BULB DEPARTMENT.—The immense quantities of Bulbs which we handle, enable us to supply them at the lowest possible prices. Our sources of supply are the best in this country and abroad, the leading growers of the world having for years supplied us with their **choicest stock**. All prices quoted in this list include duty, packing and delivery to any Express or Freight Line in Philadelphia.

PLANT DEPARTMENT.—Our stock of decorative plants is now very complete in a full line of sizes, from small seedlings for growing on, to specimens of the most useful decorative sizes. The plants are all in a clean, healthy, vigorous condition, thrifty and well-grown, and will compare favorably with stock distributed by us in previous seasons.

Whenever possible, we solicit a personal inspection of our stock. Our nurseries at Riverton, N. J., are within easy reach from either Philadelphia or New York, and something of interest will always be seen.

A time card of trains, with directions how to reach the nurseries, will be mailed to anyone applying.

PLANTS FOR FLORISTS.

Our stock of decorative plants, such as Palms, Ferns, Pandanus, Ficus, Araucaria, etc., etc., is now very complete in a full line of sizes, from small seedlings for growing on, to specimens of the most useful decorative sizes. The plants are all in a clean, healthy, vigorous condition, thrifty and well-grown.

Our Measurements of Plants, where given, as in the case of Araucarias, Palms, etc., etc., means the height of the plant from the top of the pot to the top of the plant in its natural position. We make this explanation of our way of measuring, as many growers contend that the proper measurement is from the bottom of the pot to the tip of the longest leaf, and make their offers in that way.

An Invitation. Whenever possible, we solicit a personal inspection of our stock. Our Nurseries at Riverton, N. J., are within easy reach from either Philadelphia or New York (Time Tables on application) and something of interest will always be seen.

AGERATUM PRINCESS PAULINE.

Acacia Armata.

A pretty spring flowering variety which produces its flowers in globular heads from the axils of the foliage in such a manner as to completely envelope the plant in a pleasing light yellow; an excellent plant for Easter forcing, succeeding under the same culture as the Azaleas. A nice lot of bushy plants. 6 inch pots, \$1.00 each; 7 inch pots, \$2.00 each.

Ageratum Princess Pauline.

A most distinct and novel variety of dwarf compact habit, rarely exceeding five inches in height, its peculiarity being that both colors, blue and white, are combined in the same flower; the body of the flower being white, while the stamens are of a light sky blue, giving the flower a pretty, variegated appearance; one of the most distinct new bedding plants, and a most desirable plant for the retail trade. 75 cts. per dozen; \$6.00 per 100.

Allamanda Williamsii.

This handsome variety is entirely distinct from all others, being quite dwarf and in no way resembling a climber, but forming a compact bush with trusses of bloom at every point, and having from two to four expanded blooms on each extremity at the same time and buds innumerable. It continues flowering the whole summer, and, with proper management, in the winter also. The flowers are of a very rich yet delicate tint of yellow, deliciously scented. 3 inch pots, 15 cts. each; \$1 50 per dozen.

Anthurium Scherzerianum.

A fine lot of 5 inch pots, strong bushy plants. 50 cents each; \$5.00 per dozen.

SPECIMEN AZALEA.

Import Orders for

AZALEAS

Special Prices for Immediate Orders.

We are now booking orders for fall delivery. Buyers who use a quantity of this most popular Easter blooming plant, will find it to their interest to place their orders for next season's wants early, thereby securing the choice of the stock at lowest cost for transportation, as the plants can be forwarded with perfect safety during October, by fast freight, even to the most distant points.

Our growers in Belgium are among the most successful men handling Azaleas; they have been specialists in this line for many years, and their principal stock is sent to us.

All of our importations of Azaleas are sent here in bulk, and are all repacked at our own nurseries, so that any plants that may not have carried well are set aside. This insures our customers of securing only first-class stock, which cannot be compared with cheap assorted case lots, which are made up in Belgium, and are distributed on this side just as received, frequently not only containing damaged plants, but also, as a rule, many varieties not at all suited to the American trade.

The varieties we supply are only the most popular sorts suited to the American market. Our own representative makes personal inspections of the plants in Belgium previous to shipment, thus enabling us to guarantee satisfaction.

DRACENA GODSEFFIANA.

DRACÆNAS.

Godseffiana. Undoubtedly the most striking new plant introduced this year. As shown in the illustration, the plant is of an entirely different habit and appearance from all other Dracænas ; it is of free-branching habit, and throws out many suckers from the base so as to form beautiful, compact, graceful specimens in a very short time. Its foliage is broadly lanceolate, 5 to 6 inches long, and 2 to 3 inches wide ; of a strong leathery texture ; rich dark green color, densely marked with irregular dots and spots of a creamy-white, not unlike an Aucuba Japonica, of which the markings in the foliage strikingly remind one. The illustration gives but a faint idea of its striking beauty ; it is a plant which will undoubtedly be grown very extensively for decorative purposes when it becomes more plentiful, as it is very hardy as a house plant, equaling if not surpassing in this respect the Aspidistra and Ficus. Strong plants in 4½ inch pots, \$3.00 each ; \$30.00 per doz.

Bruanti. A graceful green leaved sort that is not as well known as it deserves to be ; a most useful decorative plant that will stand as much abuse as a Rubber.

4 inch pots, 12 ins. high, 30 cts. each ; \$3.00 per doz.
5 " " 15 " 40 " 4.00 "

Fragrans. 4 inch pots, \$2.50 per doz. ; \$20.00 per 100.

Marginata. Young plants of this fine variety. 3 inch pots, 30 cts. each ; \$3.00 per dozen.

Massangeana. Fine plants in 5 inch pots, 75 cts. each.

