It's Now Time for FALL PLANTING

Nature dictates a **MUST** to all gardeners who wish to enjoy the glory of a spring garden. That **MUST** relates to planting certain bulbs **RIGHT NOW—THIS FALL**. Lest you delay beyond the period set by nature **DO IT NOW**, for autumn passes quickly and if you wait until frosts have put an end to your autumn display the choicest time to plant most bulbs, excepting Tulips, will have slipped by. Make sure yours will be a prize garden by sending your order to Dreer's now.

Surprise Yourself with Bulbs That Bloom this Fall

Glamorous Meadow Saffron (*Colchicum*), sprightly Autumn Crocus, and graceful Autumn Daffodil (*Sternbergia*) will bloom this fall. They are perfectly hardy and will give you many years of enjoyment, but—**YOU'LL HAVE TO PLANT RIGHT NOW!**

Here is Your Dream Garden To Bloom next Spring and Summer

Start off the season's parade with Snowdrops, *Eranthis*, *Chionodoxa*, Crocus, Scilla, Muscari, and Erythronium. Continue the show with Tulips, Daffodils, and Hyacinths. Among the Tulips the Single-Early and Double-Early kinds flower first. Before these pass the beautiful new Triumph Tulips are in bloom to last until the May-flowering types—Darwin, Breeder, and Cottage—reach their prime. Always admired for their exotic beauty are *Brodiaea*, *Calochortus*, *Fritillaria* and the rare Spring Starflower or *Triteleia*. Include *Camassia*, *Leucojum* (Snowflake), and the stately *Eremurus* to add some special interest.

Enjoy the Thrill of Growing Flowers Indoors in Winter

Start with Dreer Quality Bulbs of fragrant Paper-White Narcissus and have them blooming in the house all through the winter and early spring. Place several bulbs in a bowl filled with pebbles and water and start a new container every two weeks to provide a continuous succession of flowers. The showy Soleil d'Or Narcissus and the Chinese Sacred Lily also are easy to grow in a cool room. Hyacinths are another favorite of simple culture to give an abundance of living room splendor. And there are many others for the gardener who has a conservatory or a room where the temperature can be held at 45° to 60° F.

Attractive Prices for Choicest Quality

Good gardeners know that quality is the most important single factor to success and they also know that quality goods are the cheapest in the end. Dreer's Quality Bulbs are offered at most attractive prices. For one hundred years millions of gardeners have entrusted their orders for Bulbs, Seeds, and Plants to Dreer's, secure in the knowledge that their gardens would be a joy supreme.

HENRY A. DREER, Philadelphia, Pa.

Dreer's Guide to Autumn Gardening

It's much to your advantage to **order early** though you may not intend planting for a few weeks. You are then certain of receiving all the things you want this fall. The dates given below necessarily must be approximate as they depend upon climatic conditions. Where winter sets in early plant as soon as possible.

August

This is the month to plant the fall-flowering bulbs like *Colchicum*, Fall-Flowering Crocus, and *Sternbergia*. *Lilium candidum* also does well if planted at this time. Early August is a good time to start Pansy seed and seed of other quick growing biennials.

Late August or early September is the best time to start a new lawn or reseed the old one.

September

It is still time to plant the bulbs of *Colchicum*, Fall-Flowering Crocus, and *Sternbergia*. The earlier they are planted now the better they will be. If you did not sow your new lawn or repair the old one during late August do so now or as soon as possible. This is the most important month for planting bulbs in the garden to bloom next spring including Hyacinths, Narcissus, Anemone, *Brodiaea*, *Calochortus*, *Camassia*, *Chionodoxa*, Spring Crocus, *Eranthis*, Erythronium, *Fritillaria*, *Leucojum*, *Lilium candidum*, *Eremurus*, Muscari, Ranunculus, Snowdrops, Scilla, Spring Starflower (*Triteleia*), and Iris reticulata. Late in the month plant Dutch and Spanish Iris. Start Lilies indoors, also Calla, Baby Gladiolus, Freesia, Ixia, Leucocoryne, Ornithogalum, Sparaxis. Where winter sets in early sow the seed of hardy perennials marked in this catalog *. Where winter is a long way off other quick growing perennials can still be started from seed.

October

All the bulbs recommended for September planting can still be started this month as long as the ground is not frozen. But even in colder sections October planting is possible where the soil in the beds has been covered with leaves, straw, corn stalks, or any other loose matter that will keep the frost out until the bulbs or plants are available. *October is the most important month for planting Tulip bulbs.* Continue indoor planting of all bulbs that will bloom in the house during the winter and spring. By the middle of the month perennial plants, shrubs, and climbers are available and during the latter part dormant Roses should go in the ground. Just before the soil in the seed bed or cold frame freezes sow seed of the perennials marked with a * in this catalog. By the middle of the month begin your first planting of Paper White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lily indoors. Make sure you have sufficient bulbs of these to make succession plantings two weeks apart until mid-March. *This is the month to plant Lily bulbs.*

November

Continue planting Lilies throughout this month. There is still a chance to plant the many types of bulbs recommended for September and October planting, also perennial plants, shrubs, climbers, and Roses, as long as the ground is free from frost.

