Dreer's Novelties and Specialties in Flower Seeds

New Super Giant Aster "Los Angeles"

Los Angeles is the first of a new super-giant race of beautiful Asters. The color is pure shell pink. The flowers are full petaled and unusually large yet artistically graceful in the feathery effect of the interlacing petals. Of magnificent tall growth. Tr. pkt. 50c; oz. \$3.50.

Aster-Improved Giant California Sunshine

Plants of this new race grow three feet high and bear blossoms on long, stiff stems. They are admirable for cutting. The individual blooms are enormous, four to six inches in diameter.

The color in these new Asters is startlingly beautiful. A dual tone effect is obtained through the contrasting tints of the disc-like center and the outer or guard petals. Separate colors are now available and we offer the following:

- Appleblossom. Delicate flesh pink.
- Deep Rose.
- Enchantress Pink. Salmon pink.
- Lavender.
- Light Blue.
- Purple.
- Any of the above: Tr. pkt. \$1.00; ¼ oz. \$1.50.
- Finest Mixed Colors. Tr. pkt. 50c; ¼ oz. \$1.00; oz. \$3.00.

Calendula—Pot Marigold

Chrysanthus or Sunshine. An entirely new break in Calendulas with flowers that have a striking resemblance to those of a Chrysanthemum. The petals are long, wide, and drooping, giving the flower a globular shape. The color is clear buttercup yellow. Graceful, long-stemmed blooms which make particularly fine cut flowers. Tr. pkt. 25c; oz. \$1.00.

Orange Shaggy (Novelty). A very distinct new type in Calendulas. The petals are long and deeply fringed. Row upon row of these overlap each other and build up a bloom of great grace and beauty, sharply contrasting with the formal appearance of older varieties. The color is a deep orange shading slightly lighter in the center. Well grown Orange Shaggy has long stems and forms plants about 18 inches high. Tr. pkt. 50c; oz. \$3.00.

New Annual Canterbury Bells

An Annual Canterbury Bell which blooms from seed in less than six months. It should now be possible to have this beautiful flower in bloom at almost any time of the year. The plant grows from 2 to 2½ feet tall, each plant having from 6 to 8 spikes of bloom.

	Tr. pkt.	¼ oz.
Angelus Bell. A beautiful shade of deep rose	\$0 50	\$1 25
Blue Bell. A beautiful Cambridge blue	50	1 25
Liberty Bell. A lovely shade of intense violet	50	1 25
Mission Bell. A soft clear pink.....	50	1 25
Mixed. This contains shades of blue, pink, and white. Oz. \$2.00.....	40	60

Cosmos Early "Orange Flare"

Orange Flare is the same vivid orange-yellow color as Klondyke with just a bit more orange but it can be had in full flower less than four months from time of sowing. The foliage is very attractive, being a light green of graceful form. The stems are long and wiry; well adapted for cutting. Tr. pkt. 50c; oz. \$2.50.

Carnation Flowered Marigold

Guinea Gold. A distinct type of Marigold, of graceful pyramidal habit, growing 2 to 2½ feet high. Semi-double flowers, 2 to 2½ inches across, with broad, wavy petals of a brilliant shade of orange flushed with gold. The usual Marigold odor is less pungent than in other sorts. Makes an excellent cut flower and can be grown under glass as well as outdoors. Tr. pkt. 30c; oz. \$1.50.

Double Sweet-Scented Nasturtiums

With the introduction of Golden Gleam several years ago a new interest in Nasturtiums was aroused and it became the greatest novelty in flowers that has been introduced. The grower has succeeded in developing a scarlet variety and a splendid mixture of hybrids which we offer below. The plants form vigorous large bushes which throw out short runners. When well grown the flowers average 2½ to 3 inches across, having the appearance of a fully double flower. They have a delightful sweet fragrance.

Golden Gleam. Large golden-yellow. Oz. 20c; ¼ lb. 50c; lb. \$1.50.

Scarlet Gleam (Novelty). A most intensely dazzling color, even more showy than the vivid golden yellow of Golden Gleam. ¼ oz. 50c; oz. \$1.75.

Glorious Gleam Hybrids (Novelty). These are the result of years of scientific breeding and selection. A glorious and harmonious blend containing a large number of colors and shades, and almost 100% double flowering. ¼ oz. 50c; oz. \$1.50; ¼ lb. \$5.00.

