The plants are of free-branching habit, about 18 inches high; the very double flowers, averaging 3½ inches across, are borne freely on stems a foot long from early in August until the close of September. The intense color shows up well when cut, and makes a very brilliant bit of color in a bed or border. 40 cts. per trade pkt.; \$2.00 per oz.

The color is rich shell-pink, similar in shade but more decided than the late branching. Dreer's "Pink Beauty" Aster

A magnificent cut-flower variety, in bloom from early August until well on in September; 24 to 30 inches high; flowers average 4 inches across, on long strong stems. Color a delicate blush pink, the finest pink mid-season sort. 30 cts. per trade pkt.; \$1.50 per oz.

DAHLIA NOVELTIES AND VARIETIES OF SPECIAL MERIT

This collection consists of new American and European introductions and also includes a few older sorts which are still scarce and which rank in quality with some of the best of recent introduction.

Bueno (Decorative). A large, deep, well-built, beautiful flower, very original in coloring, a burnished copper, shading to bright yellow at the centre with the entire flower slightly suffused with rose; a tall grower that produces its flowers freely from early until late in the season on good stems; a splendid, keeper, fine for exhibition and as a cut flower. Plants \$1.50 each; \$15.00 per doz.

City of Trenton (Decorative). An exceptionally fine, new decorative that has every qualification of a first-class exhibition variety. In color a beautiful reddish apricot with rose suffusion with a sheen and lustre throughout the flower which it is difficult to convey in writing. The plant is of robust habit about 6 feet tall, producing flowers up to 12 inches in diameter; these are of splendid form, full to the centre on long erect stems. Plants, \$1.00 each; \$10.00 per doz.

Eagle Rock Beauty (Decorative). This fine Dahlia was sent out by the introducer in 1926 at \$50.00 each. We have succeeded in producing a sufficiently large stock to enable us to now offer it at a moderate price. In color it is a pretty combination of pastel pink with ivory or cream shadings. It is composed of long reflexing petals, the flowers are of giant size but artistic in formation and are held erect on good stems. Plants, \$1.50 each; \$15.00 per doz.

Edna Ferber (Hybrid Cactus). Always attracts attention on account of its extreme size and beauty. Color glistening coral, shading to old gold at base of the petals; these are curled and twisted, forming an extremely full flower which is held erect on fine stems. Plants, \$1.50 each; \$15.00 per doz.

Fort Washington (Decorative). A dark mahogany-red that does not fade, the best and largest dark red exhibition decorative. The plants as well as the flowers are giants with long strong stems. Plants, \$1.00 each; \$10.00 per doz.

Plants, \$1.00 each; \$10.00 per doz.

Two Perfect Decorative Dahlias

No other Dahlia has ever gained such popularity as Jersey's Beauty. We doubt if there is a Dahlia show in which it is not represented, as its absolutely perfect, beautiful flowers are always available, it being in bloom continuously throughout the season. In the newer French variety Couronne d'Or we have a close counterpart in all of its good points, but different in color. Both varieties are perfect in form with large flowers on long, stiff stems and are unequalled for any purpose.

Jersey's Beauty. Beautiful shade of rose pink. We have a large stock which enables us to offer roots at \$5.00 per doz.; \$35.00 per 100.

Couronne d'Or (Golden Crown). Rich golden apricot, reverse of petals rosy carmine which reflects in a luminous manner to the face of the flower. Strong roots \$10.00 per doz.; \$75.00 per 100.

Dreer's Extra Choice Tuberous-Rooted Begonias

The Tuberous Rooted Begonias which we are now offering are, of course, all American grown, produced for us by a specialist in this particular line. During the past summer when they were at their best, we had the opportunity of looking these over, and were delighted to see the advances made in their production as well as with the superior quality of the various types, and we assure our customers that they can depend on receiving stock at least equal if not actually superior to what we have supplied in the past. The tubers we send out are from 1½ to 2 inches in diameter, the best size for all commercial purposes, be this for growing in pots or for outdoor bedding.

Frilled Tuberous-Rooted Begonias

If you have only been growing the ordinary plain-edged Begonias, you will be delighted if you will give this wonderfully improved strain a trial. The flowers are not only of giant size, but the petals are beautifully frilled and waved, not unlike the finest frilled or ruffled Petunias.

Frilled Tuberous Begonia

California Grown Boxwoods

These are an exceptionally fine lot of nicely-trained plants. This variety is known as Japonica and is unquestionably the hardiest of all the Boxwoods. This stock has been frequently root-pruned so that the ball of soil is well matted with working roots which will insure successful transplanting.

Dreer's Fine Ferns

Adiantum Wrighti

This strong growing Maiden Hair is rapidly gaining wonderful popularity as a variety for cutting, its pinnae is intermediate in size between Cuneatum and the Glory Fern, it is of a cheerful bright green color and fronds 2½ feet long or more can readily be produced. Besides its value for cutting it makes a most beautiful specimen plant in a 4- to 6-inch pot or larger. It is of rapid growth and makes a good decorative subject. We can see a great future for it as a decorative pot plant.

We will have a fine lot of 2¼-inch pots for May and June delivery; these can be grown on into fine specimens for next fall and winter. \$12.00 per 100; \$110.00 per 1000.

Adiantum Farleyense Gloriosum The Glory Fern

This splendid Fern which so closely resembles Adiantum Farleyense in appearance and which does not require the special skill and care in growing that is necessary to produce good plants of A. Farleyense, has quickly made a place for itself, not only on account of the fact that it can be produced for little over half that of growing Farleyense, but also because either in a cut state or as plants used in decorative work, it will outlast the old variety ten to one, making it an available subject where Farleyense cannot be used at all.

We have ready for immediate delivery in splendid shape

3-inch pots, \$6.00 per doz.; \$50.00 per 100.

