RIO-OSO GEM

U. S. PLANT PATENT NO. 84

The World's Largest Peach

Ripens two weeks later than J. H. Hale. Colors
ten days before ripening. The best commercial
Peach introduced since the famous Elberta.

Sample of **RIO-OSO GEM**
Grown in Harrisons' Orchards
at Berlin, Maryland

Sold only by Harrisons'
in numerous states.
See pages 4 and 5.

LARGEST GROWER OF FRUIT TREES IN THE WORLD

Harrisons' Superior Strains

Stayman Winesap Apple

Superior red strain. Best grown. (See page 27.)

Bartlett Pears

For profitable crops.
(See page 31.)

TRUE-TO-NAME FRUIT TREES

Every customer is assured of Harrisons' Hi-Quality trees and plants at all times. For the home garden, orchardist or large commercial grower. Thousands of customers continue to buy from us since 1884.

Napoleon (Royal Ann) Sweet Cherry

A choice light colored Sweet Cherry variety.
The pick of the "Sweets." (See page 32.)

Hale-Haven Peach

New variety being extensively planted in all Peach sections. (See page 12.)

Red Yorking Apple (U. S. Plant Patent No. 125)

The Apple which will revolutionize Apple growing in the Appalachian region. (See page 30.)

Message From HARRISONS'

Dear Friends:

For fifty-five years the business of the Harrisons' has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

When it comes to fruit trees, you can buy them at most any price, but the trees that will produce the biggest crop of really worthwhile and saleable fruit, cannot be expected from undernourished trees produced in a haphazard manner with the sole idea of seeing how cheaply they can be grown, thus disregarding standard grades, sizes and specifications and careless as to their parentage.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISONS' Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many, many customers for their continued confidence, for which all of the Harrison Brothers are sincerely grateful.

Sincerely yours,
HARRISON BROTHERS

I The Harrison Bros. extend to everyone interested in horticulture a personal invitation to visit our nursery and orchard plantings. *I*

The Worlds Largest Peach RIO OSO GEM

Gigantic Size—Biggest Peach on Earth

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from $2\frac{3}{4}$ to $3\frac{3}{4}$ inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, juicy, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Bears Heavier Than Elberta

Rio-Oso-Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. The tree bears young.

Ripens Two Weeks Later Than Elberta

The Rio-Oso-Gem would be a peach of commercial importance when ripening at any time during the peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches—this variety has sold

United States Plant Patent, No. 84

at very much higher prices than Elberta and J. H. Hale. To prolong your peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted several thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable peach.

30 Rio-Oso Gem
for only \$18.00

SPECIAL INTRODUCTORY OFFER

Every peach grower owes it to himself to plant a trial orchard of this sensational peach. It is the best new variety introduced since the famous Elberta in 1870. This peach is "going places" and will soon be America's most extensively planted, late ripening variety. **Place your money on Rio-Oso-Gem—it's a sure cash profit winner.**

ENJOY LARGE PROFITS

As leading nurserymen, and large commercial peach growers we have the utmost faith in the new Rio-Oso-Gem peach. We offer you a trial orchard planting, as below:

SPECIAL OFFER

30 Rio-Oso-Gem Peach Trees
\$18.00

As a special 1939 inducement we will supply you with 30 Rio-Oso-Gem peach trees, U. S. Plant Patent No. 84, one-year, 4 to 5 ft., for \$18.00. You save on the original cost. We further guarantee complete satisfaction. If for any reason you are not satisfied with this special offer of Rio-Oso-Gem peach trees, we will gladly return your money.

THE RESPONSIBLE HARRISONS' NURSERIES

have been in continuous business since 1884, at Berlin, Maryland. The Harrisons' own and operate more than five thousand acres of land in Worcester County, Maryland.

CUSTOMER AND BANK REFERENCE

For customer references—we refer you to any fruit grower in America who has planted Harrison Grown fruit trees any time during the past 55 years.

For bank references—Union Trust Company of Maryland; Baltimore, Maryland; Calvin B. Taylor Banking Co., Berlin, Maryland; Exchange and Savings Bank, Berlin, Maryland.

RIO-OSO-GEM
Peach Grown in
Harrisons' Orchards
at Berlin, Maryland, and
Photographed in Sept. 1938 by Mr. Harold R. Morse.

I'LL TELL THE WORLD

It's the Peach of the Century!

Rio-Oso Gem "Clicked" from the Start BEARS YOUNG — PRODUCES TREMENDOUS CROPS Brings Highest Prices Everywhere

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

LARGER THAN J. H. HALE

Rio-Oso-Gem is a larger peach than J. H. Hale and yields bumper crops, larger than Elberta. In our own and other orchards Rio-Oso-Gem bears at a younger age than any of the other yellow varieties.

TRAVELS 3500 MILES

One striking feature of Rio-Oso-Gem is the unusually firm texture of the fruit. It will stand up and ship in excellent condition in standard refrigerator cars for long transcontinental hauls of 3500 miles in A-1 shape for the markets.

OUTSELLS OTHER GOOD VARIETIES

Because of their superiority, Rio-Oso-Gem outsells other good varieties on the nation's markets at a premium price of 75c to \$1.50 per bushel.

EXPERT FRUIT GROWERS SAY O.K.

Rio-Oso-Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety superseding the famous Elberta of the Victorian era.

PRICES OF RIO-OSO-GEM

U. S. Plant Patent No. 84

1-Year Trees:	1 to 9 trees	10 to 49 trees	50 to 299 trees	300 to 1000 trees
12 to 18 in. . .	\$0.55	\$0.40	\$0.35	\$0.30
18 to 24 in. . .	.65	.50	.45	.35
2 to 3 ft. . . .	.70	.55	.50	.40
3 to 4 ft. . . .	.75	.60	.55	.45
4 to 5 ft. . . .	.80	.65	.60	.50
5 to 6 ft. . . .	.85	.70	.65	.55

On larger quantities, write for special prices

Prices apply only to the quantities of Rio-Oso-Gem peach trees ordered, and cannot be assorted varieties of other peaches and other fruits.

Supply of Rio-Oso-Gem peach trees is limited.

PROTECTED BY U. S. PLANT PATENT NO. 84

The Rio-Oso-Gem has been protected by the Government against infringements by U. S. Plant Patent laws for a period of 17 years from the date patent was granted, being November 28, 1933. It is unlawful for anyone to propagate and sell the Rio-Oso-Gem, U. S. Plant Patent No. 84, peach trees without obtaining written permission from the owner.

Exclusive Propagation and Sales Rights of the Rio-Oso-Gem in the Following States Granted to Harrison's:

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kansas, Kentucky, Louisiana, Maryland, Maine, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and West Virginia.

Fruit men were amazed at the high prices Rio-Oso-Gem brought on the market. They sold in the New York City Wholesale Market at \$2.50 per half-bushel.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem peach trees.

RIO-OSO-GEM PEACH. U. S. Plant Patent No. 84

FRUIT TREES ARE YOUR BEST BET

Because They Are

- Absolutely True to Name
- Healthy — Vigorous
- Disease free
- Hardy
- Properly hardened off before digging
- Propagated from bearing trees of selected strains
- Come into bearing earlier
- Yield bigger crops of better fruits
- Have larger roots
- Take hold quickly in new locations
- The best trees for less money

MONEY IN FRUIT GROWING

Leading Orchardists Prefer Harrison Grown Fruit Trees

Alive Healthy Fruit-Bearing Trees Depend on the Heredity

Many, many years ago the Harrisons introduced a new method of propagation that was later to revolutionize the industry. Seeking out a better method of propagation in the interest of securing dependability in true-to-name varieties, we selected new budding stock from our own orchards, taking only those trees that were stamped "super-quality."

These new bud selections of known origin were later to become new orchards, and so through a desire to make more profits, we were able to help our fellow orchardists in cashing in on our experience.

You Pay No More for Harrisons' "Bud-Selected" Trees

The "bud-selection" method to propagate fruit trees is very expensive—but whatever the expense they are the trees that give satisfaction.

With 1750 acres of bearing orchards and a trained organization operating twelve months a year, we are organized on a large production basis, which reflects lower prices both for the commercial grower and the home owner.

New Lower Prices

Now every planter can buy dependable true to name Harrison grown fruit trees at prices no higher than the ordinary tree.

TODAY FRUIT GROWING is making inroads on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

Dependable Nurserymen Propagate from Bearing Orchards

If fruit trees are continuously propagated from the nursery rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate, and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. We are orchardists and nurserymen, and nothing can compare with our own scientific method of "bud selections"—it always gives complete satisfaction and spells profit for the fruit farm.

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

It's Slower Of Course

But this personalized way of selecting buds from trees in fruit, is to know definitely the percentage of your future orchard.

Peaches *A bright and PROFITABLE CASH FUTURE* *Plant a PEACH ORCHARD* *this Spring*

The Peach grower has a bright and profitable cash future—we advise you to plant a Peach orchard this spring, as the number of Peach trees in bearing is the smallest of any time during the past fifty years. Harrisons' are the largest commercial Peach orchardists in the East, and we will plant additional Peach orchards this spring.

Grown on the "Brink" of the Atlantic Real Hardy Grown Stock You Can Depend on

Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit growing section of the United States.

Finest Strains—True-to-Name

Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, bearing the highest coloring of fruit, with extra heavy bearing habits, has made the greatest contribution in directing and fixing the characteristics of the yield; of perfecting color; increasing the size of the fruit and the volume, as well as regularity of the crop.

FRUIT GROWERS

Look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Harrisons' true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries—know what you buy. For best results, plant dependable Harrison-grown trees.

SALES \$1150

from 1000 Red Bird Cling Peach trees which bore a crop when trees had been planted in orchard only two years—averaging $\frac{1}{2}$ bushel per tree. Large, one-year peach trees were planted.

THE REASONS BACK OF GROWING SUPERIOR STOCK

- A—Our organization has over 55 years experience.**
- B—Every step in growing under the personal supervision of the Harrison brothers.**
- C—One hundred thousand trees in our own orchards from which our propagating plants are selected.**
- D—Use of modern methods for planting, cultivating and digging.**
- E—Over 5000 acres of various types of soil.**
- F—Ideal soil and climatic conditions.**
- G—Co-operation with leading horticulturists and experimental stations all over the world.**

A Sectional View of Harrisons' Two Million Peach Trees Growing at Berlin, Maryland

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are propagated from bearing trees, will produce profit-paying crops in the earliest possible time.

RED BIRD

Earliest large Peach commanding high prices

Red Bird Peach

A Real Productive Variety

Also known as "Early Wheeler." The first Peach of large size to ripen. White, cling, with a crimson cheek and yellowish white undertone; very hardy, will thrive in any peach growing district.

PLANT RED BIRDS — THE FIRST OF THE EARLY PROFITS

Very Early Varieties

ADMIRAL DEWEY. Yellow fleshed, freestone; productive.

BUTTERCUP. Yellow, freestone. New.

GREENSBORO. White, freestone, extra large for such an early peach. One of the handsomest, being a large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted for wide variations in peach regions.

JUNE ELBERTA (Mikado). A big, handsome red and gold peach, highly colored, excellent quality and a dandy shipper. Being one of the earliest of the good yellow-fleshed peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

MAYFLOWER. White, cling, small size with red all over.

UNEEDA. Cling; skin creamy white with red blush; heavy bearer.

One Thousand Trees Yield a Half Bushel Per Tree. Only Two Years Old

Harrisons' peach trees are propagated direct from bearing trees of superior strains and extra heavy bearing habits—this is the best type that is true-to-name and will bear fruit at an age of two years under proper care.

EARLY ROSE — from the World's Finest Nurseries

Another Favorite Commercial Peach

Early, white, cling; medium large size for an early peach; high bright red skin; sweet, delicious flavor. Good shipper, making it a new favorite among commercial varieties. Hardy—been known to produce ten bumper crops of fruit without a miss. The tree is strong, sturdy, being a prolific grower and withstands exceedingly cold weather.

Sure to Please

Ripens several days later than Red Bird Cling and ripens at a date thus not competing with any other important commercial variety. Early Rose brings highest prices on leading markets and is being planted commercially in several Peach districts.

EARLY ROSE

Another new favorite with our commercial growers because year after year you can depend on a satisfactory crop of saleable peaches

Other Early Varieties

CARMAN. Semi-freestone, medium size, attractive and luscious, oval-shaped, yellowish white with bright red cheek; flesh creamy white, spicy and good flavor. Hardy, strong grower; heaviest producer of the earliest varieties. A sure cropper.

DELICIOUS. White, freestone. A seedling of Belle of Georgia. New.

ECLIPSE. Yellow, freestone, new variety introduced by the New Jersey Experimental Station.

MAMIE ROSS. White, freestone, large, covered with a beautiful delicate carmine—red blush; firm, juicy, good flavor, excellent shipper. Mamie Ross is about one-third larger and ripens two days later than Carman.

MARIGOLD. Yellow, semi-cling. New.

ORIOLE. Yellow, freestone, very good quality, new.

RADIANCE. White, freestone. New.

SUNBEAM. Yellow, semi-freestone, attractive. New.

VALIANT. A promising seedling of Elberta. The fruit is large, roundish oblate, yellow blushed with red, with firm, juicy flesh of very good quality. Freestone. The trees are productive and it ripens about two weeks ahead of Elberta. Highly flavored.

VICEROY. Yellow, freestone, high quality. New.

YELLOW ST. JOHN. Yellow, freestone.

