SPECIALIST IN GROWING
HIGH QUALITY—SUPERIOR STRAINS—EARLIEST TO BEAR
TRUE-TO-NAME FRUIT TREES FOR SEVENTY-THREE YEARS
PLANT WITH
HARRISONS' BUD SELECTED SUPER STRAIN FRUIT TREES

IT'S YOUR OPPORTUNITY TO PLANT THE BEST THERE IS IN FRUITS AT LOW PRICES

GET YOUR ORDER IN EARLY. Growers with a vision to the future should capitalize now by planting new orchards. You get the biggest dollar's worth from Harrisons', both in quality and price.

FACTS WORTH READING ABOUT

ALIVE HEALTHY FRUIT-BEARING TREES DEPEND ON THE HEREDITY OF YOUR TREES

In the summer and early fall of each year, while fruit was on the trees, the utmost care was exercised in selecting the new "budding stock" from extra, vigorous, bearing trees showing superior strains with extra-heavy bearing habits for the young Harrison fruit trees developing in the nursery.

YOU PAY NO MORE FOR HARRISONS' "BUD-SELECTED" TREES

The "bud-selection" method to propagate is very expensive—but whatever the expense they are the trees that give satisfaction.

HARRISONS' "BUD STRAINS"

Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, being the highest coloring of fruit, with extra-heavy bearing habits, has made the greatest contribution in directing and fixing the characteristics of the yield: of perfecting color; increasing the size of the fruits and the volume, as well as regularity of the crop.

FINES QUALITY FRUIT TREES ARE PROPAGATED FROM BEARING ORCHARDS

If fruit trees are continuously propagated from the bearing rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate—and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. Nothing can compare with our scientific method of "bud selection"—it always gives complete satisfaction.

GROWN ON "BRINK" OF ATLANTIC OCEAN WITHSTANDS MANY CLIMATIC CHANGES

Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra-heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruitgrowing section of the United States.

PLANT LARGE SIZE FRUIT Trees for QUICK RESULTS
LET'S GIVE THE CONSUMER A TREE-RIPENED PEACH
Roadside Marketing A GOOD SIDELINE

A sure and economical way to satisfy your customers with tree
ripened fruit for fresh eating, table use and home canning as well
as fresh freezing.

Harrisons' Super Selected Trees
with their unusual substantial root system, are
proving again and again that "bud selected" strains spell yearly profits to orchardists and
commercial planters...

HALE HARRISON BRILLIANT PEACH
Has "EYE and TASTE" Appeal.
"IT IS THE BEST".

Many growers also sell apples, pears, plums,
strawberries, cherries, apricot & nectarines on
their roadside markets.

Roadside fruit stand with a small orchard will make a much
higher net cash profit, than generally a large size farm.

A GENEROUS SUPPLY OF PEACHES CAN BE MAINTAINED OVER A 12 WEEKS PERIOD BY PLANTING HARRISONS' SUPERIOR SELECTED VARIETIES.
HALE HARRISON

U.S. Plant Patent 814—BRILLIANT—PEACH
PLANTED IN 42 STATES AND CANADA.
DESCRIPTION OF TREE HABITS AND FRUITING CHARACTERISTICS

Tree: Large to medium. Vigorous and rapid growth. Leaves and other parts of the growth are not noticeably affected by peach leaf curl. Very productive, bearing on an early date and carrying and maturing a good of fruit. Fruit size large, with a firm, luscious, red flesh. Ripens early, being 20 days or more before the ordinary Elberta. On an Elberta tree of a similar size, nice less pruning is required.

Trunk: Grows to medium. The wood is tough and not brittle and has excellent bearing. Will grow to considerable size.

Branches: Strong to medium. Good growth. The wood is tough and medium to hard, grows with a good spread, and is resistant to breakage.

Leaves: The foliage as compared to the Elberta is darker and longer. The leaves are rich dark green and average one inch longer and one inch wider than those from the Elberta. The leaves are greenish 10 to 12 inches in length. The leaflets are 1 to 1 1/2 inches in length, have smooth, oblong, pointed, and acuminate ends.

Flower buds: The buds and blooms are more resistant to frost and freeze than those from the Elberta. When growing the Elberta in color and conformation but are somewhat deeper in shade.

Resistance to: Brown rot—excellent. Experimental indicates that when properly watered and pruned, the tree is not subject to brown rot. A good grade of peach is obtained.

Fruit: Large, from 2 1/2 to 3 inches in diameter, oval to ellipsoid. Color yellow with blush and blossoms of red color. Quite attractive. The fruit is large, with russeting and shade. Prominent, slight, green, yellow, and white skin. Stem end narrow, with slight lenticel. Stem end and suture line on the entire crust ripen evenly. Fruit throughout the tree and tree are uniformly large, even though pruning and fruit thinning were light. The fruit ripens in the Elberta season but will remain on the tree at a more mature stage for a longer period than will the Elberta.

Size: Uniform. Larger than the Elberta and varies very little, irrespective of heavy cropping.

Form: Grows somewhat elongated, oval to ellipsoid.

Skin Color: Brilliant carnelian red almost completely covering a golden yellow ground color, becoming a shade in the interior of the tree. Many of 6 inches in size.

Tendency to split: Does not develop an incline to split. This eliminates the possibility of the bitter flavor frequently found in the Elberta peach.

Use: Commercial market, local, dessert, canning.

Keeping Quality: Excellent.

Resistance to: Brown rot—excellent. Indicates that when properly watered and pruned, the tree is not subject to brown rot. A good grade of peach is obtained.

Shipping Quality: Ships well. Bushel baskets of the fruit have been shipped by express, uniced, to various states, and have arrived in perfect condition. Baskets of the fruit have been shipped parcel post to various states and have been delivered in perfect condition.

HARRISON GROWN FRUIT TREES IN WORCESTER COUNTY, MARYLAND, ARE CERTIFIED BY THE UNITED STATES DEPARTMENT OF AGRICULTURE TO BE "FREE OF VIRUS DISEASES." WE SHIP TO ALL OF THE 48 STATES AND CANADA.
**The Peach of the Future**

**HALE HARRISON**

U. S. Patented BRILLIANT No. 814

**Sensational! New! Colossal!**

Yellow freestone ripening during midseason 3 to 4 days earlier than Elberta. The fruit is nearly fuzzless and has a brilliant cardinal red almost completely covering a golden yellow ground color even when growing in shade in the interior of the tree. Fruit throughout the tree is uniformly large even when unpruned or unthinned. Tree is large, vigorous and rapid grower. Self pollinating, it bears tremendous crops year after year. Very hardy in bud and blossom and highly resistant to brown rot. Keeping qualities are excellent.

