DREER'S GARDEN BOOK *for* 1948

**Five
Superb
Zinnias**

**For
Every
Garden**

4542 **New Super Giant Zinnia, Mixed** ^(A)

A magnificent strain. By far the largest of all Zinnias with flowers measuring $5\frac{1}{2}$ to 6 inches in diameter if grown in good soil with plants spaced not less than 3 ft. apart. They represent a truly remarkable range of enchanting colors and color combinations never before seen in Zinnias. There are a great many lovely pastel shades and many of the blooms have either a darker colored center or darker petal tips which adds an interesting feature. There also, are plants producing flowers combining two and sometimes even three harmonizing colors which diffuse gradually from one into another presenting a highly artistic and pleasing effect. These new Super Giant Zinnias give a wonderful display in the garden, particularly if planted liberally and they are superb as cutflowers. Like all Zinnias, they should have a well-drained soil and a sunny position to develop their maximum beauty. Deep preparation of the soil and the judicious use of a complete plant food mixed with the soil before sowing the seeds, will give them a chance to develop to perfection. Pkt. 25c; large pkt. 60c; $\frac{1}{4}$ oz. 85c; $\frac{1}{2}$ oz. \$1.50; oz. \$2.50.

4510 **Super Crown of Gold Pastel Tints**

The many exquisite pastel tints represented in this glorious new strain are truly enchanting. The flowers are large and showy, more than 5 inches in diameter, and they are borne profusely throughout the summer and fall on plants 3 ft. tall. Pkt. 15c; large pkt. 50c; $\frac{1}{4}$ oz. 75c.

4486 **Giant Crested Howard Zinnia**

Highly artistic blooms measuring 4 to 5 inches in diameter and combining a row of broad outer petals with a heavily crested center. There are many bright and charming colors with shades of orange, scarlet, yellow, rose, maize, and crimson predominating. Of vigorous growth, free blooming, and coming from 85 to 90 per cent true. Pkt. 20c; large pkt. 60c; $\frac{1}{4}$ oz. 85c; $\frac{1}{2}$ oz. \$1.50.

4586 **Cactus-Flowered Giants**

This new strain of Zinnia provides a vast array of gorgeous flowers which have long, curved, and pointed petals resembling those of a night-flowering Cactus. Each flower is over 4 inches across and almost 2 inches deep. Pkt. 15c; large pkt. 50c; $\frac{1}{4}$ oz. 75c.

4635 **Mixed Super Fantasy**

A delightful type of Giant Zinnias bearing very large, shaggy blooms with curled and twisted petals which have a certain resemblance to Giant Chrysanthemums. This splendid mixture includes a truly remarkable range of delightful colors many of them with pastel qualities. The plants grow 3 ft. tall and bloom from midsummer until frost. Pkt. 25c; large pkt. 60c; $\frac{1}{4}$ oz. 85c.

Zinnias are the most favorite of all annual flowers grown in American gardens. This is not to be wondered at if one considers their beauty and usefulness. They include an exceptionally wide range of colors—some of them brilliant and rich, others soft and mellow. Again others represent the highly valued pastel colors. Much of their popularity is due to their ease of culture.

Beautiful Double California Giants

Our special strain of this magnificent Zinnia produces flowers of colossal size, specimens measuring from 5 to 6 inches across being not unusual. The plants are of extremely robust habit, attaining a height of about 3 feet, and should be spaced 2 to 3 feet apart to allow for full development. They bear numerous semi-globular, mostly very double flowers all of the largest size, making them of great value in large beds, borders, etc. They bloom from early summer to late autumn.

Because the foliage is somewhat small it is best grown on trellises or stakes. Pkt. 15c; ½ oz. 55c; oz. \$1.00; ¼ lb. \$3.65.

Onion Seed

Ognon, FR.
Cipolla, ITAL.

Cebolla, SP.
Zwiebel, GER.

Treat seed with Arasan or Semesan

**1 Pkt. for 25 ft.; 1 oz. for 100 feet
5 to 6 pounds for an acre.**

Onion seed may be sown early in the spring in rows 18 inches apart, and as soon as seedlings are 3 to 4 inches tall they should be thinned out to stand 3 to 4 inches apart in the row. Pull when tops begin to die down, cure, and use, or store in a cool, dry place. By sowing seed of the Spanish type, such as Prizetaker and the Southport Globes, under glass in February or March and transplanting in April to open ground 3 to 4 inches apart in the rows, bulbs of immense size may be produced.

