DREER'S RELIABLE SEEDS

FOR MARKET GARDENERS

For sixty-nine years it has been the aim and purpose of this house to furnish to Market Gardeners Seeds that could be thoroughly relied upon. That we have succeeded in gaining the confidence of many thousands of the leading truckers throughout the United States is proven by the fact that we not only gain a large increase in customers each season, but those who have been dealing with us for many years still continue to do so, thereby attesting to the high quality of the seeds we supply.

In order to keep up the reputation we have made by supplying uniformly high-grade seeds, we are constantly on the alert, giving critical inspection to our growing crops, and, wherever possible, making improvements by careful selections of Stock Seeds.

We hope for a continuance of the patronage of our regular customers, and also at least a trial order from those Market Gardeners who have not as yet planted Dreer's reliable seeds.

Very truly yours,

HENRY A. DREER.

Seeds postpaid. At prices quoted in this catalogue, we pay the postage on all orders for ounces and quarter-pounds. Where larger quantity than quarter-pound is ordered, postage must be added at the rate of eight cents per pound, unless the goods are to be sent by freight or express, in which case the purchaser always pays the transportation charges when obtaining goods from railroad or express agent. If Beans and Peas are wanted by mail, add postage at the rate of fifteen cents per quart, and for Sweet Corn add ten cents per quart to prices quoted herein.

Packing. No charge is made for boxes or packing, nor for delivery to freight depots or express offices in Philadelphia.

Special low express rates. As seeds are now taken, when packed in boxes or bags, by leading express companies at a reduction of twenty per cent. from regular merchandise rates, it is a great advantage to those ordering in quantities, such as pounds and quarts, to have their orders shipped by express. Large quantities can be shipped cheapest by freight, but require a longer time in transit. If the manner of shipment is left to us, we will always use our best judgment in the matter and decide to the interest of the customer.

Cash with order. Please send remittance with the order sufficient to cover the whole bill. Remittances should be made by Post-Office Money Order, Drafts on Philadelphia or New York Banks, or Express Money Orders. We disclaim all responsibility when remittances are not made as above directed. Where it is not possible to obtain these, the letter should be registered.

Non-warranty. While we take every precaution to have our seeds pure and of the best quality, we do not give any warranty, express or implied, either as to quality, productiveness, or any other condition, and will not be in any way responsible for the crop. Every order for articles named in this catalogue will be accepted on these conditions only.

CUCUMBER—Ger. Gerke.

THE DAVIS PERFECT CUCUMBER

The Davis Perfect Cucumber. (*See cut.*) A new variety which will soon take the place of the best strains of White Spine and other desirable Cucumbers. For several years this variety has been controlled by the originator, who is one of the leading Market Gardeners in the West, and after whom the variety is named. Mr. Davis states that he experimented several years in trying to get an improved strain of Cucumber for forcing under glass and outside culture, and has finally fixed a "Perfect" type, combining quality, shape, color and productiveness. The Cucumbers grow long and slim, sometimes measure 12 inches in length; the color is a rich, dark, glossy green, which they hold until nearly ripe, when they turn white, without a sign of a yellow streak. It is very tender, brittle and of exceptionally fine flavor. The seeds are very soft when the Cucumber is ready for table use; this is an important feature. It will hold its color and brittleness long after cutting, and, being a strong grower, is able to resist the Cucumber disease. It is as early as the earliest strain of White Spine Cucumber and will out yield any other variety yet introduced. The seed we furnish was grown especially for us by the introducer and can be relied upon as being true. Oz., 20 cts.; $\frac{1}{4}$ lb., 65 cts.; lb., \$2.50.

Yellow Globe Danvers. A standard sort and one of the most desirable; an excellent-keeper and very productive. Our strain of this variety is the true globe shape, and not of the flat type. Onion growers throughout the country prefer this type of onion to all others, and it is with this in view that the bulbs from which our seed is grown are specially and carefully selected as to shape. It is the best paying onion that is grown for general crop. Oz., 20 cts.; $\frac{1}{4}$ lb., 70 cts.; lb., \$2.75; 5 lbs., or more, at \$2.50 per lb.

Philadelphia Yellow Dutch or Strasburg. A leading market variety; a good keeper and well flavored; bright straw colored skin and somewhat flattened shape. The onions grow to a good size and are rather flat. This variety is largely grown for sets on account of its excellent keeping qualities, and the ready sale of same during the spring months. The seed crop of this variety was almost a failure last summer, and although we have received what we think will be sufficient for our trade we advise early orders.

Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75; 5 lbs. or more, at \$1.65 per lb.

