If Goods are wanted C. O. D., 25 per cent. of the amount must accompany the order. Such orders can only be sent by express.

Special Notice about Warranting Seeds, Etc.

Peter Henderson & Co. give no warranty, express or implied, as to description, quality, productiveness, or any other matter of our Seeds, Bulbs or Plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

OUR RED TRADE-MARK.

While we no longer supply dealers, yet, as heretofore every package, large or small, of our seeds will bear our Red Trade-Mark, a fac-simile of which is here shown.

WHEN WE EXECUTE ORDERS.

Every order is filled immediately on arrival, or is acknowledged under rare circumstances its shipment is likely to be delayed for a day or two. If goods, notification of shipment or acknowledgement of order is not received by the customer after a reasonable lapse of time, it may be assumed that the order has miscarried, or that the name or address was omitted from the order. We will, when notified of such a case, use our best efforts to trace it without delay.

Give full shipping instructions on each and every order you send, avoid chance of error, never write letters on the same sheet as your order.

We fill orders of all values from the smallest to the largest, and receive the same careful and prompt attention.

ABOUT PACKING AND SHIPPING

When goods are ordered from both seed and greenhouse establishments we always combine, where practicable, the orders and make one shipment.

We make no charge for packing, cases, baskets, packages or barrels and pack as lightly as possible, consistent with safety, so as to reduce cost of carriage when paid by purchaser. In fact, we assume extra expense in supplying light strong cases and, where possible we pack in barrels covered with waterproof covers which greatly reduces weight.

Cloth bags only we charge for, and these at cost, viz: 1 peck, 1 bush, 12c.; 1 bush, 15c.; 2 bush, 2c. All grass seed bags excepting bag Timothy and Clover, are furnished free.

Special packing of seeds for foreign shipments, when necessary, in tin lined cases or double sacks we charge for at cost.

We make no charge for cartage or delivery of goods to any rail station, steamship line or express office in New York City.

The safe arrival is guaranteed of all goods sent by express to any part of the United States or Canada. We ship plants at all seasons of the year, even in the coldest weather.

When shipped by freight we deliver all bulbs and roots properly packed and in good condition, into the hands of transportation companies. After that our responsibility ceases. Consignee then assumes all risks of heating, freezing and delays.

SPECIAL IN REGARD TO THE SALE AND SHIPMENT OF PLANTS.

All plants sent by express, unless specially ordered otherwise.

Plants will be sent by freight if requested, but at purchaser's risk. Plants will be sent by mail if so ordered, and it is practicable to do so, but only at an advance of twenty-five per cent. on the prices quoted.

The plants are offered in this list at the rates per 100 provided (except

Reduction in Express Rates
on Plants.

Under the new ruling of the leading Express Companies advocated and secured by us, plants packed in closed boxes, will now be carried at the "General Specials" rate. This rate means a reduction of 20 per cent. from the regular merchandise rates to all points where no "General Specials" exists. To points where a "General Specials" rate is in force the companies made a special reduction. Shipments weighing less than 100 lbs. receive the benefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandise rate is \$4.00 per 100 lbs., a box of plants packed closed, weighing 100 lbs. will be carried for \$3.20, a saving of 80c. on one shipment.

HENDERSON'S SUPERIOR

EASTER LILY BULBS.

WE SUGGEST that forcers of Lilies divide their orders this year between Bermuda Easter Lily Bulbs and Japan Easter Lily Bulbs. Take the Bermudas for early forcing and the low priced Japan stock for late forcing. There will be a small crop of Bermudas on account of the reduced acreage.

HENDERSON'S SUPERIOR BERMUDA EASTER LILY BULBS. (LILIUM HARRISII.)

For shipment in July or early August.

	Doz.	100	1000
First Size Bulbs. (5 to 7 inches in circumference.)	\$0.60	\$1.25	\$40.00
Intermediate Size. (6 to 7 inches in circumference.)	0.75	5.50	50.00
Extra Size Bulbs. (7 to 9 inches in circumference.)	1.50	11.00	100.00
Monstrous Size Bulbs. (9 to 11 inches in circumference.)	3.00	21.00	200.00

The TRUE Bermuda Easter Lily is our Great Specialty. We were the pioneer introducers of it and have always been "Headquarters," supplying the trade generally, both in Europe and America.