The Best Red Onions

The red-skinned Onions are by far the best winter keepers lasting well into the spring, well beyond the time that any of the white or yellow varieties could be kept in good condition. They mature rather late, have solid flesh, and their flavor is stronger than that of any others.

580 Large Red Wethersfield. 110 days. A well-known variety with very large thick flat onions having a bright purplish red skin. Solid flesh, shaded pink near the skin. Pkt. 15c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.50.

The Leading White Sorts

The white-skinned onions are much milder in flavor than yellow or red ones but they do not keep so well.

584 Southport White Globe. 120 days. A well-known standard sort of medium size, perfect globe shape, with pure white skin. White, fine-grained flesh of excellent flavor. Pkt. 15c; ½ oz. 45c; oz. 75c; ¼ lb. \$2.50.

590 White Portugal or Silver Skin. 100 days. Attractive large, flat, pure white onions. A good keeper, also valuable for pickling and bunching. Fine-grained flesh of mild and pleasant flavor. Pkt. 15c; ½ oz. 45c; oz. 85c; ¼ lb. \$3.10.

594 White Sweet Spanish. 110 days. By far the largest of the globe-shaped white varieties. It resembles in form and size the pale yellow Valencia except that the color of the skin is a pure transparent white. The flesh is firm yet tender and it has an exceptionally mild and sweet flavor. Under favorable conditions individual onions of astonishing large size can easily be grown. Even under average conditions they reach a large size, yet they always are of sweet mild flavor. Pkt. 15c; ½ oz. 55c; oz. 95c; ¼ lb. \$3.50.

588 White Bunching. This variety does not form bulbs and it is grown exclusively for green onions or scallions. Sow the seed thickly in rows and earth up gradually to blanch the stalks as far up as possible. Pkt. 15c; ½ oz. 55c; oz. 95c; ¼ lb. \$3.50.

Directions to Customers

Name and Address—Please remember to write on each order and letter your full name, Post Office, County, and State. Also give the street name and house number, or P. O. Box besides the nearest Express Office. Do not omit the Postal Zone number if you live in a zoned city.

Cash With Order—Remit by Post Office Money Order, Express Money Order, Draft, or Check. If you send cash, register your letter. We cannot be held responsible if these directions are not followed. If you request goods which are "Not Prepaid" to be shipped by Parcel Post please include in your remittance the cost of postage. No perishable goods sent C. O. D. (Collect on Delivery). The prices quoted are subject to change without notice.

Packing—No charge is made for boxes or packing on express or freight shipments nor for delivery to freight depot or express office in Philadelphia.

Shipments in the U. S. A. and Possessions

Seeds and Bulbs Sent "Prepaid"—All Vegetable Seeds, Flower Seeds, Bulbs, and Lawn Grass Mixtures are sent "Prepaid" to any Post Office in the United States or its possessions at the rate effective Nov. 1, 1947; or at our option by Express or Freight Prepaid. Customer bears the cost of transportation on all other articles.

Roses—We offer dormant plants which must be ordered by April 15. Add postage if wanted by parcel post as explained on page 89.

Sundries—Sundries, except where quoted "Postpaid," are sent either by express or freight the purchaser paying transportation charges. Shipments by express offer the safest and quickest method of transportation but they are also more expensive than freight. If undecided you may safely leave the method of transportation to our judgment, otherwise please state on your order whether they are wanted by express or freight.

Canadian Shipments

Flower Seeds and Bulbs are sent "Prepaid." The complicated regulations concerning the importation of Vegetable Seeds from the United States into Canada force us, much to our regret, to decline all orders of Vegetable Seeds to be sent into Canada. All other goods are sent "Not Prepaid" by Express or Freight purchaser paying all transportation charges as well as customs duties. Orders for bulbs, corns, tubers, and plants require a Canadian Import Permit obtainable from Canada Department of Agriculture, Ottawa, which is to be sent to us with the order.

Foreign Shipments

Foreign Customers will please remit in U. S. Funds. Flower Seeds, Vegetable Seeds and Bulbs quoted "Prepaid" (except Beans, Peas, and Corn) will be prepaid only for domestic postage as in effect on Nov. 1, 1947 but transit and surcharges as well as any costs for Consular invoices, clearance papers, and other official forms are to be included in the remittance. All other goods are forwarded "Not Prepaid." Customs duties cannot be prepaid.

Time of Shipment—All Seeds, Dormant Roots, Bulbs, and Sundries are forwarded as soon after receipt of order as possible unless shipment at a later time is requested on the order sheet.