Bounty Yellow Globe. A large globular shaped yellow variety, very productive, of mild flavor. This is also a favorite variety with the onion growers, and is planted in large quantities each year. The outer skin is a beautiful pale yellow; the bulbs are of a beautiful globe shape, and good keepers. The color and shape of this onion shows up to advantage when opened upon the market and it always sells rapidly at highest price. Oz., 20 cts.; $\frac{1}{4}$ lb., 70 cts.; lb., \$2.75; 5 lbs. or more, at \$2.50 per lb.

Australian Yellow Globe. This extra early variety of onion originally came from Australia. It is a beautiful globe-shaped and quite attractive. The onions grow to a large size and are very solid, skin is deep yellow, flesh white and of very mild flavor. Besides being an extra early onion, it is very productive and a good keeper, thus making it a very valuable variety for those who grow for market, and the handsome appearance of the onion insures quick sales at good prices. Our customers who grow onions from seed would do well by planting this variety, as we are confident that it will please them. Oz., 20 cts.; $\frac{1}{4}$ lb., 65 cts.; lb., \$2.50.

Rhode Island Yellow Cracker. An extra early variety, popular in the Rhode Island markets. An excellent sort to raise where the seasons are short. We believe that when this variety is better known it will rank among the most popular sorts. It is a good keeper and also a good seller. Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75.

Prizetaker. (See cut.) This is the large pale yellow Onion that is offered for sale in the fruit stores and markets in the fall. It grows to a very large size; flesh white, of mild and delicate flavor. The large onions are raised first year from seed, and with ordinary culture produce enormous crops. The onions sometimes go over 3 lbs. each in weight where good soil and culture is given them. Our seed is pure and the genuine Prizetaker. Oz., 20 cts.; $\frac{1}{4}$ lb., 60 cts.; lb., \$2.00.

Australian Brown Onion. The bulbs grow to good marketable size and are very hard and solid, and keep well. They ripen earlier than either the Yellow Danvers or Red Wethersfield, are beautiful brown color and mild flavor. A good thing in their favor is the fact that the crop runs uniform in size and shape; nearly every plant produces a fine onion. When better known, this variety will be used extensively by onion growers. Oz., 20 cts.; $\frac{1}{4}$ lb., 60 cts.; lb., \$2.00.

Extra Early Red. Earlier than the Wethersfield and somewhat smaller, close grained and a good keeper. It is somewhat the shape of the cracker onion, but harder. It is also used for growing onion sets. Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75.

Large Red Wethersfield. A leading variety in the Eastern States, and in fact in all sections where red onions are grown; it grows to full size the first season from seed; thick through and large, deep red color, keeps well. This is one of the leading market onions and produces good crops of large onions which are of desirable mild flavor. Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75.

Southport Red Globe. The deep red color of skin and symmetrical form of this onion makes it attractive. It grows to good marketable size and is true globe shape. The quality is good, being of mild flavor and a good keeper. This onion will sell well in such markets as demand the red onion. Oz., 20 cts.; $\frac{1}{4}$ lb., 60 cts.; lb., \$2.00.

Large Red Tripoli. Large, red, flat; free from strong aroma, and keep well during winter. Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75.

White Winter Bunching. Sow seed latter part of spring, keep cultivated during summer, and in the fall cover lightly with litter. As soon as snow is off, rake off litter and dead tops; they will be ready for pulling about the time that ordinary sets are being planted. They do not make much bottom, and are distinctively a bunch onion. Oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$3.00.

Choice Onion Seed—CONTINUED.

White Portugal, or Silver Skin. (*See cut.*) One of the leading white sorts, beautiful shape and very mild flavor. The bulbs are flat in shape and mature early. It is a splendid variety for the market gardener, and is very largely used for growing sets on account of its fine shape when small, and also for its good keeping qualities. It is also extensively used as a pickling onion, for which purpose it is finely adapted. Oz., 20 cts.; $\frac{1}{4}$ lb., 65 cts.; lb., \$2.25; 10 lbs. or more at \$2.00 per lb.

Southport White Globe. Pure white color, mild flavor, and equally good for keeping as the yellow sort. It is an enormous yielder, sometimes producing as much as 1300 bushels to the acre, and always sells at high prices. It is best to dry these onions in a shady place, and one where they will get plenty of air. Our seed of this splendid variety is very fine, having been raised from selected bulbs. Oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$3.00; 10 lbs. or more at \$2.75 per lb.

White Pearl. One of the earliest varieties, pure white, mild flavor and attractive. Not a good keeper, but its quick growth makes it a good sort to grow for early market. Oz., 15 cts.; $\frac{1}{4}$ lb., 55 cts.; lb., \$1.85.

