WHOLESALE LIST

Cinnate

SEEDS

FOR

1892

D. M. FERRY & CO.

SEEDSMEN,

DETROIT, - - MICHIGAN.

TO THE TRADE.

In presenting our **Annual Wholesale Price List of Seeds in Bulk for 1892**, we beg to call your attention to the following points as being worthy of your most serious consideration, in connection with placing your order for the year's supply of bulk seeds. We are, by far, the largest growers of Vegetable Seeds in this country, having much land of our own devoted to this purpose, and thousands of acres grown each year under contract, by skilful growers. We have also a large farm where stock seeds are grown, (these are the seeds we furnish our growers to plant for us.) We are very careful to have the different kinds of seeds grown in such localities, and on such soils as are adapted to their most perfect development. The growing crops are all visited during the season, and samples of all the stocks used are planted on our Trial Grounds as an additional check. By these means we are enabled to know, as nearly as it is possible, the exact quality of the seeds we offer. In short, we do everything labor and expense can accomplish, toward making our seeds of such high quality that none better can be found.

Our prices are as low as Seeds of equal quality can be afforded. We again refer dealers to our motto, viz.: **THE BEST IS ALWAYS THE CHEAPEST.**

We send out only goods that will, to the best of our belief, give entire satisfaction; absolute immunity from error, however, being unattainable and success always being largely dependent on outside influences, it must be expressly understood that we give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with the goods we send out, and we will not be in anyway responsible for the crop.

If the purchaser does not accept the goods on these terms they must be returned at once.

Proportionately higher prices will be charged for quantities less than $\frac{1}{4}$ lb. or $\frac{1}{4}$ bu.

Where two qualities of any variety are quoted, the best will always be sent, unless specially otherwise ordered.

Not bound by these prices for any definite time or quantity and subject to advance without notice.

TERMS—Net Cash June 1, 1892, without regard to date of purchase, or a discount of one per cent. per month on the unexpired time when paid before maturity.

Bills amounting to less than \$50 are net cash.

Field Peas, Clover, Hungarian, Millet, Timothy and all Grass Seeds, net cash, without any discount whatever.

CASH or satisfactory references must accompany orders from unknown correspondents.

DETROIT, January 12th, 1892.

D. M. FERRY & CO'S WHOLESALE PRICE LIST.

Challenge Dwarf Black Wax, Extra Early.

We wish to reiterate and emphasize our claims of last year for this grand new Bean, for another season's most thorough trial has more than justified everything we have said in praise of it. Its great vigor and prolificness, together with its extreme earliness and the uniformity with which the pods ripen, make it the best Wax Bean for the early crop. We are headquarters for this Bean, as almost the entire stock in the country is in our hands. **Per Bushel, \$5.50.**

All varieties in **heavy face type** are of superior quality.

Perfect Pink Lima 24.00

SPECKLED WAX.

The best Bean to follow Golden Wax or Prolific Black Wax. If you want to plant one variety to use for snaps, green shelled, and in the dry state, plant this, because it is the best general crop bean. Its long, cylindrical, waxy yellow, fleshy, stringless, delicately flavored pods are fit for use directly after the above named sorts and continue in bearing the longest of any. When the pods get too mature for snaps, they become beautifully splashed and streaked with crimson, making them remarkably handsome, and at this stage the beans are fit to eat shelled. The Dwarf Horticultural has always been the standard of excellence as a green shelled bean, but we can assure our customers that the Speckled Wax is fully equal to or even better than Dwarf Horticultural in this particular, while in hardness of vine and quantity of yield, it is better beyond all comparison.

After years of trial and careful watching, we assert the above points of superiority for this variety and we know that a single careful planting will convince anyone that its merits are not in the least overstated. **Per Bushel, \$4.50.**

✓ **CORN**—CAUTION.—Sweet Corn in bulk, even after being thoroughly cured, will often gather moisture and spoil, particularly if it has been exposed to a low temperature. To prevent this it should be taken out of the bags as soon as received and spread in a dry place. Our quotations are per measured bushel, shelled D. M. F. & CO.