**FOR HOME OR COMMERCIAL ORCHARD**

Whether you are going to plant one tree for home fresh eating, canning or freezing or one thousand trees for a commercial orchard, we unhesitatingly recommend Hale Harrison Brilliant as the best peach to plant. It will give you more pleasure to eat or more profit in growing than any other peach known today.

**WILL REPLACE ELBERTA**

For many decades Elberta has been the standard peach of the world by which all peaches have been judged, tested and observed by leading peach authorities confirm our belief that the new sensational Hale Harrison Brilliant surpasses the Elberta in every way.

**OUTSELLS AND OUTBARES**

Hale Harrison Brilliant outclasses them all. It is really the one peach that does everything. Its beautiful attractive appearance, huge size, superior delicious flavor makes it have extraordinary favorable eye appeal, resulting in higher prices. This combine with its BUMPER crops, "Original tree has produced over twenty bushels a year" make it the outstanding moneymaker.

**WIDELY ADAPTED**

Hale Harrison Brilliant has been planted in forty-two states. Results from these plantings prove it is equally as adaptable to the far south as it is in central and western areas and it even produces highly satisfactorily in Canada and other northern peach sections.

**LONG PICKING SEASON**

One of the finest features of Hale Harrison Brilliant is its early coloring, the golden yellow ground color appears before it begins to ripen. This is the same peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its easy to color and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

**HARRISON'S AMAZING GUARANTEE**

Several years of testing in cooperation with leading Fruit authorities convince us as to the outstanding merits of Hale Harrison Brilliant that we can make the following guarantee. "Each and every Hale Harrison Brilliant is a true reproduction of the original strain, it will produce more satisfaction to you than any other peach variety that ripens during its season, on proper proof of failure to do this we will furnish you an equal number of peach trees of any other variety that you desire." 

Back of this guarantee are the resources of Harrison Brothers Nurseries with an enviable record of seventy-two years in the Nurseries and Orchard Business.

**Handsome, Brilliant Almost Fuzzless**

**GENUINE HALE HARRISON BRILLIANT PEACH TREES GROWN AND SOLD EXCLUSIVELY BY HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND.**
NEWEST VARIETIES' OF PEACHES

TRUE TO NAME

CORONET. Most popular very early ripening peach, CORONET—newest variety cross between Hale Haven and Dixired. Ripens 3 days earlier than Dixired and Jerseyland also week ahead of Redhaven. About three-quarters of peach, bright, attractive red blush over good yellow background color. Flesh is yellow, firm, smooth texture, good flavor, medium size, nearly Freestone. Introduced by U. S. Dept. of Agriculture as the ideal variety to plant in future orchards in place of Dixired.

REDCAP. Very new popular variety. Just introduced by U. S. Dept. of Agriculture. Cross between Southland and Dixired. Ripens one to two days earlier than Dixired, which it resembles. Attractive bright red blush covering three-fourths of medium sized, clingstone peach. Flesh is yellow, firm with good flavor. Recommend planting Redcap in place of Dixired.

CARDINAL. New variety, an offspring of Hale Haven, which ripens four days ahead of Dixired and week earlier than Red Bird. Attractive red blush over good yellow ground color, with smooth skin. Flesh is yellow, firm, clingstone, medium textured and good flavor. About size of Dixired, also in color, appearance and firmness. New variety just introduced by U. S. Dept of Agriculture with surprising popularity in the South.

HILAND. New variety cross between Southland, Hale and Hale Haven. Ripens two days earlier than Cardinal, also five days ahead of Dixired, being eighteen days earlier than Red Haven. Attractive red colored, flesh is yellow, fairly firm, clingstone, medium size, good flavor. Introduced by U. S. Dept of Agriculture.

TULIP. Very early. New variety originated by Missouri Fruit Experiment Station. Ripens at same time as Dixired and Redcap being six weeks earlier than Elberta. Medium to large size nearly round with good red color even before picking time, flesh, yellow, firm, fine texture, excellent flavor, free-stone. Stands shipping well.

SHINN'S DELICIOUS. A true mutation, being very early ripening budspur strain of Burbank July Elberta, U. S. Plant Patent #15, discovered by Mr. C. T. Shinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent, however, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Many growers say it is better than Starking Delicious peach U. S. plant patent #506.

RED CREST (N. J. 126). New, attractive, large, firm, yellow, freestone peach. Ripens seven days earlier than Elberta.

M. A. BLAKE (N. J. 117). New midseason peach. Medium to large size, good coloring, firm, yellow, freestone. Ripens four to five days earlier than Elberta.

GOLDRAY. See description on page 9.

RANGER. See description on page 10.

RED SKIN. See description on page 13.

N. J. 127. Promising, very early ripening, new variety, still to be named. Large size, bright red blush, yellow, ripens between Sunrise and Jerseyland.

KEYSTONE. Just introduced by U. S. Dept. of Agriculture. Cross by Newday and Southland. Ripens between Golden Jubilee and Tragem. Fruit is medium-size round, high red color with bright golden background color. Yellow flesh, firm, smooth texture, good flavor, freestone. Trees are vigorous and productive.

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name.

NEWEST VARIETIES OF PEACHES
TRUE-TO-NAME

ONCE PLANTED, HARRISON PEACH TREES TAKE ROOT AND DEVELOP
VERY RAPIDLY—THEY ARE QUALITY BRED, READY FOR EARLY
FRUITING.

POPPY. New, mid-season, cross between Frank and Hale Haven. Intro-
duced by Missouri Experiment Station. Yellow, freestone, large, fine
texture, and fine flavor. Ripens 8 to 10 days earlier than Elberta, which it resembles. Peach appears to be ripe a week or ten days before it actually reaches the hard ripe stage. Good shipper. Trees available for November 1957 planting.

SUNHAVEN. New variety just introduced by Mr. Stanley Johnston of the South Haven, Michigan Experiment Station. Cross Redhaven by J. H. Hale and Hale Haven. Ripens 10 days earlier than Redhaven, which it resembles in red color. Very early. Fruit is medium-large size, nearly round and uniform in shape. Skin color is much like Redhaven. Largely high bright red with enough bright golden background color for attractive appearance. Yellow flesh, fine-textured, firm, good flavor. Freestone when fully ripe but otherwise a partial cling. Trees hardy, large, vigorous and productive. 10c extra per tree. Available for November 1957 planting.

