A MESSAGE *from the Six Harrison Brothers*

ORCHARDISTS

ESTABLISHED 1884

NURSEYMEN

Harrisons'
NURSERIES, INC.

GROWERS OF
QUALITY FRUIT AND ORNAMENTAL NURSERY PRODUCTS

BERLIN, MARYLAND

Season 1937

Dear Friends:

For fifty-three years the business of the Harrisons has been to grow Fruit Trees--Roses and Ornamental Nursery Stock, also commercial fresh fruit growers...this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

When it comes to fruit trees, you can buy them at most any price, but the trees that will produce the biggest crop of really worth-while and saleable fruit, cannot be expected from undernourished trees produced in a haphazard manner with the sole idea of seeing how cheaply they can be grown, thus disregarding standard grades, sizes and specifications and careless as to their parentage.

Now when you buy nursery stock..remember all of it is a living plant..the pedigree..or parents play an important part in the future results of the very tree you buy..the "hidden value" is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance..and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISONS' Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

We emphasize the greatest values and by our large production we are prepared to give you the best stock for less money...and remember - the nursery stock you buy is grown, packed and shipped by trained horticulturists with a lifetime experience.

In closing - may I personally take this opportunity of thanking our many--many customers for their continued confidence, for which all of the Harrison Brothers are sincerely grateful.

Cordially yours,

HARRISONS' NURSERIES, Inc.,

Happy Days are Ahead for the Farmer, Fruit Grower,
and Garden Enthusiast

Harrisons' Hi-Quality nursery stock positively assures successful results for **commercial orchards**, real estate developments, lawn and garden improvements.

Every Customer is Assured of Harrisons' Hi-Quality
Trees and Plants at All Times

Expert inspection for inherent defect—careful grading and packing is Harrisons' policy on every order. However unforeseen errors do sometimes occur. We rectify cheerfully at all times by replacing free of charge or refund the full purchase price.

"It Pleases Harrisons' to Please You"

TODAY FRUIT GROWING
is making inroads on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

Plant with HARRISONS' Bud SELECTED Super Strain FRUIT TREES

It's your opportunity to plant the best there is in fruits at low prices

GET YOUR ORDER IN EARLY. Growers with a vision to the future should capitalize now by planting new orchards. You get the biggest dollar's worth from Harrisons', both in quality and price.

Facts Worth Reading About

Alive Healthy Fruit-Bearing Trees Depend on the Heredity of Your Trees

In the summer and early fall of each year, while fruit was on the trees, the utmost care was exercised in selecting the new "budding stock" for the young Harrison fruit trees developing in the nursery.

By our practical method of propagation and desire to furnish nothing but the true-to-name varieties, we never realized, at the time, that this Harrison method of propagation was ultimately to revolutionize the industry.

You Pay No More for Harrisons' "Bud-Selected" Trees

The "bud-selection" method to propagate fruit trees is very expensive—but whatever the expense they are the trees that give satisfaction.

Operating with 1750 acres of bearing orchards, with a trained organization and personnel operating twelve months each year, we are organized on a large production basis, all of which reflects lower prices for the commercial grower and the home owner.

Remember the inborn inheritance is the final quality built into Harrisons' stock.

Dependable Nurserymen Propagate from Bearing Orchards

If fruit trees are continuously propagated from the nursery rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate—and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. We are orchardists and nurserymen, and nothing can compare with our scientific method of "bud selection"—it always gives complete satisfaction.

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominating in bearing qualities coupled with health, vigor, and ability to withstand changeable climatic conditions—this type of a tree was to become the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

PEACHES *for Early Profits*

Sales \$1,150.00 from 1,000 Red Bird Cling Peach Trees Which Bore a Crop When Trees Had Been Planted in Orchard Only Two Years—Averaging 1/2 Bushel a Tree

1-Yr., 6 to 7 ft. Peach Trees were planted.

Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, being the highest coloring of fruit; with extra heavy bearing habits, has made the greatest contribution in directing and fixing the characteristics of the yield; of perfecting color; increasing the size of the fruit and the volume, as well as regularity of the crop.

Grown on "Brink" of Atlantic Ocean — Withstands Many Climatic Changes

Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit-growing section of the United States.

(Hale-Haven, add 10c per tree to above prices).

Very Early Varieties

GREENSBORO. White, freestone, extra large for such an early Peach, one of the handsomest, being a large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted for wide variations in Peach regions.

JUNE ELBERTA. Yellow, semi-freestone, big, handsome Peach, high red color, delicious flavor and a good shipper—a new variety, being the earliest of all yellow Peaches.

MAYFLOWER. White, cling, small size with red all over.

RED BIRD CLING. White, cling, extra large with a bright red blush, the first Peach of large size to ripen; the greatest very early money maker. We highly recommend your planting Red Bird Cling which will thrive in any Peach-growing district.

UNEEDA. Cling. Skin creamy white, with red blush.

peaches *A Profitable Future*

The Peach grower has a bright and profitable cash future—we advise you to plant a Peach orchard this spring, as the number of Peach trees in bearing is the smallest of any time during the past fifty years. Harrisons' are the largest commercial Peach orchardists in the East, and we will plant additional Peach orchards this spring.

Earliest large Peach commanding high prices

Superior Strains - Sturdy Ancestry - Maximum Yields

Golden Jubilee "OK" say our Commercial Friends

For Prices, See Page 5

Commercial Peach Orchardists

for a century have been looking for an early Peach of high quality, fine flavor, yellow, freestone, attractive color, firm texture and a good shipper, and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any variety of commercial importance which has been introduced since the Brackett.

Golden Jubilee ripens about four or five days ahead of Carman, the latter variety at one time was of commercial importance, but in recent years it has only been grown in a limited way commercially and is quickly fading away in view of the competition from Mamie Ross.

Tried and Proven

There are numerous bearing Golden Jubilee Peach orchards throughout the United States and the variety has been tested by practical fruit men who have unanimously pronounced it as a worthy member of the preferred commercial list. It has been planted by tens of thousands in every Peach producing region and has given good results; therefore, we all must congratulate the New Jersey Experiment Station, New Brunswick, N. J., for breeding and originating the Golden Jubilee.

A Proven Money Maker

Last summer was a Banner Year for the Golden Jubilee as it bore huge crops of fancy fruit which sold at premium prices on the markets throughout the United States. Many fruit growers never saw the Golden Jubilee until last summer on the city markets and all spoke of it with great praise and pronounced it as the most outstanding and the most profitable Peach for the early season group of yellow, freestone fruit.

EARLY ROSE

Another Favorite Commercial Peach

Early, white, cling, medium large size for an early Peach, high bright red skin, sweet, delicious flavor. Good shipper, making it a new favorite among commercial varieties. Hardy—been known to produce ten bumper crops of fruit without a miss. The tree is strong, sturdy, being a prolific grower and withstands exceedingly cold weather.

Sure to Please

Ripens several days later than Red Bird Cling and ripens at a date thus not competing with any other important commercial variety. Early Rose brings highest prices on leading markets and is being planted commercially in several Peach districts.

GOLDEN JUBILEE Ripens 4 Days Ahead of Carman

Fruit is of Good Size

In most localities the fruit of the Golden Jubilee will attain extra good size for an early Peach. One of its most remarkable features is that it is very hardy in fruit bud and withstood the bitter cold weather of last winter as good as any other variety known. It is a cross between the famous Elberta, and the hardy Greensboro, which is a very early variety. Golden Jubilee, fortunately through the cross, inherited the finest qualities of both the Elberta and Greensboro.

Recommended by Harrisons'

Harrisons were the first nurserymen to give Golden Jubilee wide publicity among the fruit growers of America. We recommend to every Peach grower north and west of North Carolina to plant this variety. We, ourselves, have planted several thousand trees in our own orchards and feel confident that you will be satisfied by planting the Golden Jubilee for home use or commercial plantings. Our strain of Golden Jubilee is the original strain being originated and introduced by the New Jersey Experiment Station.

Buy "Bud Selected" Super-Strain Trees--Best Grown

HILEY

*A Handsome, Creamy White Peach
With a Red-Blush Cheek—A Winner*

White, freestone, medium size, highly red colored, very firm, being an exceedingly handsome creamy white Peach with a delightful red cheek; flesh is white, fine texture, aromatic, very juicy, and of the highest flavor. Tree is strong grower, very healthy and a heavy bearer. Being an excellent shipper, with the stamina to withstand very long hauls under refrigeration, together with its beautiful, most appetizing appearance, and being easily, attractively packed in six-gallon carriers, bushels and half-bushels, along with its recent high reputation and favor with the buying public, has made Hiley a strong contender as the highest general averaged priced Peach. Many of our varieties are propagated direct from the original strain, and Hiley is no exception, as our late Mr. George A. Harrison cut the buds from the orchard of Mr. Eugene Hiley of Marshallville, Georgia, the originator of Hiley, then known as Early Belle, and later as Hiley Early Belle, now known as Hiley. The Harrison Bros. have frequently visited Georgia and also cut buds from trees being propagated direct from the original strain of Hiley from the famous Hiley orchards of Rumph Brothers of Marshallville, Georgia. **Add Harrison's Strain of Hiley to your commercial plantings for real profit.**

Other Early Varieties

CARMAN. Semi-freestone, medium size, attractive and luscious, oval shaped, yellowish white with bright red cheek; flesh creamy white, spicy and good flavor. Hardy, strong grower; heaviest producer of the earliest varieties. A sure cropper.

CUMBERLAND. White, semi-freestone, new variety introduced by the New Jersey Experimental Station.

ECLIPSE. Yellow, freestone, new variety introduced by the New Jersey Experimental Station.

HILEY — Ships like a bullet

MAMIE ROSS. White, freestone, large, covered with a beautiful delicate carmine—red blush; firm, juicy, good flavor, excellent shipper. Mamie Ross is about one-third larger and ripens two days later than Carman.

SOUTH HAVEN. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates. A new variety we recommend you to plant.

VALIANT. A promising seedling of Elberta. The fruit is large, roundish oblate, yellow blushed with red, with firm juicy flesh of very good quality. Freestone. The trees are productive and it ripens about two weeks ahead of Elberta. Highly flavored.

VEDETTE. A seedling of Elberta. Ripens a few days before Valiant and about three weeks before Elberta. The tree is productive and fruit is large, roundish oval, yellow flesh and freestone. Very highly colored.