We wish to lay particular stress upon the size and quality of our Bulbs which are larger, healthier and better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeavor to grow cheaply—to enable them to undersell.

The so-called Bermuda Lily disease is primarily the result of reduced vitality caused by insufficient plant food in the soil. While there is no crop of bulbs on the island entirely free from the disease, yet we have less of it in our fields than any other grower, as we have always realized the importance of proper fertilization.

WHAT FLORISTS THINK OF

Henderson's Easter Lily Bulbs

"I do not hesitate to say that the lot of Harrisii I bought from you this season are the best I received for a number of years. They are the nicest looking plants that I have seen anywhere, and I am glad that it is so, as this was the first time I got my Harrisii from you and which will assure you of getting further orders."
CHRIS BESOLD, Florist,
Mincola, Long Island.

"I have been growing your Harrisii bulbs for several years. Last season I divided my order, placing one-half with you and the other half with another prominent seedsman. Yours were the true Bermuda Harrisii, while the others were badly mixed with a worthless variety which grew to enormous height with a very small flower. Your half were all of an even size with flowers of excellent quality. I had the honor of having the finest lilies in Pittsburgh from your bulbs. There were but few of your plants diseased—probably 50 in the whole batch of 6,000 bulbs. You will have my full order next season."
WM. F. LAUCH, Florist,
Carrick, Pa.

"I got 100 Harrisii Lily Bulbs from you last year and 99 of them bloomed all right, they were a nice lot."
WILLIS E. HAMILTON, Florist,
Belfast, Maine.

"You may book my order for 7 to 9 inch Liliun Harrisii for 1902. Those from you this year were fine."
E. HAENTZE, Florist,
Fond du Lac, Wis.

LILIUM HARRISII.

LILIUM LONGIFLORUM

GRANDIFLORUM.

The Large Flowering Japan Grown Easter Lily.

This type flowers in Japan about a week later than L. Eximium, but the flowers are of larger size, perfect form and of superior substance; stems marked black.

First Size Bulbs. (5 to 7 inches in circumference.)	\$0.30	\$2.00	\$18.00

HENDERSON'S SUPERIOR JAPAN EASTER LILY BULBS. (LILIUM LONGIFLORUM.)

For shipment last of September or early in Oct.

The imported Japan grown bulbs of Liliun Longiflorum as they arrived in this country up to two or three years ago—were usually a mixture of various types, including early flowering later flowering, tall, dwarf, narrow leaved, broad leaved, green stemmed, red stemmed, black stemmed, small flowered, large flowered, etc. Agreeable to our persistent solicitation, our growers commenced to separate the desirable types, and discarded those unsuitable for Florists' use. So that this year we are able to offer only the best forcing strains of Japan grown longiflorum which our growers say will come 90% true though we cannot guarantee it. Of course, on account of the later arrival of the bulbs they cannot be forced into flower as early as the Bermuda type Liliun Harrisii, but for late winter and spring flowering the Japan grown bulbs are very popular on account of their low price. Some florists think the flowers from the Japanese bulbs are superior in size and substance to those of Liliun Harrisii, but we think the cool, slower forcing of the Japanese bulbs accounts for this.

In ordering, be careful to state which strain of Japan longiflorum is wanted. In absence of such information L. Longiflorum Eximium will be sent.

HENDERSON'S SPECIAL FORCING AND BEDDING HYACINTHS.

(For Shipment in September.)

These bulbs are of a much larger size than those put in ordinary mixtures; in fact, most of these average as large as those often sent out as 'First Size Named' by some dealers. They are of the same age as the first size Named Hyacinths offered by us, from which they are the second selection. They will produce grand spikes of bloom, and each sort as offered below, being of one shade of color and blooming at one time, render them of great value for forcing and bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

Late Single Garden Tulips.

The Late Flowering Garden Tulips generally are in full flush of bloom in May. They differ from the Early Single Tulips by their taller growth and larger flowers. Planted in conjunction with early tulips—a gorgeous display of bloom may be enjoyed until late in May. They are brilliant in the extreme for bedding purposes. The flowers are very large, symmetrically formed and of magnificent colors.

NARCISSUS JONQUILLA OR "JONQUILS."

HENDERSON'S GIANT

"Christmas Forcing"
LILY OF THE VALLEY.

Henderson's Giant Christmas Forcing LILY OF THE VALLEY.

