FRENCH ROMAN HYACINTHS.

Roman Hyacinths are so easily forced that they will always be popular as a winter flower. They can, with little trouble, be had in bloom from early November right on through the winter. The white variety is by far the best.

DEUTZIA LEMOINEI

NEPHROLEPIS SCHOLZELI AND SILVER MEDAL AWARDED BY THE SOCIETY OF AMERICAN FLORISTS, AND BRONZE MEDAL AWARDED AT INTERNATIONAL EXHIBITION, BERLIN, GERMANY

Dreer's Fine Ferns

The Boston Fern and its Varieties

NEPHROLEPIS SCHOLZELI

THE PLUMED SCOTT FERN

The ideal plumed Fern, holding the same position to all other plumed varieties that Scottii holds to the old Boston. It is a sport from Scottii, possessing all the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy feathery appearance. The fronds, like in Scottii, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the centre of even the largest specimen from becoming defective or yellow, which is one of the weak points of all of its predecessors.

We are fully aware of the fact that the general opinion is that there are now too many varieties of plumed Nephrolepis, but we are positive that you will agree with us that there is not only ample room but a need for this variety. Its merits are so apparent that they appeal at first sight, and continue to grow on closer acquaintance; in fact, there is no room for comparison with its forerunners. It makes a good, salable plant in any size, from a 3-inch pot to the largest specimen, and is just as easy to grow as Scottii, and will prove profitable to the grower as well as to the retailer, and give full satisfaction to your customers for house decorations.

Plants from 2½-inch pots, \$3.50 per dozen, \$25.00 per 100; \$200.00 per 1000.

These are not so well known as they deserve: they are of free, vigorous growth, and can be flowered in pots in early spring, and respond quickly to forcing when placed in a temperature of 50 degrees, forming pretty pot plants in a short time, making excellent window plants, which meet with ready sale when in bloom.

We offer six distinct varieties, from pure white to the deepest rose in color. \$1.50 per dozen; \$10.00 per 100.

Primula Veris Superba.