Harrisons' Peach Trees Yield Larger and Better Crops

Two Famous Peaches Join hands

HALE-HAVEN

Early Elberta

Early Midseason

Yellow, freestone, large, lemon yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning. Hardier in fruit bud than Elberta, tree is a good grower, bears very young and a heavy producer. Ripens about a week or ten days earlier than Elberta and is being planted quite extensively in commercial orchards; excellent home orchard peach. Due to its earliness, and being Elberta type of peach, it brings high prices on the leading markets.

Hale-Haven

10c EXTRA PER TREE

It's Early

Yellow Freestone—Colors Before Ripening—Heavy Bearer

Yellow, freestone, large, high red color, firm, good flavor. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. Very hardy in fruit bud and a heavy bearer. Ripens about 2 weeks before Elberta. Hale-Haven is a new variety, being a cross between the famous J. H. Hale and the well known new variety, South Haven, being originated by the Michigan Experimental Station.

Other Early Midseason Varieties

CHAMPION. White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

CRAWFORD'S EARLY. Yellow, freestone, large size, juicy, sweet flavored, highly prized for canning. Tree strong grower and prolific bearer. One of the old-time commercial varieties, which has been extensively planted in years past, but now mainly a home market fruit.

ROCHESTER. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone Peaches for nearby markets, and highly desirable for canning. Our buds came direct from the original tree from Mr. A. H. Heberle of Rochester, New York, the originator. Popular in Western New York and Michigan.

SLAPPEY. Yellow, freestone, medium to large size, beautifully red colored, rich, juicy and extra good flavor. Good commercial variety for nearby markets and one of the best early yellow freestone Peaches.

VETERAN. Fruit is large, round, yellow flesh, freestone and superior to the well known Elberta in quality. Ripens about ten days earlier than Elberta.

Buy "Bud Selected" Super-Strain Fruit Trees

Belle of Georgia *It's Hardy*

[*Belle*]

(NOTE: For Prices See Page 5)

Ripens early August. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best.

Bears Bumper Crops Every Year

The tree is an exceedingly strong grower and has established heavy producing records throughout the East. It withstands sub-zero temperature much better than most varieties in its season. By bearing heavy crops when other varieties were light, it has made its growers large profits in the past years.

Prosper North and South

Few Peaches are as well adapted to different soils and climatic conditions as Belle of Georgia. Although it originated in the South and still produces large crops for many Southern Orchardists, it has been equally successful in the North and West, and we highly recommend it as a profitable variety.

Withstands Coldest Winters

The tree is a strong grower with an open top; very vigorous. Bears heavy crops when very young, even at three years. Tree is very hardy in fruit bud and will bear a bumper crop of Peaches when other varieties will fail, after going through a severe winter.

Plant Harrisons' Super-Strain Belle of Georgia Trees

Harrisons, in their commercial Peach orchards over a long period of years, have grown a larger number of carloads and truck loads of Belle of Georgia Peaches than any other orchardist in the nation. Through the process of "bud selection" Harrisons, over a period of many years, have been able to aid Nature, consequently have developed from the original strain which we received from Mr. L. A. Rumph, Marshallville, Georgia, originator of this famous variety, insuring in our famous Harrisons' Super-Strain Belle of Georgia Peach trees, which is the finest type, the hardiest and the most productive available. Elicit praise from all who know it because of the great beauty of its fruit at its best—it is one of the glories of the Peach World.

Best Peach for Home Gardens

If you grow Peaches for market purposes, or if you wish several Peach trees in the garden plot near your home, you will find Belle of Georgia the best Peach for this purpose. To the commercial grower it offers a white Peach maturing before Elberta, which ships well and brings good prices. To the man with a home orchard it means big, luscious, white Peaches—Peaches you can be proud to show your neighbors. There is only one best argument for the Belle of Georgia—eat one, and you'll know immediately what it is.

Best All Around White Peach

During the past three years numerous orchardists in the sections which were visited by the bitter sub-zero winters of more or less duration, found in several cases that Belle of Georgia was the only variety of Peach which came through the winter with sufficient number of live fruit buds to insure a commercial crop. These orchardists were lucky in having Belle of Georgia as they received high prices for their Peaches, making Belle of Georgia a good cash profit variety, whereas many other varieties were a failure.

Other Midseason Varieties

OLD MIXON FREE. White, freestone, large with bright red cheek, tender, rich, excellent flavor.

RAY. White, freestone, large, most attractive red blush of delicate shade, juicy, delicious, tender and excellent flavor. Trees are exceedingly strong grow-

ers, shapely and symmetrical, a regular bearer of big crops and generally considered as the heaviest, most consistent cropper known. Plant Ray for nearby markets and roadside stands, as its fine, attractive appearance and high flavor sell it on sight.

Buy by Mail at Harrisons'—It's Convenient and Economical

Since the HORSE and BUGGY DAYS

Elberta Peaches

reign Supreme

Yellow Freestone—Midseason

Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. This attractive appearance and the uniform large size serve to sell it almost on sight.

ELBERTA IS THE BEST LONG-DISTANCE SHIPPER

The large fruit, being uniform in size and shape, along with its high attractive red color and firmness, also its ability to stand shipments of three thousand or more miles under refrigeration in cars for two or three weeks before being consumed, but with stamina enough to still look its best, has won Elberta the reputation of being a peach without a peer and the variety which is always in favor and strong demand with the buying public, therefore demanding the highest possible market prices. Elberta is by far the best canning peach.

We have the best strain of Elberta obtainable. In our own commercial orchards we have tens of thousands of this strain. It was obtained from the late Samuel H. Rumph of Marshallville, Georgia, the originator of Elberta, from the original tree and budded in our nurseries.

There are many different types of Elberta, and the "Best Strain" is the cheapest and most profitable in the long-time investment.

Recommend planting thirty-five per cent of your commercial orchard to Elberta.

Plant Harrison's Superior Strain of Elberta and reap the huge cash profits.

ELBERTA

One-Year Budded, 6 to 7 Feet,
the Largest and Best Size
Peach Tree Grown

THE BEST COMMERCIAL VARIETY

Tree is vigorous, very hardy, sturdy, thrives in widely different localities. Elberta is hardier in bud than most varieties, and is a uniform prolific bearer. You can always depend on Elberta as a sure cropper.

Buy "Bud Selected" Super-Strain Fruit Trees

J. H. HALE, a Peach of High Quality

EXTRA LARGE SIZE

Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

Hales are too large to properly pack in 6-gallon carriers, but they make the most attractive and commanding appearance when packed ring-faced in bushel and half-bushel baskets. The Hale quickly made a national reputation and is a strong competitor of the Elberta, being just about as good a shipper as Elberta.

BRINGS HIGHEST MARKET PRICES

Prices on J. H. Hale and Elberta with a large national crop are about the same, but on a short crop year Hales usually sell from 25c to 50c and sometimes 75c more per bushel on large wholesale markets.

J. H. HALE Midseason

*A Few Days Earlier
Than Elberta*

*Commands Highest
Market Prices*

ORIGINAL STRAIN J. H. HALE

Our Hales are propagated direct from the original strain, the variety being originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, who at one time was the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

The tree is somewhat dwarf, a moderate grower and should be planted on the richest, best, well-drained soil available. The Hale needs more cultivation and fertilization than most varieties.

Hale is the second most extensively planted yellow peach, only being surpassed by Elberta. Hale is a ranking member of the five greatest peaches in America.

ALL-SEASON COLLECTION PEACHES

For the Small Garden

1 Early Rose. White flesh.	Six Trees
1 Golden Jubilee. Yellow.	2 to 3
1 Hiley. White.	feet
1 J. H. Hale. Yellow.	for
1 Elberta. Yellow.	\$1.50
1 Brackett. Yellow.	

Midseason Late Varieties

CRAWFORD LATE. Yellow, freestone, superb in size and shape; splendid yellow, with broad dark red cheek; flesh deep yellow, juicy and melting, rich, winy flavor. One of the best late sorts. Tree vigorous, hardy and sure bearing, coming at a time when the midseason peaches are over, this variety is eagerly bought up for canning and preserving, and brings highest prices. Being such a remarkably good shipper, it reaches the market in first class condition. An old commercial favorite.

WILMA. Yellow, freestone, large, good red color, somewhat similar to its parent, Elberta.

ROBERTA (Augbert). A comparatively new variety of great merit. Resembles the Elberta in many respects, but ripens about a week to ten days later. An excellent sort to prolong the Elberta season.

SHIPPERS' LATE RED. Yellow, freestone, large, round, bulkier than Elberta, with an attractive red coloring which is catchy to the eye. Flesh is yellow, juicy, sweet and pleasing flavor. Trees are very hardy, good growers, bear young, sure croppers, and prolific bearers. Promising new late commercial variety and excellent home sort.

Save Money by Growing Your Own Fruits

Brackett Peach [Midseason-Late]

A THREE-POINT WINNER

Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past twenty years we have planted many thousands of this variety in our own orchards and they have given good results.

Brackett Is a Three-Point Winner — In Color, in Size, in Quality

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta and fruits weighing five to six ounces are common. Flesh is deep yellow, extremely juicy and is absolutely freestone.

Late Varieties

BEER'S SMOCK. Yellow, freestone, large, oval, skin orange-yellow mottled with red; high flavor.

BERK'S FAVORITE. White, freestone; new variety.

FOX SEEDLING (Fox). White, freestone, large; white with whole side red, melting, sweet, high quality and high flavor. Good for roadside market and canning.

IRON MOUNTAIN. White, freestone, large, generally

Fruit is much better flavored than Elberta.

Popular on the Markets

Brackett commands unusual high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We believe the grower who needs a Peach that ripens slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrison's' Original Strain

HARRISONS were the first to popularize this great variety and distribute throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.

planted in New Jersey.

SALBERTA. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey, making a fine combination for a profitable late Peach. This new variety is being planted commercially more or less in Ohio and Michigan.

Very Late Varieties

KRUMMEL'S (Krummel's Late October). Yellow, freestone, extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor. Good shipper, and ripens so late in the season that it has no real competition on the market, generally bringing satisfactory prices. If you desire a real late Peach, of good quality, then there is none better than Krummel's.

SALWEY. Yellow, freestone, large, beautifully mottled with red and a brownish cheek; the flesh is yellow, firm, rich, juicy and sugary, and particularly fine for canning and preserving. Generally grown in the mountain districts, good shipper, desirable for the fancy trade.

WHITE HEATH CLING (Heath). White, sometimes called Mammoth Heath Cling, extra large, round, with red blush, flesh is firm, white, exceedingly juicy, and ripens fully to the pit. Favorite for canning and pickling. Be sure to include it in your family orchard.