CUMBERLAND

An Outstanding Favorite Early White Peach

A comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia both in appearance and quality, although it ripens just about the same time or a little before Carman. It has proven to be a heavy cropper, vigorous grower and hardy as Carman. The flesh is white, firm and a much better quality than Carman and Mamie Ross. We can unhesitatingly recommend planting Cumberland for a white, semi-freestone variety that ripens during the Carman season.

Plant Big Peach Trees

Plant large size trees which give the quickest and best results. Leading orchardists prefer large size peach trees, as practical experience has taught them that when you plant a 1-year budded, 5 to 6 ft., 11/16 to 3/4 inch caliper peach tree, which is the strongest, most vigorous and best peach tree grown, that it will bear a good crop of peaches two years younger in age than the medium size tree and will bear a crop three years earlier than the very small peach tree and, believe it or not, the big size peach tree will always produce larger and better crops every year throughout the life of the orchard than the medium size and small size trees.

A LEADER and What a PEACH!

GOLDEN JUBILEE

Another Blue-Blood Aristocrat of the Peach Family *Recommended by Harrisons'*

Harrisons' were the first nurserymen to give Golden Jubilee wide publicity among the fruit growers of America. We recommend to every Peach grower north and west of North Carolina to plant this variety. We, ourselves, have planted several thousand trees in our own orchards and feel confident that you will be satisfied by planting the Golden Jubilee for home use or commercial planting. Our strain of Golden Jubilee is the original strain being originated and introduced by the New Jersey Experiment Station.

Commercial Peach Orchardists

for a century have been looking for an early Peach of high quality, fine flavor, yellow, freestone, attractive color, firm texture and a good shipper, and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any variety of commercial importance which has been introduced since the Brackett.

Golden Jubilee ripens about four or five days ahead of Carman; the latter variety at one time was of commercial importance, but in recent years it has only been grown in a limited way commercially and is quickly fading away in view of the competition from Mamie Ross.

Tried and Proven

There are numerous bearing Golden Jubilee Peach orchards throughout the United States and the variety has been tested by practical fruit men who have unanimously pronounced it as a worthy member of the preferred commercial list. It has been planted by tens of thousands in every Peach producing region and has given good results; therefore, we all must congratulate the New Jersey Experiment Station, New Brunswick, N. J., for breeding and originating the Golden Jubilee.

PEACHES —

A Profitable Future

The peach grower has a bright and profitable cash future — we advise you to plant a peach orchard this spring, as the number of peach trees in bearing is the smallest of any time during the past fifty years. Harrisons' are the largest commercial peach orchardists in the East, and we will plant additional peach orchards this spring.

A Proven Money Maker

Last summer was a banner year for the Golden Jubilee, as it bore huge crops of fancy fruit which sold at premium prices on the markets throughout the United States. Many fruit growers never saw the Golden Jubilee until last summer on the city markets and all spoke of it with great praise and pronounced it the most outstanding and the most profitable peach for the early season group of yellow, freestone fruit.

GOLDEN JUBILEE Ripens 4 Days Ahead of Carman

Fruit is of Good Size

In most localities the fruit of the Golden Jubilee will attain extra good size for an early Peach. One of its most remarkable features is that it is very hardy in fruit bud and withstood the bitter cold weather of last winter as well as any other variety known. It is a cross between the famous Elberta, and the hardy Greensboro, which is a very early variety. Golden Jubilee, fortunately, through the cross inherited the finest qualities of both the Elberta and Greensboro.

GIANT PEACH TREE COLLECTION No. 105

- 2 Early Rose. White, very early.
- 2 Golden Jubilee. Yellow, early.
- 2 Elberta. Yellow, midseason.
- 2 Brackett. Yellow, late.

8 big, 5 to 6 ft. trees for only

\$3.20

Important in the World of Fruits

HILEY *A White Freestone*

Best Southern Peach

White, freestone, medium size, highly red colored, very firm, being an exceedingly handsome creamy white Peach with a delightful red cheek; flesh is white, fine texture, aromatic, very juicy, and of the highest flavor. Tree is strong grower, very healthy and a heavy bearer. Being an excellent shipper, with the stamina to withstand very long hauls under refrigeration, together with its beautiful, most appetizing appearance, and being easily, attractively packed in six-gallon carriers, bushels and half-bushels, along with its recent high reputation and favor with the buying public, has made Hiley a strong contender as the highest general average priced Peach. Many of our varieties are propagated direct from the original strain, and Hiley is no exception, as our late Mr. George A. Harrison cut the buds from the orchard of Mr. Eugene Hiley of Marshallville, Georgia, the originator of Hiley, then known as Early Belle, and later as Hiley Early Belle, now known as Hiley. The Harrison Bros. have frequently visited Georgia and also cut buds from trees being propagated direct from the original strain of Hiley from the famous Hiley orchards of Rumph Brothers of Marshallville, Georgia. **Add Harrison's Strain of Hiley to your commercial plantings for real profit.**

**18 Days
Ahead of
Elberta**

SOUTH HAVEN

Midseason Varieties

ALTON. White fleshed, semi-free.
CRAWFORD'S EARLY. Yellow, freestone, large size, juicy, sweet flavored, highly prized for canning. Tree strong grower and prolific bearer. One of the old-time commercial varieties, which has been extensively planted in years past, but now mainly a home market fruit.

ROSEBUD. Freestone, extra good flavor.
SLAPPEY. Yellow, freestone, medium to large size, beautifully red colored, rich and extra good flavor. Good commercial variety for nearby markets and one of the best early yellow freestone Peaches.

EARLY HILEY

Supply Limited

A NEW STRAIN of Hiley from the South; ripens a few days earlier and is slightly larger. Our strain is from a prominent Georgia orchardist. Hiley growers—try a few trees of this new strain; it may be what you have been looking for.

South Haven

deep yellow, red cheek

Large, handsome, yellow, freestone Peaches of uniform size, delicate in flavor. Ripens about 15 to 18 days ahead of Elberta. Trees are very hardy and productive. Adapted to cold climates and produce bumper crops in mild climates. A new variety.

White Peach Special Collection No. 115

- 2 Early Rose. Early.
 - 2 Cumberland. Early.
 - 2 Hiley. Early midseason.
 - 6 selected, 2 to 3 ft. trees

CHAMPION

a good home peach

White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

Fair Beauty

A new winner from the South. Ripens several days after Golden Jubilee. Very hardy in bud. Fruit is medium to large in size. Skin a deep golden yellow blushed with bright red. The flesh is firm, tender, melting and juicy. Exceptionally well suited for long distance shipments. We strongly recommend every grower planting a limited number of trees of this variety for trial. We offer the original Texas strain.

Early Elberta

*A Masterly Peach
Harrison Grown*

**Ripens 7 to 10 Days
Ahead of Elberta**

**A Golden
Yellow
Blending
Into Rich
Red on the
Sunny Side**

**Early Elberta is
Fine for Canning**

Once planted, Harrison trees readily take root and develop very rapidly—they are quality bred, ready for early fruiting. A young Early Elberta peach tree.

Early Midseason

Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden, tender flesh, yet firm and has a delightful flavor; excellent for canning. Hardier in fruit bud than Elberta, tree is a good grower, bears very young and is a heavy producer. Ripens about a week or ten days earlier than Elberta and is being planted quite extensively in commercial orchards; excellent home orchard peach. Due to its earliness, and being Elberta type of peach, it brings high prices on the leading markets.

Four Other Midseason Varieties

BILLMEYER. Yellow, medium size, productive, quality good.

OLD MIXON FREE. White, freestone, large with bright red cheek, tender, rich, excellent flavor.

RAY. White, freestone, large, most attractive red blush of delicate shade, juicy, delicious, tender and excellent flavor. Trees are exceedingly strong growers, shapely and symmetrical, a regular bearer of big crops and generally considered as the heaviest, most consistent cropper known. Plant Ray for nearby markets and roadside stands, as its fine, attractive appearance and high flavor sell it on sight.

Rochester Popular Midseason Variety Excels in Western New York and Michigan

Yellow, freestone, large, covered with mottled red blush; flesh yellow, stained with red at pit; very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning. Our buds came direct from the original tree from Mr. A. H. Heberle, of Rochester, New York, the originator. Popular in Western New York and Michigan.

Harrisons' volume production has enabled us to supply you with high quality nursery products at new low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

Early Elberta peach. One-year, budded, 5 to 6 feet, the largest and best size peach tree grown. Plant big trees.

Don't Take Risks When You Buy Fruit Trees

Belle of Georgia *[Belle]*

A Peach Orchard Beauty

- Fruit Large,
- Trim in Contour,
- Creamy White With a Beautiful Crimson Cheek.
- Its Popularity Never wanes.

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white peach on the market. It is easily the best shipping white peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best.

Gage Elberta Recommended for Illinois and Indiana

Originated by Mr. John Gage, of Illinois. It is a disease resistant bud sport of the famous Elberta variety. The tree is just as vigorous as the ordinary Elberta, but instead of growing upright, its branches are more of spreading nature. Due to high resistance to bacteriosis, the tree retains its foliage and the fruit ripens three or four days later than the regular Elberta. In sections where bacteriosis is a serious feature in production of peaches, we recommend the Gage Elberta.

Four Other Midseason Varieties

INDIAN. Yellow, freestone, very rich, juicy flavor.

POLLY. White, freestone, large.

NEW PROLIFIC. Yellow, very vigorous, healthy, medium size fruit.

NIAGARA. Yellow, freestone.

Harrisons', in their commercial peach orchards over a long period of years, have grown a larger number of carloads and truckloads of Belle of Georgia peaches than any other orchardist in the nation. Through the process of "bud selection" Harrisons', over a period of many years, have been able to aid Nature, consequently have developed from the original strain which we received from Mr. L. A. Rumph, Marshallville, Georgia, originator of this famous variety, insuring in our famous Harrisons' Super-Strain Belle of Georgia peach trees, which is the finest type, the hardiest and the most productive available. Elicits praise from all who know it because of the great beauty of its fruit at its best—it is one of the glories of the Peach World.

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains we have also employed the services of Dr. J. K. Shaw, Research Professor of Pomology of Massachusetts State College, Amherst, Mass., and of Dr. W. H. Upshall of the Vineland, Ontario, Canada, Experimental Station. These two men are the World's foremost fruit identification specialists and they have pronounced our trees true to name.

SAVE DISAPPOINTMENT — PLANT HARRISONS' TREES

Harrisons' Peach Trees Yield Bigger and Better Crops

NATIONAL *Reputation* J. H. HALE *originated by the late PEACH KING*

Original Strain J. H. HALE

Our Hales are propagated direct from the original strain, the variety being originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, who at one time was the Peach

King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

The tree is somewhat dwarf, a moderate grower and should be planted on the richest, best, well-drained soil available. The Hale needs more cultivation and fertilization than most varieties.

Hale is the second most extensively planted yellow Peach, being surpassed only by Elberta. Hale is a

ranking member of the five greatest peaches in America.

Extra Large Size

Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

Hales are too large to properly pack in 6-gallon carriers, but they make the most attractive and commanding appearance when packed ring-faced in bushel and half-bushel baskets. The Hale quickly made a national reputation and is a strong competitor of the Elberta, being just about as good a shipper as Elberta.

Brings Highest Market Prices

Prices on J. H. Hale and Elberta with a large national crop are about

the same, but on a short crop year Hales usually sell from 25c to 50c and sometimes 75c more per bushel on large wholesale markets.

Midseason Late Varieties

BANNER. Medium size, yellow.

CRAWFORD LATE. Yellow, freestone, superb in size and shape; splendid yellow, with broad, dark red cheek; flesh deep yellow, juicy and melting, rich, winy flavor. One of the best late sorts. Tree vigorous, hardy and sure bearing. Coming at a time when the midseason peaches are over, this variety is eagerly bought up for canning and preserving, and brings highest prices. Being such a remarkably good shipper, it reaches the market in first class condition. An old commercial favorite.

WILMA. Yellow, freestone, large, good red color, somewhat similar to its parent, Elberta.

GOLD DROP. Freestone, hardy, very productive. Medium size, golden yellow color with red blush. Flavor extra good. Very desirable for home use.

SHIPPERS' LATE RED. Yellow, freestone, large, round, bulkier than Elberta, with an attractive red coloring which is catchy to the eye. Flesh is yellow, juicy, sweet and of pleasing flavor. Trees are very hardy, good growers, bear young, sure croppers, and prolific bearers. Promising new late commercial variety and excellent home sort.

**It's a Yellow
Freestone—
Midseason**

Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect.

The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side.

ELBERTA
Harrisons'
"Original Strain"

This attractive appearance and the uniform large size serve to sell it almost on sight.

**Stamina — Uniformity — Best Canning — Premium Prices
Public Demand**

The large fruit, being uniform in size and shape, along with its high, attractive red color and firmness, also its ability to stand shipments of three thousand or more miles under refrigeration in cars for two or three weeks before being consumed, but with stamina enough to still look its best, has won Elberta the reputation of being a peach without a peer and the variety which is always in favor and strong demand with the buying public, therefore demanding the highest possible market prices. Elberta is by far the best canning peach.

Save Disappointment — Plant Only Original Strain Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold in 1938 at a premium of 50c to 75c per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons' heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruited trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

**Thousands Acclaim the Superiority of
Harrison-Grown Trees**

Harrisons' pride themselves in propagating from the original Elberta strain, buds of which were personally cut by the late Senator Orlando Harrison from the original Elberta mother tree in the Rumph orchard in 1889.

We have two commercial orchards, now 36 years old, of these wonderful original strain Elberta. Besides yielding bumper crops annually, they are the source of our present supply of original strain buds for the new young trees.

For years our Elberta peaches have been the background of handsome peach profits. You can do the same if you plant Harrisons' original strain Elberta—it's your best bet.