The finest grade of Lily of the Valley in the world for early winter flowering. They will bear twelve to sixteen large bells on strong stalks, with foliage even when forced for extra early; they are equally superior for later or successional crops. The pips average large, plump and regular, with extra long roots. Read what our customers think of them.

"The Christmas Valley I had from you were very fine—better than any I have handled in 18 years' experience, and I have kicked myself because I did not order more. Will want a large quantity next season; can't compete now-a-days unless you have something a little better than the other fellow—and the extra price received more than pays the difference in cost between No. 1 stock and ordinary, and there is a satisfaction outside of dollars and cents that goes a long way."

S. A. E. LYMAN, Essex Greenhouses,
 Coe Ridge, Ohio.

"We see from the style of bloom that you have a fine strain of Lily of the Valley and you may book us for 30,000 pips for fall delivery."

A. S. MACBEAN, Lakewood, N. J.

CALLA ELLIOTTIANA.

PAEONIAS.

For Forcing.

Shipment in November.

Place the plants in a cold frame, and when forcing time arrives remove them to a green house with a uniform temperature of from 55 degrees to 60 degrees, when they should be in flower in about eight weeks; removing the lateral buds gives finer flowers; give plenty of manure water. Strong forcing roots either white, crimson or rose, 20c. each, \$2.00 doz., \$15.00 per hundred.

Lilium Candidum.

Ready for shipment in August.

(Annunciation. Madonna or St. Joseph Lily.) The well-known Garden Lily, snow-white fragrant blossoms. It is also a popular late forcing Lily for florists. Selected large bulbs, 75c. per doz., \$5.50 per 100, \$48.00 per 1000.

For a complete list of Lilies see page 12.

SPANISH IRIS.

WHITE CALLAS. DRY ROOTS.

Price, strong one-year-old plants from 3-inch pots, \$6.00 per 100.

A unique and handsome ornament for the greenhouse, conservatory or living room window. The Japanese prepare this by fastening the rhizomes (creeping stems) of *Davallia Bullata* around a ball of moss while in a dormant condition. When wanted to grow they need only be immersed in water and hung up, immersing them again at required intervals. (*See cut.*) The stock we offer is *second year growth*, not the freshly made-up stock.

Hardy Ever-blooming Climbing Rose.

Climbing Clothilde

Soupert . . .

An invaluable addition to our list of hardy Roses of climbing habit. It has withstood a temperature of twenty degrees below zero. It blooms most profusely on growths made the previous season, producing hundreds of clusters of perfect flowers. The color is French white with a distinct centre of silvery rose, flowers perfectly double even in the hottest weather. It is the healthiest climbing Rose we know, has never had any disease and should succeed everywhere, (See cut.) Plants from open ground, ready October 20th, \$2.00 per doz, \$12.00 per 100.

The Crimson Rambler Rose

It is of rapid, vigorous growth; plants in our grounds attained a height of *fifteen feet* the past season. The flowers are produced in trusses pyramidal in shape, good specimens measuring *nine inches from base to tip, and seven inches across*, fairly covering the plant from the ground to the top, so that it is *one mass of glowing crimson*. The profusion of bloom is marvelous, *over three hundred blooms having been counted on one shoot*.

THE YELLOW RAMBLER. AGLAIA.

Light yellow, quickly changing to light straw color, blooms very freely in clusters. It is semi-double, **very fragrant**, entirely hardy.

THE WHITE RAMBLER. THALIA.

This variety bears clusters of pure white flowers, which are deliciously fragrant. The flowers remain on the plant a long time—from three to five weeks. The plant is perfectly hardy, equal in this respect to the Crimson Rambler, and where one is planted the other should be also.

THE NEW PINK RAMBLER ROSE, PSYCHE.

A cross between Crimson Rambler and Golden Fairy. In growth and habit it much resembles the Rambler. The flowers are produced in large clusters, and are 2 to 2½ inches across when fully expanded. The color is white, suffused with salmon-rose and pink, with yellow base to the petals. A real companion to Crimson Rambler. Price, for the four "Rambler" Roses \$2.00 per doz., \$12.00 per 100. Plants ready Oct. 20th.

THE MEMORIAL ROSE. Rosa Wichuraiana.