DREER'S SELECT ROSES

Strong Two-Year-Old Stock for Your Retail Trade

The Roses here offered are all field-grown plants; the greater part of them have been specially grown for us by Howard & Smith at their San Fernando Nursery, California, and the plants are equal to the best Roses produced anywhere in the Rose-growing world today.

These plants are all potted during December and January, stored in cold houses and cold frames, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5- and 6-inch pots (according to the growth of the variety), for delivery during April, May and June, and while we will make shipments earlier if requested, we prefer to book orders for those months only.

NOTE. The prices noted are all given per hundred, but these will apply for any number of plants that may be selected.

New Hybrid-Tea Roses and Varieties of Special Merit

The list offered under this heading embraces, besides the latest introductions and novelties, many of which are being sent out exclusively by us this season, such sorts of earlier introduction that are of special merit or that are still scarce and worthy of special attention by the planter.

Angele Pernet (Pernet-Ducher, 1924). Distinct in color, a rich, vivid, coppery orange-yellow in which it is not approached by any other Rose. Its buds are long, opening to semi-double cupped fragrant flowers. An indispensable variety if only for its wonderful color. \$60.00 per 100.

Aspirant Marcel Rouyer (Pernet-Ducher, 1919). Long shapely bud that develops into a good-sized substantial double flower with heavy shell-like petals. Color, deep apricot, tinted red at centre reverse of petals shaded salmon-flesh with deep yellow veinings at the base. A vigorous but compact grower and free and continuous bloomer. \$60.00 per 100.

Betty Uprichard (Alex. Dickson & Sons, 1922). A pretty combination of colors, inner face of petals delicate salmon-pink to carmine, outside glowing carmine with coppery sheen and orange suffusion; well-formed medium-sized flowers of good substance and sweet scented. \$60.00 per 100.

Briarcliffe (Briarcliffe Greenhouses, 1926). A wonderful improvement on Columbia, and good bedding variety.

Splendid buds, the fully expanded flowers are full double with high pointed centers and are of a bright clear rose-pink, sweet scented. \$60.00 per 100.

Charles P. Kilham (Beckwith & Sons, 1926). A distinct and striking novelty with long pointed perfect buds opening to high-centered perfectly formed full double flowers of a rich and brilliant oriental red, flushed with orange and glowing scarlet. A vigorous grower; very free flowering and sweetly tea scented. Gold Medal National Rose Society of England Spring, 1927. \$125.00 per 100.

Doris Dickson (Sandy Dickson, 1926). Exquisitely formed medium-sized flowers, the base color of which is orange-cream but so heavily veined and pencilled with deep brilliant cherry, that it is impossible to adequately describe the unique coloring. Growth vigorous very free-flowering and extremely fragrant. A variety that is sure to become a favorite. \$125.00 per 100.

Doris Traylor (McGredy, 1924). Beautiful long buds of a rich brilliant salmon-orange with intense carmine suffusion, large double flowers of splendid form; a strong but compact grower, exceptionally free-flowering and delightfully scented. \$75.00 per 100.

Duchess of Athol (Dobbie & Co., 1923). The coloring of this new variety is uncommon and delightful, an old golden-orange flushed with peach pink, particularly attractive in the bud and open state, growth vigorous, a free and continuous profuse bloomer. Awarded Certificate of Merit of the National Rose Society of England. \$125.00 per 100.

Duchess of York (Sandy Dickson, 1925). Good sized well formed double flowers of unique and distinct coloring; a pretty shade of tangerine orange with rose suffusion, passing to golden rose-pink as the flowers develop. A good free-flowering garden variety. \$100.00 per 100.

Edel (McGredy, 1919). An enormous bold, stately, well-built flower of great depth, quality and finish. Color, white with the faintest ivory shading towards the base. \$60.00 per 100.

Elizabeth of York (Dobbie & Co., 1927). Beautifully formed long pointed buds of a glowing cerise-red with yellow suffusion at the base; the petals as they unfold spread widely with a splendid reflex ultimately showing the stamens. An artistic, dainty, delicately colored flower. \$100.00 per 100.

Cuba (Pernet-Ducher, 1926). As a bedding Rose for brilliant mass effect we know of nothing that will equal this French introduction and although the large flowers are almost single, they possess a charm and brilliancy in color which is an entirely new tone in Roses, a glorious bright vermilion-scarlet overlaying an orange ground, this color combination is so intense that in full sunlight it glistens with an iridescent sparkle. A vigorous grower with dark green foliage which make a splendid foil for the masses of richly colored blooms which it produces from spring to late fall. \$75.00 per 100.

Dame Edith Helen (Alex. Dickson & Sons, 1926). Awarded Gold Medals by the National Rose Society of England, 1926, as well as at the New York and Philadelphia Flower Shows in the spring of 1927. It was also awarded the Clay Cup in England in 1926 for the best sweet-scented Rose shown that year as well as a Certificate of Merit by the Royal Horticultural Society of England. It is not often that so many honors come to a new rose. We question if any Hybrid-Tea Rose yet introduced promised to be such a valuable addition to our garden Roses as this wonderful new pink variety. The plant possesses a strong, vigorous constitution, the flowers are produced singly on well-foliated strong canes throughout the season, these are of immense size, composed of very substantial broad petals which curl back prettily forming a wonderful long pointed bud which develops into a full double flower which is absolutely perfect in every stage of development. The color is a brilliant, yet soft Rose du Barri pink and is delightfully and strongly sweet-scented. \$75.00 per 100.

Diadem (McGredy, 1922). A large double, sweetly scented, copper-orange, heavily overlaid with salmon and red tints, very distinct. \$60.00 per 100.

