Increased Production Lowers Price of Beautiful Merion Blue Grass

Residence of John Lahey, 1538 Ridge Road, Munster, Ind.

Writes Mr. Lahey:

"Vaughan's Seed Company:

"We are very happy with our Merion Blue Grass lawn. It is true that the grass does spread and crowd out the weeds. We have had much less work caring for our lawn, as it doesn't require too much water and keeps that nice green look. We have had many compliments on our lawn and are boosters of Merion Blue Grass."

Since seed of it was first offered to the public by Vaughan's Seed Company in 1951, amazing progress has been made by Merion blue grass in widespread acceptance by lawn growers, and rapid increase in seed production.

As experience in growing has been gained and acreage increased, savings in production costs enable us to pass on to our customers a 20% reduction in the price of this luxury grass, placing it far ahead of all rivals both in quality and economy.

Wherever blue grass grows, Merion is hailed as the finest lawn grass yet discovered, producing the lawn you dream about, with a thick, dark green turf, like the yielding cushion of a fine carpet, yet with more vigor than the weeds, reducing even crab grass 50 to 100%.

Enthusiastic growers will tell you with pride that a Merion lawn is not only the most beau-

tiful you can grow, but takes less time, effort and money to maintain.

The first improved American lawn grass since colonial days, Merion was discovered in a scientific search conducted by the United States Golf Association Greens Section. On the basis of tests in 14 states, research authorities agreed that it spreads faster than old-fashioned blue grass, resists heat and drouth better, stands closer mowing, and holds its dark green color in hot weather with less watering.

Why not drive out and see Merion Blue Grass for yourself, in our trial plots at Vaughan's Garden Center, West 47th street and Willow Springs road?

Best results with Merion are obtained from fall sowing. One pound of seed will cover 750 square feet, 3 times as much as standard blue grass mixtures.

Tall Giant Tulips, Spring's Loveliest Flowers, Bloom in May

All varieties of the tall, late-flowering giant tulips are likely to be grouped in popular language as "Darwin tulips." They are often sold that way, though among them there are several clans, each having definite family resemblances, of which the Darwin, Darwin hybrids, Cottage and Breeder are most numerous.

All these bloom about the same time, and harmonize perfectly in garden plantings. They can be selected by color, height, and form for use in the garden border without regard to their ancestry. The distinction between these various clans tends to become less definite, as they are interbred by growers seeking improved varieties. We continue to list each tulip clan separately, however, to aid you in identifying favorite varieties, and also to give additional descriptive information. For an interesting planting, varieties of all types should be used.

Planning a tulip garden is made easy by the fact that you may count so surely upon each flower blooming as planned. The height, color and flowering season are all so dependable, it is a pleasure to plan a color effect and see it develop in the spring, just as planned.

All Bulbs Listed on this Page are TOP SIZE 12 ctms. up.

They will bloom two weeks or more before the tall, late varieties and bring the first brilliant red and pink flowers to the garden display.

Beautiful Hardy Garden Lilies For Fall Planting

This most beautiful of pink lilies is also the easiest to grow. It is seldom attacked by disease, and perfectly hardy, living for years in the coldest sections of the country when planted in a well drained place.

Illustrated at left.

It grows slowly, with sturdy stems reaching a height of 4 feet, and blooms in late August and early September, producing clusters of flowers many of which reach 6 inches in diameter.

The frilly petals are white, but so flushed with deep pink that only the margins are clear white, and numerous dots of carmine decorate the petals.

It requires no special type of soil or culture, but grows vigorously in ordinary garden soil which is well drained. Planting instructions are sent with the bulbs. 3 inch bulbs, 3 for \$1.00; doz., \$3.00.

Royal Lily
(L. Regale.)

