All claims must be made immediately after receipt of stock.

LIABILITY and NON-WARRANTY

All quotations are for immediate acceptance and subject to stock being sold. All bookings are without liability to us should injury befall stock from frost, hail, fire, or other causes beyond our control, and subject to the standard form Non-Warranty Clause which reads: "We give no warranty, express or implied, as to description, productiveness, or any other matter, of any nursery stock, seed or bulbs we sell."

76-A. TREE PAINT—"43 For the Tree":

This is designed primarily for use in painting stubs and surfaces after pruning, or for painting cavities before filling. It is used very successfully by many tree surgeons and landscape gardeners. A can of it should be in the kit of every home owner who uses pruning saws and shears. It is most healing in its effect. Comes in either PLASTIC or LIQUID form.

LIQUID FORM is a heavy liquid that forms an air tight coating and should be applied on all pruned surfaces where the limb is 1/2-inch in diameter or larger. The medical oils penetrate into all parts of the cut or wound. The acids and disinfectant odors will drive away worms.

PLASTIC FORM is used in filling small cavities, cracks, crotches, etc.

Prices are the same on both LIQUID and PLASTIC. State which is wanted.