New Hybrid-Tea Rose
Miss Rowena Thom

New Hybrid-Tea Roses and Varieties of Special Merit

Hybrid-Tea Rose, Dame Edith Helen

Frank Reader (Verschuren & Sons, 1927). In our California trials this has attracted great attention.

It is a large, massive flower with high pointed centre with nicely reflexing petals of great substance, the long buds in first developing are a light lemon-yellow, while the flowers in their half-expanded form reveal a heart of golden apricot; it has a delicious rose apple scent. Among light-colored varieties this is of outstanding merit. \$75.00 per 100.

Imperial Potentate (Clarke Bros., 1923). One of the best bedding Roses. Large, double flowers of crisp, glistening rose-pink, sweetly scented. At the International Rose Test Gardens, at Portland, Oregon, was awarded the Silver Medal of the American Rose Society, the Gold Medal of the City of Portland for the best bush Rose shown, and the Silver Trophy of the Portland Chamber of Commerce for the best Rose produced in 1923 on the Pacific Coast. \$60.00 per 100.

Irish Charm (McGredy, 1927). This is a gem of exquisite form and absolutely distinct from any variety yet introduced. It is of strong branching habit, remarkably free-flowering. The buds and flowers are of medium size, the base of the petals a rich golden-apricot passing to a delicate blush-pink as the flowers develop. \$75.00 per 100.

Irish Courage (McGredy, 1927). A splendid addition to the list of bi-colored Roses, the color being a soft shrimp-pink merging to salmon in the fully expanded petals, the whole overlaying a golden orange ground, this color being very pronounced at the centre of the flower. Growth and fragrance moderate, with attractive dark glossy-green foliage. \$75.00 per 100.

Irish Hope (McGredy, 1927). A splendid and distinct red with well-formed buds composed of heavy, broad petals opening to moderately full, very fragrant flowers. The color is a rich rosy-crimson with maroon shadings. It is of splendid, vigorous growth with good foliage, and a free and continuous bloomer. In our trial plots this looks like one of the most promising varieties, among the many red sorts on trial. \$75.00 per 100.

Irish Sweetness (McGredy, 1927). A delightfully fragrant variety and splendid addition to the none-too-long list of good red bedding Roses. Color, an exquisite shade of crimson-lake suffused with scarlet; a vigorous free grower and very free-flowering. \$75.00 per 100.

J. C. M. Mensing (Eveleens & Sons, 1924). In habit of growth, freedom of bloom and in the formation of its buds and flowers, this pretty sweet-scented Rose is identical with Ophelia from which it is a sport, but in color it is a lovely pleasing shade of rose-pink. \$75.00 per 100.

Edith Nellie Perkins (Alex. Dickson & Sons, 1928). New this season, a Rose entirely distinct in coloring and of such strong robust growth that it should succeed anywhere and produce an abundance of its pretty colored flowers. The buds are long and pointed, the outside of the petals are of cream and blush shaded with orange at the base, the inner face is salmon-pink with golden-orange base; the flowers are moderately double, produced on long stems and sweetly scented. \$125.00 per 100.

Emile Charles (P. Bernaix, 1922). A French introduction of rich coloring, the buds being of a fiery red shaded and suffused with golden yellow, these develop to medium sized flowers of superb coral-red shading to rosy strawberry-red on the outer petals. Growth vigorous and free flowering. \$75.00 per 100.

Etoile de Feu (Pernet-Ducher, 1921). Very large, full double globular flower of a salmon-pink color shaded with flame. \$60.00 per 100.

Etoile de Hollande (Verschuren & Sons, 1919). Although introduced ten years ago, it is strange that the great merits of this brilliant red variety have only been recognized during the past few years. Today it is considered the best red garden rose wherever Roses are grown. A strong vigorous healthy grower, a continuous bloomer with large moderately double flowers, particularly attractive in the half-blown state, of a brilliant crimson-red color. \$100.00 per 100.

Felicity (Clarke Bros., 1919). One of the best bedding Roses that is meeting with great favor, vigorous growing and very free. In color it is a beautiful shade of mallow-pink shading to cerise at the edges, with a soft creamy suffusion at the base of the petals; a fine long bud developing into a splendid, large, full, cup-shaped, sweet-scented flower. \$60.00 per 100.

Feu Joseph Looymans (Looymans & Son, 1922). Long and pointed buds, large full flowers, yellow with vivid apricot, particularly brilliant at the centre. Entirely distinct and novel. \$60.00 per 100.

New Hybrid-Tea Rose, John Russell

New Hybrid-Tea Roses and Varieties of Special Merit

New Hybrid-Tea Rose, Julien Potin

John Russell (Dobbie & Co., 1924). One of the handsomest red Roses, beautiful both in bud and in the fully expanded flower. We have always been pleased with this Rose and everyone admires it for its splendid form and rich color, a very large double flower of a brilliant deep velvety crimson, the growth is exceptionally strong, vigorous and hardy. Awarded the Gold Medal of the Royal Horticultural Society of England. \$60.00 per 100.

J. Otto Thilow (Verschuren & Sons, 1927). This variety was named in memory of our late Mr. Thilow. It is a rich, glowing rose-pink of exceptional merit with long, pointed buds of perfect formation as the flowers expand, the petals reflex forming a beautiful large double high centered flower. It is a very strong grower with clean, healthy foliage and a continuous profuse bloomer, a grand garden rose in every respect. \$75.00 per 100.

Jules Gaujard (Pernet-Ducher, 1928). Offered for the first time this year. Moderately long-ovoid but of a distinct cochineal crimson with glistening golden suffusion, which, as the large well formed double flowers mature gradually passes to a very pleasing shade of orange rose. A distinct vigorous grower and very free flowering. \$75.00 per 100.