White Queen This is the earliest onion grown; they are very mild, pure white, and splendid for pickling. They grow small and can be sown thickly. Oz., 15 cts.; $\frac{1}{4}$ lb., 55 cts.; lb., \$1.85.

Mammoth Silver King. This variety is noted for the extra large size onions it produces the first season from the seed. It is a large flat variety, averaging 5 to 6 inches in diameter. The skin is pure white and flesh remarkably tender and pleasing to the taste. Oz., 15 cts.; $\frac{1}{4}$ lb., 45 cts.; lb., \$1.60.

White Barletta. A small extra early white onion; similar to White Queen, and makes bulbs about $1\frac{1}{4}$ to $1\frac{1}{2}$ inches in diameter; in shape flattened on top. It is a good keeper and as a pickling variety it is unexcelled. Being pure white the onion makes quite an attractive appearance when in the glass bottles. Oz., 15 cts.; $\frac{1}{4}$ lb., 55 cts.; lb., \$1.85.

Dreer's Selected Garden Peas—Ger. Erbsen.

Premium Gem. A fine flavored wrinkled variety, an improvement on the Little Gem; pods long, dark green and prolific. Height 1½ ft. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.25; bu., \$5.00.

Little Gem. A dwarf first early green wrinkled marrow, very prolific, and of superior flavor; height 1½ ft. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.25; bu., \$5.00.

Early Morn. An English variety of the Gradus type with many desirable qualities. In our trial grounds it matured only a few days later than Gradus and bore large handsome pods in profusion. The peas are large, closely packed in the pod, and the flavor is sweet and delicious. Those who know the good qualities of Gradus will not be disappointed in their trial of this new variety. Height 3 ft. Qt., 35 cts.; 4 qts., \$1.30; peck, \$2.25; bu., \$9.00.

The "Thomas Laxton." Several years ago we received a small sample of this pea for trial from England, from the originator, Mr. Thomas Laxton. We were very much pleased with the results, and found it to be extremely early, ripening fully as early as the well-known "Gradus" and producing pods and peas fully as large. The plant is a very hardy and strong grower, producing the extra large size pods in abundance. The quality is delicious and cannot be surpassed by any other variety. The "Thomas Laxton" will mature fully as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter; height 3 feet. Qt., 30 cts.; 4 qts., \$1.15; peck, \$2.00; bu., \$8.00.

Gradus, or Prosperity Pea. This fine extra early, combines the finest quality with extreme earliness, and is also very productive. The smooth varieties of Extra Early Peas have heretofore filled their place in a way, as they could be planted very early; but there has been the need of an "extra early" which would also have that sweetness and fine flavor of the wrinkled varieties. "Gradus" fills this want. Vines 3 feet in height, and very prolific, bearing pods fully as large as Telephone, usually containing from 8 to 10 large peas. Qt., 35 cts.; 4 qts., \$1.25; peck, \$2.10; bu., \$8.40.

Extra Early Varieties.

If Peas are wanted sent by mail, add 8 cents per pint, or 15 cents per quart for postage.

Dreer's Eureka Extra Early. (See cut.) One of the earliest and most prolific extra early varieties, which has given the best results wherever grown, and is a standard for earliness and fine quality. It is an extremely even cropper, and can be gathered clean in two pickings. For a late fall crop it has few equals; height 20 inches. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.25; bu., \$5.00.

Dreer's Extra Early Electric. A variety of the green-seeded Alaska type, but a great improvement, being much earlier than the Alaska and bearing larger pods. The vines grow from 2½ to 3 feet high, and are literally loaded down with pods, which are crowded with the large peas, closely shouldered in pod. It is very uniform in growth, and usually produces pods containing seven or eight peas. The quality is excellent, remaining tender until fully matured. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.25; bu., \$5.00.

Dreer's Extra Early Pioneer. Pods of medium size, containing 4 to 6 full plump peas of fine flavor. The quality is all that could be desired; height 20 inches. Qt., 20 cts.; 4 qts., 70 cts.; peck, \$1.15; bu., \$4.60.

Daniel O'Rourke. Good early sort for market gardeners' and private use. Qt., 20 cts.; 4 qts., 60 cts.; peck, \$1.00; bu., \$4.00.

Alaska. An extra early round pea. Of good flavor, and bearing pods of a dark green color, which are well filled and ripen uniformly; height 2 feet. Qt., 20 cts.; 4 qts., 70 cts.; peck, \$1.10; bu., \$4.40.