America's No. 1 Peach—Elberta. There are more Elberta peach trees in bearing than any other variety on earth.

*The Best
Commercial
Variety - Elberta*

Tree is vigorous, very hardy, sturdy, thrives in widely different localities. Elberta is hardier in bud than most varieties, and is a uniform prolific bearer. You can always depend on Elberta as a sure cropper.

Brackett

Mid-Season Late

WINNER

**1. QUALITY

3. COLOR**

Peach

A THREE POINT

**A Profitable
Commercial
Variety
slightly
later than
Elberta**

Brackett is a comparatively new commercial peach in some sections but wherever tried it has given uniformly good results. During the past twenty years we have planted many thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta and fruits weighing five to six ounces are common. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta.

Popular on the Markets

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know that the grower who needs a peach that ripens slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrison's' Original Strain

HARRISONS were the first to popularize this great variety and distribute it throughout the peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.

BRACKETT—A Real Money-Maker

LATE VARIETIES

BEER'S SMOCK. Yellow, freestone, large, oval, skin orange-yellow mottled with red; high flavor.

BERK'S FAVORITE. White, freestone; new variety.

FOX SEEDLING (Fox). White, freestone, large; white with whole side red, melting, sweet, high quality and high flavor. Good for roadside market and canning.

IRON MOUNTAIN. White, freestone, large, generally planted in New Jersey.

ROBERTA (Augbert). A comparatively new variety of good merit. Resembles the Elberta in many respects, but ripens about a week to ten days later.

VERY LATE VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor. Good shipper, and ripens late in the season.

Salberta *A Late Commercial Peach*

Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many peach growing sections. Ripens about 10 days after Elberta.

SALWEY—Best Very Late Commercial Peach

SALWEY

A variety which you can always depend on to greatly lengthen your peach season. For both roadside markets and commercial shipping there is none better than the Salwey, which ripens very late in season. Yellow, freestone, large, beautifully mottled with a red and brownish cheek; flesh is yellow, firm, rich, juicy and sugary. Good quality for fresh eating and particularly fine for canning and preserving. It has a decided commercial advantage, being a good shipper. Salwey is adapted to diverse soils and climates, making it a variety that can be profitably grown in any peach district in the Union.

WHITE HEATH CLING (Heath). White; sometimes called Mammoth Heath Cling, extra large, round, with red blush; flesh is firm, white, exceedingly juicy, and ripens fully to the pit. Favorite for canning and pickling. Be sure to include it in your family orchard.

Harrisons' Reputation Was Built on the Superiority of Our Fruit Trees

Harrison's APPLE Trees

FOR THE FRUIT INDUSTRY

An 8-Year "Bud Selected" McIntosh Red

Apple Growing pays profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrison's Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, being the finest and by far the best quality produced on the North American Continent.

A New Summer Apple Large Transparent

(Lodi)

—first of the year

**Ripens
Very
Early**

**Destined to replace the
ever-popular
Yellow Transparent
Price 10c per tree extra**

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the future demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size.

**Listen!
Early Apple Growers
Make More Money
With Large Transparent**

Yes, actual profit, that's what we mean. It can be done — here's why. Yellow Transparent Apples are always the first on the market and generally they bring good profits when they attain the proper size. Size on Yellow Transparent is hard to get, but easily on its Big Brother, "Large Transparent," which ripens at the same time.

**Large Transparent Apples
Average up to 1/2 Inch Larger
Than Yellow Transparent.
This Means 35c to 50c per
Bushel Extra**

Expert horticulturists claim in Large Transparent there is no noticeable difference in the appearance, color, shape or taste from its parent Yellow Transparent.

Our Large Transparent were propagated from bearing trees.

**PLANT BIG
TREES FOR
QUICK RESULTS**

HARRISONS'

Super Selected Trees, with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

as well in the cold climes of Canada.

Ripens early in July, flesh white, flavor slightly acid, of medium size. Develops where a fine soil is not necessary.

**Harrisons' Are Commercial
Growers, Too — 1750 Acres
of Orchards**

The success of our orchards is paramount; profit is essential to operate, and unless we plant the right kind of "budded" fruit trees we gamble with future results. Large Transparent looks good to us, so we are repeating another orchard planting of Large Transparent (Lodi) this year.

LARGE TRANSPARENT (Lodi)

Other Summer Varieties

ANOKA. Striped red, bears when extra young; new. (1-year trees only.)

CARLTON. Resembles red Astrachan; new. (1-year trees only.)

DUCHESS (Duchess of Oldenburg). Medium size, red striped, flesh white, juicy and good flavor. Unusually heavy bearer, very dependable cropper. Trees are dwarf growers and require small root and branch space.

EARLY HARVEST. Very early, not a good keeper; fruit medium size, pale yellow, tender, juicy, sub-acid. Fine for home orchard because of its merit as a cooking and dessert fruit. Tree is a vigorous grower and bears early and regularly.

EARLY MCINTOSH. Red, attractive, good size, flesh white, fine, tender, juicy and fine flavor, being similar to McIntosh Red. Tree vigorous, hardy, healthy and productive.

MELBA. A seedling of McIntosh. Good size, early. (1-year trees only.)

MILTON. A very handsome new Apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous. Ripens a month ahead of McIntosh Red.

RED DUCHESS. Solid red early coloring strain of Duchess. (1-year trees only.)

RED JUNE (Caroline Red June). Medium size, conical, dark red, juicy, fairly good flavor, very productive.

STARR. Large, yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, very tender, crisp, juicy, aromatic and fine quality, brings high prices. Recommended for nearby markets; a poor long distance shipper. Popular in Southern New Jersey.

SWEET BOUGH. Large, pale yellow; tender, sweet. (Small 2-year trees only.)

SUMMER RAMBO. Large, yellowish green, splashed with red, crisp and tender. Very good.

WILSON RED JUNE. Fairly large, red; good quality. Popular in New Jersey.

**A CHANCE OF A LIFETIME TO BUY THE BEST
FRUIT TREES OF MIRACLE VALUE AT LOW PRICES**

McIntosh Red is America's Highest Priced Apple

*That's Gold
in the*

MCINTOSH RED APPLE

Best Red Strain Known, with Solid Red Color

*Excels in N. Y., Michigan
and New England States*

An exceedingly valuable, hardy, attractive Apple; medium large size; nearly covered with red. Flesh white, fine, tender, juicy, sub-acid and refreshing, and generally considered as the highest and best flavored Apple grown; splendid appearance, which sells it on sight. Demand always exceeds the supply of McIntosh Red and commands the highest prices of any Apple on the leading American markets. The best box and bushel Apple grown, and a good shipper.

THE GREAT HARDY RED APPLE

McIntosh Red is a Canadian Apple, keeps long, but is mellow and good to use from the time it is picked and if kept in cold storage, until the next crop comes. Tree is exceedingly hardy, vigorous, a very prolific bearer, consistent bumper crop producer, a sure annual cropper. Comes into fruiting early. This splendid Apple can be grown from Nova Scotia to North Carolina. Growers in New York, New England, Michigan and Canada have long grown McIntosh Red for big profits. Ask any experienced Apple grower, if you are not acquainted with the McIntosh Red, and he will praise it as highly as we do.

Harrisons' Strain of McIntosh Red is 100% red color when ripe.
Harrisons' Improved Strain is very hardy and produces bumper crops each year.

Other Autumn Varieties

FAMEUSE (Snow). Popular in northern states. Deep red; flesh snowy white, juicy and tender, size medium round. (1-year trees only.)

GRAVENSTEIN. Extra large, perfect in form. Coloring orange-yellow overlaid with broken stripes of light and dark red; flesh yellowish, firm, crisp, tender, juicy, fine flavor. Good for cooking, extra vigorous tree, comes into bearing rather early and bears profuse crops regularly. Grown extensively in California and commands good price.

KENDALL. A McIntosh seedling. Handsomely colored over entire surface. Dark red, with the same fine characteristics of the McIntosh. (2-year trees only.)

KING DAVID. A beautiful deep dark red Apple, resembling Jonathan as to size and shape, but not quite as good flavor. Splendid shipper and keeper. Tree hardy, and comes into bearing young. (2-year trees only.)

KEETOSH. A seedling of McIntosh. Canadian origin. (1-year trees only.)

LOBO. Prominent in a number of fruit districts due to the high coloring and many McIntosh characteristics. The season of Lobo begins a little earlier than McIntosh, but it keeps about as long. The earlier coloring enables growers to pick Lobo in advance of McIntosh. It hangs on the tree better than McIntosh.

MAIDEN'S BLUSH. One of the most beautiful; pale lemon and crimson cheek; flesh white, tender and crisp. Tree vigorous and good bearer.

HARRISON'S *Triple Red* Delicious

KING OF ALL

A MILLION DOLLARS WORTH OF

This apple was introduced by us several seasons ago and since introduced it has been bought and fruited by the tens of thousands by

leading fruit growers throughout the country. It is a "bud sport" of pronounced superior merits. Being **triple-red** colored and the earliest red coloring strain known.

**Blue Blooded
Aristocrats
of the
Dining Table
Brilliant
Crimson-Red
Large Size
Extra Fancy**

Colors Much Earlier Than Ordinary Delicious

Harrisons' Triple Red Delicious colors up weeks earlier than the ordinary strain. By coloring earlier the fruit can be picked while it is firm and it keeps better in storage.

Size and Taste

Size is all anyone could desire, as it runs from large to extra large. The large size, solid red color and characteristic five-knob end make it attract buyers in every market.

Taste will be found on a par with its other points of advantage. The flavor is rich, slightly sub-acid, with an individuality which makes the palate call for more. You'll have no trouble with repeat sales for this variety.

Ships and Keeps Well

Harrisons' Triple Red Delicious ships without bruising. In fact, it ships better than the ordinary Delicious because its earlier coloring permits it to be picked when the fruit is more firm. Its large size makes it easy to pack attractively and the uniformity of size guarantees a good appearance.

Large Profit Maker

The ordinary Delicious is a proven profit maker and our Harrisons' Triple Red Delicious is destined to outclass its predecessor due to the fact that it will produce more highly colored fruit and as most every fruit grower knows, color plays an important part in the price the fruit sells for.

GRIMES GOLDEN
An Orchard Preference as a Pollenizer

Grimes Golden

A Yellow Autumn Apple

BEST HOME ORCHARD APPLE

Medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

Other Fall Apples

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

SMOKEHOUSE. Large apple of superfine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

MAMMOTH GRIMES. A big golden apple. (1-year trees only.)

MAGNUM BONUM. Red, popular in South. (1-yr. trees only.)

OGDEN. Seedling of McIntosh. Sweet. (1-year trees only.)

ORLEANS. Delicious type, bears early and is an annual bearer. (1-year trees only.)

SPITZENBURG (Esopus). A very showy, large red apple, conical in shape, good quality. (1-year trees only.)

WEALTHY. Medium to large size; round; almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

Delicious

Sometimes Called Stark Delicious

THIS IS THE ORIGINAL STRAIN OF DELICIOUS

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Excellent for eating, and the most popular fruit stand apple. Packs well in boxes and bushels, always bringing high prices on the leading markets, and in strong demand by the best trade. Tree is hardy, vigorous grower and a good, dependable cropper when properly pollinized. Suggest planting Yellow Delicious or Jonathan as pollinizers with Delicious.

Harrisons' Take All the "Risk" Out of Buying Fruit Trees

JONATHAN
Keeps Until February—It's a Real Commercial Variety

Trees Are Long Lived

although they bear fruit quite young. Jonathan is more consistent with its crops from year to year than many other varieties, as it will produce good crops practically every year. In the West, Jonathan has long been a standard commercial variety and has proven itself to be one of the leading commercial varieties of the East. Harrisons' super-strain of Jonathan has been produced by "bud selection," being a very high, brilliant red color.

Jonathan APPLE

A Nation-Wide Favorite

**BE SURE TO PLANT
HARRISONS' YOUNG-BEARING
BRIGHT RED STRAIN
OF JONATHAN**

Blazing Solid Red — Fall Variety

Skin cherry-red, very thin and tough; flesh white. Size medium to large. Ripens early fall.

Keeping Qualities Are Good

Without much care, Jonathan may be kept until February, or possibly a bit later. When particular care has been paid to the packing and selection of perfect fruits, it will be found a most desirable variety for the holiday season.

Jonathan Stands Shipping Well

Many apples are excellent to the eye and to the taste, but fail to stand up under the handling which they must get, and therefore do not enjoy real commercial success. Jonathan in this sense is exceptional, for it seems able to stand much handling without ill effects. The skin is thin but tough.

Winter Varieties

ALBEMARLE PIPPIN or YELLOW NEWTOWN. Famous in section around Crozet, Va., and sections of Oregon and Washington. Large, round, ribbed and somewhat irregular. Tree a slow grower and light bearer in poor soils, but right soil and care bring a world-beater when it will thrive.

ARKANSAS BLACK. Dark red; good keeper. (1-year trees only.)

BALDWIN. Large, round, bright red, crisp, juicy and rich; good late keeper, esteemed as an eating apple and for cooking. Quick and large grower; yields big crops. A wonderful shipper, standing long distances very successfully. The best northern apple for packing in barrels, fine cold storage Apple, strong demand for car-load shipments of Baldwins to European and South American markets. Brings high prices on foreign markets; is also popular on the New England and Northern states market. Grows to perfection in New England, New York, Pennsylvania,

Michigan, and Canada, but should not be planted south of the Mason-Dixon line. Baldwin is a leading commercial variety in the Northern States.