BRACKETT — This basket tells the story of size

Buy "Bud-Selected" Super-Strain Fruit Trees

We Present The Worlds Largest Peach RIO OSO GEM

A Tremendous Money-Maker for Growers

Commercially speaking, Elberta just about ends the Peach deal each year, consequently growers for several generations have been anxiously looking for a late ripening, yellow, freestone Peach of large size, high red color and good flavor, to extend their shipping season, and have eventually found it in the newly discovered marvelous Rio-Oso-Gem. This new variety has been awarded U. S. Plant Patent No. 84 of the U. S. Patent Office.

Ripens Two Weeks Later Than Elberta

The Rio-Oso-Gem would be a Peach of commercial importance when ripening at any time during the Peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for Peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your Peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons have planted several thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable Peach.

Protected by U. S. Plant Patent No. 84

The Rio-Oso-Gem has been protected by the Government against infringements by U. S. Plant Patent laws for a period of seventeen years from the date patent was granted, being November 28, 1933. It is unlawful for anyone to propagate and sell the Rio-Oso-Gem, U. S. Plant Patent No. 84, Peach trees without obtaining written permission from the owner.

Exclusive propagation and sales rights of Rio-Oso-Gem in the following states granted to Harrisons:

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kansas, Kentucky, Louisiana, Maryland, Maine, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and West Virginia.

Prices apply only to the quantities of Rio-Oso-Gem Peach trees ordered and cannot be assorted varieties of other Peaches and other fruits.

Supply of Rio-Oso-Gem Peach Trees is Limited.

Larger Than J. H. Hale

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2¾ to 3¾ inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, juicy, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Bears Heavier Than Elberta

Rio-Oso-Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. The tree bears young.

Harrisons' APPLE Trees

FOR THE FRUIT INDUSTRY

HARRISONS'
HI-QUALITY
TREES

Two Years After Planting
—Harrisons' Apple Trees
Are Early to Bear Fruit

Apple growing pays profits, but in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best Apple trees of superior merits it is possible to produce. Harrison grown Apple trees are propagated on whole root stock, insuring an unusually large root system which is the base of plant growth. Our Apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system.

Today we believe that we have more of the improved and best strains of Apples in our nursery than any other nursery concern in America.

Do not allow a few cents per tree to keep you from buying Harrison grown Apple trees, being the finest and by far the best quality produced on the North American Continent.

APPLE TREE PRICES—(RED YORKING, 15c per tree extra)—HARRISON GROWN

RED YORKING

TRADE MARK REG. U. S. PLANT PATENT No. 125

The Investment of the Day

The New Flaming Red York Imperial

Don't Delay Planting This New Variety This Year

The new Red Yorking with its double red over-all coloring comes into the market three to five weeks ahead of its parent, York Imperial. Consumers will readily purchase this fancy fruit and is destined to be a money-maker in the years to come.

The Glorified York Imperial

The Red Yorking is a "bud sport," being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrison's Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Pennsylvania, for use in planting a large orchard about twenty-five years ago.

Early Coloring Means 100% Perfect Extra Fancy Grade

The Red Yorking is similar in size and shape to York Imperial, but is characterized with the abundant red coloring that completely covers the fruit. A vigorous grower and an abundant producer, this Red Yorking has gained unusual prestige in Pennsylvania, Virginia, West Virginia, Delaware and Maryland.

You Can Get No Finer Apple Trees for Commercial or Home Orchards

Red Yorking is truly a practical Apple to grow because it requires much less spraying than others; they thrive with little attention, and produce good crops year after year.

Harrison's Are Commercial Growers, Too; 1750 Acres of Orchards

The success of our orchards are paramount; profit is essential to operate, and unless we plant the right kind of "budded" fruit trees we gamble with future results. Red Yorking looks good to us, so we are repeating another large orchard planting of Red Yorking this year.

WARNING! It is unlawful for anyone to propagate and sell Red Yorking, U. S. Plant Patent No. 125, Apple trees without obtaining written permission from the owners. The Government has protected the owners of the Red Yorking against infringements by the U. S. Plant Patent Laws for a period of seventeen years.

Undoubtedly there will be others who will offer so-called improved York Imperial under various names, therefore beware of bogus strains. There is only one genuine, being the original strain of the "bud sport" Red Yorking, U. S. Plant Patent No. 125, which can only be bought from the owners.

Prices of Red Yorking only 15c per tree higher than standard varieties. See page 14 for sizes and quantities.

"RED YORKING"

YORK IMPERIAL

A sample branch showing the results of Harrisons' inborn inheritance

Yellow Transparent

It's a Summer Apple—First of the Year

Ripens Early, Skin Clear Yellow, Flesh White, Flavor Slightly Acid, Size Medium

This is the most popular early green Apple grown and has proven a profit maker in a large number of Apple districts. The Yellow Transparent tree is very hardy, healthy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First on the Market

as it ripens early in July, making excellent eating Apples and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "Apple appetites" impatient.

Yellow Transparent Trees Bear Early

and produce nearly every season. They are rather dwarf growers, and may be planted a little closer than most other varieties. A fine soil is not necessary, or even desirable, as the trees seem to grow best on rather poor ground, such as hill-sides and uplands.

Thrives in the South and North

It thrives just as well in the South as it does in the North. Most varieties are particularly well adapted to a certain region, and, while they may be grown elsewhere, are only at their best when grown in the prescribed region. Yellow Transparent is extremely successful in Georgia, and does equally well in Canada.

Other Summer Varieties

DUCHESS (Duchess of Oldenburg). Medium size, red striped, flesh white, juicy and good flavor. Unusually heavy bearer, very dependable cropper. Trees are dwarf growers and require small root and branch space.

EARLY HARVEST. Very early, not a good keeper; fruit medium size, pale yellow, tender, juicy, sub-acid. Fine for home orchard because of its merit as a cooking and dessert fruit. Tree is a vigorous grower and bears early and regularly.

EARLY McINTOSH. Red, attractive, good size, flesh white, fine, tender, juicy and fine flavor, being similar to McIntosh Red. Tree vigorous, hardy, healthy and productive.

MILTON. A very handsome new Apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous. Ripens a month ahead of McIntosh Red.

RED ASTRACHAN. Medium size, yellow with dark red patches; flesh decidedly acid and juicy; excellent for cooking, satisfactory for home plantings, but on account of its poor shipping qualities and irregular bearing not advisable for commercial orchards. Tree very hardy, vigorous and a good heavy bearer every other year.

RED JUNE (Carolina Red June). Medium size, conical, dark red, juicy, fairly good flavor, very productive.

STARR. Large, yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, very tender, crisp, juicy, aromatic and fine quality, brings high prices. Recommended for nearby markets; a poor long distance shipper. Popular in Southern New Jersey.

SWEET BOUGH. Large, pale yellow; tender, sweet.

SUMMER RAMBO. Large, yellowish green, splashed with red, crisp and tender. Very good.

WILSON RED JUNE. Fairly large, red; good quality. Popular in New Jersey.

WILLIAMS EARLY RED. Medium to large size, bright, rich red; flesh is crisp, tender, juicy and sub-acid; good quality. Its bright, attractive red coloring, with satisfactory size and firmness, makes the Williams Early Red a popular summer variety. Ready for market just about the time people are growing hungry for new Apples. Fine for a filler or permanent tree, being hardy, can be successfully grown in New England States and Canada. All commercial orchards should include Williams Early Red.

For prices see page 14.

Buy "Bud-Selected" Super Strain Fruit Trees

McIntosh Red Apple (*Early Winter*)

Excels in New York, Michigan and New England States

An exceedingly valuable hardy, attractive Apple; medium large size; nearly covered with red. Flesh white, fine, tender, juicy, sub-acid and refreshing, and generally considered as the highest and best flavored Apple grown; splendid appearance, which sells it on sight. Demand always exceeds the supply of McIntosh Red and commands the highest prices of any Apple on the leading American markets. The best box and bushel Apple grown, and a good shipper.

A Canadian Apple; Exceedingly Hardy

McIntosh Red is a Canadian Apple, keeps

long, but is mellow and good to use from the time it is picked and if kept in cold storage until the next crop comes. Tree is exceedingly hardy, vigorous, a very prolific bearer, consistent bumper crop producer, a sure annual cropper. Comes into fruiting early. This splendid Apple can be grown from Nova Scotia to North Carolina. Growers in New York, New England, Michigan and Canada have long grown McIntosh Red for big profits. Ask any experienced Apple grower, if you are not acquainted with the McIntosh red, and he will praise it as highly as we do. Visit our own bearing commercial orchards of McIntosh Red at Berlin. Plant this variety for the big gold profits.

Other Autumn Varieties

GRAVENSTEIN. Extra large, perfect in form.

Coloring—orange-yellow overlaid with broken stripes of light and dark red; flesh yellowish, firm, crisp, tender, juicy, fine flavor. Good for cooking, extra vigorous tree, comes into bearing rather early and bears profuse crops regularly. Grown extensively in California and commands good price.

KING DAVID. A beautiful deep dark red apple, resembling Jonathan as to size and shape, but not quite as good flavor. Splendid shipper and keeper. Tree hardy, and comes into bearing young.

KING (King of Tompkins County). Extra large, very red, with a tint of yellow, flesh yellow, crisp, juicy, sub-acid, good quality. Tree slow grower and not a big producer. Generally planted in New York.

LOBO. Prominent in a number of fruit districts due to the high coloring and many McIntosh characteristics. The season of Lobo begins a little earlier than McIntosh, but it keeps about as long. The earlier coloring enables growers to pick Lobo in advance of McIntosh. It hangs on the tree better than McIntosh.

MAIDEN'S BLUSH. One of the most beautiful; pale lemon and crimson cheek; flesh white, tender and crisp. Tree vigorous and good bearer.

McINTOSH RED

Harrisons' Strain of McIntosh Red is 100% red color when ripe.

Harrisons' Improved Strain is very hardy and produces bumper crops each year.

McIntosh Red is America's Highest Priced Apple

Our Famous

Yellow Delicious

A gleaming golden yellow with alluring beauty

A golden yellow apple with decided "delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds the flavor and condition at its best. Many people think it superior to the famous Delicious.

YELLOW DELICIOUS—They Sell on Sight

Grimes Golden

*An Orchard Preference
for a pollinizer*

Medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard.

A PROLIFIC CROPPER AT AN EARLY AGE

The Yellow Delicious Tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

Plant Yellow Delicious as a filler with other varieties in your orchards on account of its early bearing habits.