Julien Potin (The Golden Pernet). This is one of Mr. Pernet's latest achievements which will probably become better known as The Golden Pernet. It is unquestionably the most gorgeous and brilliant yellow rose yet introduced, a rich golden yellow that grows richer and deeper as the flowers mature. The buds are long and shapely and develop into large, full flowers of beautiful form, delightfully sweet-scented. Habit of growth upright with ample, attractive, glossy, bronzy-green foliage, very free-flowering. \$125.00 per 100.

Lady Inchiquin (Alex. Dickson & Sons, 1922). A distinct and novel shade of color—a rich orange-cerise with large, full, delicately perfumed flowers, of strong, vigorous free-branching habit and free-flowering. \$60.00 per 100.

Lady Mary Elizabeth (Alex Dickson & Sons, 1927). A variety of outstanding merit. Of strong, vigorous, upright, branching habit with good healthy foliage and very prolific flowering. Flowers delightfully fragrant. Long pointed buds with deep substantial petals, in color a brilliant carmine-pink. \$75.00 per 100.

Lord Charlemont (McGredy, 1922). Although introduced some seven years since, this beautiful variety is still very scarce. It is the most gorgeous and brilliant dark red Rose we have with flowers of the most intense clear crimson-scarlet, deepening to carmine-crimson with almost black shadings with perfectly shaped long pointed buds and large, full double, sweetly scented flowers. Free growing and free flowering, a splendid Rose of exceptional richness and beauty. \$75.00 per 100.

Lord Lambourne (McGredy, 1925). Deep buttercup-yellow, each individual petal being heavily margined carmine-scarlet, the buds are long opening to large semi-double flowers, a strong vigorous grower and free flowering with strong fruity odor. \$75.00 per 100.

Mabel Morse (McGredy, 1921). Not as large a flower as Souvenir de Claudius Pernet, but a most beautifully shaped long bud which develops into a handsome good-sized flower of the richest clear, bright golden-yellow. It is a strong, vigorous grower, very free-flowering with rich glossy foliage. \$60.00 per 100.

Margaret McGredy (McGredy & Sons, 1928). We consider this one of McGredy's most brilliantly colored masterpieces, large, beautifully shaped full double flowers, entirely distinct from all others in its rich coloring, which is a brilliant shade of Turkish or Oriental red, passing as the flowers age to a beautiful carmine-rose, these are borne on long stiff stems and hold their form and beauty for a long time. \$100.00 per 100.

Hybrid-Tea Rose, Mrs. William C. Egan

New Hybrid-Tea Roses and Varieties of Special Merit

Dormant Stock for Delivery Winter of 1928-1929

Hybrid-Tea Rose, Mrs. W. E. Nickerson

Mrs. Beatty (Cant & Sons, 1926). An exquisite self-colored light lemon-yellow with the delightful perfume of the old favorite Marechal Niel. Habit of growth good, with disease-immune foliage, always in flower with large, long, oval-pointed buds. A rose that is destined to become a popular favorite. Awarded the Gold Medal of the National Rose Society and Certificate of Merit of the Royal Horticultural Society of England. \$75.00 per 100.

Mrs. Beckwith (Pernet-Ducher, 1922). An erect grower of splendid habit, with glossy, light green foliage, long shapely buds, medium sized, full, gracefully shaped flowers of a buttercup yellow, shading lighter at the edges of the petals. \$60.00 per 100.

Mrs. C. W. Edwards (McGredy, 1924). Rich rosy-scarlet overlaying an orange ground, the base of the petals prettily zoned citron-yellow which runs in faint veinings into the higher colors; a novel color combination. Strong, vigorous habit of growth; very free flowering, with large, full, fragrant flowers. \$75.00 per 100.

Mrs. Henry Bowles (Chaplin, 1921). Everybody admired the old favorite Mme. Abel Chatenay, for a long time one of the most popular Roses but which has practically disappeared from commerce. In this we have the same pleasing warm color values but in flowers of much greater size. Color a most effective deep salmon-pink and of splendid form. Vigorous growing and free flowering. \$60.00 per 100.

Marcia Stanhope (G. Lilley, 1924). A delightfully fragrant pure white; a good-sized full double flower, fine both in the long bud as well as in the fully expanded flower; vigorous and free. \$100.00 per 100.

Marion Cran (McGredy & Sons, 1927). Messrs. McGredy say of this novelty: "The color combination is the most wonderful we have yet seen in any rose." In the young stage before the flowers expand the color is deep buttercup-yellow, margined and flushed cerise and rosy-scarlet. As the flower opens the outside of the petals retain their color, while the inner side opens a brilliant geranium scarlet flushed and veined orange and yellow; as the flowers age the color changes to a deep cerise on bright rosy-scarlet flushed buttercup-yellow. The whole flower glows and has a wonderful sheen and when fully open the color combination is delightful. The flowers are full, of nice form, and medium to fairly large in size. The habit is bushy, free, and upright, making a magnificent bush; one of the freest and most perpetual flowering garden and bedding roses. \$100.00 per 100.

Mme. Alexander Dreux (Souper & Notting, 1921). While not a large flower it has become prominent as a winter cut flower on account of its distinct brilliant color and pretty shaped buds of a brilliant coppery golden-yellow and which develop into high centred full flowers with reflexed petals of deep yellow splashed with orange. It has also proven desirable as a garden Rose of vigorous, compact free-flowering habit. \$60.00 per 100.

Mme. Henri Queuille (Pernet-Ducher, 1923). This might correctly be described as a light colored form of the same grower's popular variety Souvenir de Georges Pernet which it resembles in the formation of its flowers as well as in habit of growth, but in color it is a pretty shrimp or coral pink on an orange coppery base, vigorous and free. \$150.00 per 100.