Safe Arrival of Packages—We guarantee safe arrival of all goods sent by express or mail to any point within the United States proper. If such packages are injured or lost we will replace them as soon as notified of the fact. Goods sent in any other way travel at purchasers' risk. Claims for damages or errors must be made on receipt of goods. We cannot be held responsible for failure after delivery of goods in good condition.

"Henry A. Dreer, Inc. gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seeds or bulbs."

Dreer's Hormone-Treated LAWN GRASS MIXTURES

Our special mixtures are composed of heavy, carefully cleaned grass varieties suited for the purpose for which they are recommended. In addition, the Hormone treatment will insure a good strong growth right from the start if conditions are anywhere near favorable. Grass seeds require cool weather to germinate and we therefore recommend sowing as early in the spring as possible. Later sowings must be kept watered. Sow one pound to 200 square feet (10 ft. x 20-ft.).

6100 "The Dreer" Lawn Grass

"The Dreer" Lawn Grass produces a smooth even sod of finest texture altogether free from grasses which are inclined to produce clumps or knots. Such a lawn is bound to enhance your home grounds, providing a rich green setting that cannot be achieved in any other way. All grasses included in this superb mixture are permanent, fine bladed, and of a rich green color. Contains Bent Grass and White Clover. Can also be supplied without clover.

Lb. 85c; 2 lbs. \$1.60; 5 lbs. \$3.65; 10 lbs. \$7.00;
25 lbs. \$17.15; 100 lbs. \$63.00, delivered.

6102 "Evergreen" Lawn Grass

Though less expensive than The Dreer Lawn Grass, this mixture gives exceptionally fine results. It produces a beautiful and permanent lawn of rich green color and velvety appearance. If not cut too short and well-watered during the dry season it can be depended upon to give entire satisfaction. It is blended according to our own special formula and includes White Clover.

Lb. 70c; 2 lbs. \$1.35; 5 lbs. \$3.10; 10 lbs. \$5.95;
25 lbs. \$14.50; 100 lbs. \$52.45, delivered.

6104 "Fairmount Park" Lawn Grass

An excellent low-priced mixture suited to various soil conditions. It gives good results even on small city grass plots where the soil frequently is stiff and heavy. Contains some White Clover.

Lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.75; 10 lbs. \$5.35;
25 lbs. \$13.15; 100 lbs. \$47.00, delivered.

6110 "Shady Place" Lawn Grass

Shaded areas should be seeded with this special mixture which contains varieties naturally suited to these conditions. It consists of extra-fine, heavy, and choice seed which will produce a thick and rich growth of deep green if fed regularly and watered properly. Free from Clover seed.

Lb. 85c; 2 lbs. \$1.60; 5 lbs. \$3.75; 10 lbs. \$7.25;
25 lbs. \$17.70; 100 lbs. \$65.20, delivered.

6114 "Seashore" Lawn Grass

Composed of deep rooting varieties which quickly will give a thick green turf of good appearance. As good lawn grass will not thrive in pure sand it is essential that the areas first be top-dressed with 4 to 8 inches of good soil.

Lb. 85c; 2 lbs. \$1.60; 5 lbs. \$3.75; 10 lbs. \$7.25;
25 lbs. \$17.65; 100 lbs. \$65.20, delivered.

6112 "Terrace" Lawn Grass

The use of our special Terrace Lawn Grass Mixture will prevent the many annoying features caused by the use of an ordinary mixture. It contains deep-rooting grasses including Bent Grass and White Clover that holds the soil in place. Use EROSIONET, page 94, to prevent washouts after seeding.

Lb. 85c; 2 lbs. \$1.55; 5 lbs. \$3.60; 10 lbs. \$6.95;
25 lbs. \$16.95; 100 lbs. \$62.45, delivered.

6116 "Landscape" Lawn Grass

A quick-growing mixture suited especially to large areas where ultra smoothness is not of prime importance.

Lb. 55c; 2 lbs. \$1.05; 5 lbs. \$2.30; 10 lbs. \$4.40;
25 lbs. \$10.70; 100 lbs. \$37.15, delivered.

Tailor Made Lawn

If you have trouble establishing a good sod on a terrace or slope, the Tailor Made Lawn is just the thing for you. It is a pure cellose wadding in roll form containing 50 sq. ft. Pre-planted with a high-grade grass mixture and fortified with organic fertilizer and a root stimulating hormone.

Prepare the soil thoroughly just like you would for any good lawn, then lay the Tailor Made Lawn in position and anchor with a little soil or a few pegs. Give a good watering and it will stay in place while the young grass plants will be well anchored if heavy rain should subject your slope to washing.

\$2.00 per roll of 50 sq. ft., postpaid