HARRISONS' RECOMMEND YOU TO PLANT NOW

The Yellow Delicious has been planted in every Apple district and its fruits are known on the commercial markets where they bring good prices.

The Yellow Delicious has proven itself worthy as a commercial, as well as a good home variety. We recommend your planting Yellow Delicious on account of its high quality, being an extra heavy bearer, and produces crops at an early age, thereby making it a good money maker.

Other Fall Apples

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, bear very young.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

SMOKEHOUSE. Large apple of super-fine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

WEALTHY. Medium to large size; round almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relative good keeper. One of the most profitable commercial apples. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

Buy "Bud-Selected" Super-Strain Fruit Trees

HARRISONS' RED DELICIOUS

*—Brilliant Crimson-Red—Large Size
Extra Fancy Grades—Excel—*

This Apple was introduced by us several seasons ago and since introduced it has been bought and fruited by the tens of thousands by leading fruit growers throughout the country. It is a "bud sport" of pronounced superior merits. Being **triple-red** colored and the earliest red coloring strain known.

Colors Much Earlier Than Ordinary Delicious

Harrisons' Red Delicious colors up weeks earlier than the ordinary strain. By coloring earlier the fruit can be picked while it is firm and it keeps better in storage.

Size and Taste

Size is all anyone could desire, as it runs from large to extra large. The large size, solid red color and characteristic five-knob end make it attract buyers in every market.

Taste will be found on a par with its other points of advantage. The flavor is rich, slightly sub-acid, with an individuality which makes the palate call for more. You'll have no trouble with repeat sales for this variety.

Ships and Keeps Well

Harrisons' Red Delicious ships without bruising. In fact it ships better than the ordinary Delicious because its earlier coloring permits it to be picked when the fruit is more firm. Its large size makes it easy to pack attractively and the uniformity of size guarantees a good appearance.

Large Profit Maker

The ordinary Delicious is a proven profit maker and our Harrisons' Red Delicious is destined to outclass its

predecessor due to the fact that it will produce more highly colored fruit and as most every fruit grower knows color plays an important part in the price the fruit sells for.

Ideal for Home or Commercial Orchard

Harrisons' Red Delicious is not only a commercial apple but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons' Red Delicious will give full value.

Starts Red Coloring During Early August

One of the unique features of our "bud sport" selected strain of Harrisons' Red Delicious is that it starts to take on bright red color during early August and has sufficient color for United States No. 1 grade for picking and shipment on the domestic markets, as well as export, several weeks earlier than Delicious.

The Harrisons' Red Delicious is comparable, if not superior, to any of the other several new strains of Delicious as introduced, such as Starking, Richard Delicious, Shotwell Red Delicious and others. For several years we have sold Harrisons' Red Delicious trees at premium prices, but this year we are giving our customers the benefit and are selling at the same prices as other varieties of Apples. Plant Jonathan as a pollenizer.

For price see page 14.

Harrisons' Have done the watching, waiting and caring for these trees You get the benefit

JONATHAN —

A Superior Harrison "Red Strain"

**JONATHAN Keeps Until February—
It's a Real Commercial Variety**

Keeping Qualities Are Good

Without much care, Jonathan may be kept until February, or possibly a bit later. When particular care has been paid to the packing and selection of perfect fruits, it will be found a most desirable variety for the Holiday season.

(For Prices, see page 14)

Skin cherry-red, very thin and tough; **flesh** white.

Size medium to large
Ripens early fall

Jonathan is well able to hold its name high among the different varieties which ripen at about the same time. Its taste is exceptional; very few apples are able to approach it in this respect, and, in addition, you will find that

Jonathan Stands Shipping Well

Many apples are excellent to the eye and to the taste, but fail to stand up under the handling which they must get, and therefore do not enjoy real commercial success. Jonathan in this sense is exceptional, for it seems able to stand much handling without ill effects. The skin is thin but tough.

Trees Are Long Lived

although they bear fruit quite young. Jonathan is more consistent with its crops from year to year than many other varieties, as it will produce good crops practically every year. In the West, Jonathan has long been a standard commercial variety and has proven itself to be one of the leading commercial varieties of the East. Harrisons' super-strain of Jonathan has been produced by "bud selection," being a very high, brilliant red color.

We highly recommend you to plant Jonathan in a commercial orchard as well as your home orchard.

Other Winter Varieties

ALBEMARLE PIPPIN or YELLOW NEWTOWN. Famous in section around Crozet, Va., and sections of Oregon and Washington. Large, round, ribbed and somewhat irregular. Tree a slow grower and light bearer in poor soils, but right soil and care bring a world-beater when it will thrive.

BALDWIN. Large, round, bright red, crisp, juicy and rich; good late keeper, esteemed as an eating apple and for cooking. Quick and large grower; yields big crops. A wonderful shipper, standing long distances very successfully. The best northern apple for packing in barrels, fine cold storage apple, strong demand for carload shipments of Baldwins to European and South American markets. Brings high prices on foreign markets; also popular on the New England and Northern States markets. Grows to perfection in New England, New York, Pennsylvania, Michigan and Canada, but should not be planted south of the Mason-Dixon line. Baldwin is the leading commercial variety in the Northern States.

BEN DAVIS. Fine looking, large, round; yellow with red stripes; flesh white, juicy, sub-acid, coarse. Good for cooking, but on account of poor flavor not desirable for fresh eating. Finest keeper known. Can be kept in cold storage until July. Excellent shipper,

usually packed in barrels. Tree is a rapid grower, healthy, vigorous, bears at an early age, heavy cropper and a sure bearer.

CORTLAND. A new variety resulting from cross pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

DELICIOUS. Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Excellent for eating, and the most popular fruit stand apple. Packs well in boxes and bushels, always bringing high prices on the leading markets, and in strong demand by the best trade. Being a good shipper, along with its high red color and fine flavor, has placed the Delicious among the topnotchers. Tree is hard, vigorous grower and a good, dependable cropper when properly pollenized. Suggest planting Grimes Golden and Jonathans as pollenizers with Delicious.

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities, recommended for commercial planting.

Pioneers in Better Orchard Trees

Stayman Winesap

A Premium Apple The Public Prefer

Qualifications

- 1 Thrives On Poor Soil
- 2 Puts Idle Land to Work
- 3 Popular Commercial Variety
- 4 Sells On Sight at High Prices
- 5 Skin Solid Bright Blood Red
- 6 Size Large

- 8 Excellent Flavor

The Most Popular Apple

During the past ten years the popularity of the Stayman Winesap has risen by leaps and bounds, and the buying public now realize this is a premier variety of par excellence.

A READY MARKET AT TOP PRICES

Stayman Winesap is the best general purpose Apple grown in any Apple district. You can always sell Stayman for good prices and there is always a buyer for this famous variety. The general average selling price for Stayman Winesap during the past ten years has been very high, practically at the top.

EASTERN GROWERS PLANT STAYMAN WINESAP IN NEW ORCHARDS

Harrisons' Superior Strain Strain is Best

We have in our own commercial orchards several thousand trees of Stayman Winesap and we have selected for our parent trees the finest, deepest colored, annual bearing trees. Our selected super-strain is far superior to several new strains that are being offered by some nurserymen.

They realize that this Apple will produce as good results and do it on poorer ground. Naturally, not so much capital is required for the investment.

With the old Winesap, the fruit tends to decrease in size as the tree ages; with the Stayman it is generally as large and attractive as ever. A strong grower and comes into bearing at early age. Being nationally known for its bumper crops of superb Apples.

"IT IS ALWAYS DEPENDABLE"

—Say Harrisons' Customers

Many varieties of Apple trees have a good year and an "off year"; that is, they will give a large crop one year and next season produce very little. While this cannot always be blamed upon the variety, since climate, temperature and other causes enter into the question, yet Stayman Winesap seems to ripen a very uniform crop, and letters from our customers inform us that the regularity of crop is remarkable. This is naturally a valuable qualification, and, in part, accounts for the choice of many Eastern orchardists. The taste and appearance tell the rest of the story. For a pollenizer plant Grimes Golden.

STAYMAN
WINESAP

100% Red Color.

ONLY

**RED
ROME
BEAUTY—**
Best red strain
of all Rome types.
Ideal commercial variety

Harrisons' strain of Red Rome Beauty is the best of all Rome Beauty types and because of its improved and early high red color characteristics, will eventually replace the Rome Beauty. Already the Red Rome Beauty is a star among the leading commercial varieties of winter apples.

Red Rome Beauty

*Yes! It's Harrisons'
Superior Strain*

**Renowned for Bearing
at Early Age**

An improved Rome Beauty, identical in vigor and production. Color of fruit much darker and solid red. Produces much higher percentage of fancy apples and also superior in quality than the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

Other Good Winter Apples

GANO (Black Ben). A handsome, large apple of perfect shape, smooth, glossy, deep red skin; flesh white, slightly tinged with yellow, firm, rather coarse, crisp, mild, sub-acid, fair flavor. Gano is one of the most popular export apples, for the South American trade. Excellent keeper, standing long shipments, usually packed in barrels. A sure money-maker for the export trade.

LOWRY. Beautiful mahogany red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

MACOUN. Similar quality and texture as McIntosh Red, although it ripens 2 to 3 weeks later than Cortland.

NERO. An apple which has received far too little attention from planters of Eastern orchards. Deep red, with handsome shading; medium large size, of good quality and excellent flavor; one of the longest keepers, one of the best cold storage apples. Apples are graded and packed easily, do not show bruises and hold up well in storage.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong, erect grower, very healthy, extremely hardy and free producer. Blossoms are produced late in the spring, thus escaping frosts. Trees are slow in coming into bearing, but the quality of the fruit largely overbalances this difficulty. Popular old commercial variety in the Northern States. Should not be planted south of Southern Pennsylvania. Northern Spy is one of the best varieties on which to top bud or top graft certain weaker growing varieties. Available in 1-2 ft., 2-3 ft., and 3-4 ft. sizes only.

OPALESCENT. Very handsome dark crimson apple.

PARAGON. For description see Mammoth Black Twig.

RED SPY. A new red sport identical with Northern Spy except that the fruit is a solid bright red. Much handsomer than its parent.

ROME BEAUTY. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always in strong demand and brings highest prices. Keeps in good condition until May and June. With an established reputation due to real merit, Rome Beauty is a variety Eastern orchardists should plant. Good, hardy, strong grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. Reliability, due to being frost-proof, strong growing, sure bearing, unusual demand, with high prices on the leading markets, especially from the chain stores, make it a favorite with the growers. Fine quality and long keeping for use and for handling make it popular with consumers and dealers. Most attractive when packed in boxes and bushels.