CORTLAND. A new variety resulting from cross pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting.

BACK YARD SPECIAL APPLE TREE OFFER No. 212

- 1 Harrisons' Triple-Red Delicious
- 1 Yellow Delicious
- 1 McIntosh Red
- 1 Grimes Golden
- 2 Stayman Winesap

Six Big 5-6 ft. size heavy bearing trees, for only **\$3.00**

Be Smart

PLANT AN APPLE ORCHARD NOW of well-selected varieties. This orchard will come into bearing when there will be a decided shortage of apples. The unwritten law of supply and demand has always worked and when your orchard comes into bearing the demand for high quality apples will far exceed the available supply. There is a bright future for making money in growing apples. Plant the best strains of leading commercial varieties preferred on the American and foreign markets. Says G. Hale Harrison, the Nationally known Fruit Marketing Specialist for Harrisons' Nurseries, Inc.

**More fruit prizes are won on fruit grown in orchards planted with
Harrisons' fruit trees than any other.**

STAYMAN WINESAP

at New Low Prices

**Now an Improved
Red Strain of Stayman**
The Most Popular Apple

IT'S HARRISONS' OWN POPULAR APPLE

During the past ten years the popularity of the Stayman Winesap, has risen by leaps and bounds, and the buying public now realize this is a premier variety par excellence.

A Ready Market at Top Prices

Stayman Winesap is the best general purpose apple grown in any apple district. You can always sell Stayman for good prices and there is always a buyer for this famous variety. The general average selling price for Stayman Winesap during the past ten years has been very high, practically at the top.

Eastern Growers Plant Stayman Winesap in New Orchards

They realize that this apple will produce as good results and do it on poorer ground. Naturally, not so much capital is required for the investment.

With the old Winesap, the fruit tends to decrease in size as the tree ages; with the Stayman it is generally as large and attractive as ever. A strong grower and comes into bearing at early age, being nationally known for its bumper crops of superb apples.

"Always Depend- able"—Say Har- risons' Customers

Many varieties of apple trees have a good year and an "off year"; that is, they will give a large crop one year and next season produce very little.

While this cannot always be blamed upon the variety, since climate, temperature and other causes enter into the question, yet Stayman Winesap seems to ripen a very uniform crop, and letters from our customers inform us that the regularity of crop is remarkable. This is naturally a valuable qualification, and, in part, accounts for the choice of many Eastern orchardists. The taste and appearance tell the rest of the story. For a pollenizer plant Grimes Golden.

Harrisons' Own Orchards

We have in our own commercial orchards several thousand trees of Stayman Winesap and we have selected for our parent trees the finest, deepest colored annual bearing trees. Our selected super-strain is far superior to several new strains being offered by some nursery-men.

Qualifications

- 1** Thrives On Poor Soil
- 2** Puts Idle Land to Work
- 3** Popular Commercial Variety
- 4** Sells On Sight at High Prices
- 5** Skin Solid Bright Blood-Red
- 6** Size Large
- 7** Ships Well Good Keeper
- 8** Excellent Flavor

TURLEY ~ A Type of Stayman

This variety is an offspring of Winesap, which it resembles. Fruit rounded conical in shape, as large as Stayman Winesap, smoother skinned, deeper and richer in color; juicy and rich flavor. Tree very hardy and comes into bearing early. Planted extensively in Indiana and Ohio along with Stayman Winesap, to prolong shipping season.

RED SPY

ONE-YEAR RED SPY APPLE TREES
Mr. E. B. Bradford, a nursery foreman, proudly shows some 6-ft. specimens grown at Berlin

TEN REASONS WHY RED SPY IS A NORTHERN LEADER

1. Extremely hardy, extra strong, vigorous growing tree.
2. Extra large size fruit, slightly larger than Northern Spy.
3. A typical Northern Spy except in color. Red Spy color is solid bright red without either stripes or splashes.
4. Every apple being a solid red color is a tremendous advantage.
5. Colors early. Red Spy harvests somewhat earlier than Northern Spy, it enjoys advantage in price.
6. Quicker sales. A basket of Red Spy sells at premium prices over the well known Northern Spy on account every apple being a blazing solid red color.
7. More U. S. No. 1 grade apples. There are no culls in Red Spy on account of color lacking—the U. S. No. 1 grade pack will be of much higher percentage in quantity than Northern Spy, consequently a greater profit.
8. Red Spy is apparently more prolific than Northern Spy, which for more than a century has been recognized a leader in producing big bumper crops.
9. Red Spy comes into bearing at an earlier age than its well known parent, Northern Spy.
10. Recommended for commercial and home planting by the leading horticultural experts as well as practical fruit growers in the Northern States and Canada.

WINESAP. An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. A strong grower; comes into bearing early and is remarkable for its regular and abundant crops.

Other Good Winter Apples

GAÑO (Black Ben). A handsome, large apple of perfect shape, smooth, glossy, deep red skin; flesh white, slightly tinged with yellow, firm, rather coarse, crisp, mild, sub-acid flavor. Gano is one of the most popular export apples for the South American trade. Excellent keeper, standing long shipments, usually packed in barrels. A sure money-maker for the export trade.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

MACOUN. Similar quality and texture to McIntosh Red, although it ripens 2 to 3 weeks later than Cortland.

MEDINA. Delicious type, slightly larger, recommended for trial where Delicious grows too small. (1-year trees only.)

MOTHER. Medium sized red late fall, early winter export variety. One of the latest apples to bloom. Seldom killed by late spring frosts. (1-year trees only.)

NERO. An Apple which has received far too little attention from planters of Eastern orchards. Deep red, with handsome shading; medium large size, of good quality and excellent flavor; one of the longest keepers, one of the best cold storage Apples. Apples are graded and packed easily, do not show bruises and hold up well in storage. Nero is an extra heavy bearer, dependable, being a big cropper every year.

NEWFANE. Delicious type, large size, attractive red color. (1-year trees only.)

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong, erect grower, very healthy, extremely hardy and a free producer. Blossoms are produced late in the spring, thus escaping frosts. Trees are slow in coming into bearing, but the quality of the fruit largely over-balances this difficulty. Popular old commercial variety in northern states. Should not be planted south of Southern Pennsylvania. Northern Spy is one of the best varieties on which to top bud or top graft certain weaker growing varieties.

OPALESCENT. Very handsome dark crimson Apple. (1-year trees only.)

PARAGON. For description see Mammoth Black Twig.

ROME BEAUTY. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always in strong demand and brings highest prices. Keeps in good condition until May and June. With an established reputation due to real merit, Rome Beauty is a variety eastern orchardists should plant. Good, hardy, strong grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. Reliability, due to being frost-proof, strong growing, sure bearing, unusual demand, with high prices on the leading markets, especially from the chain stores, make it a favorite with the growers. Fine quality and long keeping for use and for handling make it popular with consumers and dealers. Most attractive when packed in boxes and bushels. This is the improved Cox strain of Ohio.

Buy "Bud Selected" Super-Strain Fruit Trees

Red Rome Beauty

A FAVORITE WITH THE GROWERS

This Is a Flaming Triple Solid
Scarlet-Red "Bud Sport"

RED ROME BEAUTY—Colors Red a Month Earlier than Rome
A 100 per cent Red—
Flesh exceptionally white and fine grained

**Renowned
for Bearing
at an Early
Age**

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceedingly hardy.

Superior to All Other Tested Strains of Rome

Harrisons' strain of Red Rome Beauty is the best of all Rome Beauty types and because of its improved and early high red color characteristics, will eventually replace the Rome Beauty. Already the Red Rome Beauty is a star among leading commercial varieties of winter apples. It pays to grow them.

Red Rome Beauty is easy to pack U. S. Fancy grade while most strains of Rome Beauty have just enough color to pass the requirements of U. S. No. 1 grade.

**Yes!—It's

Northwest.**

Other Good Winter Apples

RHODE ISLAND GREENING. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROXBURY RUSSET. Large, firm, moderately tender, juicy, sub-acid, good flavor. Skin almost smooth, but covered with greenish to yellowish brown russet, long keeper. Most popular russet apple; tree hardy, strong grower, and a prolific bearer. (1-year trees only.)

STARK. Long keeper and a reliable commercial sort. Fruit large, round, greenish yellow with red stripes; flesh yellow, crisp and mildly acid. Excellent baking apple, preferred by the larger baking concerns and hotels. A good variety for the commercial orchard because the tree is hardy, thrifty, healthy and very productive. Good trees to top work other sorts on.

SWEET DELICIOUS. Seedling of Delicious. Very sweet in flavor. (1-year trees only.)

TWENTY OUNCE. Very large, yellow striped with red; fine quality, good keeper.

WOLF RIVER. Very large, handsome, bright yellow, skin mottled and blushed with deep red and broad stripes of bright carmine, fair quality, long keeper and excellent for cooking. (1-year trees only.)

WINTER RAMBO. Medium size, greenish yellow color; thick skin. (2-year trees only.)

WAGENER. A large apple of beautiful bright red; fine texture, high flavor and excellent quality. Tree bears early; a reliable cropper. (1-year trees only.)

WINTER BANANA. Extra large, golden yellow, and beautifully shaded with bright crimson-red; firm, fine grained, rich, sub-acid. The name suggests the high flavor. Tree thrives nearly everywhere. Should be packed in bushels or boxes and sold soon after picking.

YELLOW BELLFLOWER. Large, yellow; good flavor.

YELLOW BELLFLOWER IMPROVED. An improved type of Yellow Bellflower. (1-yr. trees only.)

THIS NEW GLORIFIED YORK IMPERIAL

RED YORKING

TRADE MARK REG.

U. S. PLANT PATENT No. 125
 Prices of Red Yorking only 10c
 per tree higher than standard va-
 rieties. See page 18 for sizes and
 prices.

"RED YORKING"

United States Plant Patent No. 125

(FOR PRICES OF ALL APPLES, SEE PAGE 18)

WARNING! It is unlawful for anyone to propagate and sell Red Yorking, U. S. Plant Patent No. 125, Apple trees without obtaining written permission from the owners. The Government has protected the owners of the Red Yorking against infringements by the U. S. Plant Patent Laws for a period of 17 years.

York Imperial

*a favorite for Southern Pa.,
 Maryland, W. Va. & Va.*

Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer.

Other varieties may fail to set fruit and suffer from off years, but York Imperial with proper cultural methods, will bear consistently from year to year. York Imperial is a popular winter variety for cooking; also good for eating. A wonderful apple for packing in bushels for the domestic trade. The best known and most popular export apple in barrels.

Early Coloring Means 100% Perfect Extra Fancy Grade

The Red Yorking is similar in size and shape to York Imperial, but is characterized by the abundant red coloring that completely covers the fruit. A vigorous grower and an abundant producer.

**A Winner—
 because it
 comes into
 the market
 3 to 5 weeks
 ahead of its
 parent.**

An Exalted York Imperial

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrison's Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Penna., for use in planting a large orchard about twenty-eight years ago.

The Appalachian Winner **RED YORKING**

WITH TEN TESTED REASONS:

1. York Imperial has long been the commercial leader and money-maker in Virginia, West Virginia, Maryland and Southern Pennsylvania, but with the discovery of a "bud sport" strain from a Harrison-grown York Imperial planted near Shippensburg, Pennsylvania, the new "Red Yorking", U. S. Plant Patent, No. 125, will eventually replace its famous parent.
2. Leading fruit growers were astounded and now proclaim that Red Yorking is the ideal commercial apple for the Appalachian region.
3. Red Yorking, by actual comparisons, has proven to be far superior to any other so-called red strain of York Imperial.
4. Color: Every Red Yorking apple being SOLID RED is a tremendous advantage.
5. Colors very early—being able to pick and ship Red Yorking from three to five weeks earlier than York, due to its 100% solid red color before the apple is fully ripe.
6. Will bear bumper crops each year under modern up-to-date orchard management, and Red Yorking is a more prolific bearer than its parent.
7. Red Yorking can be easily packed U. S. Fancy grade from three to four weeks sooner in the fall than you can possibly pack York Imperial to meet the requirements of U. S. No. 1 grade.
8. All apples of Red Yorking will run U. S. Fancy grade and U. S. No. 1 grade as to color requirements, whereas you always have a varied percentage of York Imperial that will fail to meet even U. S. No. 1 color specifications.
9. For the export trade, Red Yorking can be sold and shipped at premium high prices long before Yorks are ready to pick.
10. For cold storage purposes, Red Yorking does not "scald," even when held until June; whereas, York Imperial must be sold during the winter to avoid "scald" and other cold storage troubles.

Can be assorted pears or other fruit trees. New Low 1939 Prices.

For home, for canning, for market, the best. A golden colored pear, with red cheek. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich, juicy. One of the finest pears that grows to eat raw.

KIEFFER — Easy to Grow RICH GOLDEN YELLOW—Tinted Red

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer is the only pear that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning pear.

A leading commercial variety. New method of storing enables Kieffer pears to have as good flavor as other varieties.

Fancy Bartlett Brings Highest Prices. Bartlett pears always sell on the market even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be carefully sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack apples.

**BARTLETT—
Aug. and Sept.**

7 Other Pear Varieties

ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer.

BARTLETT. See description at top of page.

BUERRE BOSCH (Bosc). Large size, fine quality, brings highest market prices.

CLAPP'S FAVORITE (Clapp). Very large, long, lemon-yellow with brown dots; richly flushed with russet-red on sunny side; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Thrives where other varieties fail. Tree hardy and very productive.

DUCHESSE (Duchesse d'Angouleme). Very large, dull greenish yellow, spotted russet, flesh white, rich, buttery, juicy; excellent flavor. Tree somewhat dwarf, but a most dependable bearer. Profitable commercial pear.