The grandest plant for cemetery decoration in existence. It grows flat on the ground, like an ivy, and blooms in grand abundance throughout July and intermittently the balance of the season; pure white, sweetly fragrant flowers, with a golden yellow disc. It is perfectly hardy and if planted this fall should bloom next season. Price, strong plants from open ground, \$2.00 per doz., \$12.00 per 100. Ready Oct. 20th.

NEW RED MEMORIAL ROSE

Similar to the above in all respects, except that the flowers are a *brilliant carmine red*. A very useful plant by itself but of increased value as a companion for the White Memorial Rose.

Price, \$3.00 per doz., \$20.00 per 100. Plants from open ground ready Oct. 20th.

HENDERSON'S CREAM OF THE

NAMED SWEET PEAS.

All small flowering, delicate and inferior sorts as well as renamed duplicates, have been discarded.

There are too many so-called varieties of Sweet Peas—nearly two hundred—offered to the Public. Many of them are alike, or so nearly so that experts can scarcely distinguish them apart. So we have culled out inferior older varieties that have been improved upon, the newer sorts that have reverted back or are not improvements, and the sorts that have been offered under different names by different firms which we have proved at our trial grounds to be the same thing.

If we do not offer the variety you are looking for, refer to our discarded list, which tells what better variety of same color to select in place.

Mammoth Rock Red. This is the finest of all the red cabbages, especially for the market gardener. The seed we now offer was grown especially for us by a Long Island market gardener from a select stock, which has brought the top price in the New York market for many years. This will account for its higher price, but to the market grower it is well worth the extra cost.....30 1 00 3 50

TURNIPS.

GOLDEN BALL or ORANGE JELLY. This is the most distinct yellow Turnip we know. The flesh is of a very fine texture, making it one of the best table varieties. The bulb is of medium size, with small tap roots, and is early in maturing. 10c. oz., 15c. $\frac{1}{4}$ lb., 40c. lb.

YELLOW GLOBE. One of the best varieties for general crop; flesh very firm and sweet, and keeps well until late in spring; grows to a large size, and is excellent both for stock and table-use. 10c. oz., 15c. $\frac{1}{4}$ lb., 35c. lb.

WHITE EGG. Its shape is nearly oval or egg; flesh very firm and fine-grained; thin and perfectly smooth skin, and both flesh and skin are of snowy whiteness. Its flavor is of the very best, mild and sweet. 10c. oz., 15c. $\frac{1}{4}$ lb., 50c. lb.

EARLY WHITE STRAP LEAF. Differs from the Red only in color. 10c. oz., 15c. $\frac{1}{4}$ lb., 35c. lb.

PURPLE TOP WHITE GLOBE. A second early and late variety. Is a heavy cropper and a good keeper. The leading variety grown by market gardeners. 10c. oz., 15c. $\frac{1}{4}$ lb., 40c. lb.

RED TOP STRAP LEAF. A flatter and earlier form of Purple Top White Globe. It is used chiefly for early marketing. 10c. oz., 15c. $\frac{1}{4}$ lb., 30c. lb.

RUTA BAGA.

Henderson's Long Island Improved Purple Top.

This is undoubtedly the finest variety of Purple-Top Ruta Baga—originated by one of our Long Island growers. It is twice the size of ordinary American stocks, and although size is usually got at the expense of quality, the quality of this variety for domestic purposes is superior to any we have tested. It first came under our notice as a prize winner and we feel certain that from its enormous size, solidity and good quality, it will prove to be a champion variety for exhibition purposes. (See cut.) 10c. oz., 20c. $\frac{1}{4}$ lb., 50c. lb.

Exposition,

SOW THE "HENDERSON" LAWN GRASS SEED

THIS FALL AND HAVE A PERFECT LAWN NEXT SPRING.

THE "HENDERSON" LAWN GRASS SEED will form a close, thick turf in a few weeks' time, with no tendency to stool or grow in clumps. It roots deeply and withstands severe droughts without turning brown, maintaining its beautiful deep green color throughout the season. We have made the formation of permanent lawns a study for years, and the **Finest Lawns in this country to-day were obtained by using the "Henderson" Lawn Grass Seed**, which is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England.

THE "HENDERSON" LAWN GRASS SEED is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs. per measured bushel.

Full instructions of "HOW TO MAKE A LAWN" are given with every package.

THE QUANTITY REQUIRED.