Buy "Bud Selected" Super-Strain Fruit Trees

York Imperial *Still a Great Favorite*

For prices of all Apples see page 14.

Medium to large size, round irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer. Other varieties may fail to set fruit and suffer from off years, but York Imperial with proper culture methods, will bear consistently from year to year. York Imperial is a popular winter variety for cooking; also good for eating. A wonderful apple for packing in bushels for the domestic trade. York Imperial is one of the leading commercial Apples for Southern Pennsylvania, Maryland, West Virginia, and Virginia.

YORK IMPERIAL

Other Good Winter Apples

ROXBURY RUSSET. Large, firm, moderately tender, juicy, sub-acid, good flavor. Skin almost smooth, but covered with greenish to yellowish brown russet; long keeper. Most popular russet apple, tree hardy, strong grower, and a prolific bearer.

RHODE ISLAND GREENING. Large, greenish yellow, flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan, and Canada, but not advisable to plant south of the Mason-Dixon line.

STARK. Long keeper and a reliable commercial sort. Fruit large, round, greenish yellow, with red stripes; flesh yellow, crisp and mildly acid; valuable as a keeper. Excellent baking apple and always sought by the larger baking concerns and hotels. A good variety for the commercial orchard because the tree is hardy, thrifty, healthy, one of the strongest growers, a regular bearer; very productive. Desirable trees to top work other sorts on.

TURLEY. A seedling of the Winesap which it somewhat resembles. Fruit rounded conical in shape, much larger than the Winesap, smoother skinned and deeper and richer in color; juicy and rich flavor. Tree very hardy and comes into bearing early.

WINESAP. Sometimes called Old Winesap and Virginia Winesap; medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. A strong grower; comes into bearing early and is remarkable for its regular and abundant crops.

TWENTY OUNCE. Very large, yellow striped with red; fine quality; good keeper.

WOLF RIVER. Exceedingly large, handsome, bright yellow, skin mottled and blushed with deep red and broad stripes of bright carmine, fair quality, long keeper and excellent for cooking. (Small 1-year trees only).

WINTER RAMBO. Medium size, greenish yellow color; thick skin.

WAGENER. A superior large apple of beautiful bright red; fine texture, high flavor and excellent quality. Tree bears early, and is a reliable cropper.

WINTER BANANA. Extra large, golden yellow, and beautifully shaded with bright crimson red; firm, fine grained, rich, sub-acid. The name suggests the high flavor. Tree thrives nearly everywhere. Should be packed in bushels or boxes and sold soon after picking.

YELLOW BELLFLOWER. Large, yellow, good flavor.

Crab Apples

Fine for Jelly

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

TRANSCENDENT. Yellow striped with red; good for eating fresh and fine for preserving. Best of all crab apples. Tree large; quick grower.

Cherry Trees

Sturdy Two-Year-Olds. The Pick of best Sweets and Sours

LARGE MONTMORENCY—Sour

Sweet Cherries

What fruit is more pleasing than a sweet cherry? The ideal fruit to plant in the backyard. We have a good supply of first class trees in the following varieties:

BING. Very large, dark brown, almost black; flesh firm, sweet, rich and delicious.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor.

NAPOLEON (Royal Ann). Large, pale yellow with bright red cheek, sweet excellent flavor, prolific bearer. Famous canning variety of the Pacific Coast.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep black, tender, fine flavor.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light colored cherries. Heavy bearer.

PRICES OF SWEET CHERRIES

(Can be assorted Cherries or other fruit trees).

Sour Cherries

Harrison
Grown

For Home and Market

A good cherry orchard is a very profitable investment. On account of the rapidly increasing demand for fruit juices, there is a great outlook for the cherry grower. Cherries are easy to grow and are very heavy annual bearers. We have a good supply of the leading varieties and they are priced in the reach of every grower.

MONTMORENCY (Large Montmorency). Midseason, sour, large, red, slightly acid; flesh very tender, good quality, being the best variety of sour cherry grown. The best shipper of all sour, which with its wonderful carrying ability for long distance shipments always commands the highest market prices, either on the city markets or from the commercial canneries. Montmorency is famous in Wisconsin, Michigan, New York and West Virginia for canneries.

DYEHOUSE. Very early summer, ripening ten days prior to Early Richmond; medium size, sour, good quality, heavy bearer.

EARLY RICHMOND. Early summer. Very sour, medium size, bright red, valuable and popular cherries, unsurpassed for cooking purposes. A good old variety which yields such marvelously heavy crops. Tree is the most hardy of all cherries, being uninjured by the coldest winters; slender in growth and very productive.

ENGLISH MORELLO. Midseason. Fruit sour, large elongated almost blackish red when fully ripe; very rich, acid, juicy and good.

Plums—Apricots—Nectarines

Extra Good Fruits for the Home Orchard

PLUMS

Plums are easy to grow, few people realize how easy it is to grow luscious, edible plums. They thrive and bear readily on most any land that is not too wet. Below is a selected list of varieties chosen for their size, appearance and flavor of their fruit, as well as hardiness and strong growing characteristics of the trees.

We have some exceptionally good plum trees to offer this year, all budded on whole root seedlings. With our low prices it will pay you to set out a few.

ABUNDANCE. Early, large, lemon-yellow, hardy, productive.

BURBANK. Midseason, large cherry red with thin lilac bloom. Flesh amber-yellow with rich sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

BRADSHAW. Midseason, large, dark violet-red, juicy, excellent flavor. One of the best for home orchards.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

ITALIAN PRUNE (Fellenberg). Late, medium size, dark purple, delicious. Fine for drying.

RED JUNE. Very early, medium size, deep vermilion-red. The best early variety.

SHROPSHIRE DAMSON. Late, medium size, dark purple, the popular old-fashioned Damson variety.

WICKSON. Late, very large, deep maroon-red covered with white bloom, flesh firm, meaty, yellow, rich, aromatic, cling.

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange with red blush; very juicy and sweet flavor. A large prolific bearer that will withstand adverse weather conditions. This variety deserves greater popularity.

EARLY GOLDEN. Small, pale orange in color, good flavor.

SUPERB. Medium size, light salmon-colored fruit. Hardy.

(Can be assorted Plums, Apricots, Nectarines or other Fruit Trees).

**BRADSHAW—
A Fine Canning
Variety**

NECTARINES

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

BOSTON. Bright yellow, red cheek; flesh yellow.

QUETTA. One of the newer nectarines that is being tested for commercial possibilities in the East. Fruit large, greenish white, splashed with red. Plant some out this year. **10c per tree extra.**

RED ROMAN. Greenish yellow, red cheek, flesh golden.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

BARTLETT

Pear for Canning Eating Market

BARTLETT
Best Pear Grown, always popular;
most popular variety

For home, for canning, for market, the best. A golden-colored Pear, with red cheek. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich, juicy. One of finest Pears that grows to eat raw.

Bears Early. Bartlett trees bear early, produce enormous crops, and are not subject to damage by insects and disease as other sorts.

Fancy Fruits Bring Highest Prices. Bartlett Pears always sell on the market even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be carefully sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples.

Other Pear Varieties

ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer.

BUERRE BOSC (Bosc). Large, size, fine quality, brings highest market prices.

CLAPP'S FAVORITE (Clapp). Very large, long, lemon-yellow with brown dots; richly flushed with russet-red on sunny side; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Thrives where other varieties fail. Tree hardy and very productive.

SECKEL. A beautiful and delicious little Pear known everywhere and an old-time favorite; skin yellowish brown with deep brownish red cheek; flesh very fine grained, sweet; one of the richest and highest flavored Pears grown. Tree rather dwarf, slow, but stout and erect, bears prolific crops.

DUCHESS (Duchess d'Angouleme). Very large, dull greenish yellow, spotted russet, flesh white, rich, buttery, juicy; excellent flavor. Tree somewhat dwarf, but a most dependable bearer. Profitable commercial Pear.

KIEFFER. Fruit large to very large; skin yellow, with light vermilion cheek. Flesh brittle, very juicy. Most popular canning Pear. Keeps well.

SHELDON. Medium size, flesh slightly coarse, melting, juicy.

WORDEN-SECKEL. An offspring of Seckel, equal in quality and productiveness, but decidedly superior in size, color, and form.

PRICES OF HARRISONS' PEAR TREES

NUT TREES

Are Ornamental and Profitable

PAPER SHELL PECAN. Medium to large nuts; oblong, thin shell, rich flavor. Good grower. The best type Pecan grown. 2 to 3 feet, \$1.25 each; 2 for \$2.00.

BLACK WALNUT (Juglans nigra). Rapid grower, spreading branches, large, delicious nuts, prolific bearer. 6 to 8 feet, \$2.00 each.

ENGLISH WALNUT (Juglans regia). Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. Most popular walnut grown. 2 to 3 feet, \$1.50 each; 2 for \$2.75.

QUINCES

Sought after for canning, preserving and for jellies. It gives a delicious flavor to the Apple, cooking in any manner. Plant ten to sixteen feet apart on deep, rich soil.

ORANGE. Late, large, bright yellow, excellent flavor, productive, and rarely fails to produce a crop. Best canning variety. Popular Wayne County (New York) strain. 4 to 5 ft., \$1.00 each.

FIGS

BROWN TURKEY. Medium to large size; copper brown skin, flesh white. Not hardy North. 2 to 3 ft., 75c each; 10 for \$6.50.

Buy "Bud Selected" Super-Strain Fruit Trees, Best Grown

ASPARAGUS

is a profitable crop

Being the first vegetable to come in the spring it always brings a high price on the markets. Stocks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous Mary Washington—Plant This Pedigreed Strain

There is no variety of Asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower which means many cuttings.

How to Grow Asparagus

Asparagus is easy to grow and should be in every garden because it thrives everywhere. Spring is the best time to plant as soon as the soil can be worked into good condition. Dig or plow a trench ten inches deep, place the plants in this trench and spread the roots, then cover with two inches of soil, when the new growth comes through fill in two more inches and continue until trench is full. For garden culture Asparagus may be planted eighteen inches apart each way, but for field culture plant two feet apart in the row with the rows four feet apart. Cultivate and hoe frequently.

Commercial Planters Prefer 1-Year Roots

The majority of commercial growers of asparagus prefer 1-year roots, they cost less and are much easier to plant. By liberal application of fertilizer and manure heavy yields of asparagus can be had after one or two years.

