Our Trial Grounds

Your Assurance of Quality Seeds

We are one of the few seedsmen who operate large trial grounds yearly. At our "True Blue" Farms these trials have been in progress since 1850, and during these 91 years super foundation stocks, from which many of the strains we offer are grown, have been developed. Here, each year, many stock seeds are grown and tested for germination, vitality, productiveness, earliness, trueness, etc. Complete records are made and used as a guide in choosing the strains offered to our trade. With this carefully built background "Livingston's 'True Blue' Seeds" have unusual merits that are particularly adaptable to this highly competitive 1941 market.

Being deeply appreciative of the high regard accorded "True Blue" vegetable seeds amongst the critical vegetable gardening trade we take this opportunity to thank our many old and newer customers for their patronage and support. To those who may have received this catalog for the first time or who have not tried our seeds we urge your serious consideration. If your requirements demand quality seeds "True Blue" seeds will more than please you. Since 1850 they have been grown and supplied to the most critical trade in this country. The seeds offered herein include **High Grade General, Certified, and Extra Select Strains** that will meet your most exacting requirements in every respect.

Asparagus

Paradise. Sensationally new, early maturing variety, producing normal crop one year earlier than others and a heavier crop throughout its life; 6 to 8 stalks make a pound. Fully as rust-resistant as Mary Washington. See page 2 for full description and illustration. Pkt. 15 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.30; lb. \$4.50.

Its high-branching habit makes it possible to cut shoots, with good tight tip buds, as much as 2 feet long. Further, the tips do not "sprangle out" or "blow" prematurely. The seeds are large and tend to produce strong, thrifty seedlings right from the start. Pkt. 10 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00; 5 lbs. \$4.75.

Its superior quality, marked resistance to blight and rust, and early maturity, combine in making it a valuable sort for the market gardener. Care should be taken in outside sowings to have soil fine and well firmed. Comparatively new but is already one of the most popular Celeries. In this locality this year, the quality of the tomatoes is very poor, affected particularly with the nailhead disease. This year I planted your New Stone and Marglobe and they show no signs of any of the Tomato diseases." E. S. Noggle, Beaver Co., Pa. writes: "We have bought your seeds for many years. Livingston's Giant Oxheart Tomatoes

The Big Tomato Everybody Is Talking About

Truly the giant of them all. Different from any Tomato you have ever grown in shape, size or in flavor. Three pound specimens are quite common; one customer sent us a single fruit that weighed five pounds.

Very popular with home gardeners and brings fancy prices in city and roadside markets.

Livingston's Giant Oxheart. Introduced by us in 1925. Attractive pink skinned variety; exceedingly smooth and tender and almost seedless, frequently showing 2 inches thick without a seed cavity. It has that delicious mild flavor that every lover of this fruit likes so well. Its attractive shape, large size and excellent table qualities have brought it into deserved popularity. Rich soil adds greatly to its productiveness. 87 days. **Selected seed, grown by us.** Pkt. 10 cts.; $\frac{1}{4}$ oz. 30 cts.; $\frac{1}{2}$ oz. 45 cts.; oz. 75 cts.; $\frac{1}{4}$ lb. \$2.25; lb. \$8.00.

Livingston's *Quality* Lawn Seeds

Treat Your Lawn to the Best

It is the hardy perennial grasses that ultimately make a good lawn and the large percentage of any good mixture should consist of these, such as Kentucky Blue, Red Top and Chewing's Fescue. The annual grasses are necessary as a nurse for the better grasses but if used to excess do not benefit your lawn, although the mixture sells for less. All our grasses are fancy, heavy weight grades, mixed in proportions to give the ultimate in lawn satisfaction and the prices are most reasonable.

"Capitol Brand" Mixture

Hormone Treated—See below

The ingredients are the choicest, top-grade grasses suitable for making a beautiful, durable, lasting lawn. Withstands the intense heat of summer and the hard cold of winter. Contains high percentage of heavy, hardy seeds of perennial grasses with small amount of clover and annual nurse grasses; guaranteed free of dandelion and crab grass seeds. Makes thick turf of rich, velvety green. Your lawn, once established with "Capitol Brand," lasts for years. Literally, we lean backwards to make it the best you can buy at near the price. Owing to the high-grade seeds used in this mixture, one pound is sufficient to sow 300 square feet of new lawn.