(We furnish it in large or small quantities to suit the pretentious lawn or the modest dooryard plot.)
The quantity for making new lawns is 5 bushels per acre, or for renovating old lawns, 1 to 2 bushels. For a plot 15x20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns.

Prices, 20c. per quart, \$1.25 per peck, \$4.50 per bushel of 20 lbs.

(If by mail, add at the rate of 5c. per qt. for postage.)

Henderson's "TERRACE SOD" LAWN GRASS.

A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out, that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich velvety green turf throughout the season.

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bush.

"SUNNY SOUTH" LAWN GRASS.

Specially prepared for the South or for very dry sections, and contains the best grasses adapted for hot, dry situations.

Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bush.

Henderson's "SHADY NOOK" LAWN GRASS.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty.

Price, 20c. per qt.; \$1.75 per pk.; \$6.00 per bush.

Henderson's "GOLF LINK" GRASS SEED.

A mixture of grasses that will produce a sward equal to those of the "GOLF LINKS" of Scotland. While the outlying portions of the "Links" can be seeded with less expensive grasses, the "putting greens" for about twenty yards around the "holes" must be sown with the very finest grasses.

For Putting Greens we can supply a special mixture of grasses. Price, 30c. per qt.; \$1.75 per pk.; \$6.00 per bushel of 25 lbs.

For the Outlying Grounds or Fair Greens we can supply a suitable mixture of grasses. Price, 20c. per lb.; \$18.00 per 100 lbs.

The Superiority of

The "Henderson" Lawn Grass Seed

has drawn forth favorable comment from the Managers of the Pan-American Exposition Grounds, as follows:

"It affords me great pleasure to inform you that your Lawn Grass Seed has come up splendidly. It is the best seed that I have ever seen and by far superior to any other that has been sown here." R. ULRICH, Sept. 1st, 1900. Sup't Landscape Dep't.

And later Mr. Ulrich informs us:

"The lawns from your seed are the finest on our grounds; they are of that BEAUTIFUL RICH GREEN color, so much darker and different from any of the others, some of which are of such a pale yellow green that I fear we shall have to plow them up and re-sow with your seed."

DWARF ESSEX RAPE.

Rape affords the best pasture during comparatively cool weather, so that it should be sown either early in spring or during July and August, to be ready for pasturing during the months of September, October, November and even December, if the weather be favorable.

It is usually ready for pasturing in six to eight weeks from time of sowing, and one acre will carry twelve to fifteen sheep or hogs six weeks to two months. When on the Rape they should at all times have access to salt, but water is not necessary.

It is also an excellent plant for feeding green to cattle during the fall months, but it should be cut and fed to them in the stalls, as they trample and waste too much. For sheep and hogs the feeding value of Rape excels all other plants we know of. Sow 4 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. Price, 10c. lb., \$3.25 bushel of 50 lbs., 100 lbs., \$6.25. If by mail, add 8c. per lb.

MILLET.

Excellent catch crops for sowing during the summer. They cure into excellent hay if cut when in blossom; if allowed to ripen they become too woody.

HUNGARIAN. Is the quickest of catch crops for hay, and as it may be sown any time during the summer months up to middle of August, it is invaluable for overcoming a shortage of the regular hay crop. Many farmers now occupy their land with other crops, and for their hay depend entirely on Hungarian Grass, which they can sow after other crops have been harvested. Sow 1 bushel per acre. 8c. lb., \$1.80 bushel, \$3.50 per 100 lbs.

GERMAN OR GOLDEN. This variety is considerably larger than Hungarian and yields a much heavier crop, but is later and not so quick growing, consequently cannot be sown much after the fourth of July in this latitude. To maintain its heavy cropping character, seed of this variety needs to be specially cultivated.

Our seed is specially grown and selected, and will produce nearly double the crop of seed not so grown and which can be offered at a cheaper price. Sow 1 bushel per acre. 10c. lb., \$2.25 bushel, \$4.25 per 100 lbs., 10 bushels and upwards, \$2.00 per bushel.

WINTER OATS.

The stock of Winter Oats we offer is grown in Northern Pennsylvania and is remarkably hardy, and superior to the ordinary winter or turf oats of Virginia and the South. These may be grown as far north as New Jersey. Sown in September they stool out remarkably and require but one and one-half bushels per acre. They have stiff straw stand up well and are more productive than spring oats. 40c. peck, \$1.15 bushel; 10 bushels and upwards, \$1.10 bushel.