Figures at left of Varieties correspond to figures on cut.

SWEET, OR SUGAR VARIETIES.

Per Bu.

1	Cory, very early	Copiah	2 50
	White Cob Cory. We have been working on this variety for three years, selecting carefully to the White Cob type, and have succeeded in fixing the type so that a large proportion of them come true. We now offer it, without hesitation, as the best extra early Corn for market use. It differs in no way from ordinary Cory, except in the color of the cob and in having a lighter colored grain, having been obtained originally from it. It is fully as early, has as large ears, etc., and is in every way the best Corn for first early use.....

MICHIGAN YELLOW GLOBE.

Through unavoidable circumstances we were unable to offer seed of this splendid variety in any quantity last season, but this year we are fairly well supplied with a fine stock grown on our own Greenfield Seed Farms.

WE SPEAK ADVISEDLY WHEN WE SAY THIS IS THE
FINEST SHAPED, BEST COLORED AND LARGEST CROPPER
OF ANY OF THE YELLOW GLOBE ONIONS.

Our own large plantings for seed and the fields we have seen growing for market have fully demonstrated this. Wherever we have sold it, either in large or small quantities, it has given unbounded satisfaction, and we cannot urge you too strongly to plant largely of it for this year's crop.

Long Brightest Scarlet, White Tipped.

We offered this last year as Long *Deep* Scarlet, but *deep* does not do the color justice, for it is as *bright* scarlet as we have ever seen in any Radish. It is fully as early as Wood's Frame, or Early Long Scarlet, Short Top, making roots fit for use in four weeks, or less; is the same size and shape, while the beautiful bright scarlet color of the body of the root and the white tip make it the most attractive for market use of any long Radish.

TOMATO—*All our tomato seeds are grown from stocks raised strictly for seed purposes and from seed stocks, carefully selected and saved by ourselves, and we challenge comparison of our stocks with any offered by anyone.*

Atlantic Prize..... **Pitkin**..... 2 00

ONE-THIRD NATURAL SIZE.

ATLANTIC PRIZE TOMATO.

The earliest tomato grown. Beyond all doubt the largest, smoothest, and in every way the best extra early tomato. The most careful tests have failed to reveal any difference between this and Early Ruby, except that our stock of Atlantic Prize has been more carefully selected.

EARLY MICHIGAN, OR EARLY RED APPLE.

We have changed the name of this splendid variety, because many of our customers, naturally enough, confuse it with the White Apple, taking it to be its counterpart except in color, whereas it has medium sized to large fruits which are as smooth, solid and free from core, and of as fine flavor as any tomato grown. It ripens its first fruits almost as early as any variety, and continues in full bearing until cut off by frost. For general market, canners' or family use, there is no variety which will be more uniformly satisfactory. Our stock has been selected with the greatest care for many years.

TOMATO—Continued.

HAND GARDEN IMPLEMENTS.

FOR PRICES OF THE "PLANET JR." SEED DRILLS AND CULTIVATORS SEE PAGE 47.

THE "PLANET JR." HILL DROPPING GARDEN DRILL.

This Drill will sow in hills with perfect accuracy as well as in rows. It will sow all kinds of garden seeds from Peas and Beans down to Celery. It opens, sows, covers, rolls down and marks the next row, all at one operation. The machine holds two quarts and is adapted for all conditions of land, working especially well in fresh ground or when planting on a ridge. We can also supply a special flow attachment for sowing onion seeds for sets, which will open several shallow furrows side by side, making a band of plants about four inches wide. This attachment is an extra.

THE "PLANET JR." Combined Hill Dropping Seed and Fertilizer Drill.

For several years there has been a pressing demand, especially by market gardeners and onion growers, for a machine which would not only do all that the machine just described will do, but at the same time sow fertilizers either above or below the seed as wanted and in any quantity necessary. The machine shown in this cut does this work perfectly. It works with entire regularity whether there is much or little in the Drill, and small heaps do not interfere with its regular sowing. It holds about one peck.