Mary Washington Asparagus
Sensational new variety which has greatly outclassed all others

Plant Harrisons' Pedigreed Roots

We have made a specialty of growing asparagus roots for over 40 years and have supplied plants for some of the finest asparagus beds in the country. The growing, handling, and shipping of millions of asparagus roots has taught us many things and today we are in position to supply you with quality roots at low cost. All our crowns were grown direct from the original strain of seed.

We Recommend Two-Year Roots for Home Gardens

Experience has taught us that 2-year roots give better results for garden planting than 1-year roots. The 2-year roots are much larger and have more food stored up which causes them to make more growth and yield larger crops of asparagus sooner than the 1-year roots.

The Giant Latham Red Raspberry

A Blue Ribbon Winner for the Home and Commercial Grower . . . A first grade Raspberry past the experimental stage . . . It simply cannot be equalled.

LATHAM

The sensational yields of this variety have attracted the attention of growers everywhere, and everyone who has given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

Cumberland

MOST POPULAR BLACK RASPBERRY

Midseason to late. This is the most popular Blackcap at the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A Big Crop Every Year

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Other Black Raspberries

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

PLUM FARMER. Very popular with many growers on account of its earliness of ripening. Plum Farmer has the ability to mature its customary big yield in a very short time, generally 15 to 20 days. The plants are healthy, canes strong growing. Ripens a week earlier than Cumberland.

Other Red Raspberries

CHIEF. A new Red Raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large excellent quality berries that will withstand shipments to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

ELDORADO

Eldorado - for Quality Blackberries

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among Blackberries. Every good quality possessed by other Blackberries is emphasized in Eldorado. Its berries are of enormous size, shiny jet black, sweet pleasing flavor.

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days, and can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

Other Blackberries

ALFRED. A comparatively new Blackberry that has given good results wherever planted. Immense sized berries practically coreless, heavy producers and very hardy. Worthy new commercial variety, ripens over a long period of time.

EARLY HARVEST. Black, very early, excellent quality, good size, ripens 10 days to two weeks before any other. Favorite commercial berry in Middle Atlantic States.

MERSEREAU. Brilliant black, late, very large berries, extra good quality. Heavy producer, extra strong grower.

Dewberries Train Them on Your Back Fence

LUCRETIA. Long, mammoth Blackberries, recognized by horticulturists everywhere as the leading variety. Each plump berry is a morsel of delight. Incomparably better in every way than any Blackberry you ever have seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. This, together with the fact that they are unquestionably the finest looking berry of their kind and of such big uniform size makes them topnotchers on price in any market. For real profits, be sure to plant Lucretia. For home and commercial growing, Lucretia is the only variety of importance.

GRAPES

Always Bear

Profitable Vineyards Planted with Harrisons'—They Tell the Story of Success Immediately They Are Planted.

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

Growing Grapes Profitably

The increasing demand for grape juice and other extracts makes this a big money crop for the farmers. Get your vineyard started now and be ready for the increased demand for grapes. For commercial vineyard Concord is by far the best.

Concord - America's Favorite

It adapts itself to varying conditions and is grown in most every State in the Union. Large compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

EXCEPTIONALLY HEAVY YIELDS

Concord is a very vigorous grower, hardy and very productive. It will live and grow and bear large crops of fine quality in almost every section of the United States. It ripens during midseason and is rated as the best money-making commercial variety. For home use it is unsurpassed by any other variety.

Other Varieties

AGAWAM. Large, dark red or brown berries, thick skin, aromatic flavor. The vine is a strong rank grower, hardy and productive. Ripens with Concord.

CATAWBA. Large bunches of dark red berries, flesh pulpy with rich vinous flavor. Best quality for table use. Late.

DELAWARE. Bunches medium size, full of large berries, which are sweet and of extra good quality. Late.

MOORE'S EARLY. Extremely dark purple, almost black. Bunches medium size, but berries are large. Flavor and quality are very much like Concord but ripens much earlier.

NIAGARA. The best of the standard, light colored grapes. Bunches of large greenish white berries, changing to a pale yellow when fully ripe. Ripens about the same time as Concord or a little earlier.

WORDEN. Large bunches of black colored berries, very highly flavored and of large size, excellent for table use. Ripens five to ten days earlier than Concord.

STRAWBERRIES PAY

Harrisons' Plants Give Big Yields of Fancy Fruits

Dorsett

Most Outstanding Early Strawberry Ever Introduced

A product of the master plant breeders of the U. S. Dept. of Agriculture. Although only introduced a few years it has been widely planted in every Strawberry producing region in the country and proven to be an outstanding variety. Ripens same time as Premier.

Large Fruit — Vigorous Grower — Heavy Crops

Dorsett berries average large size, considerably larger than the Premier, in fact their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries, far superior to any other variety ever introduced.

Good Shipper — A Proven Profit Maker

Firm berries mean a good shipper, and Dorsett has the ability to stand up when shipped long distances. This variety has a superb quality which is equaled only by Fairfax. Better quality means bigger market.

Premier — King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yields. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home garden, local market, or for shipping moderate distances it has outclassed all the older varieties.

PREMIER

DORSETT—
The new champion of Strawberry producing sections

Fairfax

Dependable New Early Variety

Originated by the U. S. Department of Agriculture, and is destined to become another favorite berry. Those who have had the privilege of eating this berry are enthusiastic about it and say its eating qualities are far superior to any other Strawberry. Ripens same time as Premier.

Produces Bumper Crops

Fairfax is a heavy plant maker and produces bumper crops of large berries. It is one of the most productive Strawberries grown, and is establishing a record-breaking sale in the markets.

Supreme in Quality

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

Other Early Varieties

BLAKEMORE. It has been thoroughly tested in nearly all the Strawberry producing centers, and is rated as "A Winner". Blakemore is a cross between Premier and Missionary. We believe it is the coming early berry to plant in those sections which are distant from the markets.

SENATOR DUNLAP. Big, uniformly shaped berries of handsome, dark red color. Suitable for home use or market.

Quality and Satisfaction

Harrisons' Strawberry Plants

CATSKILL

CHESAPEAKE

BIG JOE—*Ideal Midseason*

It is a worthy companion for Dorsett, Fairfax and Premier, the best early berries, and Chesapeake the best late. When grown for local or nearby markets Big Joe is one of the best money-makers. Commands top market prices.

Large Yield—Fancy Fruit

Big Joe is a heavy producer of large brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring.

CATSKILL for *Fancy Fruit*

It Climaxes All Midseason Varieties

This remarkable new variety is a scientific cross between Premier and Marshall originated by the New York Experiment Station. During the past few years it has been thoroughly tested in most of the eastern states and growers are highly enthusiastic about it. It ranks with Premier in regards to its adaptability over a wide area.

Vigorous Grower—Highly Productive

Catskill is a very vigorous grower and produces well-matted beds of healthy plants. In production of berries it ranks at the top of the list. One grower in our section picked over 32,000 quarts off three acres. With yields like this it is sure that the grower will make large profits.

Large Attractive Berries

The berries of the Catskill are large to very large size; they average just as large as the well known Big Joe, but are produced in much larger quantity. The color is somewhat lighter than Big Joe, but the dark green cap makes it more attractive in its package. The quality of the berry is very good, much superior to other sorts in its season.

Large Profit Maker

We advise every grower to try out the Catskill and see just how it performs on his own particular soil. We believe this new variety will replace all the older midseason varieties after it gets better known. With its tremendous yield of fancy fruits the grower who plants Catskill will make a good profit from his berry crop.

CHESAPEAKE—*Favorite Late*

The Favorite Late Berry

All growers seem to make money on this variety, especially when grown under conditions suitable for it. Chesapeake grows to perfection on most any highly manured soil.

Very Large Berries of Supreme Quality

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting.

Strawberry Patch Collection No. 320

Premier, Fairfax, Big Joe, Chesapeake, Everbearing
Mastodon—50 of each variety—250 plants in all,

\$1.55

NOTE.—All the varieties of strawberries which we offer are self-fruitful and do not require other varieties to pollinate them.

Giant Everbearing MASTODON

A Triple Yield

1. Plant this Spring, 1937.
2. Pick 1st Crop July to Frost 1937.
3. Pick 2nd Crop June 1938.
4. Pick 3rd Crop August to Frost 1938.

3 REAL CROPS — 3 BIG PROFITS
Bears in 90 days, and too it's the best Family Garden Strawberry.

Loads of Big Berries in 90 Days

Unlike the other varieties Mastodon begins to bear big luscious berries three months after planting and bears three big crops in eighteen months. Customers have reported yields as high as three quarts per plant the first fall.

Why Wait a Whole Year

Plant Mastodon this spring and grow your own berries this summer and fall instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will always bring top prices.

MASTODON

Late Strawberries

AROMA. Clean, healthy, hardy growing plants, does well on most soils. Fruit large, deep red, excellent quality for home use or market.

GANDY. The favorite late berry in many localities. Large size and handsome appearance make it command highest prices on the market. Not quite as productive as some of the other berries, but its appearance and quality offset this. Good for either home use or commercial planting.

WM. BELT. An extra good quality late berry for home use or market. Its flavor is extraordinarily good, the berries are medium to large size, ideal for home use.

GEM—Everbearer

Quick Profits with Gem

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roadside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

REMEMBER! Houses are Cold and Uninviting Until the Marvel of Growing Things Transforms Them Into Real Homes

Nursery Stock a Good Investment

Is there any other thing about your home that grows in value, interest and beauty each succeeding year like trees and plants? Most other things are wearing out with use and age and constantly depreciating in value. That is why we say our nursery stock is a permanent and accumulative investment. What is that shade tree that cost you two or three dollars a few years ago now worth to your place? If you are contemplating a planting, not for years have you had such an unusual opportunity to secure plants of Harrison's quality at such low prices.

Quality Stock at Lowest Prices

With one of the finest growing seasons and prices lower than in years, landscape architects and garden lovers are taking advantage of the "America Beautiful" spirit by purchasing their planting material now.

As in all buying, it pays to know what you are getting in buying nursery stock—you can't afford to take chances. When you buy from Harrison's Nurseries you know that a strong established organization with over fifty successful years of experience is behind every transaction. Harrison's stand back of the quality of every plant they send out.

2 to 3 ft.	.55	1.50	2.70

These named Lilacs are marvels of beauty and elegance, far superior to the older varieties. The following varieties are considered to be the very best of their respective colors.

BELLE DE NANCY. Satiny rose-colored flowers in large clusters.

CHARLES X. Single, purplish red flowers.

COMMON PURPLE LILAC. Old-fashioned variety so familiar in old gardens.