WINTER RYE.

Winter.—The variety most commonly cultivated.. \$1.20 bushel; 10-bushel lots, \$1.10 bushel.

Excelsior Winter.—A variety from Vermont that has never failed to yield 40 to 50 bushels per acre. \$1.50 bushel; 10-bushel lots, \$1.40 bushel.

Thousandfold.—Most productive rye; \$1.50 bushel; 10-bushel lots, \$1.40 bushel.

Giant Winter.—The heaviest cropping rye in existence, having in fair tests outyielded all other varieties both in straw and grain. The heads average six to eight inches in length and are filled from end to end with large, plump, heavy grains. The straw is giant in length and strength and of extraordinary stiffness, resisting severe wind and rain storms to a remarkable degree, without lodging. \$1.75 bushel; 10-bushel lots, \$1.60 bushel.

WINTER WHEAT.

BEARDED RURAL NEW YORKER.—(No. 57.)

Heavy heads, beautifully symmetrical, broad in the middle and tapering at each end. The straw is tall and strong and stools freely, frequently having 35 to 40 stalks from a single grain. The heads are compact, averaging three kernels to a "breast," and ten breasts to a side. The kernels are of medium size and colored between the "red" and amber. It produces the finest grade of flour. The chaff is white with a trace of velvet sufficient to make it difficult for the green fly to attack it, and the heads do not mildew. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

BEARDLESS RURAL NEW YORKER.—(No. 6.)

A hybrid between rye and Armstrong wheat, though apparently all traces of rye have disappeared. It succeeds and produces heavy crops on poor, thin land, and it is also extremely hardy. The golden straw is thick and strong, supporting the heavy grain without breaking. The large amber kernels are placed four to a breast, eight breasts to a side, with long, symmetrical heads having a brown chaff. 75c. peck, \$2.25 bushel; 10 bushel lots, \$2.00 bushel.

PEDIGREE GIANT.—(Half-Bearded.)

The Pedigree Giant is a cross obtained from the old Genesee Giant, and has all the desirable features of that variety when at its best. The whole head is crowded with fine hard amber grain.

It is a champion in productiveness and it has a thrifty fall growth, is early and strong stooling, has strong, short-jointed straw, which stands up well under high culture. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

PRIDE OF GENESSEE.—(Bearded.)

Most productive, having a long, well-filled head, and will give a reasonably good crop on poor land. The head is large and well-filled, even on short, light straw. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

GOLD COIN.—(Bald.)

A very productive variety. The grain is white, the head long and well-filled, frequently having five kernels abreast. The straw is strong and stiff, and will not lodge on the richest land. 75c. peck, \$2.00 bushel; 10-bushel lots, \$1.85 bushel.

BEARDED WINTER FIFE.

A grand new bearded wheat, which has all the splendid milling qualities of the celebrated Winter Fife, and is even harder and more flinty in the grain. It is one of the earliest wheats, a strong, healthy grower, stooling rapidly in fall and starts early in spring. Straw strong; heads long and wide; grain large and plump; of light amber shade. It will make more flour than almost any other sort. 75c. peck, \$2.00 bushel; 10-bushel lots, \$1.85 bushel.

CLAWSON LONGBERRY.—(Bald.)

Resembles the old favorite Red Clawson, but is a stronger grower and more prolific stooler, has a sturdy, thick-walled, wiry straw, of a light yellow shade. Grain dark amber, large and of the true Longberry type. \$2.25 bushel, 10 bushels and upwards, \$2.00 bushel.

Full descriptions of Wheats, etc., are given in our special AUTUMN WHEAT PAMPHLET, which will be mailed on application.

CRIMSON OR SCARLET CLOVER.

(*Trifolium Incarnatum*.)

THE MOST VALUABLE PLANT FOR RESTORING THE FERTILITY OF WORN-OUT SOILS.

The value of Scarlet Clover is now so thoroughly established that we have no hesitation in recommending that all lands from which crops have been harvested during the summer and fall should be sown with Scarlet Clover for plowing under the following spring. Authorities who have made a careful estimate state that plowing under a good crop of Scarlet Clover is equivalent to 20 tons of stable manure per acre, and even if the clover be harvested or pastured, the benefits derived from the wonderful nitrogenous root formation will alone many times repay the cost.