THE "PLANET JR." NO. 2 SEED DRILL.

Sows all garden seeds accurately at any desired thickness or depth. Opening, dropping, covering, rolling down and marking the next row all at one passage in the most perfect and reliable manner. It holds $2\frac{1}{2}$ quarts. It is remarkable for simplicity and strength and for ease and perfection of work in the field. No one having use for a Seed Drill can afford to buy any other. It is the best. Truckers, market gardeners, onion growers and all who raise vegetables in quantity, should supply themselves also with the "Planet Jr." Double Wheel Hoe. (Described on page 46.)

THE "PLANET JR." Combined Drill, Wheel Hoe, Cultivator, Rake and Plow.

THE "FIRE-FLY" WHEEL GARDEN PLOW.

Makes the care of a vegetable garden a pleasure, and 10,000 families who could not find time to keep a garden, if attempting cultivation with the ordinary hand hoe, can raise their own vegetables successfully with the "Fire Fly."

THE "PLANET JR." DOUBLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

This very popular tool has been greatly simplified, strengthened and improved and merits the thorough admiration of every practical gardener. Each tool is sent out with a pair of rakes, a pair of hoes, a pair of cultivator teeth, a pair of four-inch sweeps, and a pair of plows. The wheels are

adjustable in height, and the arch is 14 inches high. Leaf guards (detachable), go with each machine, to be used when plants extend into a wide row. This tool is light, very simple, made of the best material and highly finished, and nothing can exceed the perfection and variety of work it performs.

"PLANET JR." PLAIN DOUBLE WHEEL HOE.

To meet a demand from Onion Growers and others who want a hoe only, we offer the Double Wheel Hoe, just described, supplied simply with one pair of long curved point hoes. This tool has the same adjustment of hoes and wheel as the above, and any or all of the other attachments may be added to this at any time, and will be found to fit.

THE "PLANET JR." GRASS EDGER.

A cheap, handy and effective Grass Edger is a treasure, and here it is; one with which you can in an hour edge beautifully the walks and the flower and shrub beds of an ordinary half-acre lawn. This perfect little tool does either *straight or curved* work most accurately, edging at the desired angle, and at the speed of a mile an hour.

For heavy work the frame forms a pocket just the proper size to carry a brick, which gives the needed additional weight for effectual service.

Strawberry growers will find it also a rapid and perfect tool for cutting off surplus runners. For this work the hoe may be removed.

By removing the wheel, the hoe may be used alone with great satisfaction in the vegetable garden, first cutting away from the crop, and then returning the earth.

THE "PLANET JR." SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

Great strength, easy running, simple combinations, and variety of attachments are striking features of this favorite for the season of 1892. The full equipment is shown in the cut. All the blades are steel, hardened in oil, tempered and polished. The wheel has an extra broad face, and

is readily raised and lowered, and can be attached at one side of the frame so that one can cultivate both sides of a row of small plants at one passage. For the home vegetable garden its work is exactly what is needed for the easy cultivation of crops without the aid of a horse. Its lightness and simplicity recommend it to all who examine it.

The "Fire-Fly" Single Wheel Hoe, Cultivator and Plow.

This popular implement has also been completely remodeled, and is greatly increased in strength and simplicity. The adjustment for depth is perfect, and for the first time, it has been arranged to hoe both sides of a row at one passage, by attaching the wheel to one side of the main frame. It is similar in all respects to the "Planet Jr." Single Wheel Hoe just described, and does the same variety of work, *excepting it is not supplied with the new Rakes and Leaf Guard.*

MATTHEWS' GARDEN SEED DRILLS AND CULTIVATORS.

MATTHEWS' GARDEN SEED DRILL.

We know of no hand Garden Drill, for sowing vegetable seeds, etc., which has met with more popularity than the Matthews' Garden Seed Drill among market gardeners everywhere.