Mrs. A. R. Barraclough. (McGredy & Son, 1927). Unquestionably one of the finest Roses ever sent out. Pink sounds uninteresting in a new Rose, there being so many of this shade, but in this new variety we have a most distinct and valuable addition of a bright but soft sparkling carmine-pink of an even shade passing to yellow at the base of the petals. The color does not fade as the flower ages, but appears to become brighter. The bud is long and perfect and develops into a full double flower of great size, most perfect form and substantial substance; very fragrant. \$100.00 per 100.

New Hybrid-Tea Rose Patience

New Hybrid-Tea Roses and Varieties of Special Merit

Hybrid-Tea Rose, Rev. F. Page Roberts

Miss Rowena Thom (Howard & Smith, 1928). In vigorous habit of growth, freedom of bloom and in its adaptability to varied climatic conditions, this will prove equal to the popular Radiance Roses, while its flowers in size and form are equal to the best high-class varieties of recent introduction and all of which it will outclass in freedom of flowering. Its buds are long and shapely, opening to perfect double flowers frequently 5 inches across of a brilliant rose-pink, the base of the petals having a golden suffusion which as the fragrant flowers unfold, adds to the brilliancy of its coloring. **\$125.00 per 100.**

Padre (B. R. Cant, 1920). Most attractive and novel in coloring, with long petals of a coppery scarlet flushed with yellow at the base. Growth strong and upright and exceedingly free-flowering. A remarkably beautiful bedding Rose. **\$60.00 per 100.**

Patience (McGredy & Sons, 1927). One of the finest Roses of very recent introduction. Its splendid long pointed buds are of a deep scarlet carmine opening to large fragrant double perfect blooms that shade from orange at the base of the petals to rich carmine at the edges. It is of strong robust habit with glossy holly-like foliage and extremely free flowering for a rose of its large size. **\$125.00 per 100.**

Pink Pearl (Leenders & Co., 1924). A dainty variety always admired destined to become a universal favorite if it had nothing to recommend it but its delicious fragrance. In color it is a brilliant rich cerise pink the base of the petals touched with gold that lights up the flower wonderfully, particularly in the half expanded bloom. The flowers are full double, of perfect form and produced most profusely on plants of vigorous, healthy growth. **\$60.00 per 100.**

Princess Marie Jose (Londes, 1924). A remarkably brilliant colored long bud of an orangy vermillion on an orange ground which opens to a full double high centered flower of cadmium yellow with vermillion shading; pretty, free flowering and a vigorous grower. **\$75.00 per 100.**

Rapture (Traendly & Schenck, 1926). A sport of that favorite variety Mme. Butterfly with deeper tinted flowers and of more vigorous habit of growth. Free flowering and richly perfumed. **\$75.00 per 100.**

Mrs. J. Heath (McGredy, 1924). In the bud stage this is so beautifully shaded and splashed with crimson-red, madder-red orange and running off to maize-yellow at the points making it absolutely indescribable, as the flowers expand the outer petals shade off to maize-yellow tinted peach red while the centre remains deep cadmium-yellow. The buds are long pointed, the flowers full, large and of perfect form and slightly scented. **\$75.00 per 100.**

Mrs. Lovell Swisher (Howard & Smith, 1926). A remarkably vigorous grower of branching habit, well furnished with excellent foliage, freely producing perfectly formed long shapely buds with nicely reflexing petals that develop into good double flowers. The color of the buds is a deep coppery salmon at base merging to salmon-pink at the tips. The developed flowers are also salmon-pink, deepening towards the centre. Delightfully tea scented. **\$60.00 per 100.**

Mrs. Redford (S. McGredy & Sons, 1919). One of the most distinctive and desirable Roses of recent introduction. Bright apricot-orange, one of the most lovely of this tone of color, an upright grower with holly-like mildew-proof foliage. The flowers are substantially built, perfect in form, very free-blooming and sweetly scented, a superb bedding Rose. **\$60.00 per 100.**

Mrs. Tom Smith (T. Smith & Sons, 1924). A splendid Gold Medal variety of thorough distinctness and merit. The expanding buds and the developed flowers are models in formation, there are none more perfect. Color a distinct glowing cerise, very fragrant; a strong, vigorous grower and very free-flowering. **\$60.00 per 100.**

Mrs. William C. Egan (Howard & Smith, 1922). A strong, healthy grower, with long, pointed buds that develop into flowers of good shape. In color, it is a two-tone-pink, the reverse of the petals, a soft light-pink, the interior, deep, flesh color. An exceptionally free and continuous bloomer. **\$60.00 per 100.**

Mrs. W. E. Nickerson (McGredy, 1927). An extremely vigorous growing very free-flowering Rose of the duatone Pernetiana type. The splendidly-formed buds are of an entrancing new color, the exterior of the petals heavily veined with rose d'or and shaded orange cadmium, the interior a deep chrome-yellow on the lower half vein out and pass to a warm rich rosy-salmon. **\$75.00 per 100.**

Hybrid-Tea Rose, Souv. de Georges Pernet

New Hybrid-Tea Roses and Varieties of Special Merit

New Hybrid-Tea Rose, Talisman

Talisman. This new American Rose, originated by the Montgomery Co. and offered now for the first time, created a sensation at all the shows where it was exhibited last year and was awarded Gold Medals by the American Rose Society at the National Flower Show at Louisville, Ky.; at the Philadelphia Flower Festival, as well as at the International Flower Show at New York, where it was also honored with the President Coolidge Horticultural Gold Medal. It is the most remarkable piece of coloring that we know in any Rose; a combination of shadings of gold, apricot, yellow and deep pink or old-rose. The outside of the petals is bright yellow, gold, and pink; as the flower develops and the petals unfold they become bright apricot, gold, deep rose-pink or old-rose and unlike most Roses the color becomes brighter as the flowers develop. The bud is long, perfectly formed, averaging about 25 to 28 petals, the plant is a strong, vigorous grower with glossy green foliage and free flowering. Strong two-year-old plants, ready for delivery April 1st, \$150.00 per 100.