If intended for feeding, it should always be cut while in the young stage and never fed to stock after the crop has ceased flowering, as serious results are apt to follow the feeding of over-ripe Crimson Clover. It is the cheapest source of nitrogen and should be extensively used throughout the entire Eastern States.

Its value as a winter soil mulch and for green manuring for orchards cannot be overestimated.

It may be sown among corn, tomatoes, turnips, etc., at the time of last hoeing, or after potatoes, melons, cucumbers, etc., have been harvested, or on grain-stubble and harrowed in.

In the latitude of New York, time for sowing may extend from July 15th to September 15th, and further South up to October. The seed needs to be only lightly covered, and a good plan is to sow on fresh plowing and cover with a light harrow. Sow 15 lbs. per acre.

Choice new crop American grown seed of highest growing quality, thoroughly recleaned and free from weed seeds, 10c. per lb., \$4.25 per bushel, \$6.75 per 100 lbs.

For full descriptions and illustrations of our Grasses, etc., see our "FARMER'S MANUAL. Mailed free on application.

These are made of strong Burlap bagging, warmly lined with waste wool and cotton which is quilted in to hold position. They are excellent substitutes for straw mats, being, if anything, warmer than straw, more easily handled less bulky, and they do not harbor mice or other vermin. We were afraid that they would hold moisture, and either rot or mildew, but our trial for two winters proves them to be far more durable than straw mats.

MASTICA FOR GLAZING.

Greenhouses, sashes, etc., new and old. It is Elastic. Adhesive and easily applied; it is not effected by dampness, heat or cold.

MASTICA
GLAZING
MACHINE
\$1.00 Each.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is, putty is no adopted for greenhouse work.

After much study, the inventor of "Mastica" decided that the composition must be of different material and the qualities must be elastic and tenacious to admit of expansion and contraction without cracking. "Mastica" when applied, in a few hours forms a skin or film on the entire mass hermetically sealing the substance and preventing evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a Mastica machine on the outside of sash as it makes it perfectly tight and saves the expense of relaying the glass. One gallon is sufficient for about 300 lineal feet used either for bedding or over glazing.

Prices for Mastica, soft for machine application, 35c. per quart; 65c. per half gallon; \$1.25 per gallon.

VAN REYPER "PERFECT" GLAZING POINTS.

GREENHOUSE FUMIGATORS

For Smoking Plants.

For fumigating greenhouses with dampened tobacco stems; made of galvanized sheet iron; a damper regulates the draft; no danger of fire; no ashes or litter. No. 1, 12 ins. high, \$1.40; No. 2, 16 ins. high, \$1.60; No. 3, 20 ins. high, \$1.85; No. 4, 24 ins. high, \$2.50.

Perfection Fumigators.

Make Moist Smoke.

This fumigator will last for years; it has a water tank between the fire and the outside, preventing burning out. The tank should be filled with tobacco water, from which a vapor arises and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious to delicate foliage than from any other fumigator made. Outside fumigating can also be done with the Perfection; the cast-iron lid is made so a hose can be attached, and all the outlets for the smoke (except through the hose) can be closed off. No. 1 holds one peck of stems \$2.70; No. 2 holds half bushel of stems, \$3.35; No. 3 holds 3/4 bushel of stems, \$4.00.

HENDERSON'S PICTURESQUE GARDENS.

THIS unique new book mirrors the charms of the prettiest parks lawns and gardens of Europe and America. The picturesque, the natural and the gardenesque adornments are reflected in about two hundred magnificent photographic illustrations from nature—many of these views are 5 x 7 inches, some larger, few smaller; they are grouped and printed in a most artistic manner on heavy-coated paper, with just enough text matter to describe the view and name the plants, vines, trees and shrubs needed to produce a similar effect or design.

There are in this country many lawns gardens and grounds which the owners would improve and embellish, but they do not know exactly what they want, what would look well, nor how to go about it, and it is for the benefit of such that we have prepared this book; for, although there are countless works of exhaustive *precept* on landscape and gardening, there have been none issued so rich with illustrations of *example* as in HENDERSON'S "PICTURESQUE GARDENS." In it we force no particular styles or fashions, but describe and picture such a great variety of lawn and garden creations that some fruitful suggestions must be found adaptable to the environment of every home, whether pretentious or modest. Price, postpaid, \$2.50.