REDGLOBE. New, just introduced by U. S. Dept. of Agriculture. Early mid-season, yellow freestone, medium to large, bright red attractive red color. Firm, fine-textured flesh, good in flavor. Ripens about 16 days earlier than Elberta.

LATEROSE (N. J. 109). Late, white, freestone. Large, ripens 10 days later than Elberta. Excellent for home canning and freezing. Tree harder than Elberta.

LORING. New, mid-season, cross between Frank and Hale Haven. Intro-
duced by Missouri Experiment Station. Yellow, freestone, large, firm
peach. Ripens 10 days earlier than Elberta. Fruit most nearly resembles Golden Jubilee.

ALAMAR (U. S. Plant Patent 9301). New variety recently introduced. Late, yellow, freestone, skin yellow with very high red blush. Pit small. Excellent long distance shipper. Ripens about a week earlier than Rio Oso Gem, which it most nearly resembles. An excellent variety for commercial canning and freezing. 12c extra per tree. Available for November 1957 planting.

EARLY EAST (N. J. 134). Very early, cross between J. H. Hale, slappey
by Admiral Dewey Yellow, freestone when tree-ripe, medium to large,
firm, skin attractive red. It is hardy and productive. Ships well as
commercial peach. Ripens 10 days earlier than Golden Jubilee. Trees available for November 1957 planting.

RICHHAVEN. New variety just introduced by Mr. Stanley Johnston of the South Haven, Michigan Experiment Station. Cross Redhaven by J. H. Hale and Hale Haven. Ripens 2 to 3 days earlier than Hale Haven. Early mid-season. Fruit is large, nearly round and uniform in size and shape. Large bright red blush on area exposed to sun with stripes of red and gold for the background color. Very attractive in appearance. Yellow, freestone, unusual thick skin adds to the handling and shipping ability of the fruit. Tree hardy, vigorous and productive. 10c extra per tree. Available for November 1957 planting.

HARRISON'S—GROWERS OF THE BEST NEWEST VARIETIES
New! Exclusive! Sensational!

YELLOW FREESTONE

The World's Greatest Peach

The famous Rio Oso Gem Peach which has earned the greatest amount of favorable results. Any Peach introduced in a new district is first marketed as a Pacific the World's largest being a Patent and is registered. (Plant Patent No. 141,797) It has been proved in all Peach-growing districts in the United States and Canada, and has definitely proven itself to be the best and finest for commercial Peach. Ask any man who has tasted the Rio Oso Gem.

THE BEAUTIFUL GLORIFIED PEACH

The beautiful Peach has a bright, bright red color running around it. They are easy to eat whereas, they are easy to look at. U. S. Farm grade. The size of the Peach is always large, as many of these Peaches will run a pound or more in weight, and in many instances have been reported that the crop would average three-quarters pound per Peach. The flavor, texture, and red color in the cheek, along with an attractive orange-colored background, has earned it an enviable reputation that has been国家重点.

BEST FLavored COMMERCIAL PEACH

The unequaled flavor is better than that of J. H. Hose and Ebersta. The eating flavor makes it a very popular Peach for fresh eating. This rich flavor is retained when canned or preserved. You are assured of the leading canning Peach in California. Rio Oso Gem Peach which can be quick frozen and still retain its firm texture with its beautiful rich, golden yellow flesh and the same flavor as when picked. We have been named "Rio Oso-Gem" Peaches which were picked and processed on September 1, 1944 which were all holding up in excellent condition.

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety adds itself exceedingly well for shipments in refrig.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleeper, Round Hill, Virginia, wrote: "We have the land ready for the 500 Rio Oso-Gem peach trees. 5 to 6 feet for April, 1950. The fruit of the 2nd year's peach and we have had marvelous results, marketing that last year at $5.00 per bushel in spite of the low market price prevailing during the summer of 1949."

IDEAL FOR HOME ORCHARDS

Stays to ripen 7 to 10 days later than Elberta. Rio-Oso Gem is a very prolific bearer and dependable annual cropper.

NATION'S HIGHEST NET CASH MONEY-MAKER

RIO-OSO-GEM

DESIRED TO BE

America's Leading

Commercial Peach

Sample of RIO-OSO-GEM Grown in Harrison's Orchards at Berlin, Maryland. Sold only by Harrison's Nurseries in numerous states.

READ WHAT FELLOW GROWERS SAY

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peach. U. S. Plant Patent No. 64, from all over the United States, some of the typical remarks are from people such as Russell-Graham-Alderson Company, Forest City, Arkansas. We have heard from several of Harrisons' Rio-Oso-Gem Peach trees from which we have been harvesting the largest and prettiest Peaches I ever saw. We sold our Elberta Peaches, U. S. No. 1 grade at $2.25 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 21 4 inches and up which we sold at $4.00 per bushel. Mr. and Mrs. Forest City, Arkansas. Mr. E. H. Smith. Prop. Millcrest Orchard, Dover, Arkansas, writes: "This year's crop convinces me that the Rio-Oso-Gem. U. S. Plant Patent No. 64, is the very best Peach and has certainly proven such with me. Its have very fine qualities as a canner and people go wild about it... It always brings the highest prices for me."

Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years' experience that he has had was his first crop of Rio-Oso-Gem on 400 trees three years old, from which he picked during early September 254 bushels and which he sold at an average price of $5.00 per bushel at his farm, grossing him more than $1,600.00 from this very young orchard. He bought 620 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA'S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker of Stephen City, Virginia, in the famous Frederick County fruit section, was excepted only well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees which he picked during early September. From his 400 trees, three years old, he picked a 300 hectar crop for which he was offered $8.75 per bushel. Mr. E. R. Connor, a 100 more trees two years ago which had a few Peaches on them this summer. Connor states he wishes he had 5,000 Rio-Oso Gem Peach trees. U. S. Plant Patent No. 54 planted in his Orchard instead of 500.

RIO-OSO-GEM IS A "MUST" FOR EVERY GROWER

There are still big cash profits in Peaches, provided you grow the right varieties and in the near future you will see where the best and finest will be. This is the most extensively planted commercial Peach in America.