Pansy—New Early Giant America

An extra-early giant-flowering strain of short, stocky, and vigorous growth. Very free flowering and includes the richest and most brilliant colors. An ideal Pansy for the grower who has a basket trade. Tr. pkt. 75c; ¼ oz. \$3.00; oz. \$10.00.

Petunia—Single Dwarf Compact Mixed

A new strain of Petunias with dwarf plants 8 to 10 inches high and 12 inches in diameter. Bears good sized flowers in a well balanced range of colors. Splendid for pot culture, rock gardens, beds, and borders. Tr. pkt. 50c; oz. \$2.50.

All-Double Dwarf Giant Fringed Petunia Victorius Mixture

The plants are remarkably uniform in habit, producing very large, fully double flowers in a wonderful assortment of brilliant and fancy colorings. As they seldom grow more than 10 inches in height, they are very suitable for pots and for borders. 500 seeds \$1.50; 1000 seeds \$2.50.

Sweet William—Dwarf Alpine Mixed

This magnificent strain makes compact plants about 6 inches tall and about a foot in diameter. The plants are completely covered with flowers in a remarkably wide range of colors, many of them attractively edged with deeper colors. Flowers two weeks earlier than any other Sweet William, and is very even in habit of growth. Tr. pkt. \$1.00; ¼ oz. \$1.50; oz. \$5.00.

Zinnia—Scabiosa-Flowered

This new Zinnia is entirely different in the formation of its flowers, the outer ring is formed of long petals, whereas the center is made up of many small flowers, which at first sight have a great likeness to the Scabiosa. Plants 2-2½ ft. Colors include crimson, scarlet, orange, yellow, pink, and white. Tr. pkt. 50c; oz. \$2.50.

Zinnia—Chrysanthemum-Flowered or Fantasy Finest Mixed

The very informal, shaggy flowers are graceful and interesting, quite distinct from the stiff, formal appearance of the regular type. The rounded, medium sized flowers are a mass of irregular ray-like petals. The blooms are large enough for a mass of color yet small enough to lend themselves gracefully to flower arrangement. The color range includes the brightest shades of red, yellow, and orange as well as popular pastel pink and cream tones. Tr. pkt. 50c; oz. \$2.50.

DREER'S SUPERB GLADIOLUS

We handle only the best varieties of Gladiolus for garden and field use, forcing, and for resale to the retail trade. Our list embraces all the popular varieties for every purpose, and the prices will be found right for No. 1 top-size bulbs, which is the only size we handle. The difference in price between top-size bulbs and second and third size does not justify taking the risk of having smaller blooms or such as do not bloom at all. Our bulbs are all thoroughly treated against thrips and we will send directions for thrips control with every shipment.

Varieties most popular for forcing in the greenhouse are marked with an asterisk (*).

Dreer's Gold Medal Gladiolus

Our Gold Medal Blends are made up entirely of named sorts, grown separately, and blended according to a carefully considered formula, so that there may be a proper balance of the various colorings and shadings. We know from experience that it is practically impossible to grow Gladioli in mixture and have them give satisfaction to our customers. Such mixtures soon become loaded with less desirable but rapidly propagating sorts and the whole color scheme is thereby thrown out of balance.

In our blends we use only the finest named kinds and no variety enters into them that is not large flowering and of attractive color. Good texture, strong spike and artistic placement of the blooms are requirements of the greatest importance. All are sorts that are well worth growing individually.

Section One. The range of coloring extends from rich rose, through old rose, rose ash, orange-scarlet, and bright red, to deep crimson and velvety maroon. 30c per doz.; \$2.00 per 100; \$15.00 per 1000.

Section Two. From palest blush to warm deep pink and soft rose, from cream and primrose to citron yellow and salmon-orange, together with snowy and tinted whites and other sorts splashed or stained with deeper blending shades. The colorings of our Gold Medal Section 2 Blend always carry a strong appeal. 30c per doz.; \$2.00 per 100; \$15.00 per 1000.

Section Three. Pale lavender, deep blue, lilac, heliotrope, amaranth, and velvety royal purple—all of the rich "Pansy" shades have been garnered for this blend. 35c per doz.; \$2.25 per 100; \$18.00 per 1000.

