Dreer's Autumn Gardening Guide Order Early

This year, more than ever before, it is very important that you place your order just as early as possible because the supply of many items is decidedly limited.

The dates given below necessarily must be approximate as they depend upon climatic conditions. Where winter sets in early, plant as soon as possible.

*Late August or September
is the best time to start a new
lawn or reseed the old one.
See page 24.*

September

Plant bulbs of Colchicum just as soon as possible. The earlier they are planted now the better they will be. If you did not sow your new lawn or repair the old one during late August do so now or as soon as possible.

This is the most important month for planting bulbs in the garden to bloom next spring including Narcissus, Anemone, Brodiaea, Calochortus, Camassia, Spring Crocus, Chionodoxa, Erythronium, Leucojum, Liliun candidum, Eremurus, Muscari, Ranunculus, Scilla, Spring Starflower, (Triteleia), and Iris reticulata. Late in the month plant Dutch and Spanish Iris. Start Lilies indoors, also Calla, Freesia, Ixia, Lachenalia, Leucocoryne, Ornithogalum, and Sparaxis.

Where winter sets in early sow the seed of hardy perennials marked in this catalog. (See pages 18 and 19.) Where winter is a long way off other quick growing perennials can still be started from seed.

October

All the bulbs recommended for September planting can still be started this month as long as the ground is not frozen. But even in colder sections October planting is possible where the soil in the beds has been covered with leaves, straw, corn stalks, or any other loose matter that will keep the frost out until the bulbs are available.

*October is the most important
month for planting Tulip bulbs.*

Just before the soil in the seed bed or cold frame freezes sow seed of the perennials marked with a ★ in this catalog.

By the middle of the month begin your first planting of Paper White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lily indoors. Make sure you have sufficient bulbs of these to make succession plantings two weeks apart until mid-March. Also start Gloriosa, the beautiful Climbing Lily, indoors now.

*This is the month to
plant hardy Lily bulbs.*

November

Continue planting Lilies throughout this month. There is still a chance to plant the many types of bulbs recommended for September and October planting as long as the ground is free from frost. Continue planting tender bulbs indoors for flowers during late winter and early spring.

December

Throughout December start bulbs of Paper White Narcissus, Soleil d'Or Narcissus, Chinese Sacred Lily, Amaryllis, and all tender bulbs for blooming indoors in the house.

Early autumn is a favorite time with many gardeners to sow perennial flower seeds. To hasten them along a cold frame or a similar temporary structure should be used.

Those marked ★ give best results if the seed is sown late in the fall. They need the action of frost to sprout freely during the coming spring.

To help our customers in selecting varieties for the rock garden we have used the symbol △ to identify them at a glance. These varieties also are splendid for dwarf beds, borders, or for edgings. Plants suited to semi-shade are marked ○, and those that will grow in deeper shade ●. Practically all of these also do well in a sunny position.