Prolific Bearer—RIO-OSO-GEM PEACH

Write Us About Your Planting Requirements. FOR LARGER QUANTITY, WRITE FOR SPECIAL PRICES.
Biggest Peach Tree Values in America

HERE’S A “LOAD” OF REASONS WHY HARRISONS’ PEACH TREES ARE BETTER

A—Our organization has over 70 years’ experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—Thousands of trees in orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

**DIXIRED.** Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor, prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

**DIXIGEM.** Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

**SUNRISE (N. J. 133).** Very early. Attractive, well colored, firm medium sized, yellow fleshed, semi-freestone peach. Ripens just after Dixired and a few days earlier than Red Bird.

**JERSEYLAND (N. J. 135)** — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

Plant Big Peach Trees
For Quickest and
Best Results

ERLY-RED-FRE—Very Early Large Peach, Commanding High Prices

**RED BIRD.** Bright glowing color—“red as fire”—on a background of creamy white. Handsome. Large—as large as Elberta. Ripens about 40 days before Elberta. Clingstone.

**GOLDRAY.** New, very early variety. Red-bud sport strain of Golden Jubilee. Ripens two weeks earlier than its parent and at the same time as Red Bird. It is a “Bud Mutation” discovered in the orchard of Mr. J. Roy Cunningham, Lancaster, South Carolina, a customer of Harrison’s. Identical in color, size, shape and fine flavor and delicious eating quality of Golden Jubilee, except that Goldray is semi-freestone.

**JUNE ELBERTA.** A big handsome red and gold Peach, highly colored, excellent quality and a dashy home early Peach.

HARRISONS’ HARDY PEACH TREES

We absolutely guarantee Harrison-grown Peach trees, variety for variety, to be as hardy or harder than trees grown in any locality north of us.

HARRISON—A Name in Trees You Can Trust
The Sensational

REDHAVEN

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 5 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone peach ever introduced. A cross between Halo-Haven and Kolhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Redens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

TRIOGEM (N. J. 70)

Developed by the Master Plant Breeders of New Jersey
MEDIAN TO LARGE, FIRM, ATTRACTIVE
Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh, freestone, smooth, nearly fuzzless like J. H. Halo, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hongs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

A REAL PROFIT MAKER

TRIOGEM has been fruited commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

RARITAN ROSE (N. J. 97). Extremely hardy, white flesh, nearly freestone, large size, high red color with good flavor. Ripens a few days earlier than Golden Jubilee. Excellent peach for home and local market.

GOLDEN JUBILEE. Early—Fruit bright deep yellow, medium to large size, oblong shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards. Also excellent for commercial orchards for nearby city shipments. It ripens about ten days earlier than Halo-Haven.

RANGER. A fine yellow freestone, ripening at same time or just after Golden Jubilee. Beautiful peach. Very hard, new variety, bears big crops when some other varieties under same weather conditions have light yields. Introduced by U. S. Dept. of Agriculture.

TRIOGEM PEACH—Bears Large Crops

SOUTH HAVEN. Early mid-season, yellow, large, handsome, deep yellow with red cheek, freestone. Peaches of uniform size, delicate in flavor. Ripens 15 to 18 days ahead of Elberta. Trees are very hardy and productive. Adopted to cold climates and produces bumper crops in mild climates.

HERE IS THE HIGHLY FLAVORED EARLY WHITE FREESTONE PEACH YOU HAVE BEEN LOOKING FOR

CUMBERLAND

An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.
HARRISONS' Peaches
ARE A COLLECTION
OF THE WORLD'S BEST

HALE-HAVEN

Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine-flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freezing.

BURLINGTON JULY ELBERTA

The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever planted. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overspilled with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper, large size, a sensational money maker. July Elberta is known by different names, such as Burnett Elberta, Burbank July Elberta, Kim Elberta, Burbank Elberta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elberta (Original Strain).

AMBER GEM CLING

FAIRHAVEN

Midseason, yellow freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens 7 days after Golden Jubilee.

CHAMPION

A Good Home Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

SUNLIGHT

(N. J. 82.) A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it ideal for market. It is a medium size, firm freestone Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish, thick-skinned, very uniform in size. Color dark yellow with red cheek. Stone is free. Ripens approximately 15 days before Elberta, at a time to bring high market prices.

HILEY

White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

SOUTHLAND

Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U. S. Department of Agriculture, being an ideal peach for the extreme Southern peach belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

SUMMERCREST

(N. J. 94.) Midseason, yellow, freestone, large with red blush and sweet flavor. Tree exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

GOLDEN EAST

(N. J. 87.) Early midseason. Very large, high red color, yellow, freestone. Very good flavor. Ripens 12 days earlier than Elberta. Good roadside market and commercial Peach.

For Greater Profits From your Land Plant Trees
MIDSEASON—Ripens 2 to 3 days before Elberta.

Original Strain
J. H. HALE

Our 'Hales' are propagated directly from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollination.

Extra Large Size
Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

HARRISON BROTHERS NURSERIES BERLIN, MARYLAND

J. H. HALE—Giant Size, Enticing Flavor

Belle of Georgia
The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach.

Early Elberta
Midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning. Gleason strain which ripens three days earlier than Elberta.

SULLIVAN EARLY ELBERTA
An Early Ripening Red Bud Sport of Elberta

MIDSEASON YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA
1.—Size: Large to Extra Large.
2.—Yellow Freestone.
3.—Rich, Sweet Flavor.
4.—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5.—Tree Vigorous Grower.
6.—Bears Large Crops Annually.
7.—Colors a Week Earlier Than Elberta.
8.—Ripens Slowly After Being Picked.
9.—Brings Highest Market Prices.
10.—Completely Tested.
GAGE ELBERTA. "Bud Sport" of Elberta, disease resistant. Tree is just as vigorous as original Elberta, but instead of growing upright, its branches are more of spreading nature. Due to high resistance to bacteria, the tree retains its foliage and the fruit ripens 3 to 4 days later than Elberta.

ELBERTA
(ORIGINAL STRAIN)

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrison
ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrison's heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

FOR NEW LOWER PEACH TREE PRICES SEE PAGE 14

ELBERTA
Original Strain
The Leading Peach—America's No. 1 Peach—Elberta. There are more Elberto Peach trees in bearing than any other variety on earth.

REDSKIN. A new variety introduced by the University of Maryland. Mid-season, yellow, freestone, large, round, deep red blush, firm flesh, sweet flavor. It is a cross between J. H. Hale and Elberta, which ripens slightly earlier than Elberta. Vigorous, good growing tree and productive.