The Queen Alexandra (McGredy & Son, 1918). A brilliant flower of intense vermillion, deeply shaded old-gold on reverse of petals, which spring from a pure orange base; one of the most remarkable color combinations seen in Roses. The flowers are quite full and when half-blown are bewildering in their beauty, delightfully sweet scented. \$60.00 per 100.

Victor Waddilove (McGredy, 1926). Buds of splendid form, long and pointed, opening to moderately full flowers, sweetly scented, color imperial pink flushed crimson and orange, the coloring is intensified by the golden base of the petals which gives the flowers a golden suffusion which is difficult to convey. Growth vigorous and very free flowering. \$60.00 per 100.

Ville de Paris (City of Paris) (Pernet-Ducher, 1926). One of Pernet-Ducher's Gold Medal Roses which award it received in the International trials at the Bagatelle Gardens, Paris, in the summer of 1926. It is of a rich buttercup-yellow much in the style of Mrs. Beckwith but with longer buds and larger flowers and purer in color. The plant is of vigorous growth and very free flowering. \$75.00 per 100.

Wilhelm Kordes (Kordes & Sons, 1922). Long pointed buds opening to full double flowers, a rich capucine red overlaying a golden ground, wonderfully prolific. \$75.00 per 100.

Reims (Barbier, 1923). Large flowers of very regular and perfect form, petals round, very large, imbricated like a Camellia. Color flesh white, yellow at base, centre bright nankin shaded orange-apricot, very free flowering. \$60.00 per 100.

Rev. F. Page Roberts. (Cant & Son, 1921). A Rose of remarkable beauty both in form and color. The long pointed buds are of a coppery-red stained red on the outside and open to good full double fragrant flowers of a golden-yellow particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. A most distinct variety that has deservedly gained great popularity in the short period since its introduction. \$100.00 per 100.

Roselandia. (W. Stevens, 1924). Roselandia is a sport from the popular variety Golden Ophelia, over which it is an improvement not only in color but in its remarkable free-flowering habit. It is a golden-orange suffused with a lustrous glow of apricot in the heart and at the base of the petals, frequently tinted red on the reverse of the outer petals; the buds are long pointed, of superb build and substance, and very sweet scented. \$60.00 per 100.

Shot Silk. One of the most beautiful of Alex. Dickson & Son's introductions of 1924 which was awarded the Gold Medal of the National Rose Society of England. Color orange-rose overshot with golden-yellow and flushed soft rose; bud of beautiful shape, the open flowers cupped with reflexing outer petals; growth vigorous and free, with beautiful foliage; a sweetly scented Rose of exceptional merit. \$60.00 per 100.

Sir David Davis (McGredy & Sons, 1926). As this variety has shown up in the fields during the past two seasons we do not hesitate on account of its profuseness in flowering, its free vigorous growth and its good color to select it as one of the best red bedding roses. Color, an unfading deep glowing crimson of an even shade throughout running to light yellow at the base of petals. The flowers are of good size, pointed and of good form with large heavy petals, exceptionally free-flowering and strongly sweet-scented. \$75.00 per 100.

Souvenir de Claudius Pernet (Pernet-Ducher, 1920). A most vigorous grower of erect branching habit; beautiful, brilliant green foliage; long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals, a beautifully formed bloom. Color most striking sunflower yellow, deeper in the centre, without any color blending, and which is retained without fading even in the warmest weather. No other Rose ever introduced has attracted so much attention. \$60.00 per 100.

Souvenir de Georges Pernet (Pernet-Ducher, 1920). We have felt enthusiastic about this variety ever since its introduction, and are convinced that it stands at the head of the list of the many valuable garden Roses that have been produced by Mr. Pernet-Ducher. It is a strong, vigorous grower and produces its large flowers which are beautiful in both bud and fully developed bloom, which are of an intense Oriental red, shading to cochineal carmine at the margin of the petals, the whole being suffused with a golden sheen. \$60.00 per 100.

Souvenir de George Beckwith (Pernet-Ducher, 1919). A variety that is meeting with much favor; flowers very large, globular and full double, with petals of good substance. Color, shrimp-pink, tinted chrome-yellow, shading deeper at the base of the petals, the various shades blending very harmoniously; moderately fragrant. \$60.00 per 100.

Souvenir de H. A. Verschuren. This Holland introduction of 1924 has quickly found its place among the best bedding Roses. In color it is a two-tone yellow, the centre a beautiful apricot-yellow which shades to saffron-yellow at the edges, and while in unfavorable weather it shades lighter, its rich color is maintained better throughout the season than any other pure Hybrid-Tea variety of similar color. \$60.00 per 100.

New Polyantha Golden Salmon

Two Remarkable New Polyantha or Baby Roses

Golden Salmon. This new color in the Baby Roses is remarkable, a most distinct, brilliant, luminous, orange-scarlet that everyone admires and which is certain to become one of the most popular of the Baby type, be it as a plant for the garden or as a pot plant for Easter, Mother's or Memorial Day.

Locarno. Identical in vigorous habit of growth, freedom of bloom and brilliancy of color to Golden Salmon, equally desirable, but of a glowing Oriental or Turkish red, which, as the flowers mature, passes to a pretty cochineal carmine.

The above two Baby Roses we offer only in strong, vigorous young plants from 3-inch pots, fine stock to pot on into larger sizes for this spring's sales. \$3.50 per doz.; \$25.00 per 100.

