How to Plant Bulbs

SAVE THIS CHART

It shows the depth at which different bulbs should be planted

HOW TO PLANT

Outdoor Culture. Plant the bulbs as soon after September as possible, to enable the roots to make good growth before the cold weather sets in. They require a moderately rich soil. For best results, apply Loma, Vigoro, Sheep Manure or Bone Meal. How far apart and how deep to plant the different bulbs is shown in the accompanying chart.

Indoor Culture. Plant hyacinths, tulips and narcissus in a sandy soil. For forcing, bulbs should be planted from September until November; the earlier they are potted the better. After they are potted they may be set outdoors and covered with a few inches of soil until freezing weather, then brought into a cool cellar and watered occasionally. If not

possible to set them outdoors they may be placed in a cool cellar, covered with soil and watered regularly. When the roots are well developed the bulbs may be brought into a cool room where they will flower very quickly.

Growing Paper-White Narcissus in Water. Place a dozen bulbs in a shallow bowl, cover with small stones and keep filled with water. Place a few small pieces of charcoal in the bottom of the bowl to keep the water from fouling. Keep in a moderately temperate room. They require no care, no attention. They keep on growing and produce beautiful flowers in about six weeks. Plant bulbs at two-week intervals for a succession of blooms.

American-Grown DAFFODILS OR NARCISSUS

No garden is complete without a liberal planting of Daffodils or Narcissus. Perfectly hardy, they grow and produce abundantly in almost any position, sun or shade, moist or dry. They are equally suited to pot-culture for winter flowering and are unsurpassed for naturalizing.

Note. The trumpet, crown, or cup is the center of the flower; the perianth is the surrounding row of petals or wings.

All No. 1, Double Nose, First Quality Bulbs.

Large Yellow Single Trumpet Varieties

The varieties we offer are not difficult to grow in the home-garden. Plant them with hardy perennials or in front of a shrub border.