Brackett
Mid-Season
Late

A Profitable Commercial Variety, Slightly Later Than Elberta

Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in but wherever tried it has given uniformly good results.

The fruit is rich yellow, with dark crimson cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular On The Markets

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrison's Original Strain

HARRISON'S were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
Genuine SHIPPERS LATE RED

Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach, having good quality and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red-colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shippers Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards. Dependable trees which are absolutely "true to name."

Harrisons’ Maryland Grown Peach Trees are the Finest Quality in the World

Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having some prominent coloring characteristics as its parent.

73 YEARS LARGEST GROWERS OF HIGH QUALITY TRUE-TO-NAME PEACH TREES IN THE WORLD
ABUNDANCE. Early, large, color pinkish-red changing to darker red, with thin bloom. Flavor: Very, juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin bluish bloom. Flesh amber-yellow with rich, sugary flavor, high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish-yellow, overlaid with red. Alternate bearer. Heavy crops.

ITALIAN PRUNE (Fellenberg). Late, medium size, freestone, dark purple, delicious. Fine for drying. GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midseason. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spilling. Prolific cropper.

BRADSHAW. Very large, fine early Plum; dark violet-red, juicy and good. Very productive: valued for market. Quality is excellent, color attractive. Good cropper.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, redish-purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on an east side of soil and is a heavy annual bearer.

RED JUNE. Early, medium size, garnet-red color thin bloom, flesh light yellow, somewhat mealy, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SATSUMA. Midseason. Best flavored semi-freestone, blood-flesh Plum known. Large size: flesh dark purplish red, juicy sweet, possessing an alluring aroma. Originated by Luther Burbank.

SHIRL. (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

WICKSON. Midseason Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large golden yellow. Good for cooking. Largest and handsomest of yellow Plums.

Extra Good Fruits for The Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hard, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon-colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

APRICOTS CAN BE GROWN ANYWHERE PEACHES SUCCED

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red.

CAVALIER. New mid-season, large, yellow freestone

GARDEN STATE. Large, firm yellow freestone

NECTARINES ARE DELICIOUS
Because They Are
- Absolutely true to name.
- Healthy—vigorous.
- Disease-free.
- Hardy—budded fruit trees are superior to grafted.
- Properly hardened off before digging.
- Come into bearing earlier.
- Yield bigger crops of better fruits.
- Have larger roots.
- Take hold quickly in new locations.
- The best trees for less money.
- Propagated from bearing trees of selected strains.

WILLIAMS’ EARLY RED

The Big Red Home or Market Apple

Just as the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the markethouse or dealer’s store. It holds its own anywhere and has proven to be—

The Best Summer Apple

The rich bright red fruit catches the buyer’s eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red.

A good pollinizer for Red Yorkling and Red Rome Beauty Apple trees.

LARGE TRANSPARENT (Lodi)

You Can Depend on Bumper Crops—Plant Harrisons’ “Bud Selected” Strain

SUMMER APPLES

LARGE TRANSPARENT (Lodi)

A New Summer Variety

Ripens Very Early—Destined to Replace the Ever-Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size. A good pollinizer.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that’s what we mean. It can be done—here’s why: Yellow Transparent are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, “Large Transparent,” which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent—This Means $1.00 to $2.00 per Bushel Extra

OTHER SUMMER APPLES

STARR. Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and at extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

MILTON. Very handsome, McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Ripens a month earlier than McIntosh Red.

TWENTY OUNCE. Very large, fine quality, yellow striped red.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits of early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

EARLY Mcintosh. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually a full early and severely. The shape and framework of the tree, especially the heavy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

RED SUMMER RAMBO. Large, splashed with red.

EARLY RED DUCHESS. Highly colored early Apple bring premium prices, this bud sport colors red all over early in the summer. Excellent pollinizer for Red Gravenstein.

YELLOW TRANSPARENT. Medium size, greenish yellow, very heavy bearer. Most widely planted yellow variety.

RED GRAVENSTEIN. See description page 19. Excellent summer apple.

To Make One Tree Do the Work of Two, Plant Harrisons’ Bud-Selected, Heavy-Bearing Strains.
NEW BRIGHTER
Bear Giant Size, Rich Colored, Fine

A HORTICULTURAL TRIUMPH—UNEXCELLED FOR

TRIPLE RED DELICIOUS—THE BEST
King of All Red Apples
Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

AMERICA'S HIGHEST PRICE APPLE EXCELLENT FLAVOR

Budded Apple Trees

2. Same as Parent in Flavor, Quality, Productiveness.
4. Produce Highest Percentage Fancy Fruit.
5. Tests Show They Come Into Bearing Sooner.
7. Completely Tested.
8. Excelled by No Other Red Bud Sports or Strains.
10. Greatest Profits.

SCARLET RED STAYMAN BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish cause it to command highest market prices. The fruit is large and it produces bumper crops each year.

SOLID RED WINESAP—Best Flavored, Long Keeper

FOR JUMBO APPLE TREES SEE PAGE 21

Superior to all Other Tested Strains

PLANT BIG TREES for QUICKEST and BEST RESULTS
RED VARIETIES
Flavored Apples

HOME OR COMMERCIAL ORCHARDS

RED ROME BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional red budspot strains known as C. and O. Red Rome also C. and O. Red Rome number 262.

SUPER RED MCINTOSH
A new strain of Mcintosh Red that starts coloring earlier and produces a larger percentage of extra fancy fruits. Super-Red Mcintosh, when allowed to mature on the tree, is slightly darker in color than our regular improved Mcintosh. Has all the best qualities of ordinary Mcintosh and will mean larger profits for growers who have been unable to get sufficient color. Mcintosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. Plant Mcintosh strain of red apples for big profits, equally as good in home orchards as it is commercially.

SPARTAN—A cross between Mcintosh and Yellow Newtown, very worthy of a trial planting.

RED SPY—Crisp, Juicy Apples

RED SPY
A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

BRIGHT RED JONATHAN
We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain of Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

RED GRAVENSTEIN
Here is the Apple that has been overlooked by eastern growers. Old-fashioned Gravensteins have been grown in tremendous volume during the past twenty-five years, mostly in California, a few in the Eastern States. The old strain lacks the color to make it sell. Our new Red Gravenstein colors a solid bright red long before it is ripe. The quality of Red Gravenstein is extra good for an early Apple and its ability to carry to distant markets even after it gets solid red makes it command the highest prices.