Two New Single Hybrid-Polyantha Roses

New Hybrid-Perpetual Rose

Mme. Albert Barbier

Introduced three years ago, this remarkable Rose has quickly found its place in popular favor. In its habit of flowering it is as free as many of the popular Hybrid-Tea varieties, its seed parent is Frau Karl Druschki, from which it has inherited a strong, clean, vigorous growth; its buds are long and well formed of a pearly white color suffused with soft, salmony flesh and develop into large, full double imbricated flowers of splendid form which as they expand, show a golden apricot suffused centre. A gem in every respect. \$75.00 per 100.

New Hardy Yellow Rambler "Primrose"

In this variety we have what has long been sought after, a real hardy yellow rambler, that is a strong grower and hardy under climatic conditions that Dr. Van Fleet and similar varieties will stand. Our colored illustration does not do full justice to its color which is brighter, a glowing shade of light primrose-yellow which color is maintained until the petals drop. Its flowers, which are generally borne in trusses of from 2 to 5 flowers, on long stems, are about 2½ inches in diameter. The plant is of vigorous climbing habit, free flowering, mid-season and the flowers last in good condition for a long time, with healthy dark glossy green foliage. Strong two-year-old plants, \$1.00 each.

Rose Species

Rosa Hugonis. This species, recently introduced from China, is unlike any other Rose. It is of shrub-like habit of growth and naturally forms symmetrical bushes about 6 feet high and the same in diameter. Its delicate yellow, single flowers are produced on long arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips with these attractive flowers, and after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy. Strong two-year-old plants, 60 cts. each.

Rosa Moyesi. Grows from 6 to 10 feet high with brilliant single deep blood red flowers in June. 75 cts. each.

Rosa Xanthina. Bright yellow double flowers about two inches across, really a double flowering Hugonis with better foliage and lasts in flower for a much longer period. 75 cts. each.

Austrian Brier Roses

Harison's Yellow (Austrian Brier). 50 cts. each.

Juliette (Hybrid Brier). 50 cts. each.

Perslau Yellow (Austrian Brier). 50 cts. each.

New Hybrid Rugosa Roses

Agnes. Coppery yellow buds and flowers turning to amber yellow as they develop, the only Rugosa of a yellow color. The flowers are of good size for this type, sweetly scented and produced freely in early summer. \$1.50 each.

Red F. J. Grootendorst. This might properly be called a Rugosa Baby Rambler, it being a cross between Rugosa and the Crimson Baby Rambler. Imagine a shrub-like Rugosa Rose covered with trusses of Crimson Baby Rambler Roses and you will have a fair conception of this new hybrid variety. It is not a rose that you want to plant in with your bed of Hybrid-Tea or Hybrid Perpetual Roses, but is valuable to plant as an isolated specimen or in a mass in a bed in an exposed position or in the shrubbery border or use it for an everblooming hedge, for which purpose it is admirably adapted. It is absolutely hardy and continues in bloom until late in the fall.

Strong two-year-old plants, \$60.00 per 100.

Pink F. J. Grootendorst. Identical with the above except in color which is a splendid, clear pink. Two-year-old plants, \$60.00 per 100.

New Climbing and Rambler
Roses

Bonfire. One of the freest flowering, of Dorothy Perkins type but with great trusses of cherry crimson flowers; an early bloomer. 50 cts. each.

Emily Gray. In this we have a real yellow climbing Rose. The buds are long and pointed, of splendid shape; in color, a beautiful light orange-yellow, changing to pale orange as they expand; they are borne on stiff stems of sufficient length for cutting; dark green, glossy, holly-like foliage. 50 cts. each.

Ernestine Cosme. A unique single-flowered variety of pretty form and of a delicate soft pink, these are borne in great pyramidal shaped many flowered sprays in great profusion. 50 cts. each.

Jacotte. A wonderfully distinct Rose of strong, vigorous habit, bronzy colored branches and rich green, glossy, disease resisting foliage and good sized, delightfully sweet scented flowers of a light salmon-orange with golden-yellow shadings at the base of the petals. On account of its strong, healthy growth, clean foliage and beautiful flowers, differing from all other varieties, we consider this a gem among climbers and a Rose that will please all who plant it. 60 cts. each.

Le Reve. A yellow pillar Rose of which Dr. J. Horace McFarland, editor of the American Rose Annual, under date of May 31, 1927, said: "Le Reve is perfectly beautiful today, a yellow Rose requiring no excuse for fading, for it is yellow and stays yellow. The foliage is good, the plant is good looking and the fragrance to me is delightful." 50 cts. each.

Mme. Jenny. A very strong growing climber with large, healthy disease resisting foliage with flowers two inches and over in diameter borne in clusters of from 5 to 7 flowers each, these are cup shaped, quite full of a delicate satiny rose color with a delightful fragrance. 75 cts. each.

Marie Gouchault. Identical with Dorothy Perkins, excepting in color, which is a clear geranium-pink without magenta shadings. Very free and early, 50 cts. each.

Paul's Lemon Pillar. A very beautiful and entirely distinct large double, sulphur-yellow, perfectly formed flower, that has proven hardy in this latitude during the past two seasons. Fine as a pillar Rose. 50 cts. each.

Phyllis Bide. The feature of this variety is that it blooms continuously throughout the summer and fall, and while its flowers are small they are of exquisite form in the bud opening with gracefully reflexed petals and are produced in long, loose sprays; in color a pale gold at base, flushed and shaded pretty rosy-carmine towards the edges. 60 cts. each.

Solarium. In single-flowered Ramblers this is a gem. It is of the same type as Hiawatha on which it is a decided improvement, the flowers being larger, more freely produced and of more brilliant coloring, an intensely rich crimson-scarlet. 50 cts. each.