HUGO KOSTER. Purple flowers, best one of all purple Lilacs.

LUDWIG SPAETH. Single, very rich dark purplish red.

MADAME ABEL CHATENAY. Double white.

MARLEYENSIS. Red.

MICHAEL BUCHNER. Dwarf, double, beautiful trusses of pale lilac color.

PERSIAN PURPLE LILAC (Syringa persica). A tall-growing shrub with slender branches; bloom in May and June.

PRESIDENT GREY. Double, bright blue.

ROTHOMAGENSIS. Dark red flowers in large panicles.

RUBRA DE MARLEY. Single flowers of light red.

HYBRID LILAC

HALL'S JAPAN HONEYSUCKLE

VINES That Cling and Creep

ENGLISH IVY (Hedera helix). The most popular evergreen vine; large, deep, green glossy foliage. Excellent for covering walls. Useful for shady locations. **2-year plants, 25c each; 3 for 65c; 10 for \$1.80.**

BOSTON or JAPANESE IVY (Ampelopsis veitchi). A popular climber, clinging firmly to brick, stone or other material. Deep, glossy, green, ivy-shaped foliage which turns to cream and gold color in autumn. **Strong 2-year plants, 30c each; 3 for 75c; 10 for \$2.25.**

CHINESE WISTERIA. A rampant growing, clinging vine. Blue flowers in large drooping clusters, during May and June. **Strong 2-year plants, 40c each; 3 for \$1.05; 10 for \$3.00.**

HALL'S JAPANESE HONEYSUCKLE. Dark, glossy green foliage; fragrant flowers from July to fall. **Strong 2-year plants, 25c each; 3 for 65c; 10 for \$1.80.**

SWEET AUTUMN CLEMATIS (Clematis paniculata). A splendid climber for covering porches and trellises. Flowers snowy white; produced in immense quantities during late summer and autumn. **Strong 2-year plants, 40c each; 3 for \$1.05; 10 for \$3.00.**

**BOSTON IVY is the Best Vine for Covering Masonry
Without Support**

Harrisons' Lifetime Shrubs To Beautify Your Home

Everywhere people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well-kept lawn planted to shrubs and flowers. How proud you are of your lovely yard.

FIRETHORN. A beautiful shrub covered with a profusion of white flowers in early spring, followed by bright orange berries which hang on all winter. $1\frac{1}{2}$ to 2 feet, \$1.00 each; 2 to 3 feet, \$1.50 each; 3 to 4 feet, \$2.00 each.

HYDRANGEA, PINK or BLUE (Hydrangea otaksa). Old favorite Southern Hydrangea. When winters are severe we suggest heeling in. Large balls of pink or blue flowers; very attractive large leaves. Color depends on acidity of soil. 2-year field-grown, 60c each; 3 for \$1.30.

HYDRANGEA PEE GEE (Hydrangea paniculata grandiflora). Large flowers; first snowy white, then pink changing to reddish bronze in the fall. Blooms from middle of summer until fall. $1\frac{1}{2}$ to 2 feet, 40c each; 3 for \$1.05; 2 to 3 feet, 50c each; 3 for \$1.35.

NANDINA DOMESTICA. A beautiful upright growing shrub with numerous reed-like stems springing from the same root. Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long panicles are followed by masses of small

bright red berries which are retained all winter. $1\frac{1}{2}$ to 2 feet, 75c each; 2 to 3 feet, \$1.25 each.

CREPE MYRTLE (Lagerstroemia indica). Small, green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. $1\frac{1}{2}$ to 2 feet, \$1.00 each; 3 for \$2.50; 2 to 3 feet, \$1.50 each; 3 for \$3.75.

SNOWBALL FRAGRANT (Viburnum carlesii). The fragrant, spicy flowers are borne in May and June. Buds before opening are an attractive pink, developing to pure white flowers. 12 to 15 inch, 75c each; 3 for \$1.80.

SPIREA VAN HOUTTEI. The most popular shrub. It is valuable as a specimen in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows 6 to 8 feet and is unsurpassed in gracefulness and beauty. $1\frac{1}{2}$ to 2 ft., 20c each; 3 for 50c. 2 to 3 ft., 25c each; 3 for 65c. See page 47 for quantity prices.

TAMARISK AFRICANA. Feathery, gray-green foliage; effective near water. Thrives at seashore. 30c each; 3 for 75c.

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. $1\frac{1}{2}$ to 2 ft., 40c each; 3 for \$1.05. 2 to 3 ft., 50c each; 3 for \$1.35.

PUSSY WILLOW (Salix caprea). A very interesting shrub or dwarf tree, producing many furlike catkins, 1 to 2 inches long, up and down upright stems. Quite often these pearl-gray catkins have a touch of pink, and are delightful in winter bouquets. The branches can be cut any time in December, January or February; then, if placed indoors in a vase of water, they will quickly burst forth into bloom. Remove from the water when in full bloom, and they will retain their loveliness for months. 6 to 10 feet at maturity. 2 to 3 ft., 30c each; 3 for 75c; 10 for \$2.00. 3 to 4 ft., 40c each; 3 for \$1.05; 10 for \$3.00.

WEIGELA EVA RATHKE in Foundation Planting

ALTHEA—Rose of Sharon

PINK WEIGELA

JAPANESE FLOWERING QUINCE

DEUTZIA, Pride of Rochester

America's Favorite Flowering Shrubs

Outstanding in Fragrance and Beauty

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). A tall shrub with upright or slightly spreading branches. The double and single flowers are formed in varying colors. We can supply double pink, double red, double white, and double white with crimson center.

BUTTERFLY BUSH (*Buddleia magnifica*). Bushes grow from 3 to 4 ft. tall and are crowned with long racemes of lilac-colored flowers in midsummer. Its honeyed fragrance attracts the butterflies. Tops die back during winter.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, which are slightly tinged with rose, appear in mid-June.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of our best early blooming shrubs.

GOLDEN TWIG DOGWOOD (*Cornus stolonifera flaviramea*). Dwarf grower, branches are golden in color; most attractive in winter.

GARLAND or SWEET MOCK ORANGE (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white fragrant flowers.

JAPANESE FLOWERING QUINCE (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs.

JAPANESE BUSH HONEYSUCKLE (*Lonicera morrowi*). Early white flowers in June, followed by red berries.

TARTARIAN HONEYSUCKLE (*Lonicera tartarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. Endures partial shade. We offer pink and white varieties.

RED BRANCHED or CORAL DOGWOOD (*Cornus alba sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

PINK WEIGELA (*Weigela rosea*). The most popular Weigela sold today. Its delicate, pink, bell-shaped flowers are borne in great profusion along arching branches.

AZALEA—A Miracle of Loveliness

Every Woman's Heart Has a Place for this "Prince of the Orient"

Azalea Hinodegiri

DEEP CORAL-PINK FLOWERS

Plant Azalea hinodegiri this spring and a few weeks after planting it will be a blaze of color. No other hardy evergreen plant can compare with the color produced by this remarkable variety.

DEEP CORAL BLOSSOMS—HOLLY-LIKE EVERGREEN FOLIAGE

Everyone is highly enthusiastic about its color, in comparison with other Azalea varieties it is far superior. In addition to its superb bloom it also has evergreen foliage which makes it so attractive when it is out of bloom.

A DWARF GROWER—GOOD FOR SHRUB PLANTING

Azalea hinodegiri is a dwarf grower and is ideally suited for planting around the foundation of homes or adding color in front of evergreens. As each season goes by the plant gets larger and larger. More than one thousand flowers have been counted on a single plant.

AZALEA HINODEGIRI—A profusion of all-over deep coral-pink at blooming time

AZALEA AMOENA. A dense, dwarf-growing shrub with slender branches and semi-double flowers of a bright, rosy purple color. Blooms in early spring and retains its foliage all year.

AZALEA MACRANTHA. Large, single salmon-red flowers. Blooms very late in the season. A very compact, flat, quick grower with dark green, glossy leaves.

American

Boxwood

BUXUS SEMPERVIRENS

A BROTHER OF "YE OLDE ENGLISH" BOXWOOD

—It Grows Much Faster

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years this is the best variety to plant.

Holly Trees

AMERICAN HOLLY (Ilex opaca). The Christmas Holly. Its bright green, spiny leaves and brilliant red berries make it one of our handsomest plants. We offer the Howard strain grown from grafts. 12 to 18 inch, \$1.00 each; 18 to 24 inch, \$1.50 each; 2 to 3 feet, \$2.00 each.

JAPANESE HOLLY (Ilex crenata). A much branched evergreen shrub with oval crenate leaves. Clusters of black berries form during the fall. Makes a splendid specimen plant. We offer 2 types, small or large leaf. 12 to 15 inch, 75c each; 15 to 18 inch, \$1.00 each; 18 to 24 inch, \$1.50 each.

AMERICAN BOXWOOD

America's Favorite Evergreen Shrubs

They Live for Centuries

DWARF ENGLISH BOXWOOD

BUSH ARBUTUS (*Abelia grandiflora*). One of our most beautiful, popular and satisfactory Broad-Leaved Evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations. 1 to 1½ ft., 50c each; 3 for \$1.20; 6 for \$2.00. 1½ to 2 ft., 75c each; 3 for \$1.80; 6 for \$3.00.

COTONEASTER HORIZONTALIS. A low shrub with almost horizontal branches. Leaves dark green, pinkish white flowers followed by red berries. 15 to 18 inch, \$1.25 each; 3 for \$3.00. 18 to 24 inch, \$1.75 each; 3 for \$4.50.

SOUTHERN MAGNOLIA (*Magnolia grandifolia*). Greatest of all southern ornamental trees. Large, glossy leaves, handsome white flowers. 3 to 4 ft., \$2.00 each; 2 for \$3.50. 4 to 5 ft., \$2.75 each; 2 for \$5.00.

HOLLY LEAVED MAHONIA (*Mahonia aquifolium*). Bright, glossy green, holly-like leaves, turning rich red and bronze in autumn. Clustered racemes of attractive yellow flowers in spring. 18 to 24 inch, \$1.25 each; 2 for \$2.25.

LEATHERLEAF VIBURNUM (*Viburnum rhytidophyllum*). Large oblong, crinkled, deep green leaves. Flower yellowish white, berries deep red. 12 to 18 inch, 75c each; 2 for \$1.25.

MOUNTAIN LAUREL (*Kalmia latifolia*). Most effective in June, when the clusters of pink flowers open. Good foliage, likes shady locations. 2 to 3 ft., \$1.50 each; 3 for \$3.75; 6 for \$6.00.

