 20 pounds per acre. Cut when in bloom, recommended for this climate.

White Kaffir Corn

JAPANESE HONEY DRIP CANE. Good syrup producer, splendid forage crop and if drilled thickly makes excellent hay. Very prolific, makes about 200 gallons of highly flavored syrup per acre. For syrup sow about 15 pounds per acre. We recommend this highly.

STRAIGHT HEAD RIBBON CANE. Used extensively for ensilage, also for syrup. Grows similar to the crookneck variety. Plant March to August about 15 pounds per acre.

WHITE KAFFIR CORN. Makes excellent fodder, keeps green and brittle. For grain, sow about 10 pounds per acre in rows about 3 feet apart. For fodder, sow $\frac{1}{2}$ to 1 bushel either broadcast or in drills. Planted March to June.

STECKLER'S SUNFLOWER

MAMMOTH RUSSIAN. Heads often measure from 12 to 15 inches in diameter, containing an immense amount of seed, which is used for Poultry feed, planted in Spring about 3 pounds per acre.

STECKLER'S HAIRY, WINTER OR SAND VETCH

Culture—Plant from August to November or early Spring with small amount of Rye, Oats, Wheat or Barley. Sow about 40 pounds per acre. Makes an excellent hay crop and is very popular throughout the South. A good soil improver.

STECKLER'S BARLEY
(Southern Grown)

Culture—Grown extensively for winter and spring grazing. Plant about 2 bushels per acre, September to December.

STECKLER'S WHEAT

Culture—Best time to plant in South, October 15th to December 15th. Seed should be drilled in rather than broadcasted. In early planting (to November 15th), use 1 bushel per acre, later planting use more.

RED MAY. Many planters claim that this variety is earlier than Fultz. Beardless, excellent producer, recommended highly.

STRAWBERRY SHOOKS OR DIRT BANDS

Eggplants, Muskmelons and Early Cucumbers pay well if they come early into the market. In order to have them early, it is a good plan to start them in a cold frame in what are called "Dirt Bands." This is a box 4 inches square and 4 inches deep, without bottoms. These are placed in a frame and filled up with good rich soil, and five or six seeds in each box; when the plants come up, thin them out to one or two in each box. Before using dirt bands, wet them thoroughly before bending or they will be apt to break at the grooves, as they are made of thin veneered wood.

Price: 75c per 100; \$4.00 per 1000, not prepaid.

Tacks for Dirt Bands and Boxes, $\frac{1}{4}$ pound 15c; pound, 50c.

STECKLER'S PEANUTS

Culture—Planting time, Southern States, April to August. Plant about 2 bushels per acre, in rows about 2 $\frac{1}{2}$ to 3 feet apart in hills about 12 to 15 inches apart in the rows. Cultivate well and keep free from weeds.

IMPROVED WHITE VIRGINIA. Grows upright and produces heavy crop of large peanuts. About 20 pounds per bushel.

SPANISH. Small pods, very prolific.—The whole plant is harvested and used for stock feeding, very nutritious.

TENNESSEE RED. Very large shells, usually contains 3 large kernels, enormously productive.

Roses

Planting instructions—See that your ground is well loosened and fertilized before planting rose bushes. Press the soil firmly around the roots and do not plant them too deep. Water after planting. While we are prepared to fill all orders for field grown roses at any time, better results are obtained when planted after December 1st. If sold out of any variety, we will substitute another as good unless instructed to the contrary.

Bush Varieties

- BESSIE BROWN.** Crimson, free blooming, large foliage, long stems.
- DUCHESS DE BRABANT.** Light rose color, shading to salmon, medium foliage, good stems, very popular.

Pecans

A Real Money Crop

The Pecan has become a very important nut, particularly in the Southern States and it may be said that there is no other fruit or nut tree which fits so well into the general farming of this region as the Pecan. Cotton, Corn, Cow Peas and other farm crops can be sown to advantage among the trees when they are young and even until the trees have begun to bear well. The region in which the Pecans may be grown with a proper selection of varieties, extends from Virginia to Florida, thence west to Texas and Oklahoma. As shade trees, they make handsome specimens and they are well adapted for street, road and yard planting.