It is designed for use in field and garden. When in operation it opens the furrow, drops the seed accurately at the desired depth, covers it and lightly rolls the earth down over it, and at the same time, marks the next row.

A valuable feature in this Drill is its patent INDICATOR, with names of different seeds on it, for adjusting the Drill to sow different kinds of seed, which is done by simply turning the Indicator until the name of the seed you want to sow comes to the top. No other drill is furnished with this ingenious device. This Drill is made of the best material throughout, and is complete in all its arrangements. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$6.75. (Tel. Cipher, Yates.)

MATTHEWS' IMPROVED DRILL, CULTIVATOR AND HOE COMBINED.

Matthews' Drill, Cultivator and Hoe, Combined, is the most complete combined implement of the kind made. When used as a drill, it possesses all the features of the separate Matthews' Drill, except it is of a smaller size. It will sow all the different varieties of vegetable seeds as well as that, and when used as a cultivator or a hoe, it is substantially like the Matthews' Hand Cultivator or the Matthews' Wheel Hoe, and is fully equal to either of them. Therefore in this there is combined all three of those implements in one and it cannot fail to give the best satisfaction to any one wanting a combined implement. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$8.25. (Tel. Cipher, Yazoo.)

combined implement. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$8.25. (Tel. Cipher, Yazoo.)

"Gem of the Garden" Hand Wheel Hoe and Cultivator.

This implement is offered to gardeners and others with the assurance that it is the most effective and convenient tool of the kind yet invented. Its working parts are: two Scuffle or Cutting Blades, one 4½ and one 9 inches wide; two Plows, right and left hand; five Stirring Teeth, all made of best steel. The wheel and handles of the "GEM" are both adjustable in height, while the frame is so slotted that the hoes, teeth and plows can be set in almost any position or angle. The hoes, of thin steel, and presenting nearly a straight line to the work, avoid the "dodging" so common to tools of this kind. Price, boxed and delivered at Depot or Express Office in Detroit, Mich., \$3.75. (Tel. Cipher, York.)

THE WEED SLAYER.

In offering this tool we are confident from our experience with it that it is a very superior tool for use in the garden among onions, turnips, corn, potatoes, strawberries, etc., and for weeding among flowers and in gravel walks. It is light, weighing but 7 lbs.; strong, made of the best steel and iron; adjustable to any height of person, and cutting from one-half inch to one and one-half inches under ground and 7 inches wide. Price, packed and delivered at Depot or Express Office in Detroit, Mich., \$1.50 each. (Tel. Cipher, Young.)

SEED BAGS.

No doubt most Seedsmen have experienced considerable difficulty (as we have) in obtaining ready-made bags suitable for Seed purposes. Most in the market are *machine made*, with more or less *imperfections*, and frequently made from *very weak and poor paper*.

The following are all designed especially for *Seed purposes* and except Nos. 11, 13 and 16, are *hand made*. The larger sizes, from 1 pint upward, are made from the *best Manilla Paper* with a high finish and are graded in weight or thickness according to size of bag. The smaller sizes are made from the finest finished paper obtainable.

Samples of all sizes furnished on application.

NOTICE.

By making use of the following Telegraphic words for weights and measures, together with the Telegraphic Cipher attached to each article in this list, our customers will be able to order by wire at trifling expense. The Telegraphic words for QUANTITIES must always PRECEDE the cipher words for Seeds, but if the same quantity of several articles is needed, the word for that quantity should be placed before the word for the first article only. For example:—

“Freight Righter Kearney, Kossuth, Lehigh.” Means “Send by first freight Five Bushels each of Ferry’s First and Best Selected, McLean’s Little Gem and Champion of England Peas.”

“Express Recanter Broome, Burke, Carlton.” Means “Ship by first express Two Pounds each of Early Jersey Wakefield (true American), Early Winnigstadt and D. M. Ferry & Co’s Premium Flat Dutch Cabbage.