Dwarf

English Boxwood

(*Buxus Sempervirens Suffruticosa*)

A widely known and popular form of dwarf boxwood. It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings, can be trimmed in various forms.

Easy to Grow

Dwarf English Boxwood is easy to grow, will thrive in most every type of soil. After this plant once becomes established it does not require any particular attention. It is practically immune from all diseases and insects. Can be planted in the full sunlight and semi-shady locations.

Large Specimen Plants Sell at High Prices

Dwarf English Boxwood has been called the "Century" plant due to its ability to live over a hundred years. A few years ago large plants sold for fabulous prices, many selling for hundreds of dollars.

PRICES OF DWARF ENGLISH BOXWOOD

	Each	3 Plants for	6 Plants for	10 Plants for
4 to 6 inch . . .	\$0.35	\$0.90	\$1.35	\$2.00

Take Advantage of Our **LIFETIME** Experience in Growing Evergreens

Decorative Evergreens

AMERICAN ARBOR-VITAE (*Thuja occidentalis*). Probably no evergreen is more admired than the American Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. This evergreen is easy to transplant and grows under adverse weather conditions.

CHINESE ARBOR-VITAE (*Thuja orientalis*). An attractive, upright evergreen, rapid grower with bright green foliage. When young it is compact and rather pyramidal in form. As it becomes older it assumes the habit of a rather loose-growing Red Cedar. Very useful for screening purposes because of its rapid growth.

PRICES of AMERICAN ARBOR-VITAE and CHINESE ARBOR-VITAE

	Each	3 for	6 for	10 for
15 to 18 inches	\$0.60	\$1.20	\$ 2.10	\$ 3.00

3 to 4 feet	1.75	3.75	6.90	10.00
4 to 5 feet	2.50	6.00	11.40	17.50

PYRAMIDAL ARBOR-VITAE (*Thuja occidentalis pyramidalis*). A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a home makes a superb showing. Our Pyramidal Arbor-Vitae are grown with extreme care and each one is a specimen.

Junipers That Excel

Handsome Pyramids of Silver-Blue and Purple-Bronze—Low Growing and Spreading Types, Superb on the Landscape

PFITZER'S JUNIPER (*Juniperus chinensis pfitzeriana*)

The most popular of all spreading evergreens. Its peculiarly graceful, distinctive manner, plus an unusually hardy nature, makes it particularly fascinating and desirable for foundation planting.

SAVIN JUNIPER (*Juniperus sabina*). Handsome, dark green foliage, spreading branches forming irregular vase-shaped bush. One of the most attractive spreading evergreens grown. The ideal plant to use for low foundation plantings. Can be kept trimmed to any desired height.

ANDORRA JUNIPER (*Juniperus communis depressa plumosa*). A low-spreading Juniper of an unusually good color. During spring and summer it is a bright green, turning to a rich purple-bronze color in fall and winter. Unusually good for planting along slopes and places where grass will not grow.

PRICES OF PFITZERS, SAVIN, AND ANDORRA JUNIPERS

4 to 5 feet	2.50	6.00	11.40	17.50

SPINY GREEK JUNIPER (*Juniperus excelsa stricta*). A tall grower of upright columnar habit and bluish green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees.

VIRGINIA BLUE JUNIPER. Broadly conical form and beautiful glaucous blue foliage make it one of the choicest evergreens.

CANNART JUNIPER (*Juniperus virginiana cannarti*). Handsome, compact columnar habit, rich dark green foliage and bluish, bloomy fruits.

MEYER JUNIPER. Handsome irregular growing type, foliage is thick, pointed and prickly and of a rich shining blue color that varies in intensity.

Retinosporas

Dainty and Feathery—So Picturesque in the Foundation or Rockery

JAPANESE PLUME-LIKE RETINOSPORA (*Retinospora plumosa*). A handsome evergreen from Japan, with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

JAPANESE GOLDEN PLUME-LIKE RETINOSPORA (*Retinospora plumosa aurea*). Golden yellow color throughout the summer, compact habit of growth, similar to the Japanese Plume-like Retinospora except in color. Makes an ideal background plant in foundation planting.

VEITCH'S JAPANESE RETINOSPORA (*Retinospora squarrosa veitchii*). Foliage silvery blue, feathery and dense, giving a soft woolly appearance. Broad pyramidal outline, can be kept to any height by trimming. One of the best Retinosporas.

JAPANESE HINOKI RETINOSPORA (*Retinospora obtusa*). Compact; pyramidal form, slightly drooping tips, beautiful dark green, flat foliage.

JAPANESE THREAD-LIKE RETINOSPORA (*Retinospora filifera*). Has long, stringy, droopy branches, bright green foliage; slow grower, very attractive.

Savin Juniper

MUGHO PINE

KOSTER'S BLUE SPRUCE

MUGHO DWARF PINE (*Pinus montana mughus*). A picturesque dwarf pine that forms a bushy, compact ball growing as broad as it does tall, seldom reaching a height of 4 feet. Foliage is dark, rich green; needles long and stiff.

15 to 18 inch spread	Each	3 for
18 to 24 inch spread	\$1.25	\$3.00
	1.75	4.50

COLORADO BLUE SPRUCE (*Picea pungens glauca*). Foliage blue and sage-green, that distinct color which is so rare in the East. As a specimen tree on the lawn or planted in groups in front of darker colored evergreens, the Blue Spruce is at its best. No planting of evergreens can be effective without this splendid variety.

12 to 15 inch	Each	2 for
15 to 18 inch	\$1.50	\$2.50
	2.00	3.50

KOSTER'S BLUE SPRUCE (*Picea pungens glauca kosteri*). Foliage intense silvery blue and very dense on the branch ends.

12 to 15 inch	Each	2 for
15 to 18 inch	\$2.00	\$3.50
	2.75	5.00

NORWAY SPRUCE (*Picea excelsa*). A lofty, noble tree of open, pyramidal habit. Very popular and effective in evergreen groups and one of the best evergreens for hedges. Its color is normally a good, rich, dark green, but when the new spring growth lights up the branches, the tips are silver-blue.

15 to 18 inches	Each	3 for	6 for	10 for
18 to 24 inches	\$0.60	\$1.20	\$2.10	\$3.00

	3.00	7.50	13.80	22.00

INDIAN CEDAR (*Cedrus deodara*). Feathery blue-green foliage; graceful drooping branches, tall growing. Ideal to use as a specimen in the corners of lawns. 4 to 5 ft., \$4.00 each; 2 for \$7.00.

Evergreens

That Are Not Expensive

Arbor-Vitae

GOLDSPIRE ARBOR-VITAE (*Thuja orientalis aurea conspicua*). Conical plant of fast growth; attractive golden hue, becoming bronze tipped in winter.

ELLWANGER'S or TOM THUMB ARBOR-VITAE (*Thuja occidentalis ellwangeriana*). A low, broad pyramidal form of evergreen with slender branches and feathery foliage.

SIBERIAN ARBOR-VITAE (*Thuja occidentalis sibirica*). Dark green color, broadly pyramidal, very hardy and holds green color during the winter.

LEE GOLDEN ARBOR-VITAE (*Thuja occidentalis elegantissima*). Compact, pyramidal plant; golden green foliage; dependable, hardy and vigorous in growth.

PRICES OF ABOVE ARBOR-VITAEs

15 to 18 inches, 75c each; 3 for \$1.65; 6 for \$3.00; 10 for \$4.50. 18 to 24 inches, \$1.10 each; 3 for \$2.40; 6 for \$4.20; 10 for \$6.00. 2 to 3 feet, \$1.50; 3 for \$3.75; 6 for \$6.90; 10 for \$10.00. 3 to 4 feet, \$2.25 each; 3 for \$5.25; 6 for \$9.90; 10 for \$15.00.

There is no finer windbreak than Norway Spruce

IRISH·YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

IRISH YEW—*Taxus baccata hibernica*

This Evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This Yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

	Each	3 for	10 for
12 to 15 inches	\$1.25	\$3.00	\$9.50
15 to 18 inches	1.50	3.75	12.00
18 to 21 inches	2.00	5.25	17.00
21 to 24 inches	2.75	7.50	24.00

IRISH YEW

JAPANESE SPREADING YEW (*Taxus cuspidata*). The beautiful Yew of moderate bushy growth, the upright spreading branches densely clothed with short leaves of dull green. Hardest of all Yews. Grows in semi-shady locations.

SPREADING ENGLISH YEW (*Taxus baccata repandens*). Low spreading, dwarf grower, with dark, glossy green foliage.

PRICES OF JAPANESE AND ENGLISH SPREADING YEWs

Superior Ornamental Trees

Friends of Mankind

Norway Maple

A Leader in Hard Maples

NORWAY MAPLE
Fine for Lawn and Street Planting

PIN OAK (*Quercus palustris*). The daintiest and most graceful of the oaks, with deeply cut, bright, fresh green foliage; beautiful autumn effect. A very graceful tree for the lawn and fine for streets or roadsides.

SWEET GUM (*Liquidambar styraciflua*). A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

CHINESE ELM (*Ulmus pumila*). This tree is of recent introduction in this country. It is a very rapid grower, typical Elm-like foliage, adaptable to most every kind of soil and condition. It develops into a splendid shade tree, its vigorous growth making it very desirable where quick shade is desired. Order early as our stock on this variety is somewhat limited.

MOLINE ELM. Grows into a dense conical specimen.

EUROPEAN MOUNTAIN ASH (*Sorbus aucuparia*). Valuable for a small lawn; orange-scarlet berries.

PIN OAK—Lives for Generations

Harrisons' Prices are Still Low

ORIENTAL PLANE

Harrisons' Superior Shade Trees

AMERICAN ELM

Oriental Plane, Silver Maple, American Elm Popular Trees from Harrisons'

ORIENTAL PLANE (*Platanus orientalis*). A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many favorable merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America.

SILVER MAPLE (*Acer dasycarpum*). The name comes from the color of leaves. Underneath, these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple, and probably faster than that of any other shade tree. Branches are slim and dainty rather than heavy, and the form of growth is spreading. Gets very large eventually—as high as 120 feet sometimes—and does well over nearly all the United States. Makes splendid quick screens or quick shade. On streets and in parks is extensively planted, and is very fine.

AMERICAN ELM (*Ulmus americana*). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

AMERICAN PLANE (*Platanus occidentalis*). A very rapid growing tree for yard and street planting. The bark is grayish green and peels off during the winter. Not as desirable as the Oriental Plane, but is a much more rapid grower.