December

Throughout December start bulbs of Paper White Narcissus, Soleil d'Or Narcissus, Chinese Sacred Lily, Amaryllis, Lily of the Valley Pips, and all tender bulbs for blooming indoors in the house.

Fascinating Triumph Tulips

A Glorious New Giant-Flowered Race

Albiga is typical of the splendid vigorous habit found in all the Triumph Tulips. It is an appealing clear heliotrope color that has real charm.

This new race of Tulips brings to our gardens giant blooms in colors and color combinations distinctly different from all other Tulips. Furthermore they bloom within the interim of the Early Single varieties and the Cottage, Darwin, and Breeder classes so that now one may have a continuous display of Tulips throughout the spring. They are of sturdy compact growth and exceptionally colorful.

Albiga. We selected this variety for its exceptionally clear heliotrope color. While it is a trifle dwarfier than the others its robust habit and large size are outstanding. 16 inches. 3 for 24c; 12 for 80c; 100 for \$5.50.

Aviateur. A brilliant carmine with a wide creamy white border. The inside is garnet-red relieved by the light border at the petal edges. Very showy. 20 inches. 3 for 27c; 12 for 90c; 100 for \$6.50.

Kansas. A glistening pure white flower of magnificent size and superb form. Like the others in this class it is a vigorous sturdy variety. Among the earliest to come into bloom. 20 inches. 3 for 28c; 12 for 95c; 100 for \$6.75.

Lord Carnarvon. Somewhat taller than the others and equally as vigorous. A soft rose-pink enhanced by a beautiful white margin. An exceptionally fine Tulip. 25 inches. 3 for 24c; 12 for 80c; 100 for \$5.50.

Ribera. We recommend this particularly attractive new Tulip because of its striking color effect. The well-formed large blooms are bright yellow, mottled and stippled with Fuchsia red. 22 inches. 3 for 25c; 12 for 85c; 100 for \$6.00.

Zimmerman. A splendid tall vigorous grower of an enchanting vivid pure rose, cast over a creamy ground and finished with a deeper rose tone at the upper edges. 23 inches. 3 for 24c; 12 for 80c; 100 for \$5.50.

Hardy bulbs bring to our gardens a wealth of colorful flowers. All of them are easy to grow and those which flower during the early spring are particularly welcome. Though they are small they are truly beautiful. Take for example the Snowdrops, Chionodoxa, or Crocus that greet us soon after the last of the snow has melted. Scillas and Grape Hyacinths continue the procession with Fritillaria, Lily of the Valley, Anemone, Calochortus, Erythronium, Leucojum, and Rannunculus providing a succession that leads up to the early summer-flowering plants. For blooming this fall plant Colchicum and Fall-Flowering Crocus without delay.

We have endeavored to make Dreer's Bulb Catalog a helpful and instructive guide to your fall planting problems. On page 2 you will find "Dreer's Guide to Autumn Gardening" and we suggest that you plan your fall operations keeping in mind that the monthly directions are based upon conditions similar to those of the Philadelphia vicinity. For every 100 miles north you may advance the planting date one week and for an equal distance south delay the planting for a week.

Throughout the book you will find handy information that gives you not only the height and flowering season but also tells you how deep and far apart to plant various kinds of bulbs.

Careful planning will help you to secure the finest display. Order early to secure all the varieties which appeal to you most.

For Autumn Sowing

All Flower Seeds

States or its possessions

Early autumn is a favorite time with many gardeners to sow perennial flower seeds. To hasten them along a cold frame or a similar temporary structure should be used.

Those marked + give best results if the seed is sown late in the fall. They need the action of frost to sprout freely during the coming spring.

To help our customers in selecting varieties for the rock garden we have used the symbol △ to identify them at a glance. These varieties also are splendid for dwarf beds, borders, or for edgings. Plants suited for the semi-shade are marked ●, and those that will grow in deeper shade ●. Practically all of these also do well in a sunny position.

Dreer's Giant Pacific Hybrids

This is a sensational new strain of hybrid Delphinium proclaimed the showiest and most glorious of all Delphiniums. Rarely a single, nicely formed bees, fine foliage, and unusual uniformity of habit combine to make this the most desirable of all hardy Larkspur.

"The Dreer" Lawn Grass

The Unequalled Mixture for a Beautiful Lawn

Where a fine-bladed, dense, rich green lawn is wanted we recommend the Dreer Lawn Grass as the finest and most satisfactory mixture that can be obtained. It will give a perfect lawn because it includes the correct proportion of grass seed varieties which make a dwarf compact growth and have a rich green color. The Dreer Lawn Grass has been prepared in accordance with our own special formula which has proved to give a smooth velvety lawn of finest texture free from any coarse grass that would spoil the good effect. All the grasses included are permanent and of good color. They are strictly lawn grasses of first quality.