KIEFFER. See above description.

SECKEL. A beautiful and delicious little pear known everywhere and an old-time favorite; skin yellowish brown with deep brownish red cheek; flesh very fine grained, sweet; one of the richest and highest flavored pears grown. Tree rather dwarf, slow, stout and erect; bears prolific crops.

SHELDON. Medium size, flesh slightly coarse, melting, juicy.

WORDEN-SECKEL. Offspring of Seckel, equal in quality and productiveness; decidedly superior in size, color, and form.

HARRISON'S

SUPER-STRAIN CHERRY TREES

What fruit is more pleasing than the sweet cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

Abundance. Large, yellow, very productive, attractive. Midseason.

Bing. Very large, dark brown, almost black; flesh firm, sweet, rich and delicious.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown.

GOLDEN WAX. Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet.

Lyons. Large, black, extra early, ripens a week ahead of Black Tartarian.

NAPOLEON (Royal Ann). Large, pale yellow with bright red cheek, sweet, excellent flavor, prolific bearer. Famous canning variety of the Pacific Coast.

Schmidt (Schmidt's Biggareau). Large, sweet, deep black, tender, fine flavor.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

Can be assorted cherries or other fruit trees

Yellow Spanish or Ox-Heart

A popular variety within reach of every rural housewife—in orchard or garden, along roadside or lane. A stately tree with abundant annual yield of big 1-inch cherries. Coloring a rich yellow and orange-red. Renowned for being a heavy bearer.

Harrison-Grown Cherry Trees

Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy grown, whole root seedlings; which, in our most favorable soil, form a large, fibrous, well proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

SOUR CHERRIES *They Never Miss a Crop*

Montmorency

The most popular sour cherry grown in America. It ripens midseason, is large, red, slightly acid, flesh very tender, good quality. The best shipper of all sour cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.

Montmorency trees are strong, disease-resistant, very hardy, generally starting to bear fruit in two years.

The superior strain which Harrison's grow is a bud-selected strain from Montmorency (Ordinaire). There are several different types and strains of Montmorency, which is often confusing to the public. We have experimented over a long period of years and have selected the best type and strain. You can depend on our superior strain of Montmorency, which is a real money-maker for the commercial orchardist.

4 Selected Trees — 1 to 2 feet

FOR
ONLY \$1.00

Other Sour Cherry Trees

Dyehouse. Very early summer, ripening ten days prior to Early Richmond; medium size, sour, good quality, heavy bearer.

EARLY RICHMOND. Early summer. Very sour, medium size, bright red, valuable and popular cherries, unsurpassed for cooking purposes. A good old variety which yields such marvelously heavy crops. Tree is the most hardy of all cherries, being uninjured by the coldest winters; slender in growth and very productive.

ENGLISH MORELLO. Midseason. Fruit sour, large, elongated, almost blackish red when fully ripe; very rich, acid, juicy and good.

May Duke. Very early, sour, large, red, juicy, rich, its acidity pleasantly tempered to the advantage of sensitive teeth, superior quality, very productive.

Olivet. Large, deep red, glossy cherry with rich vinous sub-acid flavor. Morello type. Midseason.

Richmorency. A Montmorency type that ripens a week or more earlier than Montmorency. Produces heavy crops and the size of the fruit is large.

Royal Duke. Sour, dark red, fair quality. Early.

ITALIAN PRUNE

ITALIAN PRUNE

(Fellenberg)

Late. The best of all the older prune-type plums. Medium size, purplish black, flesh greenish yellow, changing to yellow; juicy, firm, subacid, slightly aromatic; stone free. Tree rather vigorous, hardy, productive. Good for drying, and when allowed to become fully ripened, excellent for eating. Ships well. Italian Prune is the leading commercial variety. We have the genuine strain.

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

Albion. Late, large, beautiful dark purplish blue. Quality extra good. Tree vigorous and productive. 10c per tree extra.

American Mirabelle. Small sweet, yellow, Damson type. The flavor is delightfully good and it is easy to grow. 10c per tree extra.

BLUE DAMSON. Late, very similar to Shropshire Damson. A favorite variety in many sections. We consider Shropshire Damson better.

BRADSHAW. Midseason, large, light purplish red changing to dark reddish purple at maturity, covered with thick bloom. Flesh dull yellow with a trace of red, juicy, somewhat tender, sweet, pleasant, good. Hardy, a popular variety.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

German Prune. Late, purplish black, thick bloom. Flesh yellowish green, sweet. Good for canning and drying.

Gueii. Midseason, large, color dark purplish black, flesh greenish yellow, fair in quality. Very productive.

Hall. Late, extra large, blue. The flavor is excellent and its handsome appearance sells it. Hardy and productive. One of the newer varieties that has met with big demand. 10c per tree extra.

Imperial Epineuse. Late, purplish red, flesh greenish yellow, rather tender, sweet, agreeable in flavor, especially recommended for home gardens.

IMPERIAL GAGE. Midseason, greenish yellow, faintly tinged with red on the sunny side. Flesh. golden yellow, juicy, sweet, mild, very productive.

Jefferson. Midseason, large size, color golden yellow with faint pink blush. Thin skin, flesh deep yellow, juicy. One of the best of all the dessert plums grown. Shy bearer.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market plum.

SANTA ROSA. Large, round, dark purple, flesh reddish near the skin. Good quality. Keeps and ships well. Originated by Luther Burbank.

SHROPSHIRE DAMSON. Late, medium size, purplish black, overspread with thick bloom. Thin skin, tender flesh, golden yellow, juicy, agreeably tart in full maturity, sprightly, pleasant, enormously productive. Very easy to grow. One of the best of its kind for culinary purposes, and when fully ripe and after light frost makes a highly desirable dessert plum. The popular old-fashioned Damson variety.

SUPERIOR. Large size, red, firm flesh, delicious quality. Extra hardy.

UNDERWOOD. Very large, beautiful red color, delicious quality. The best of many plums originated at Minnesota Fruit Farm. Bears annually.

WICKSON. Early, midseason, extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

WILD GOOSE. Very early, medium size, color bright red, flesh yellowish, sprightly, fair to good in quality.

YELLOW EGG. Late, large, golden yellow, of average sweetness, mild. One of the largest and handsomest of the yellow plums. Good for cooking.

Apricots — Nectarines

Extra Good Fruits for the Home Orchard

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange with red blush; very juicy and sweet flavor. A large prolific bearer that will withstand adverse weather conditions. This variety deserves greater popularity.

BLLENHEIM. Large, attractive, excellent quality.

EARLY GOLDEN. Small, pale orange, juicy and sweet. It is a hardy, prolific bearer; ripens first of July.

NEWCASTLE EARLY. Early, medium size, good color, fair in quality.

SUPERB. Medium size, light salmon-colored fruit; hardy.

TILTON. Very large, highly colored.

WENATCHEE MOORPARK. An improved strain of Moorpark.

GROW YOUR OWN FRUIT It's Easy with Harrison's Hi-Quality

NECTARINES *Delicious for Eating*

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

BOSTON. Bright yellow, red cheek, flesh yellow.

GOLD MINE. White flesh, large, attractive, freestone.

GOWER. Large, white flesh, freestone, good flavor.

HUNTER. Large, round, yellow, freestone.

JOHN RIVERS. Early, medium size, red, semi-cling.

QUETTA. One of the newer nectarines that is being tested for commercial possibilities in the East. Fruit large, greenish-white, splashed with red, white flesh, cling. 10c per tree extra.

STANWICK. Very large, attractive, white, freestone, good flavor.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

What a Strain! THAT SUPER CONCORD GRAPE

*Harrisons' Magnificent
Super-Strain*

CONCORD

Black, midseason. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

**Harrisons' Are
Large Growers of
Grape Vines**

We have about 250,000 thrifty, well rooted one- and two-year vines to offer this season. For large quantities, write us.

Here's the Answer to Your Grape Problem?

1939 brings to Harrison's customers one of the finest crops of fruit trees and grapevines we have ever had. Climatic conditions this year were exceptional, resulting in root growths for which every planter will gladly pay premium prices.

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

Growing Grapes Profitably

The increasing demand for grape juice and other extracts makes this a big money crop for the farmers. Get your vineyard started now and be ready for the increased demand for grapes. For commercial vineyard Concord is by far the best.

BLACK GRAPES — True-to-name

CONCORD. World's best grape. Description, see page 36.

CLINTON. Black. Late. A rank grower, hardy; bunch and berry small to medium size, slightly juicy and spicy. Ripens two to three weeks after Concord.

FREDONIA. Black. Very early. Originated by New York Experimental Station. The bunch and berry are large with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

IVES. Black. Midseason. Quality good when fully ripe. Produces a successful market grape.

MOORE'S EARLY. Black. Early. Bunch and berry very large. Equal to Concord in quality, health and hardiness, but ripens about ten days earlier. It is a fair grower, valuable for garden and vineyard.

WORDEN. Black. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

RED GRAPES — True-to-name

AGAWAM. Red. Midseason. Large, thick skin, aromatic flavor. Vines strong; rank grower. Hardy and productive. Ripens with Concord.

BRIGHTON. Dark red. Early, bunch large, berry medium size. Skin thin. Flesh tender. Sweet and best quality. Vine vigorous and fairly productive.

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early midseason. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich soil, good culture and close pruning.

LUCILE. Red. Early. Very large bunches, large fruit. Vine is vigorous grower, hardy, and enormous bearer. Quality very good.

SALEM. Dark red. Midseason. Bunch and berry large. Flesh sweet, tender, with rich vinous flavor. Good keeper, vigorous and productive.

WHITE GRAPES—True-to-name

DIAMOND. White. Early midseason. Bunch and berry large. Quality fine. Strong grower, healthy, hardy, productive.

ELVIRA. White. Late. Bunch and berry medium size. A good wine grape in the South.

NIAGARA. White. Midseason. Best of the standard light colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North as well as the South.

PORTLAND.

White. Very early, new variety. Berries large. Quality excellent. Hardy, productive.

The Giant Red Raspberry

LATHAM

WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and everyone who has given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

12 Selected Latham Raspberry plants for only 75c

Biggest Money-Making Raspberry in America

Harrisons "Selected Strain" Raspberry Plants—Triple Inspected, Disease Free—preferred by growers in every state in the union.

LATHAM

CUMBERLAND

Midseason to late. This is the most popular Blackcap at the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

The most popular Black Raspberry

Other Black Raspberries

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

PLUM FARMER. Very popular with many growers on account of its earliness of ripening. Plum Farmer has the ability to mature its customary big yield in a very short time, generally 15 to 20 days. The plants are healthy, canes strong growing. Ripens a week earlier than Cumberland.

Other Red Raspberries

CHIEF. A new Red Raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large, excellent quality berries that will withstand shipments to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

NEWBURGH. The new Red Raspberry which is gaining popularity rapidly. Bright red, excellent shipper, high quality. Earlier than Cuthbert. A new commercial leader.

CUMBERLAND

New the Sensational Boysenberry

The New Mammoth Berry that Will Revolutionize the Berry-Growing Industry
BOYSENBERRY, 2 inches in length

The new Boysenberry is truly a glorified Youngberry. We offer it this year for the first time because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own. The few seeds are scarcely noticeable. Plant 6 feet apart in rows 6 feet across. You will be surprised at the berries you can get from a dozen plants.

SPECIAL LOW PRICES OF THE NEW BOYSENBERRY

No. 1 Grade — Selected Plants

10c each; 10 for 90c; 25 for \$2.00; 50 for \$3.50; 100 for \$6.50; 250 for \$13.75; 500 for \$25.00; 1000 for \$40.00.

Eldorado Blackberry

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among blackberries. Every good quality possessed by other blackberries is emphasized in Eldorado. Its berries are of enormous size, shiny jet black, sweet pleasing flavor.

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days, and can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

Other Blackberries

ALFRED. A comparatively new blackberry that has given good results wherever planted. Immense sized berries practically coreless, heavy producers and very hardy. Worthy new commercial variety, ripens over a long period of time.

EARLY HARVEST. Black, very early, excellent quality, good size, ripens 10 days to two weeks before any other. Favorite commercial berry in middle Atlantic states.

MERSEREAU. Brilliant black, late, very large berries, extra good quality. Heavy producer, extra strong grower.

The Mammoth Dewberry

LUCRETIA

Long, mammoth blackberries, recognized as the leading variety. Incomparably better in every way than any blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

HARRISONS' BIG YIELD STRAWBERRY PLANTS

Dependable - Hardy - True-to-Name

55 Years of Progress

Harrisons' are known far and wide for high grade nursery stock. During our 55 years of business dealings, we have established a record of dependability and customer confidence of which we are duly proud.

In this, our 1939 strawberry selections, we are giving you a preferred list of the leaders which have proven most satisfactory for the commercial and home grower in this country.

Yes! A Living in Strawberries

Today there are big opportunities for making money in growing strawberries. Some of our customers, with little effort, make a nice living from one or two acres planted in our Selected Strain berries—it's the way to financial independence for a lot of folks.

Honestly, Bob—

Even if it costs a few cents more, it's a good idea—to place all our nursery business with Harrisons'. We are gambling in the right direction, because they not only operate 3500 acres of nursery but 1750 acres of commercial orchards. It's our best bet for reliable stock.

It's a Fact

All Strawberry Plants
Freshly Dug at the
Time Your Shipment
Is Made.

Long, Fibrous Roots

With proper soil conditions in the development of a long, fibrous, heavy root system, our customers may be assured of the kind of plants that will be readily established in a new location. It's the Harrisons' Super-Selected strains that bring you bumper crops.