Varieties

STUART—Nut large, thin shell, oblong in shape, full meated, quality best, abundant bearer of rapid growth, popular.

VAN DEMAN—One of the most attractive in appearance, rich, well flavored, medium large, elongated.

SUCCESS—Nut large and round with medium thin shell, full and containing a larger quantity of meat than any other pecan on the market.

FROTSCHER'S (Eggshell)—Nut large, oblong in shape, very thin shell. Kernel plump, full, quality good, abundant bearer, rapid grower. A very popular variety.

SCHLEY—Nut medium size, oblong in shape, smooth, clean and bright in color, very thin shell, kernel very plump and rich.

Stuart

Van Deman

DON SUNG—Makes Hens Lay

DON SUNG (Chinese for egg - laying) is a new scientific discovery for hens that stimulates the egg-laying organs and makes the hen healthy, strong and vigorous. As a result she lays regularly in any season.

DON SUNG is easily given in the feed, and costs nothing to try. It doesn't force or hurt the hen in any way. In fact it makes her healthier. It is used by thousands of successful poultry raisers the world over.

Positively Guaranteed—Try This Test At Our Risk

Take ten hens, separate them from the others and give them **DON SUNG** for one month. Then figure your egg yield. If you don't find that **DON SUNG** has paid for itself and paid you a good profit besides, your money will be refunded without question or argument. A 50-cent package will handle this test.

Prices: 50c, postpaid; Large size, \$1.00, postpaid (3 times 50c size); Special size, \$5.00, postpaid (6 times \$1.00 size.)

STOPS CHICKS DYING

Most people lose half of every hatch, and seem to expect it. Chicken cholera or white diarrhoea is the trouble.

Science offers the poultry raiser a new wonderful discovery, **AVICOL**, that is easily given in water for either the prevention or treatment. The thousands of poultry raisers who have used **Avicol** are unanimous in their praise of it.

Get a package of **Avicol** today. If you don't find that it promptly stops your chicks dying, or is not successful in the treatment of white diarrhoea and all other bowel diseases of poultry, your money will be refunded.

Avicol revives the drooping chicks and helps them grow and develop rapidly. Shows positive results in 48 hours. Don't be without it.

50c Packages and \$1.00 Packages, postpaid.

TALCIMIZED SODIUM FLUORIDE

(Called "T.S.F.")

The U. S. Department of Agriculture recommends Sodium Fluoride to kill poultry lice. They report that it does the work better than anything else, killing both old and young lice, including the young which come from the eggs present on the fowl at the time of treatment.

TALCIMIZED FORM MADE ESPECIALLY FOR POULTRY

Talcimized Sodium Fluoride is made especially for poultry and carries the Government's directions for applying. It is safe, easy to use, inexpensive and absolutely does the work quickly and effectively.

Price: 45c, postpaid (Enough to treat 50 chickens.)

Floral Department

The shipping of Fresh Cut Flowers, Bouquets and Floral Designs has always had our special attention. This department is in charge of a Floral Artist who prides himself with the fact that he

NEVER DISAPPOINTS

This is a source of great satisfaction to people in the country who want fresh flowers on short notice for Funerals, Weddings, etc. We always ship something appropriate in case the desired flower is not in season.

Telephone or telegraph us, allowing a few hours before train time and you can count on prompt service.

It is preferable to write us explicitly, if possible, naming prices and colors of flowers desired, also the time for which flowers are needed in cases of weddings and entertainments.

NO EXTRA CHARGE FOR PACKING

Cash or city references should accompany each order. Telegraph or telephone orders are not shipped C. O. D. except where parties are known to us.

CUT FLOWERS

These are all hot house grown. Roses on long stems and large buds. Carnations fresh and sweet, Lilies of the Valley, etc.