In size, beauty and hardiness, this lily is without a rival for American home gardens. It does not require coddling, and is rarely attacked by disease, but blossoms year after year without special attention if planted in a sunny, well drained location. It grows 3 to 4 feet tall, on strong stems, and bears its large trumpet flowers in clusters. The fragrant flowers are pure white inside with a yellow throat; the backs of the petals are tinged with pink. The blossoms average 6 inches in length. This lily is a native of China but has shown a remarkable adaptation to the soil and climate of this country. No other lily of its size and beauty can equal its hardiness and disease resistance. It is one of the earliest lilies to blossom. Bulbs 3 inches in diameter. 3 for \$1.00; doz., \$3.00.

BRING EARLIEST PINK AND RED BLOOMS

Hyacinths contribute to the spring garden fragrance as well as colors which at that time no other flowers can give so well.

They serve to border paths, near all garden architecture, including ornaments such as bird baths, pools and fountains, and groups of Hyacinths may well be worked into the border planting, where they will provide a needed color foil or accent.

For garden planting, it is not necessary to use the largest forcing sizes. Bulbs of third and bedding sizes will do well. Take especial care to plant them in well-drained soil, and if there is any doubt, elevate the bed a few inches to keep them above water. Plant bulbs six inches deep, and after the ground has frozen, a light mulch to keep the frost in will benefit.

When you sow seeds of annuals in Fall, you imitate nature's method.

The ideal time is just before the ground freezes for the winter. November 15th is early enough in normal seasons in the vicinity of Chicago and New York. If the ground has been prepared in advance, sowings can also be made during winter thaws.

A fine seed bed is desirable, if the sides are protected with boards it will save the seed from washing away. A light covering may be used if birds are troublesome. Plant at half the depth used when sowing seed in spring. Broadcast all small seed.

★ Varieties preceded by star are especially recommended for sowing in the Fall above your bulbs. They will grow in the spring and blossom after the bulbs. Their shallow roots will not interfere with the bulbs maturing properly; their growth will conceal the bulb foliage after it grows yellow and unsightly.

8 of These Lovely Daffodils \$1⁷⁵

2 Each of 4 Varieties Illustrated on This Page

24 Bulbs (6 of Each Variety), \$5.00; 100 Bulbs (25 of Each Variety), \$18.00

FRANCISCA DRAKE

SIAM. Introduction of pink into the daffodil family has been the goal of breeders for many years. This variety is considered by experts as the best of the pink daffodils so far achieved. Its trumpet is wide and flaring, of soft apricot, flushed pink, which deepens as the flower matures. The perianth is pure white and of good substance. The pink coloring is developed best in flowers which are grown in partly shaded locations, especially where shielded from the mid-day sun. Otherwise they need no different culture from other varieties. Flowers intended to be used for bowl arrangements indoors, should be cut when the pink coloring is at its best. If planted in well drained soil, bulbs of this variety will continue to bloom for years. Double Nose No. 1 bulbs, each 40c; doz., \$4.25; 100, \$30.00.

SIAM

KING ALFRED

KING ALFRED (Giant Trumpet). This magnificent variety has long reigned unchallenged as the "King of Yellow Daffodils." Two feet tall and vigorous, it is of commanding posture. Its expanded trumpet measures 2½ inches in diameter, with the perianth in proportion, and segments gracefully twisted. Double Nose No. 1 bulbs, each 25c; doz., \$2.30; 100, \$16.00.

Spring Herald Mixture of Daffodils, 12 for \$1.00

25 Bulbs, \$2; 100 Bulbs, \$7.50; 1000 Bulbs, \$65.00, Prepaid.

Daffodils bloom before any other major flower. Plant where you can see them from a window and they are visible to passers-by, to herald the joyous news of spring's arrival. Our mixture contains many of the best named Trumpet, Leedsii, Berri, and Poeticus varieties. Do not disturb the bulbs until they begin to crowd, when they can be lifted and replanted over a larger area.

JOHN EVELYN

JOHN EVELYN (Incomparabilis). Outstanding among the new varieties, this measures 4 to 5 inches across with a flat cup nearly 2 inches in diameter, densely frilled. It multiplies rapidly in favorable locations. Varieties of the Incomparabilis strain have proved useful for bedding and border planting as well as naturalizing. Double Nose No. 1 bulbs, each, 20c; doz., \$1.80; 100, \$12.50.
