CHRYSANTHEMUM FRUTESCENS, MRS. F. SANDER

New Chrysanthemum Frutescens or Marguerite.**Mrs. F. Sander.**

The most valuable Marguerite, or Paris Daisy, yet introduced, the merits of which both as a flowering pot plant as well as a cut-flower proposition for the late winter and early spring months is now well established.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the centre of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. It is but rarely that a flower comes single, and when such is the case, they are as beautiful as the double forms; they are produced on long stems with a freedom not known in other varieties of the Marguerite.

We are prepared to book orders for delivery after October 25th for good 2 1/4-inch pots at \$1.25 per doz.; \$8.00 per 100; \$75.00 per 1000.

FINE FERNS OF SPECIAL MERIT

Adiantum Farleyense Gloriosa.

The Glory Fern or Ruhm von Mordrecht.

The Fern Which Will Revolutionize the Cut Frond Business.

For the grower of Ferns for cutting this new Maiden Hair will undoubtedly prove a most important addition; it closely resembles Adiantum Farleyense and will make a splendid substitute for that fancy variety and it can be produced at much less cost, as it will thrive under conditions in which Adiantum Farleyense could not exist.

At our Riverview Nursery we have given it a very fair trial for this purpose during the past winter. A block of these plants were planted on a bench in a house devoted to the ordinary Boston Fern and received the same treatment and temperature given to the Nephrolepis, and they developed not only fronds of great beauty on longer, stiffer stems than Farleyense, but also many more fronds than would be developed by that variety in the same length of time under the most favorable conditions.

Anyone who successfully grows the ordinary varieties of Adiantum such as Cuneatum, Croweanum and Hybridum, can grow it under precisely the same conditions given to these sorts.

We have a fine block of about 30,000 young plants 2¼-inch pot at \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This for many years has been the standard variety for general commercial work. We will have a nice lot of 3-inch pots. \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

NEW HYDRANGEA

The New Hydrangeas**The Great Easter Novelty of the Year**

Sizes listed below ready October 1st.

All of the varieties here offered have been tested by us under ordinary conditions as to their adaptability to forcing for Easter, with the intention of discarding any that proved unworthy.

To our surprise and gratification, all have proven themselves valuable additions.

While it is true that the average florist may ultimately select only a half dozen sorts as meeting his particular requirements, it is manifestly impossible for us to make the final selection for him.

In view of the condition explained above, we continue to offer the full set at a special price to enable the grower to try all the varieties and determine for himself which most nearly meets his particular requirements.

New Hydrangeas.

Continued.

Mme. E. Mouillere. This has been the favorite white variety in the New York market this year, very free flowering, of good size and form. Awarded silver medal at the National Flower Show at Boston last year. A great favorite with English growers, one London grower known to us handling over 30,000 of this variety alone.

2 1/4-inch pots, \$1.50 per doz.; \$10.00 per 100.

Mme. Maurice Hamar. Described by the introducer as a delicate flesh rose-color, of a pleasing shade. In our soil it has been the most beautiful deep blue we have seen, and which has been admired by everyone; a vigorous grower, very free and early; the individual flowers as well as the trusses being of immense size. One of the easiest to force early.

2 1/4-inch pots, \$1.25 per doz.; \$8.00 per 100.

5 " " 4.50 " 35.00 "

6 " " 6.00 " 50.00 "

5 " " 4.50 " 35.00 "

Mlle. de Tremault. As the result of our own trials we are convinced that this variety, which is yet but little known, is the best very large flowered white yet introduced. As free flowering as any, of splendid erect habit and beautiful foliage, it will produce flower heads as large as the old popular Otaksa. We strongly recommend it.

We have arranged with the introducer of this grand new variety to handle his entire crop of seed, which is now ready in fine plump seed of high germination. It would hardly be possible to praise this new type too much, and it has already made a name for itself among the most critical growers. It is of very rapid growth, the fronds set closer on the stems than the very best type of Plumosus Nanus, making a fuller, heavier string and when cut lasts longer in good condition than any other and is just as good for bunching as the old sort. We will not be surprised if it quickly becomes the leading variety for all purposes. Stock of seed limited. \$1.25 per 100 seeds; \$10.00 per 1000 seeds. 250 or more seeds at the 1000 rate.