Harrisons' 12 Best Selected Strawberries

Recommended as Best Profit Varieties
Commercial growers know the value of Harrisons' selected strain strawberry plants. They know that the best results come from selected strains of proven parentage. For 1939 we recommend such outstanding varieties as—

PREMIER
CATSKILL
CHESAPEAKE
DORSETT
FAIRFAX
BLAKEMORE

BIG JOE
AROMA
GEM
MASTODON
SENATOR DUNLAP
MISSIONARY

NEW LOW PRICES

Harrisons' selected strain strawberry plants are grown on our own farms under the constant supervision of the Harrison Brothers. By producing strawberry plants in immense quantities we have been able to lower our prices this season. Whether you are interested in 100 plants or 100,000 plants, our well-trained organization can take care of your requirements.

Triple Inspected — By U. S. Government and State of Maryland inspectors; also by Harrisons' expert strawberry plantsmen.

All strawberry plants are guaranteed to be free from all diseases and insects.

**Northern Growers Recognize the Hardiness and Superiority of
Harrisons' Selected Strains of Strawberry Plants**

PREMIER *Early*

(HOWARD - 17)

The First Berries on the Market

If you plant Harrison's' Premier, you can depend on having the first berries in market, and the first cash returns on the new strawberry crop.

In Premier you get a wonderful early variety with excellent features. It is immensely productive, and unlike other early ripening strawberries, the fruit produced by Premier is of the finest quality, color, texture and flavor. The berry is well proportioned, of uniform size and shape, making it supreme for eating, canning, and preserving.

Nation-Wide Popularity

Although Premier is extremely popular in large berry-growing areas of Michigan, thousands of large shipments are made by other berry-growing associations and individual growers throughout the United States.

Because of the Wonderful Premier Characteristics

1. Color—a showy red.
2. Extra firm, long distance shipper.
3. Healthy foliage. Grows successfully anywhere.
4. Resists drought and frost.
5. Attractive size.
6. Holds records for bumper crops.
7. Ripens early.

DORSETT—
The new cham-
pion of Straw-
berry producing
sections.

The Premium Priced STRAWBERRY

Despite drought, excessive rain, cold or heat, DORSETT comes through year after year with large crops of fancy berries.

A product of the master plant breeders of the U. S. Dept. of Agriculture. The commercial growers are receiving it with great satisfaction, because of its unusual, strong selling appeal.

Get the Harrisons' Super Selected Strains of this most famous variety; make more money than you have ever made before. DORSETT is making profits as high as \$1,100 per acre, and made those profits even in years when prices were low.

The berries are very large, all finely shaped, and cover a long extra early to late fruiting time.

Best for Heavy Yields **HARRISONS' Selected**

Another New Strawberry Introduction That Is a Companion of DORSETT

As a double guarantee for bumper crops, many growers plant both sorts extensively. They are both topnotchers on the market, and little difficulty is experienced in selling the "load."

Fairfax is the famous team-mate of Dorsett, and is as good a variety in every respect but slightly later. Unlike many other berries, Fairfax does equally well in all parts of the country, and for this reason it is a general utility variety, which is early, frost-proof, uniform in size and shape, deep red clear to the center, firm and a bisexual that does not require mating.

BLAKEMORE

Favorite Early

The U. S. Dept. of
Agriculture
Recommends It

The Blake-
more berries
are slightly
blunted, with
broad shoul-
ders and slim neck.

The color a
bright glossy red, with a tough skin,
firm flesh, and a mild flavor, which
make a wonderful market and ship-
ping berry. Plants make runners
freely and you are sure of getting a
good fruiting row. They should be
set about 24 inches apart. Other-
wise, if close, they will get too thick.

Yes—it's one week earlier than
the popular Premier.

Clermont

A cross between Premier
and Marshall, being intro-
duced by the New York Ex-
perimental Station. It is
recommended for New Eng-
land, and for New York,
Pennsylvania, Ohio, Indiana,
Illinois and Michigan. It
bears a heavy crop of large,
smooth, bright, glossy red
berries with an attractive
green calyx. The plants are
strong, vigorous growers pro-
ducing a large fruiting bed.

SENATOR DUNLAP Mid-Season

Sometimes Called Dr. Burrill

Senator Dunlap is an old standard variety that is depend-
able. It has made more crates and more dollars for berry
growers than any other one variety. It's the toughest vari-
ety known. Plants are healthy, fast growers and make
new plants freely. Berries very dark red, wonderful for
canning, excellent for preserves. Require little attention,
and by all means include it in your list of preferred varieties.

— For Prices of Plants, see page 47 —

3 Winners In Southern States

Southland

Very early. Adaptable to the
southern states, it excels as a local
market berry. Bright red with a
glossy surface, flavor sweet, excel-
lent for shortcakes and preserves.

A promising new variety. Give it
a trial.

Missionary

Some folks say this is the best
southern berry. It reigns supreme
in Florida and is extensively grown
in Georgia, North Carolina, South
Carolina, Louisiana and Texas. The
berries are well colored, firm, large,
holding their size throughout the
season.

Bellmar

A cross between Missionary and
Premier. Plant makes a vigorous
growth and under good conditions
is very productive. The berries are
about the same size as Premier, but
are somewhat darker in color. They
are slightly firmer and of better
quality.

SOCIETY**

The Fine Qualities of Premier
and Marshall are United to
Bring You this Prize Winner.

Acclaimed by Strawberry experts the country over, as one of the three outstanding new varieties which include Dorsett and Fairfax. The commercial grower can make no better selection than this powerful trio of heavy producers, combining quality, beauty and sales appeal.

3 Good Midseason Varieties

ABERDEEN Grown extensively in Pennsylvania, New Jersey, Ohio, Illinois, Indiana, West Virginia, New York, and the New England States. Very productive; unusually free from disease. Light in color, somewhat acid, above average in size. Excellent shipper.

BIG JOE It is a worthy companion for Dorsett, Fairfax and Premier, the best early berries, and Chesapeake, the best late. When grown for local or nearby markets, Big Joe is one of the best money-makers. Commands top market prices.

Large Yield—Fancy Fruit

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring.

CULVER A long midseason variety. Attractive dark red berries, firm, fine for preserving. Plants are healthy and vigorous and produce quite heavily.

Harrisons' selected strains give you only the best in recognized Hi-Quality Strawberry plants.

GIBSON (Parsons' Beauty). Very productive. Berry very good in quality and excellent for canning. An old favorite in many strawberry-growing sections.

PATHFINDER Originated at the New Jersey Experimental Station and formerly known as New Jersey No. 35. It makes vigorous, healthy growth and sets tremendous crops of berries, ripening a few days after Premier. The berries are medium in size, uniformly smooth and regular in shape, but rather dark in color. One of the newer varieties that we recommend for trial plantings.

Surplus Strawberry Plants

A Real Buy for Those Who Enjoy Strawberries
and Are Not Particular as to Variety

Each day we dig thousands of plants to fill our orders, sometimes we dig too many plants of certain varieties, and rather than hold them over to fill our future orders, we are offering these to our customers at reduced prices. Each and every one of these surplus plants are freshly dug and sure to please. On account of the extraordinary low prices we are offering these plants, we cannot give you any particular variety, but each variety shipped will be labeled as to name.

(Not less than 1,000 Surplus Plants sold)

Harrisons' — Famous for Quality and Service

CHESAPEAKE

An Excellent Late Berry
Commercially Dependable
BERLIN GROWN - AMERICA'S FINEST

The Favorite Late Berry

All growers seem to make money on this variety, especially when grown under conditions suitable for it. Chesapeake grows to perfection on most any highly manured soil.

Very Large Berries of Supreme Quality

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable commercial berry but equally adapted for home planting.

CHESAPEAKE

Dominates
the late
market

Late Bearing Strawberries

Dependable and Popular—True to Name

AROMA. Clean, healthy, hardy growing plants; does well on most soils. Fruit large, deep red, excellent quality for home use or market.

GANDY. The favorite late berry in many localities. Large size and handsome appearance make it command highest prices on the market. Not quite as productive as some of the other berries, but its appearance and quality offset this. Good for either home use or commercial planting.

WM. BELT. An extra good quality late berry for home use or market. Its flavor is extraordinarily good, the berries are medium to large size, ideal for home use.

BIG LATE. One of the most attractive berries of very high quality. Plant makes a vigorous growth and sets a large number of berries. Blooms are imperfect and should be planted with Big Joe, Catskill or other varieties of same season for pollination.

LUPTON'S — A Table Delight. The heaviest sales are made in Pennsylvania, New York, Michigan, West Virginia, and Ohio. A favorite for years, because of its large size and attractive "double red" color. They demand top prices because of their appetizing appeal.

NEW YORK — A Real Home Garden Berry. It is one of the few strawberries we know of that gets sweet before it gets red. The plant is a vigorous grower, producing a moderate number of large, healthy plants. Every gardener should plant this worthwhile berry.

SAMPLE. Like old "Faithful" this variety has been with us for a long time and it is still one of the most popular varieties in the middle and northern states. Plants are vigorous growers and very productive. Berries are uniform in shape, medium to large in size, and very attractive.

Harrisons' MASTODON

Fresh Berries from July till Frost

A Triple Yield

1. Plant this spring, 1939.
2. Pick 1st crop, July to frost, 1939.
3. Pick 2nd crop, June, 1940.
4. Pick 3rd crop, August to frost, 1940.

3 REAL CROPS — 3 BIG PROFITS

Bears in 90 days, and, too, it's the best Family Garden Strawberry

Set Strawberry Plants in Spring

Early spring is the best time, being the logical and natural season, for the most successful transplanting of strawberry plants. Set your strawberry plants during the spring 1939 and you will pick a big crop of luscious strawberries in the spring or early summer of 1940. Plow your ground now and have it ready so that you can make your planting any time at your convenience during the spring, but preferably plant during early spring for best results, or, in other words, as soon after the frost is out of your ground, and the land is in proper condition for planting. There is nothing to be gained in strawberry culture by fall planting and you will be much more successful with spring planting of any variety.

We can dig and ship strawberry plants any time between November 1st and May 15th. For Southern customers we can ship any time during the winter.

ATTENTION!

COMMERCIAL GROWERS

Strawberry plants are a specialty with us and if you are interested in large quantities, please write us for special prices.

ASPARAGUS ROOTS

100 Mary Washington Roots \$1.50
Selected Two-year plants only

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stocks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous Mary Washington — True To Name Plant This Pedigreed Strain

There is no variety of Asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Mary Washington Asparagus in the Nursery Rows

Write for prices on larger quantities. We maintain a separate department for handling asparagus roots and are in a position to give prompt service on large orders.

IT'S EASY TO CUT YOUR FAMILY'S
FOOD COST — PLANT ASPARAGUS.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower which means many cuttings.

How to Grow Asparagus

Asparagus is easy to grow and should be in every garden because it thrives everywhere. Spring is the best time to plant as soon as the soil can be worked into good condition. Dig or plow a trench ten inches deep, place the plants in this trench and spread the roots, then cover with two inches of soil, when the new growth comes through fill in two more inches and continue until trench is full. For garden culture Asparagus may be planted eighteen inches apart each way, but for field culture plant two feet apart in the row with the rows four feet apart. Cultivate and hoe frequently.

Commercial Planters Prefer 1-Year Roots

The majority of commercial growers of asparagus prefer 1-year roots, they cost less and are much easier to plant. By liberal application of fertilizer and manure heavy yields of asparagus can be had after one or two years.

Plant Harrisons' Pedigreed Roots

We have made a specialty of growing asparagus roots for over 40 years and have supplied plants for some of the finest asparagus beds in the country. The growing, handling, and shipping of millions of asparagus roots has taught us many things and today we are in position to supply you with quality roots at low cost. All our crowns were grown direct from the original strain of seed.

We Recommend Two-Year Roots for Home Gardens

Experience has taught us that 2-year roots give better results for garden planting than 1-year roots. The 2-year roots are much larger and have more food stored up which causes them to make more growth and yield larger crops of asparagus sooner than the 1-year roots.

Plant Asparagus for Big Quick Cash Profits

Within the past few years the popularity of canned and fresh asparagus has increased enormously. In fact, at the present time there is not enough asparagus acreage in order to take care of the huge demand. Asparagus growing pays large profits and to those growers who are located near the markets or canning houses we unhesitatingly recommend planting this money crop.

Plant several acres to asparagus. Big profits—home markets, city markets, and canning houses.

Nursery Stock a Good Investment. Is there any other thing about your home that grows in value, interest and beauty each succeeding year like trees and plants? Most other things are wearing out with use and age and constantly depreciating in value. That is why we say our nursery stock is a permanent and cumulative investment. What is that shade tree that cost you two or three dollars a few years ago now worth to your place? If you are contemplating a planting, not for years have you had such an unusual opportunity to secure plants of Harrison's quality at such low prices.

Quality Stock at Lowest Prices. With one of the finest growing seasons and prices lower than in years, landscape architects and garden lovers are taking advantage by purchasing their planting material now.

As in all-buying, it pays to know what you are getting in buying nursery stock—you can't afford to take chances. When you buy from Harrison's Nurseries you know that a strong established organization with over fifty successful years of experience is behind every transaction. Harrison's stand back of the quality of every plant they send out.

Azalea Hinodegiri

DEEP CORAL-PINK FLOWERS

Plant Azalea Hinodegiri this spring and a few weeks after planting it will be a blaze of color. No other hardy evergreen plant can compare with the color produced by this remarkable variety.