Two New Hardy Climbing Roses

Two New Hardy Climbing Roses introduced by the American Rose Society. Of the various Roses distributed through arrangements made by the American Rose Society with the U. S. Department of Agriculture, where these varieties were raised by the late Dr. W. Van Fleet, we consider Breeze Hill and Glendale among the most distinct and valuable.

Breeze Hill. On account of its color, which is a deep cream with tints of pink and salmon, it has very aptly been described as a hardy Gloire de Dijon; the flowers are large and very double, it is of strong climbing habit, perfectly hardy and one of the latest to come into bloom.

Glendale. A perfectly hardy climber with heavy dark green disease resistant foliage and long, slightly fragrant, beautiful lemon-yellow buds of uniform shape which open to creamy-white, fairly double flowers which are borne in clusters of up to 20 flowers on stems long enough for cutting.

Strong two-year-old plants of either, 75 cts. each.

Althea William R. Smith

Abelia Chinensis Grandiflora

A choice, small, hardy shrub of graceful habit, producing through the entire summer and fall months white-tinted lilac heather-like flowers in such abundance as to completely cover the plant. 3-inch pots, \$1.50 per doz.; \$10.00 per 100.

Giant-flowered Althea William R. Smith

Everyone will be pleased with this splendid variety. The habit of the plant is ideal, naturally forming attractive, symmetrical, bushy specimens, while the glistening, pure white flowers are of giant size, open out flat or salver-shaped, quite different from the older types, and are produced in great profusion from early in July until late in September.

Strong 3-year-old plants, bushy, 24 inches high, \$4.00 per doz.; \$30.00 per 100; bushy 4-year-old plants, 24 to 30 inches high, \$6.00 per doz.; \$50.00 per 100.

New Red-leaved Japanese Barberry

This splendid novelty has met with unusual popular favor, immense quantities have been disposed of during the past two seasons, and it is certain to continue in good demand.

We are now booking orders for one year seedlings for lining out, delivery fall of 1929 and spring of 1930, \$5.00 per 100; \$30.00 per 1000, or in lots of 5000 or more, \$25.00 per 1000.

Three-year-old Specimen Plant
New Red-Leaved Japanese Barberry

Azalea Kurume

Corchorus or Kerria Japonica Fl. Pl.

(Globe Flower)

Illustrated in colors in our Garden Book for 1929.

One of the good old shrubs that is not planted near as extensively as it deserves, it should find a place in every garden. It is recognized as one of the only ornamental shrubs which may be classed as "ever-blooming"; producing attractive double golden-yellow flowers like small rosettes in great profusion from early June until October; of strong, upright growth and clean habit, blooming equally as well in the shade as in the open sun, a quality lacking in most of our flowering shrubs. The branches in winter are a pleasing shade of green, adding much to its decorative value throughout the entire year. Strong plants, 24 to 30 inches high, \$3.50 per doz.; \$25.00 per 100.

Cotoneaster

Horizontalis. A dependably hardy variety of compact, spreading habit of growth with neat evergreen foliage and very attractive orange-red berries which are set off nicely against the dark foliage and which remain on the plant the entire winter. A most valuable subject for the front of the border or for the rockery. Large field-grown plants being difficult to transplant, we have prepared a lot of thrifty young pot-grown plants which will give satisfactory results. 4-inch pots, \$6.00 per doz.; \$50.00 per 100.

Prostrata. Equally as hardy as *Horizontalis* but of erect though compact habit of growth with smaller deeper green foliage and brilliant bright red berries that carry throughout the winter. 3½-inch pots, \$4.50 per doz.; \$35.00 per 100.

Golden Variegated California Privet

We offer a splendid lot of two-year-old plants, nicely trimmed, very bushy specimens, from 12 to 15 inches high, which, if potted in 6-inch pots, will make most valuable material for use in window or porch boxes and other plantings. \$3.50 per doz.; \$25.00 per 100.

We also offer three-year-old bushy plants, 24 to 30 inches high, \$4.50 per doz.; \$35.00 per 100.

One-year-old stock for lining out, 12 to 15 inches high, \$10.00 per 100; \$80.00 per 1000.

Kolkwitzia Amabilis (Beauty Bush)

An exceedingly handsome new ornamental shrub from the wilds of China, resembling the Weigelia and Honeysuckle to which it is allied. Growing 6 to 8 feet high at maturity, with long arching branches, this variety combines all the merits of a perfect shrub: hardiness, year-round beauty of foliage and habit, and an amazing profusion of pale-pink bell-shaped flowers in June. Strong plants 18 to 24 inches high \$1.00 each.

Nandina Domestica (Chinese Bamboo)

A very handsome small shrub, hardy as far north as Philadelphia; it grows about three feet high with graceful, light green foliage, which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and are followed by crimson berries. Strong 5-inch pots 75 cts. each.

Viburnum Carlesi

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of *Bouvardia*. Good bushy specimens 1½ to 2 feet high, \$1.50 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, one-year old, 15 to 18 inches high, \$2.50 per doz.; \$20.00 per 100.

Wheel Hoes, Cultivators and Seeders

Much of the tedious, back-breaking seeding, weeding and hoeing are eliminated by the use of adjustable wheel tools. Being light and simple in construction, they are practical tools for women and children. Market gardeners use them, making possible accurate sowing and thorough cultivation in rows too narrow for horse tools.

Send for a Planet Jr. Catalogue. It is possible to list only a few of these tools here since the line includes a very complete assortment of hand tools and horse tools, both for one horse and two horses.

No. 3 Planet Jr. Hill and Drill Seeder

The equipment of one pair of garden plows, 4 cultivator teeth, 1 pair of 6-inch hoes and leaf lifters enables you to do practically all the garden work. Capacity of seed hopper, $2\frac{1}{2}$ quarts. \$20.00.