PRICES OF CUT FLOWERS

Cannot be established for the entire year as they will vary with the season and supply. Holiday prices from 25 to 50 per cent higher.

American Beauties, dozen, \$10.00 to \$20.00.
Roses, white and pink, dozen, \$3.00 to \$7.00.
Carnations, white, pale and deep pink and red, per dozen, \$2.50 to \$3.00.
Chrysanthemums, dozen, \$4.00 to \$12.00.
Hyacinths, white, dozen, \$2.00.
Lily of the Valley, dozen, \$2.50.
Narcissus, white, dozen \$2.00; yellow, dozen, \$2.50.
Daffodils, yellow, dozen, \$2.50.
Sweet Peas, all colors, per bunch, \$1.00 to \$2.00.
Gladiolus, all colors, dozen, \$2.50.

During Mid-Summer—

Asters, white, pink and lavender, dozen, \$1.50 to \$3.00.
Paeonies, dozen, \$3.50 to \$5.00.
Easter Lilies, in season, dozen, \$5.00 to \$6.00.
Ferns free with each shipment.
During holidays, prices are higher from 25 to 50 per cent.

FUNERAL DESIGNS

Crosses, without foot, to lay on coffin, \$5.00 to \$15.00.
Crosses on stand, \$5.00 to \$25.00.
Wreaths without foot, to lay on coffin, \$5.00 to \$25.00.
Wreaths on stand or easel, \$5.00 to \$25.00.

Pillows, Lyres, Harps, Stars, \$5.00 to \$25.00.
Masonic, Odd Fellows, Elks, and other fraternity emblems, \$10.00 to \$30.00.

Funeral Bouquets, flat for coffin, \$4.00 to \$10.00.
Casket Covers or Floral Blankets, \$35.00 to \$100.00.
These require at least six hours and longer for elaborate pieces, and should be ordered as early as possible.

ANNIVERSARIES, BIRTHDAYS, ETC.

Horseshoes of Fresh Flowers from \$6.00 to \$25.00.

EASTER LILIES

We grow quantities of these and ship to all parts of the South. Price, per dozen, \$5.00 to \$6.00.

WEDDING BOUQUETS

The Bride's Bouquet is nearly always white, but of late we have furnished American Beauties and other colored flowers for the Bride to carry.

The Maid of Honor carries the same color as the Bride and the bouquets for the Bridesmaids correspond in color with their costumes, but pink is predominant.

BRIDAL BOUQUETS

White Carnations, with white ribbon or tulle, \$5.00 to \$10.00.

White Carnations and Bride Roses, with ribbon or tulle, \$5.00 to \$10.00.

White Carnations and Lilies of the Valley, with ribbon or tulle, \$8.00 to \$20.00.

Bride Roses only, with tulle or ribbon, \$5.00 to \$10.00.

Bride Roses, with Lilies of the Valley, \$8.00 to \$20.00.

Shower Bouquets of Carnations, \$6.00 to \$12.00.

Shower Bouquets of Carnations and Bride Roses, \$8.00 to \$15.00.

Shower Bouquets of Lilies of the Valley and Roses, \$8.00 to \$30.00.

Shower Bouquets of Orchids and Lilies of the Valley, \$25.00 to \$50.00.

Boutonnieres to match, 25c to 50c.

Maid of Honor and Bridesmaids Bouquets, in white or pink, \$5.00 to \$10.00.

Baskets for Flower Girls, \$3.00 to \$5.00 each.

MARDI GRAS, FAIRS AND OTHER FESTIVITIES

We are prepared to furnish up-to-date Floral Decorations, Bouquets, Baskets, etc., for Queen and attendants. Correspondence solicited.

We suggest timely correspondence to arrange for coming events and guarantee satisfaction.

We exercise the greatest care in packing and shipping only fresh stock, but all shipments travel at the risk of consignor.

We reserve the right to substitute when flowers ordered are out of season.

NOTHING ON THIS PAGE IS POSTPAID EXCEPT WHERE NOTED.