All Sections Mixed. An actual mixing in due proportion of bulbs from the three numbered blends. If you want all of the possible worthwhile Gladiolus colorings, you should find them here. 30c per doz.; \$2.00 per 100; \$15.00 per 1000.

Primulinus Hybrid Gladiolus

These are most attractive, easy to grow, and sure to bloom. They lend themselves particularly well to interesting decorative effects and soft color harmonies.

In hot, dry locations, where other varieties would burn out, they will still give a wealth of flowers, but naturally they respond, like all Gladiolus, to high cultivation and favoring environment. The color range runs from primrose to rich orange, apricot, and crimson, but there will be shades of pink and rose as well, together with rare coppery hues. We offer a mixture of named varieties, grown separately, and blended to give a proper color balance. 30c per doz.; \$2.00 per 100; \$15.00 per 1000.

Select Hydrangeas

Young Stock in 2-inch Pots, for Growing on

The following list embraces the best of the standard varieties, as well as the best of the more recent introductions.

The stock offered is of last summer's propagation. The plants from which the cuttings were made are planted in the open field, where many of them have stood from ten to twenty years. The young stock is therefore very superior to such propagated from the blind wood of forced plants. It is not only 6 to 9 months older, but much more vigorous.

New Dwarf Hybrid Border Asters

We take pleasure in introducing 6 New Dwarf Hybrid Asters which we feel sure will fill a long felt want in providing a race of dwarf, compact, free flowering plants blooming at a season when there is a scarcity of low-growing flowering plants.

Two Wonderful New Climbing Roses Easlea's Golden Rambler

(Easlea, 1934). U. S. Plant Patent No. 114. A new outstanding Climbing Rose from England, producing its comparatively large, double, rich golden flowers in large trusses. An additional quality is a delicious fragrance. Gold Medal Royal Horticultural Society July 1932. Awarded the Cory Cup as the best new seedling climber or rambler Rose of British origin introduced in 1932. **\$1.25** each; **\$12.50** per doz.; **\$90.00** per 100.

Skyrocket

(Kordes, 1934). A real everblooming pillar Rose with enormous clusters of medium size, blood red flowers produced in profusion during the whole season. Very showy. The fore-runner of a new race. Its upright habit makes this variety valuable either as a pillar Rose or at the back of a shrubby border. **\$1.00** each; **\$10.00** per doz.; **\$80.00** per 100.

Three American Hardy Climbing Roses Blaze

(The New Hardy Everblooming Scarlet)

U. S. Plant Patent No. 10. A marvelous new Hardy Climbing Rose which has inherited the blazing color of Paul's Scarlet Climber and the everblooming habit of Gruss an Teplitz, thus combining the most attractive features of both its parents. It is a vigorous climbing variety which will grow to considerable height and will produce flowers on both the old and new growth. It is a Rose that is destined to enormous popularity. **\$1.25** each; **\$12.00** per doz.; **\$75.00** per 100.

Golden Climber

(Mrs. Arthur Curtiss James)

U. S. Plant Patent No. 28. The first true golden yellow climber with blooms of the choicest quality. The buds are true golden yellow with heavy markings of orange-scarlet showing between the sepals. These splashes gradually disappear and the semi-double blooms are a solid golden yellow with a heavy cushion of nankeen yellow stamens in the center. They have a delightful fragrance and last a long time in water. The flowers are mostly solitary on stems 18 inches or longer. Though the blooms have all the wonderful qualities of the Hybrid-Tea type the plants are exceptionally hardy withstanding sub-zero freezing weather to an astonishing degree. **\$1.50** each; **\$15.00** per doz.; **\$100.00** per 100.

The New Dawn

The New Dawn

(The Everblooming Dr. Van Fleet)

U. S. Plant Patent No. 1. This new Rose is a sport from Dr. Van Fleet. It is identical in every way with its parent, in size of the flowers and formation of its long, pointed, flesh pink buds, and showy double flowers, but it blooms continuously throughout the summer and fall months. Really the first worthwhile Hardy Everblooming Climber introduced. **\$1.25** each; **\$12.00** per doz.; **\$75.00** per 100.