DEEP CORAL BLOSSOMS — HOLLY-LIKE EVERGREEN FOLIAGE

Everyone is highly enthusiastic about its color, in comparison with other Azalea varieties it is far superior. In addition to its superb bloom, it also has evergreen foliage which makes it so attractive when it is out of bloom.

A DWARF GROWER — GOOD FOR SHRUB PLANTING

Azalea Hinodegiri is a dwarf grower and is ideally suited for planting around the foundation of homes or adding color in front of evergreens. As each season goes by, the plant gets larger and larger. More than one thousand flowers have been counted on a single plant.

AZALEA AMOENA. A dense, dwarf-growing shrub with slender branches and semi-double flowers of a bright, rosy purple color. Blooms in early spring and retains its foliage all year.

AZALEA MACRANTHA. Large, single salmon-red flowers. Blooms very late in the season. A very compact, flat, quick-grower with dark green, glossy leaves.

Azaleas Can Be Satisfactorily Grown in Shady Locations

The Famous Colonial Boxwood of the South

DWARF English Boxwood

(*Buxus Sempervirens Suffruticosa*)

A widely known and popular form of dwarf Boxwood. It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings, can be trimmed in various forms.

Easy to Grow

Dwarf English Boxwood is easy to grow, will thrive in most every type of soil. After this plant once becomes established it does not require any particular attention. It is practically immune from all diseases and insects. Can be planted in the full sunlight and semi-shady locations.

Large Specimen Plants Sell at High Prices

Dwarf English Boxwood has been called the "Century" plant due to its ability to live over a hundred years. A few years ago large plants sold for fabulous prices, many selling for hundreds of dollars.

DWARF ENGLISH BOXWOOD

BOXWOOD *steps out ahead*

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS'

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

LOVELY

BROADLEAF EVERGREENS

*the foliage stays
green all winter*

BUSH ARBUTUS—*Abelia Grandiflora*

BUSH ARBUTUS (*Abelia grandiflora*). One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are born in clusters. Good for shady locations.

6 to 9 inches—30c each; 2 for 50c; 10 for \$2.00.
9 to 12 inches—40c each; 2 for 70c; 10 for \$3.00.
1 to 1½ feet—50c each; 2 for 90c; 10 for \$4.00.
1½ to 2 feet—75c each; 2 for \$1.40; 10 for \$6.50.

HOLLY-LEAVED MAHONIA (*Mahonia aquifolium*).

Bright glossy green, holly-like leaves, turning rich red and bronze in autumn. Clustered racemes of attractive yellow flowers in spring.

18 to 24 inches—\$1.25 each; 2 for \$2.20.
2 to 3 feet—\$1.75 each; 2 for \$3.00.

LIGUSTRUM LUCIDUM. Large, thick, shiny dark green leaves; white flowers, black berries in winter. Will thrive in shady locations.

18 to 24 inches—\$1.25 each; 2 for \$2.20.
2 to 3 feet—\$1.50 each; 2 for \$2.70.
3 to 4 feet—\$2.00 each; 2 for \$3.70.

BERBERIS JULIANAE. A beautiful and rare evergreen variety. It stays perfectly green during the winter

and blends well with other evergreens and broad-leaved evergreens.
9 to 12 inches—40c each; 2 for 70c. 1 to 1½ feet—75c each; 2 for \$1.30.
1½ to 2 feet—\$1.25 each; 2 for \$2.20.

MOUNTAIN LAUREL (*Kalmia latifolia*). Most effective in June, when the clusters of pink flowers open. Good foliage, likes shady locations.

2 to 3 feet—\$1.50 each.

LEATHERLEAF VIBURNUM (*Viburnum rhytidophyllum*). Large oblong, crinkled, deep green leaves. Flowers yellowish white, berries deep red.

9 to 12 inches—50c each; 2 for 90c.
12 to 15 inches—70c each; 2 for \$1.20.
15 to 18 inches—\$1.00 each; 2 for \$1.80.
18 to 24 inches—\$1.50 each; 2 for \$2.70.
2 to 3 feet—\$2.00 each; 2 for \$3.50.

CHERRY LAUREL (*Laurocerasus*). A broad-leaved evergreen with dark green glossy foliage, compact and symmetrical in form. Very desirable.

12 to 15 inches—70c each; 2 for \$1.20.
15 to 18 inches—\$1.00 each; 2 for \$1.80.
18 to 24 inches—\$1.50 each.
2 to 3 feet—\$2.00 each.

GREEN EUONYMUS (*Euonymus japonica*). Green glossy evergreen foliage, upright grower. Thrives under adverse soil conditions. Ideal for planting at seashores.

9 to 12 inches—30c each; 2 for 50c.
12 to 18 inches—50c each; 2 for 90c.
18 to 24 inches—75c each; 2 for \$1.30.

HARDY CHERRY LAUREL. An improved form of cherry laurel, much hardier, slightly dwarfer grower.

12 to 15 inches—70c each; 2 for \$1.20.
15 to 18 inches—\$1.00 each.
18 to 24 inches—\$1.50 each.

JAPANESE HOLLY

Real Holly Trees *that breathe of Christmas*

AMERICAN HOLLY (*Ilex opaca*). The Christmas Holly. Its bright green, spiny leaves and brilliant red berries make it one of our hand-somest plants.

15 to 18 inches—\$1.25 each; 2 for \$2.20.
18 to 24 inches—\$1.75 each; 2 for \$3.20.

JAPANESE HOLLY (*Ilex crenata*). A much branched evergreen shrub with oval crenate leaves. Clusters of black berries form during the fall. Makes a splendid specimen plant. We offer two types, small or large leaf.

9 to 12 inches—40c each; 2 for 70c.
12 to 15 inches—70c each; 2 for \$1.20.
15 to 18 inches—\$1.00 each; 2 for \$1.80.
18 to 24 inches—\$1.50 each; 2 for \$2.70.

3 to 4 feet	.50	.90
4 to 5 feet	.60	1.00

BECHTEL'S FLOWERING CRAB

APPLE. Only genuine double-flowered Crab. When in bloom, appears to be covered with delicate pink, perfectly double small roses of delicious fragrance. Best flowering crab apple.

18 to 24 inches—	50c each; 2, 90c.
2 to 3 feet—	60c each; 2, \$1.00.
3 to 4 feet—	75c each; 2, \$1.25.

JAPANESE FLOWERING CHERRY.

Double white. A handsome variety that flowers profusely in the spring.

2 to 3 feet—	65c each; 2 for \$1.10.
3 to 4 feet—	80c each; 2 for \$1.40.
4 to 5 feet—	\$1.00 each; 2 for \$1.80.

Dwarf Flowering Varieties for limited spaces; they take up little ground area

RED FLOWERING DOGWOOD

(*Cornus florida rubra*). One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen.

18 to 24 inches —	\$1.00 each; 2 for \$1.80.
2 to 3 feet—	\$1.50 each; 2 for \$2.70.

WHITE FLOWERING DOGWOOD (*Cornus florida*).

One of the native spring flowering small trees, with white flowers and bright red berries in fall.

3 to 4 feet—	80c each; 2 for \$1.40; 10, \$6.00.
4 to 5 feet—	\$1.00 each; 2 for \$1.80; 10, \$8.00.
5 to 6 feet—	\$1.50 each; 2, \$2.70; 10, \$12.00.

WEeping Flowering Peach. A beautiful red flowering peach that has a decided weeping effect. This peach has bloom and weeping characteristics somewhat similar to Japanese Weeping Cherry.

2 to 3 feet—	65c each; 3 to 4 feet, 85c each; 4 to 5 feet, \$1.00.
--------------	---

LILACS

BELLE DE NANCY. Satiny rose-colored flowers in large clusters.

COMMON PURPLE LILAC. Old-fashioned variety so familiar in old gardens.

HUGO KOSTER. Purple flowers; best one of all purple lilacs.

LUDWIG SPAETH. Single, very rich dark purplish red.

MADAME ABEL CHATENAY. Double white.

MICHEL BUCHNER. Dwarf, double, beautiful trusses of pale lilac color.

MARLEYENSIS. Red.

PERSIAN PURPLE LILAC (*Syringa persica*). A tall-growing shrub with slender branches; bloom in May and June.

PRESIDENT GREY. Double, bright blue.

ROTHOMAGENSIS. Dark red flowers in large panicles.

RUBRA DE MARLEY. Single flowers of light red.

VILLOSA. Fragrant purplish white blooms.

1 to 1½ ft., 40c each; 2 for 70c; 10 for \$3.00.

FLOWERING PEACH

DOGWOOD BLOSSOMS

Hardy Vines

Nature's
Draperies

CHINESE WISTERIA. A rampant growing, clinging vine. Blue flowers in large drooping clusters during May and June. 2-yr., 40c each; 2 for 70c; 10 for \$3.00.

ENGLISH IVY (*Hedera helix*). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. 2-yr., 25c each; 2 for 40c; 10 for \$1.80; 50 or more, 15c each.

HALL'S JAPANESE HONEYSUCKLE. Dark, glossy green foliage; fragrant flowers from July to fall. 2-yr., 25c each; 2 for 40c; 10 for \$1.80.

YELLOW JASMINE (*Jasmine nudiflorum*). A shrub-type vine, deep golden yellow flowers in early spring. 2-yr. plants 25c each; 2 for 40c; 10 for \$1.80; 50 or more at 15c each.

SWEET AUTUMN CLEMATIS (*Clematis paniculata*). A splendid climber for covering porches and trellises. Flowers snowy white; produced in immense quantities during late summer and autumn. 2-yr., 40c each; 2 for 70c; 10 for \$3.00.

BOSTON or JAPANESE IVY (*Ampelopsis veitchii*). A popular climber, clinging firmly to brick, stone or other material; deep, glossy, green, ivy-shaped foliage which turns to cream and gold color in autumn. 2-yr., 30c each; 2 for 50c; 10 for \$2.30.

JAPANESE SPURGE (*Pachysandra terminalis*). An evergreen ground cover. Will grow in dense shade; suitable for planting beneath trees where grass will not grow. 2-yr. plants 25c each; 2 for 40c; 10 for \$1.80; 50 or more at 15c each.

BECHTEL'S CRAB APPLE
Very hardy and colorful

These Plants Add Color and Variety to Your Planting

Decorative EVERGREENS

BUY DIRECT FROM THE GROWERS — Our splendid trees embellish the grounds of beautiful homes the country over

AMERICAN ARBOR-VITAE (*Thuja occidentalis*). Probably no evergreen is more admired than the American Arbor-vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic shape. These features make it indispensable in the home foundation groups and in lawn and garden plantings. This evergreen is easy to transplant and grows under adverse weather conditions.

CHINESE ARBOR-VITAE (*Thuja orientalis*). An attractive, upright evergreen, rapid grower with bright green foliage. When young it is compact and rather pyramidal in form. As it becomes older it assumes the habit of a rather loose-growing Red Cedar. Very useful for screening purposes because of its rapid growth.

PRICES of AMERICAN ARBOR-VITAE and CHINESE ARBOR-VITAE

	Each	2 for	10 for
18 to 24 inches	\$0.90	\$1.60	\$7.00

5 to 6 feet	3.50	6.50	30.00

PYRAMIDAL ARBOR-VITAE (*Thuja occidentalis pyramidalis*). A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a home makes a superb showing. Our Pyramidal Arbor-vitae are grown with extreme care and each one is a specimen.

Junipers That Excel

PFITZER'S JUNIPER (*Juniperus chinensis pfitzeriana*).

The most popular of all spreading Evergreens. Its peculiarly graceful, distinctive manner, plus an unusually hardy nature, makes it particularly fascinating and desirable for foundation planting.

SAVIN JUNIPER (*Juniperus sabina*). Handsome, dark green foliage, spreading branches forming irregular vase-shaped bush. One of the most attractive spreading Evergreens grown. The ideal plant to use for low foundation plantings. Can be kept trimmed to any desired height.

ANDORRA JUNIPER (*Juniperus communis depressa plumosa*). A low-spreading Juniper of an unusually good color. During spring and summer it is a bright green, turning to a rich purple-bronze color in fall and winter. Unusually good for planting along slopes and places where grass will not grow.

PFITZER'S JUNIPER

Prices of Pfitzer's, Savin, and Andorra Junipers:

	Each	2 for	10 for
12 to 15 inches	\$0.90	\$1.60	\$ 7.50

Evergreens Famous for Quality, Vigor, and Beauty

RETINOSPORAS

PREFERRED BY LANDSCAPE GARDENERS

Dainty and Feathery—So Picturesque in the Foundation or Rockery

JAPANESE PLUME-LIKE RETINOSPORA (*Retinospora plumosa*).

A handsome Evergreen from Japan, with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

JAPANESE GOLDEN PLUME-LIKE RETINOSPORA (*Retinospora plumosa aurea*).

Golden yellow color throughout the summer, compact habit of growth, similar to the Japanese Plume-like Retinospora except in color. Makes an ideal background plant in foundation planting.

VEITCH'S JAPANESE RETINOSPORA (*Retinospora squarrosa veitchi*).

Foliage silvery blue, feathery and dense, giving a soft woolly appearance. Broad pyramidal outline, can be kept to any height by trimming. One of the best Retinosporas.

JAPANESE HINOKI RETINOSPORA (*Retinospora obtusa*).

Compact; pyramidal form, slightly drooping tips, beautiful dark green, flat foliage.

JAPANESE THREAD-LIKE RETINOSPORA (*Retinospora filifera*).

Has long, stringy, droopy branches, bright green foliage; slow grower, very attractive.

JAPANESE SAWARA RETINOSPORA (*Retinospora pisifera*).