BRIGHT RED JONATHAN—A Treat to Eat

Bears

SPY

Crisp

Apples

It's Solid Red
GRIMES GOLDEN
Harrisons' Selected "Big Yield" Strain—Best Home Orchard Apple

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid delicious, the best flavored Apple known, and a goodkeeper. No better varieties exists to-day for cooking. This Apple is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent for eating, for a fertilizer or for canning. This Golden is the best pollinator, especially for Stayman Winesap, Louisy, Baldwin, Cosmic, Rome Beauty, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT'S EASY TO GROW!

YELLOW DELICIOUS It's Golden!

A golden Apple with decided "Delicious" characteristics. It's an attractive yellow, rich, sub-acid, with sub-acid flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its large bearing of fruit at a very early age. You can depend on a good yield of roasted fruit each year. Excellent pollinator for all varieties.

STAYMAN WINESAP Big Yield Strain. Shown to be the heaviest yielding strain of Stayman Winesap ever examined. This strain yields bumper crops of flavor and size. Once established, it will bear well for years.

McINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North.

Until the discovery of our New Super Red McIntosh, our improved McIntosh Red was the best strain of McIntosh available. It colors bald red when young, and holds its color, and will stand the cold storage variety, keeping until July. Strong grower, comes into bearing 2nd year. Our strain produces bumper crops of the larger sized Apples with plenty of color.

OTHER GOOD APPLES

SMOKEHOUSE. Large Apples of superfine flavor, excellent for eating, yellowish green mottled with dull red, and with many russet dots, firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowy covered with deep red, the general effect being dark red, flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinator.

NORTHERN GREENING. Large, round, greenish yellow; juicy, firm, good quality, splendid keeper, ships well. Attractive Apple when packed in bushels, demands great prices, excellent baking Apple. Should not be planted extensively because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine-grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada but not advisable to plant south of the Mason-Dixon line.

ROMA BEAUTY. Large, round, red, firm and quality above average.

RED LOWRY. Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has very much richer red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earliness in season and color. Introducing a few Grimes Golden as a pollinator.

DWARF FRUIT TREES Take Little Space to Produce Big Delicious Fruit

DWARF APPLES

These little trees can be planted 8 to 10 feet apart, and are only 10 to 12 feet high at maturity. Most varieties start producing fruit the first or second year after planting, and the fruit is as large or larger than that from standard trees. Plant two or more varieties for pollination.

Price: 2-yr., 3-4 ft. $3.25 each; 3 for $9.00.

MONTMORENCY—The Best Sour Cherry, Easy to Grow

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor; heavy bearer and most profitable sweet variety grown. Early.

GOVERNOR WOOD. Large, light yellow, marked red, sweet flavor.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

SCHMIDT. (Schmidt's Bigarreau.) Large, deep black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late.

EMPEROR FRANCIS. Large, high quality, resembles Napoleon.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Midseason.

HANSEN'S IMPROVED

Bush Cherry

An ornamental shrub producing delicious fruit. Easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect. 3-Year Bushes, Bearing Size, $1.00 each; 10 for $9.00.
Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue papers, and arranged in the container practically in the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sold at good advantage. Plain fruit can be sold without wrapping, in smaller baskets or boxes. One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on various soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.
This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.
BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.
CLAPP'S FAVORITE. Large size, hardy, and very productive. Thrives where other varieties fail. Very early.
DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.
DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.
KOONCE. One of the earliest Pears, free from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.
SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.
WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

QUINCE

ORANGE. Late, large, bright yellow, excellent flavor, productive and rarely fails to produce a crop. Best canning variety. We offer the Wayne County (New York) strain.

A WHOLE ORCHARD
FOR ONLY $2.50

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety, Williams Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.
2 year, 4 to 5 feet, well branched at $2.50 each.
2 year, 5 to 6 feet, extra well branched with good heads, at $3.25 each.
Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $4.50 each.

If Your Space Is Limited
Plant one or two of these novel trees. You will have a variety of Apples maturing over a long season. Pics can be sold as an ornamental and shade tree, as well as for its fruit.

SAVE A YEAR!
PLANT JUMBO THREE-YEAR

Mary Washington Asparagus Roots

Yes, you can grow your own delicious, tender Asparagus quick by planting our jumbo size roots. These roots are the cream of our three-year-old crop and have already borne large, early, tender, juicy Asparagus in the nursery. This is the selected pedigreed Mary Washington strain and is far superior to other kinds.

New Gigantic
Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.
NEW GIANT Cultivated Blueberries

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—$400.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotten leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: June, Rancocas, Concord, Stanley, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00

LEADING BLUEBERRIES

JUNE. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

STANLEY. Tall, vigorous bush with large, thick shiny leaves. Good producer of large berries, considered best flavored of all varieties.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Grow Finer Flavored Berries
With Harrisons' Select Certified Raspberry Plants

LATHAM
WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect, you will be both delighted and surprised after giving it a trial.

Large Berries—Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

LATHAM—The Big Red Raspberry

Every Garden Should Have

INDIAN SUMMER
Sensational New Everbearing Raspberry

A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year round.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular
Black Raspberry

CUMBERLAND
Midseason to late. This is the most popular Blackcap at the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and it is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equaled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Here's Another Extra Good Blackcap
The Mammoth New MORRISON

This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thrifty, strong, hardy plants are heavily rooted and disease resistant. Easy to grow, excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

Increase your Profits with
The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.35; 6 for $2.15; 12 for $3.15; 25 for $4.95; 50 for $8.55; 100 for $14.85; 250 for $32.00; 500 for $51.75; 750 for $70.85; 1000 for $90.00.

Lucretia Dewberry

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-natchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for $1.70; 12 for $2.45; 25 for $5.90; 50 for $6.65; 100 for $11.55; 250 for $24.95.

ALFRED BLACKBERRY

A Heavy Yielding Blackberry that Spells Success Everywhere

 sized in Alfred. Berries of enormous size, shiny jet-black, sweet pleasing flavor.

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three or four days, and can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

NEW LOWER PRICES OF BLACKBERRIES: Selected plants, 1-yr. No. 1 grade, 6 for $1.65; 12 for $2.60; 25 for $4.50; 50 for $7.50; 100 for $12.00; 250 for $25.00.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries, with a mild sweet flavor. Delicious for fancy desserts, salads, conserves, pies, etc. bushes lovely as shrubs. Small, yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored. Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

NEW RED LAKE CURRANT

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy. WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large, 1-yr. bunches, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

[27]
NEWEST VARIETIES

"VIRUS-FREE" PLANTS

POCAHONTAS—(Early)
A new introduction of the U.S.D.A. A large, deep vivid red berry is produced from the exceptionally vigorous plants. Highly flavored. A leader due to its strength and productiveness.