Lightning. A very early pea, bearing in great profusion long, well filled pods, containing peas of a bright green color, well flavored, sweet and good size; height 2 feet. Qt., 20 cts.; 4 qts., 70 cts.; peck, \$1.10; bu., \$4.40.

The "Harbinger." This variety originated in England, and like most peas from that country, it is of very fine flavor. A remarkable feature is the extremely dwarf character of the plant, which seldom grows taller than eight inches, but is literally covered with large, well filled pods. It is far superior to the well-known American Wonder. The pods, however, are of the same shape, but are broader and better filled, besides they mature earlier. As an extra early wrinkled pea this new variety is bound to soon rank among the very best. Qt., 30 cts.; 4 qts., \$1.15; peck, \$2.00; bu., \$8.00.

Nott's Excelsior. An improvement on American Wonder, being as early, if not a little earlier, and the pods are decidedly larger and many more of them to the plant. The peas are very large and are closely crowded in the pod, so close that when matured the peas are flattened at the sides and the pod is square at each end. It grows about half taller than American Wonder; height 14 inches. Qt., 25 cts.; 4 qts., 90 cts.; peck, \$1.50; bu., \$6.00.

American Wonder. A very fine, extra early, wrinkled variety. Quite productive. The flavor and quality of the peas are excellent, and its dwarf habit of growth makes it a desirable sort; height 10 inches. This variety has long been a favorite with many gardeners, the pods always being well filled and the peas of large size. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.40; bu., \$5.60.

Surprise Pea. This excellent variety has been carefully tested beside the very earliest of the smooth peas, and found to be fully as early. The vines grow about two feet high, and do not require any support; they are literally loaded down with pods, which, while not so large, are well filled with beautiful peas of most delicious quality, tender and sweet, much more so than any of the smooth Extra Early varieties. The pods are about 3 inches long, round shape and remain in good condition for a long time. It is a splendid variety for the market gardener and is also largely used for canning. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.40; bu., \$5.60.

General and Late Varieties.

Dwarf Champion. (See cut.) The Champion of England has long been a standard variety among truckers, the long vines, however, were an objection, as they required brush or support of some kind. This new variety has all the good qualities of the Champion of England, is hardy and of fine quality, but has less vine and produces larger pods and more of them. Qt., 25 cts.; 4 qts., 80 cts.; peck, \$1.30; bu., \$5.20.

Pride of the Market. Pods are large, of a medium green color. The quality of this pea is excellent, being sweet and tender; 1½ feet. Qt., 25 cts.; 4 qts., 90 cts.; peck, \$1.60; bu., \$6.40.

TOMATO—Ger. Liebesapfel.

June Pink. (See cut.) The demand for an early pink tomato will be satisfactorily supplied by this new variety, which really is a pink Spark's Earliana, resembling this variety in every way except in color. It ripens very early, in fact was the first to ripen on our trial grounds. The fruits measure about 3 inches in diameter, are quite deep and continue to ripen until the frost kills the plants. The seed we supply was grown by the originator. $\frac{1}{2}$ oz., 65 cts.; oz., \$1.00; $\frac{1}{4}$ lb., \$3.00.

Atlantic Prize, or Early Ruby. Splendid extra early variety for general use, of large size, bright red color and smooth. Oz., 25 cts; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.50.

Ponderosa. This is one of the largest varieties; although somewhat irregular in shape, it is good, particularly for stewing. Oz., 40 cts; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50.

New Dwarf Stone. This Tomato resembles the original Stone in color and shape, and what is remarkable for an

erect sort, they are practically the same size and equally as productive. Oz., 25 cts.; $\frac{1}{4}$ lb., 85 cts.; lb., \$3.00.

Trucker's Favorite. A large purple tomato, attractive in shape and very solid. The flavor is very good and the fruits ripen until frost. Oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.50.

Magnus. This tomato is the same color as Acme, being a glossy red. It is medium early, perfect form, grows large and attractive. Oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$2.75.

Matchless. A large, bright red Tomato, very solid and meaty, containing but few seeds. The flavor is excellent. Oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$2.75.

Pink Mikado, or Turner Hybrid. Very large, solid and good flavor. Oz., 25 cts.; $\frac{1}{4}$ lb., 65 cts.; lb., \$2.25.

The Stone. (See cut.) Dreer's selected stock. Fruit very large and deep; bright scarlet; smooth, ripening evenly to the stem; exceedingly solid and firm flesh and of the finest quality. Oz., 25 cts.; $\frac{1}{4}$ lb., 65 cts.; lb., \$2.25.

Frogmore Selected. A forcing variety of great merit. The plants are healthy and very productive, the fruit growing in large clusters. Shape round, color deep bright red. $\frac{1}{2}$ oz., 20 cts.; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.25.