Light green lacy like foliage, bluish beneath. Quick grower, loosely pyramidal.

JAPANESE GOLDEN SAWARA RETINOSPORA (*Retinospora pisifera aurea*).

Habit of growth like the Sawara Retinospora, but its color is bright golden.

PRICES OF ALL RETINOSPORAS

Evergreens

That Are Not Expensive

Arbor-Vitae

ELLWANGER'S or TOM THUMB ARBOR-VITAE (*Thuja occidentalis ellwangeriana*). A low, broad pyramidal form of Evergreen with slender branches and feathery foliage.

SIBERIAN ARBOR-VITAE (*Thuja occidentalis sibirica*). Dark green color, broadly pyramidal, very hardy and holds green color during the winter.

LEE GOLDEN ARBOR-VITAE (*Thuja occidentalis elegantissima*). Compact, pyramidal plant, golden green foliage; dependable, hardy and vigorous in growth.

FERNLIKE ARBOR-VITAE (*Thuja occidentalis filicoides*). Pyramidal in shape, dark green whorled foliage.

GEORGE PEABODY ARBOR-VITAE (*Thuja occidentalis lutea*). A beautiful variety, the gold marking diffusing more deeply into the foliage than in any other tall growing evergreen.

VERVAENE ARBOR-VITAE (*Thuja occidentalis vervaeniana*). More compact than American arbor-vitae, good green foliage, slightly variegated.

PRICES OF ABOVE ARBOR-VITAE:

	Each	2 for	10 for

Yews or Taxus

Beautiful Rich Green - All Year
Hardy, Disease-Resistant, Long-Lived

IRISH·YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

IRISH YEW (*Taxus baccata hibernica*). This Evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

Harrisons' Lifetime Shrubs To Beautify Your Home

EVERYWHERE people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well-kept lawn planted to shrubs and flowers.

GOLDEN TWIG DOGWOOD (*Cornus stolonifera flaviramea*). Dwarf grower, branches are golden in color; most attractive in winter.
1 to 1½ feet, 30c each; 2 for 50c.

HYDRANGEA PEE GEE (*Hydrangea paniculata grandiflora*). Large flowers; first snowy white, then pink changing to reddish bronze in the fall. Blooms midsummer to fall.
1 to 1½ feet, 30c each; 2 for 50c.
1½ to 2 feet, 40c each; 2 for 70c.
2 to 3 feet, 50c each; 2 for 90c.

HYDRANGEA, PINK or BLUE (*Hydrangea otaksa*). Old favorite southern hydrangea. When winters are severe we suggest heeling in. Large balls of pink or blue flowers; very attractive large leaves. Color depends on acidity of soil.
Field-grown, 60c each; 2 for \$1.00.

CREPE MYRTLE (*Lagerstroemia indica*). Small, green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. State color desired.
1 to 1½ feet, 75c each; 2 for \$1.30.
1½ to 2 feet, \$1.15 each; 2 for \$2.00.

GLOBE FLOWER (*Kerria japonica flora plena*). A very popular weeping shrub that has double yellow blooms during late summer.
2-yr. plants at 25c each; 2 for 40c; 10 for \$1.80.

NANDINA DOMESTICA. A beautiful upright growing shrub with numerous reed-like stems springing from the same root. Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long panicles are followed by masses of small bright red berries which are retained all winter.
9 to 12 inches, 35c each; 2 for 70c.

FIRETHORN. A beautiful shrub covered with a profusion of white flowers in early spring, followed by bright orange berries which hang on all winter.

12 to 15 inches, 50c each; 2 to 90c.
15 to 18 inches, 75c each; 2 for \$1.30.
1½ to 2 feet, \$1.00 each; 2 for \$1.80.

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub.
1½ to 2 feet, 40c each; 2 for 70c.
2 to 3 feet, 50c each; 2 for 90c.

PUSSY WILLOW (*Salix caprea*). A very interesting shrub or dwarf tree, producing many furlike catkins, 1 to 2 inches long, up and down upright stems. Quite often these pearl-gray catkins have a touch of pink, and are delightful in winter bouquets. The branches can be cut any time in December, January or February; then, if placed indoors in a vase of water, they will quickly burst forth into bloom. Remove from the water when in full bloom, and they will retain their loveliness for months. 6 to 10 feet at maturity.
1½ to 2 feet, 25c each; 2 for 40c.
2 to 3 feet, 35c each; 2 for 60c.
3 to 4 feet, 50c each; 2 for 90c.

SCOTCH BROOM (*Cytisus scoparius*). A lovely plant with great masses of yellow pea-shaped flowers in June.
1 to 1½ feet, 75c each; 2 for \$1.30.
1½ to 2 feet, \$1.15 each; 2 for \$2.00.
2 to 3 feet, \$1.50 each; 2 for \$2.75.

SNOWBALL FRAGRANT (*Viburnum carlesi*). The fragrant, spicy flowers are borne in May and June. Buds before opening are an attractive pink, developing to pure white flowers.
12 to 18 in., \$1.00 each; 2 for \$1.80.

COMMON SNOWBALL (*Viburnum opulus sterile*). The old fashioned snowball, large globular clusters of snow white flowers in May and June.
12 to 18 inches, 35c each; 2 for 70c.
18 to 24 inches, 50c each; 2 for 90c.

SPIREA VAN HOUTTEI. The most popular shrub. It is valuable as a specimen in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows 6 to 8 feet and is unsurpassed in gracefulness and beauty.

	Each	2 for
1 to 1½ feet.....	\$0.15	\$0.25

DISTINCTIVE SHRUBS

New Low Prices:

Big, 1½ to 2 ft. 30c each; 3 for \$0.75; 10 for \$2.00
Largest, 2 to 3 ft. 40c each; 3 for \$1.05; 10 for \$3.00

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply double pink, red, white with crimson center.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly Bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus Alba Sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of our best early blooming shrubs.

HONEYSUCKLE, JAPANESE BUSH (*Lonicera Morrowi*). Early white flowers in June, followed by red berries.

QUINCE, JAPANESE FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall.

SPIREA REEVESIANA. Slightly drooping shrub covered in May with clusters of single, white flowers.

SYRINGA; SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET SCENTED SHRUB (*Calycanthus floridus*). Hardy native with many double, chocolate colored flowers in May. Flowers, leaves and even wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE (*Lonicera tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela rosea*). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

This colorful shrub planting adds that "bit" of beauty so necessary to the home. Each variety should be carefully selected and planted to get the proper place and correct balance.

These shrubs blossom intermittently from April until frost.

1939 Hi-Quality at Low Prices

Can supply larger caliper sizes—write for prices.

ORIENTAL PLANE (*Platanus orientalis*). A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America.

SILVER MAPLE (*Acer dasycarpum*). The name comes from the color of leaves. Underneath, these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple, and probably faster than that of any other shade tree. Branches are slim and dainty rather than heavy, and the form of growth is spreading. Gets very large eventually—as high as 120 feet sometimes—and does well over nearly all the United States. Makes splendid quick screens or quick shade. On streets and in parks is extensively planted, and is very fine.

AMERICAN ELM (*Ulmus americana*). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

AMERICAN PLANE (*Platanus occidentalis*). A very rapid growing tree for yard and street planting. The bark is grayish green and peels off during the winter. Not as desirable as the Oriental Plane, but is a much more rapid grower.

CATALPA SPECIOSA Rapid grower. Large heart-shaped leaves and panicles of white flowers tinged with violet.

Harrisons' Can Supply Shade Trees in Car Loads

We invite the City Forester of your Department of Parks; the District Engineer of your State Highway Commission and Landscape Architects to visit us at Berlin, Maryland to see the Shade Trees growing in our nurseries.

Our tremendous production enables us to supply high quality Shade Trees at very low prices.

Can supply larger caliper sizes—write for prices.

NORWAY MAPLE (*Acer platanoides*). Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is fast. Branches and foliage are thick and compact, and the head, which is round-topped, begins to branch not far above the ground. The tree is large—towering 50 feet high when fully grown. Splendid trees, most beautiful and desirable. For lining the sides of lanes and roads, for a lawn, to protect the house from sun and weather, for shade, for beauty and satisfaction, and for real permanent worth in all landscape planting there are no other trees in its class. Norway Maples are at home in the mountains, but will thrive at any elevation, and in nearly any soil to be found in this country.

PIN OAK (*Quercus palustris*). The daintiest and most graceful of the oaks, with deeply cut, bright, fresh green foliage; beautiful autumn effect. A very graceful tree for the lawn and fine for streets or roadsides.

SWEET GUM (*Liquidambar styraciflua*). A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

MOLINE ELM Grows into a dense conical specimen.

EUROPEAN LINDEN (*Tilia platyphyllos*). Pyramidal in form, its abundant foliage forms a dense shade, flowers fragrant.

RED or SCARLET MAPLE (*Acer rubrum*). Brilliant autumn coloring, eventually grows into big tree size. Do not confuse with Japanese Blood Leaf Maple.

SYCAMORE MAPLE (*Acer pseudoplatanus*). Very similar in growth to the Norway Maple, but is much faster grower.

EUROPEAN LINDEN

PIN OAK

NORWAY MAPLE

HARRISONS' NURSERIES, Inc., AT BERLIN, MARYLAND, IS AMERICA'S LARGEST GROWER OF SHADE TREES

Picture these lovely shade trees in your own garden. They are modern and really so inexpensive.

CHINESE ELM. Quickest Growing Tree in the World

Northern Strain Chinese Elm

Grows 20 feet in Four years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a cut-leaf Birch.

AMERICAN PILLAR

AMERICAN BEAUTY

DR. W. VAN FLEET

PAUL'S SCARLET

Climbing and Rambler

ROSES

Prices, two-year, budded, No. 1 grade, field-grown:
40c each; 3 for \$1.10; 6 for \$2.00; 12 for \$3.60; 50 or more, 25c each.

AMERICAN BEAUTY. Large, rosy crimson blooms.

AMERICAN PILLAR. Large clusters of single rosy pink flowers, with yellow shadings. Rank climber.

DOROTHY PERKINS. Full double, shell-pink flowers in large clusters. A very attractive climber.

DR. W. VAN FLEET. Light shell-pink to silver-flesh color blooms; double.

GARDENIA. Small yellow buds, opening to creamy white; very fragrant.

HARRISONS' YELLOW. Bright golden yellow; very hardy.

PRIMROSE. A hardy, unfading primrose-yellow climbing rose; double.

PAUL'S SCARLET CLIMBER. Large, intense scarlet colored blooms; freely produced. It is strong and perfectly hardy. The most popular climbing rose.

SCORCHER. A new rose from Australia with enormous ruffled blooms of vermilion-red. Very free bloomer. Grows rapidly to a height of ten feet or more. No other climber like it.

Hybrid Perpetual Roses Extra Size

Largest of all Roses — Very Hardy and Brilliant

Prices, two-year, budded, No. 1 grade, field-grown:

45c each; 3 for \$1.20; 6 for \$2.20; 12 for \$4.00; 50 or more, 30c each.

We recommend these roses for extremely cold climates. They produce more blossoms at one time than any other type, and are the easiest to grow of the rose family.

FRAU KARL DRUSCHKI. Enormous pure white.

GENERAL JACQUEMINOT. Fragrant, perfectly formed blossoms of scarlet-crimson.

MAGNA CHARTA. A rosy pink, full rounded, globular rose of marked fragrance.

MRS. JOHN LAING. Soft pink, beautifully formed large, double blossoms.

PAUL NEYRON. The well known H. P. Immense pink flowers.

ULRICH BRUNNER. Brilliant scarlet-crimson.

Customer and Bank References

For customer references—we refer you to anyone who has planted Harrisons' Nursery Products during the past 55 years.

For bank references—Union Trust Company of Maryland, Baltimore, Maryland; Calvin B. Taylor Banking Company, Berlin, Maryland, and the Exchange and Savings Bank, Berlin, Maryland.

Our 55 years of continuous business under the Harrison family ownership and management is your assurance for dependable nursery products and fair dealing. Compare our reliability with others before you purchase.

Money Back

In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter.

HARRISONS' NURSERIES, INC.

Note: Any money overpaid by customer will be promptly refunded.

OUR GUARANTEE

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within six months after its arrival.

HARRISONS' NURSERIES, INC.

Harrisons' Hi-Quality

ORNAMENTAL TREES — EVERGREENS — ROSES

Buy direct from the grower

The Lovely Pink Radiance Rose

Lovely to look at. They bloom from June to frost. The popularity of this Rose never wanes. 50c each; 3 for \$1.35; 6 for \$2.40. (See pages 64 to 66.)

Bechtel's Flowering Crab

One of the finest of the flowering trees. Bears a profusion of delicate pink, roselike blossoms in May. Very hardy and beautiful. 2 to 3 ft., 60c each; 2 for \$1.00. (See page 52.)

American Boxwood

Remember the finest specimens in America come from Harrisons'. They grow faster than the English Boxwood. 3 to 4 in., 25c each; 10 for \$1.50. (See page 50.)

Azalea Hinodegiri

More than a thousand blossoms on a mature Azalea "Hinodegiri."

This masterpiece in Azaleas, because of its loveliness in form and color, graces the gardens of America's finest. This is your opportunity to secure some of the finest specimens we have ever grown. 3 to 5 in., 25c each; 10 for \$1.80. (See page 49.)

The Sturdy Pin Oak

A very graceful tree for the lawn and fine for street or roadside. 6 to 8 ft., \$1.50 each; 2 for \$2.70. (See pages 60 to 62.)

Montmorency Sour Cherries

Most popular variety for canning.
(See page 33)