DIXIELAND—(Early)
A new introduction of the North Carolina Agricultural Experiment Station. The vigorous growing plants have a strong color and produce berries considerably larger and much firmer than Blakemore. Berries are very uniform in shape and ripen about the same time as Blakemore. Truly an excellent shipper and the best to date for freezing.

STELEMASTER—(Early)
One of the latest introductions of the U.S.D.A., Beltsville, Md. Because of its resistance to all races of "Red Stele" now known in the Eastern United States. The champion of all in this respect. Ripens about the same time as Blakemore. Berries are uniform, smooth, and of good size. Flesh is light red, juicy, and firm, with flavor mildly sub-acid.

ROBINSON—(Midseason)
Ripens just after Premier, at a time when berries bring a good price. Berries are large, brilliant red, uniform in size. Vigorous grower and a heavy yielder.

SPARKLE—(Midseason)
A vigorous grower and very productive. Berries are somewhat round in shape, of excellent quality and splendid for freezing.

ARMORE—(Midseason)
Introduced by the Missouri Experimental Station. This variety has proved more productive than 60 others in actual test. Berries are of good size, a beautiful red and of excellent flavor; a firm, good keeping, good shipping variety.

VERMILION—(Midseason)
Introduced by the University of Illinois. Very productive, of good size berries; fine quality.

Plants referred to as "virus-free" on this page have been field-grown from virus-free foundation stock furnished by U. S. D. A. Plants have been dusted with parathion to control aphids which transmit the virus disease. Since virus does produce clear-cut symptoms in most strawberry varieties but simply weakens and devitalizes the plants, no guarantee can be made that these plants are 100% free of virus. Because of the measures that have been taken to protect these plants from virus infection, believe them to be substantially virus-free.

Dependable-Hardy-True-to-Name
Harrisons' Selected Strain "Big Yield" Strawberry Plants Are Better
WELL-KNOWN STANDARD VARIETIES

PREMIER King of the Early Berries
Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more strawberry growers than any other variety ever grown. Accepted by all soils—Heavy Yields. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has outclassed all the other varieties.

BLAKEMORE No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and freezing because it holds its color and shape so well.

FAIRFAX, Early
The Sugar-Solving Berry
Color is a deep, full red, its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

CATSKILL—Midseason
A midseason berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lipton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

RED STAR Here's a New One
Extra Good—Very Late
This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

Pick World's Finest Strawberries

IT PAYS TO PLANT OUR SELECTED "BIG YIELD" STRAINS

SUPERFECTION—EVERBEARING

This exceptionally large, round, red to the center berry, has a sweet, pleasing, mellow flavor and is delicious to eat fresh, canned, preserved in jams and jellies, as well as fresh frozen. Bears an abundance of large berries throughout the late summer and fall season.

A TRIPLE YIELD
1—Plant inns spring.
2—Pick first crop, July to frost.
3—Pick second crop, June next year.
4—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS
Bears in 90 Days, and, too, It's the Best Family Garden Strawberry—Loads of Big Berries in 90 Days

EVERBEARING STRAWBERRIES

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10¢ to 25¢ more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to $50.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

TEmPLE (MIDSEASON)

Bred for heavy yields and resistance to disease. Named after Prof. C. E. Temple of the University of Maryland, whose efforts started the work of cross-breeding Strawberries for disease resistance. Temple is not only a heavy yielder of fine looking berries, but they are of the highest quality and are suitable either for home or commercial production. One of the easier varieties to grow, as it thrives on soil that is too wet for other kinds.

FAIRPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

HARRISONS' BIG YIELD GRAPE VINES

BEAR BETTER CROPS OF BETTER FRUIT

Harrison Brothers Selected Varieties Grapes

FREDONIA. Red. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

RED-WHITE-BLUE

Victory Grape Vineyard

OFFER No. 22

2 Catawba, Red
2 Niagara, White
2 Concord, Blue

All for $2.70

CONCORD

Harrisons' Super Strain

Blue, midseason. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

For Quick Crops Plant

JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size; listed in their order of ripening: Fredonia, Worden, Concord, Agawam, Niagara, Cotowbo.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.

Plant Paper Shell PECAN TREES for Shade and Nuts

PAPER SHELL PECAN

Medium to large nuts; oblong thin shell; rich flavor. Good grower. The best type Pecan grown. 2 to 3 ft., $2.75 each; 3 to 4 ft., $3.75 each; 4 to 5 ft., $4.75 each.

BLACK WALNUT

(Juglans nigra)

Rapid grower, spreading branches, large delicious nuts, prolific bearer. 2 to 3 ft., $2.00 each.

FIGS

To Tempt the Appetite

BROWN TURKEY

CREPE MYRTLE (Lagerstroemia Indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., $1.50 each.

QUINCE, FLOWERING (Cydonia Japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1½ ft., $1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, $1.00 each.

WEIGELA, EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. 1½ to 2 ft., $1.00 each; 2 to 3 ft., $1.25 each.

HYDRANGEA PEE GEE (Hydrangea Puniculata Grandiflora). Large flowers; first snowy white, then pink, changing to reddish bronze in the fall. Blooms midsummer to fall. 18 to 24 inches, $1.00 each.

GARDENS BURST INTO GLORY

With blooms of Harrisons' Berlin, Maryland, grown Hi-Quality Flowering Shrubs.

SYRINGA, SWEET Mock ORANGE or GARLAND (Philadelphus Coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (Calythnum Floridus). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and wood have a spicy fragrance.

TAMARIX, AFRICAN (Tamarix Aficana). Feathery grey-green foliage; very showy.

TARTARIAN HONEYSUCKLE (Lonicera Tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (Weigela Rosea). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

ROYAL BLUE HYDRANGEA

(Hydrangea Oekk). Old favorite southern Hydrangea. When winters are severe we suggest hellebore. Large balls of blue flowers and attractive large leaves. Color depends on acidity of soil. Field-grown plants, $1.50 each; 2 for $2.80.

Everywhere people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well kept lawn planted to shrubs and flowers.