Lorillard (Forcing). A good sort for forcing under glass as well as for out-door culture; bright red, smooth, early. Oz., 25 cts; $\frac{1}{4}$ lb., 85 cts.; lb., \$3.00.

Best of All (Forcing). This is strictly a forcing Tomato. The vines grow strong and healthy, and produce Tomatoes in heavy bunches at short distances all over the plant. The fruits grow to a good size, are very solid and firm. Color is a deep scarlet. $\frac{1}{2}$ oz., 20 cts; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.25.

Mayflower. Excellent for forcing or outside; medium size; bright red color. Oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.50.

Spark's Earliana. An extra early variety. Fruits smooth and bright red. Largely grown by New Jersey growers, who get the tomatoes in market very early. Oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.75.

Chalk's Early Jewel. Ripens nearly as early as "Spark's Earliana;" the fruits are more solid. Color bright scarlet and quality good. Oz., 25 cts.; $\frac{1}{4}$ lb., 85 cts.; lb., \$3.00.

Livingston's Globe. A new early variety, globe shape and large size. Color glossy rose, tinged with purple. $\frac{1}{2}$ oz., 20 cts.; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.00; lb., \$3.75.

Dwarf Champion. An early and distinct variety, medium in size, plant of dwarf and compact growth. Oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$2.75.

Petunia.

Our Riverton grown strain of Double and Single Fringed Petunia have long been celebrated as the best on the market. We keep continually culling out and hybridizing and thus maintain the high standard. We frequently test stocks from the world's best growers and can say, without fear of contradiction, that our own strain is by far the best to be had at any price.

Note.—We would especially call the attention of every florist who grows Double Petunias from seed that all the smallest and weakest seedlings should be saved, as they usually produce the finest double flowers. The same is true of the singles, the strong seedlings being inclined to "weediness."

Dreer's Superb Double Fringed. Our own unrivaled strain. Every seed saved at Riverton. 75 cts. per 500 seeds; \$1.50 per 1000 seeds.

Planet Jr. No. 3 Hill and Drill Seeder

Price, \$10.00

This drill will sow in a continuous row in the ordinary way with the greatest regularity, but its distinctive feature is that it will drop neatly in hills either 4, 6, 8, 12 or 24 inches apart. It is changed in a moment from hill to drill work; the plow is adjustable for depth and opens a very narrow furrow. Capacity two and one-half quarts

Planet Jr. No. 12 Double-Wheel Hoe, Cultivator and Plow

Price, \$6.50

Two acres a day can easily be worked with this implement, and when it is done it will be a better job than three men could have done in the same time with hand hoes, and runs either astride or between the rows.

The No. 12 has a pair of 6-inch hoes, a pair of plows for opening or covering, and a set of 4, all steel cultivator teeth. The tools shown are what gardeners use most, and others can be added as wanted.

No. 13. Same tool as No. 12 but with only one pair 6-in. hoes, \$4.50.

\$8.00.

The Planet Jr. Horse Hoe and Cultivator is strongly built, is light and easy to handle. The reversible side hoes, as shown in the cut, act as plows or hillers, but when turned end for end the tool becomes a genuine horse hoe, working shallow and close without injury to the roots.

"Fire-Fly" Hand Plow

Invaluable for use in small gardens. Moldboard of tempered and polished steel. The depth is easily and quickly changed. Very useful to plow up chicken yards. \$2.25.

Planet Jr. No. 4 Combined Seed Drill, Single Wheel Hoe, Cultivator and Plow.

Price, \$10.00
As a Seeder only,
\$8.00

This tool combines in a single implement a hill-dropping seeder, a continuous row seeder, a single-wheel hoe, a cultivator and a plow. It sows in continuous rows or drops in hills, 4, 6, 8, 12 or 24 inches apart. It is automatically thrown out of gear and the feed stopped by raising the handles. For use as a cultivator, the drill parts are removed and the tool frame substituted by taking out a single bolt, it is then a perfect single-wheel hoe, with a variety of tools.

Planet Jr. No. 17, Single Wheel Hoe, Cultivator and Plow

Price, \$4.50

No. 17. Wheel Hoe is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

Other attachments can be added at any time.

Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulverizer

Price, \$8.50
Less Pulverizer, \$6.90
Less Wheel and Pulverizer, \$5.80

Gardeners cultivate better than formerly. It has been found to pay best. The farmer or gardener is most likely to cultivate best who has the tool best adapted to his purpose. With the Twelve-Tooth Harrow here shown, you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil, and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.