Sanderiana. A new and entirely distinct species. It has thick textured narrow leaves which are closely set on slender upright stems, variegated with silvery white and green bands alternating and of various widths, the whole surface of the plant being covered with a silvery sheen of bloom. It is altogether different from anything heretofore known in the way of Dracænas.

Good young plants, 3 inch pots, 30 cts. each ; \$3.00 per dozen.

Terminalis. 2½ inch pots, \$1.00 per doz. ; \$8.00 per 100.

DEUTZIA LEMOINEI.

Deutzia Lemoinei.

Without doubt one of the most important new hardy plants offered in many years. It is a hybrid between *D. gracilis* and *D. parviflora*, and has the advantage over the former of having flowers nearly three times as large, which are produced in broad based cone-shaped heads of from 20 to 30 flowers each, and are of purest white, which open out very full. It is perfectly hardy, and will not only prove a valuable plant for the garden, but is certain to become one of the standard plants for forcing into flower in winter, more especially at Easter, and it is quite sure to take the place of the popular *D. gracilis*. This plant has received the highest awards from the National Horticultural Society of France, and has created quite a sensation wherever shown. Good one year old plants, \$1.25 per dozen; \$10.00 per 100.

As usual our stock of Ferns is very large, about 500,000 being now in pots ready to send out. Our collection has been especially selected for florists' use, discarding all such as are only useful in a botanical collection.

Asplenium Nidus Avis.

(Bird's Nest Fern.)

It is very rarely that this interesting variety is offered to the trade. We have been fortunate in securing a fine lot of 4-inch stock which we offer at 50 cents each, \$5.00 per dozen.

Cibotium Schiedei.

This is undoubtedly the finest of all Tree Ferns for use in decorative purposes, and though appearing very soft, is in fact very hardy, as has been demonstrated by the leading decorators in all the Eastern cities, succeeding admirably as a house plant, which is not the case with any other Tree Fern. It possesses a grace and delicate appearance that is found in no other plant. It is a variety that is always scarce and difficult to obtain. We have succeeded in growing a fine lot of this variety, and offer beautiful decorative plants of it.

7 inch pots, \$2.50 each.	9 inch pots, \$4.00 each.
8 " 3.50 "	10 " 5.00 "

Microlepia Hirta Cristata.

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is of such a delicate, graceful appearance, that would lead one to think that it was useless as a house-fern, it is, nevertheless, one of the best for this purpose, and when well grown meets with as ready sale as the popular Boston Fern. It is seldom that we are in a position to offer it in quantity; this season our stock is exceptionally large, which enables us to offer it at the following low prices:

2½ inch pots, 75 cents per doz.; \$ 6.00 per 100.
3 " \$1.25 " 10.00 "

Nephrolepis Cordata Compacta.

In our estimation this variety is the finest of all the sword ferns; it is of free, strong growing, compact habit, attaining when fully grown a height of about 2 feet. The fronds, which are of a dark green color, are very rich, of upright growth, with just sufficient arch in them to make them graceful.

2½ inch pots, \$1.25 per doz.; \$ 8.00 per 100.
3 " 2.00 " 15.00 "

Nephrolepis Exaltata Bostoniensis.

DREER'S DOUBLE PETUNIA.

Pandanus Utilis.

We have a large stock of this popular plant in fine condition. 2 inch pots, \$ 75 per doz., \$ 6.00 per 100

Pandanus Veitchii.

Good plants in 6 inch pots, \$1.25 each.

Dreer's Double Petunias.

Our strain of Double Petunias is too well known to require special description. For many years this has been one of the specialties of our establishment, and again this season we have grown many thousands of seedlings from which our collection has been selected, embracing only such distinct fringed varieties and colors that are especially suited to the retail trade.

We offer strong 3 inch pots, in 15 distinct varieties, ready about the first of October, at \$1.50 per set; or \$10.00 per 100.

NEW SINGLE VIOLETS.

The varieties offered below are great improvements over the old sorts, which were practically of little use except at such seasons when double-flowering sorts were not to be had, while in these new sorts the flowers are of such immense size that they are fully as desirable as the finest doubles. We offer strong field-grown clumps.

Admiral Avellan. A French variety with entirely distinct bright reddish flowers, different from anything yet introduced; the flowers, which are produced very freely, are of large size and fragrant. \$1.25 per doz.; \$10.00 per 100.

California. This was sent out as the finest single variety in cultivation. The flowers are very large, borne on long, stout stems, which makes it especially valuable as a cut flower; intensely fragrant and of a clear violet purple color that does not fade out. \$1.00 per doz.; \$8.00 per 100.

Luxonne. This variety is of French origin, and is without doubt the finest single violet grown. It is of the same size as the California, but appears nearly double its size, as the petals all open out flat. It is of a beautiful rich but soft violet purple color, with strong, stout stems from 9 to 12 inches long, and very fragrant. \$1.00 per doz.; \$8.00 per 100.

Princess of Wales. Another grand variety, not quite as large as Luxonne, and a shade lighter in color; intensely fragrant. \$1.00 per doz.; \$8.00 per 100.

PALMS, OUR LEADING SPECIALTY.

We again call special attention to our stock of Palms, which is the largest and most complete in the country, especially in the varieties and sizes used in the general Florist trade. Our stock of Kentias alone occupying over one and a half acres of glass, and all other popular varieties being on hand in proportionate quantities.

Special Notice.—Our measurements of plants where given, as in the case of Palms, etc., etc., means the height of the plant from the top of the pot to the top of the plant in its natural position. We make this explanation of our way of measuring, as many growers contend that the proper measurement is from the bottom of the pot to the tip of the longest leaf, and make their offers in that way.