CHINESE ELM—Quickest Growing Tree in the World

NORTHERN STRAIN

**CHINESE ELM**
Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 3 to 4 ft., $0.95 each; 4 to 5 feet, $1.45 each; 5 to 6 ft., $1.95 each; 6 to 8 ft., $3.00 each.

**AMERICAN PLANE**
(Platanus Americana)
Very attractive, well known, rapid growing shade tree. Foliage large and maple-like. Prices: 4 to 5 ft., $1.75 each; 5 to 6 ft., $2.75 each; 6 to 8 ft., $4.25 each.

**AMERICAN ELM**
(Ulmus americana) A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers, in a tall vase. Prices: 4 to 5 ft., $1.45 each; 5 to 6 ft., $1.95 each; 6 to 8 ft., $3.00 each.

**LOMBARDY POPULAR**
A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.25 each; 6 to 8 ft., $1.95 each.

**SILVER MAPLE**
(Rapid growing. Prices: 3 to 4 ft., $0.95 each; 4 to 5 ft., $1.45 each; 5 to 6 ft., $2.00 each; 6 to 8 ft., $3.25 each; 8 to 10 ft., $5.00 each; 10 to 12 ft., $7.50 each.

**ORIENTAL PLANE**
The Famous Light Bark Tree

**ORIENTAL PLANE**
(Platanus Orientalis)
A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. Won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets, and highway plantings. Prices: 4 to 5 ft., $1.75 each; 5 to 6 ft., $2.75 each; 6 to 8 ft., $4.25 each.

**CHINESE CHESTNUTS**
Now You Can Grow Chestnuts!
Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own ground, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven't you felt sorry for your children because they couldn't? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they'll bear year after year!

Plant in abundance Harrisons' strain of Chinese Chestnut Trees.

**PRICES:** 2 to 3 ft., $2.50 each.

**AMERICAN FILBERT**
(Hazel Nut)
Old family favorite. Small, attractive bush, yielding abundant crops of tasty, round nuts. Bears very young.

**PRICES:** 2 to 3 ft., $2.00 each.

**ENGLISH WALNUT**
(Juglans Regia)
Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

**PRICES:** 2 to 3 ft., $2.75 each.
SPREADING YEW

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starting branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch $2.50 each.

GOLDEN RETINOSPORA

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Featherly, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches $2.00.

COMPACT GLOBULAR ARBOR-VITAE

Natural compact, globe-shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch $2.00.

PYRAMIDAL ARBOR-VITAE

Probably no evergreen is more admired than Pyramidal Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artist-upright shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. Price: 18 to 24 inch $3.00 each.

IRISH JUNIPER

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted against the foundation of a home at corners and entrances. Price: 24 to 36 inch $3.00 each.

All evergreens are shipped with Moss on the Roots.

American BOXWOOD

GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISON'S

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adopt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

PRICES OF AMERICAN BOXWOOD

10 to 12 inches $1.50 each; 16 for $2.50

OLD ENGLISH BOXWOOD

The famous Dwarf Boxwood so much admired in old gardens. Slow growing, compact, most attractive. Will grow in sun or partial shade.

3 to 4 in. 55¢ ea.; 10 for $5.00
4 to 6 in. 65¢ ea.; 10 for $7.50
6 to 8 in. $1.25 ea.; 10 for $11.00

demand. Flowering in Oct. and Nov. WHITE OR PINK BLOOMS.

PRICES: 8 TO 10 INCHES $1.00 EACH.

AUCUBA—Gold Dust Plant
Large green leaf, mottled with bright
golden spots. Green bark. Large clumps
of bright red berries on older plants. One
of the very best plants for shady places.
8 to 10 INCHES $1.00 each; 10 to 12

GORGEOUS LILACS

Lilacs are marvels of beauty and ele-
gance. They are the first plants to
bloom in the spring. Perfectly hardy in any
locality. We can supply the following col-
ors: White, Purple, Pink and Blue. State
color desired. Prices: Field grown plants,
$1.50 each; 2 for $2.80; 10 for $13.00.

BAKERS' BEAUTY

The Colorful
PEONIES

THEY RIVAL THE ROSE

Once planted they last for years. There should be sev-
eral planted in every yard.
Their large bright colored flowers during May and June
furnish an abundance of flowers for the home. Can
supply the following colors:

WHITE PINK RED

State color desired.
Prices: 75c each; 3 for $1.95; 10 for $5.50.

HEDGES
Beautiful living fences

THE FAMOUS CALIFORNIA PRIVET-The Best Low Cost Hedge-Grown by Harrison Brothers, Berlin, Maryland

CALIFORNIA PRIVET
(Ligustrum ovalifolium)
This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, dark green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

SPIRAEO VAN HOUTTEI
This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy shrub thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

GREEN BARBERRY
(Barberis Thunbergii)
The best low dense hedge plant grown. Its abundant, small, tight green leaves, which turn red in colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

BUSH ARBUTUS
(Abelia Grandiflora)
By For the Best Evergreen Shrub
One of our beautiful, popular and satisfactory, broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of June to frost, the plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

ABOUT SHIPPING—PLEASE READ

HOW WE SHIP—All stock is priced f. o. b. Berlin, Maryland. The method by which shipment can be made depends entirely on the type of stock and quantity ordered. Small size fruit trees, strawberry plants, small fruits, roses, small shrubs, vines and peonies can be shipped by parcel post when ordered in small quantities. We estimate the postage on these items to be about 10% of the purchase price of the plants. If sufficient postage is not remitted with order we reserve the right to change the method of shipment, or we will ship by parcel post and customer can then pay the additional postage; any excess postage charges which are sent to us will be refunded. Large size fruit trees, shade trees, evergreens, etc., also large quantities of small size fruit trees, small fruits, roses, shrubs, vines, peonies, etc., cannot be shipped by parcel post due to size, length and weight and they must be shipped by express or freight with the customer paying the transportation charges when they are delivered. Freight is the cheapest way of shipping balled and burlapped plants such as evergreens, Boxwood, Aralbus, etc., also shade trees, shrubs, and small fruits when ordered in medium to large quantities. 500 or more strawberry plants should go forward by express. When sending in your order, be sure to give us the name of the nearest express or freight station. If you will leave the matter to us we will ship your order the best way. Safe arrival guaranteed.

WHEN TO SHIP—Our fall shipping season commences about October 15th and continues through the winter and in the spring until May 15th. Order early and we will make the shipment any time that you might desire. If no specified date is requested we will ship the stock at proper planting time for your section.
