Directions to Customers

Order Early—We suggest that you send us your order as early as convenient. Please keep a copy of the order with which to check the goods when received.

Name and Address—Please remember to write on each order and letter your full name, Post Office, County, and State. Also give the street name and house number or P. O. Box besides the nearest Express Office.

Cash With Order—Remit by Post Office Money Order, Express Money Order, Draft, or Check. If you send cash, register your letter. We cannot be held responsible if these directions are not followed. If you request goods which are "Not Prepaid" to be shipped by Parcel Post please include in your remittance the cost of postage and special packing as explained below. We decline sending goods C. O. D. (Collect on Delivery).

Packing—No charge is made for boxes or packing on express or freight shipments nor for delivery to freight depot or express office in Philadelphia. The extra cost of "special packing" for parcel post shipments of plants and roots is included in the charges noted below.

"Prepaid" and "Not Prepaid" Shipments in the U. S. A. and Possessions

(For Canada and Foreign, see below)

Seeds Sent "Prepaid"—All Vegetable Seeds, Flower Seeds, and Lawn Grass Mixtures are sent "Prepaid" to any Post Office in the United States or its possessions, or at our option by Express or Freight Prepaid. Customer bears the cost of transportation on all other articles quoted "Not Prepaid."

Plants, Roots, and Bulbs Forwarded "Not Prepaid"—All Plants, Roots, and Bulbs are forwarded "Not Prepaid" by Express which means that the customer pays the cost of transportation. Goods that can be sent by Parcel Post as noted in the catalog will be mailed if you add to your remittance for postage and special packing:

10% of their value, east of the Mississippi
15% of their value, west of the Mississippi
Minimum charge 10c

We recommend to our customers to have their Plants, Roots, and Bulbs forwarded by Express as our experience shows that this method is usually the most satisfactory, except on small packages.

Sundries—Sundries, except where quoted "Postpaid," are sent either by express or freight the purchaser paying transportation charges. Shipments by express offer the safest and quickest method of transportation but they are also more expensive than freight. If undecided you may safely leave the method of transportation to our judgment, otherwise please state on your order whether they are wanted by express or freight.

Local Delivery—There is no charge for delivery of goods in Philadelphia and immediate suburbs.

Shipment by Steamboat—Fast lines of Steamship connect Philadelphia with Baltimore, Boston, Jacksonville, Miami, and Savannah. This forms a convenient, cheap, and safe method of transportation for heavy goods except during severely cold weather.

Plants by Railroad Freight—Shrubs, Hedge Plants, and other dormant stock can be forwarded by fast freight even to distant points.

Canadian Shipments

Flower Seeds are sent "Prepaid." The complicated regulations concerning the importation of Vegetable Seeds from the United States into Canada force us, much to our regret, to decline all orders of Vegetable Seeds to be sent into Canada. All other goods are sent "Not Prepaid" by Express or Freight purchaser paying all transportation charges as well as customs duties. Patrons who wish to purchase Plants or Bulbs must first secure a permit from the Department of Agriculture, Ottawa. If mailable Plants, Roots, and Bulbs are wanted by Parcel Post add 20% of their value to your remittance to cover postage and special packing. Minimum charge 10c. Remittances from Canada must be made in U. S. funds.

Foreign Shipments

Foreign Customers will please remit in U. S. Funds. Flower Seeds and Vegetable Seeds quoted "Prepaid" (except Beans, Peas, and Corn) will be prepaid for regular postage but transit and surcharges as well as any costs for Consular invoices or clearance papers are to be included in the remittance. All other goods are forwarded "Not Prepaid." If mailable Roots, Plants, and Bulbs are wanted by Parcel Post add 25% of their value to your remittance to cover postage and special packing. Minimum charge 10c. Customs duties cannot be prepaid.

Time of Shipment—All Seeds, Dormant Roots and Bulbs, and Sundries are forwarded as soon after receipt of order as possible unless shipment at a later time is requested on the order sheet. Roses and all Hardy Plants for the garden (Perennials, Shrubs, Hardy Vines, etc.) will be shipped at proper planting season unless otherwise specified on the order sheet.

Safe Arrival of Packages—We guarantee safe arrival of all goods sent by express or mail to any point within the United States proper. If such packages are injured or lost we will replace them as soon as notified of the fact. Goods sent in any other way travel at purchasers' risk. Claims for damages or errors must be made on receipt of goods. We cannot be held responsible for failure after delivery of goods in good condition.

Non-Warranty

We give no warranty, expressed or implied, as to description, quality, or productiveness of any of the seeds, bulbs, or plants we send out and will not in any way be responsible for the crop, and every order for articles purchased from this catalog will be accepted on these conditions only.

Correspondence—Your inquiries will have our prompt attention but we ask that all questions be stated clearly and briefly. Give them on a piece of paper separate from the order sheet and always add your full name and address to each.

NOVELTIES

and

SPECIALTIES

for

1935

The great interest in new and improved varieties manifested by American gardeners throughout the country prompts us to present to you this special catalog of Novelties and Specialties for 1935.

In order that one may have a well diversified garden it is advisable to combine novelties with the best of the standard varieties, and the specialties which we have included in this catalog will serve this purpose exceptionally well.

It is our hope that the gardeners who receive this special catalog will find it of value in planning their gardens. Anyone interested in Dreer's Garden Book for 1935—our complete 200 page catalog—is welcome to write for a free copy.

The development of new plants from seed is a slow and tedious process depending upon careful cross pollination and selection. Occasionally nature presents us with a worth-while sport of her own. Usually it takes a number of years before a new type has been worked up properly so that it will come true to form. In the case of plants propagated vegetatively by divisions or cuttings considerable time is required before sufficient stock can be grown to supply the demand.

The prices of novelties must necessarily be higher than those of old standard varieties but for the little extra cost the gardener will have the finest and latest because novelties offered by reputable houses are not merely different from others but represent a marked and desirable improvement in one or more ways.

We believe that the novelties offered in this catalog represent the best that have been originated for this year's introduction. The new Rust Proof Snapdragons are bound to appeal to all gardeners, particularly those who heretofore have found the growing of this showy flower difficult on account of the prevalence of the rust disease. Other new flowers that deserve your special attention this year are the new Sunshine Asters offered in separate colors. Also Orange Shaggy Calendula, Korean Hybrid and Riverton Seedling Chrysanthemums, Early Orange Flare Cosmos, Scarlet Gleam and Glorious Gleam Hybrid Nasturtiums, Dwarf Alpine Mixed Sweet William, Early-Flowering Tithonia, and the beautiful Chrysanthemum-Flowered Fantasy Mixed Zinnias.

Among the hardy plants the New Dwarf Hybrid Border Asters pictured and offered on the front cover have special value because of their late blooming season and compact habit. They are splendid for beds, borders, and for rock garden planting. The three new Roses offered on page 24 have our full endorsement and we feel confident that you will find them of exceptional merit.

You may rest assured that we carefully guard the quality of our seeds, bulbs, and plants and that we endeavor to supply you with the best strains, be it novelties, specialties or the old standard varieties.

New Cosmos—2102 Early Orange Flare

Among the new flowers offered this year for the first time this new Cosmos stands out as a most unusual and remarkable variety because it gives us a Cosmos of a distinct and rich vivid orange color. Its particular value lies in the fact that it is early blooming and may therefore be enjoyed even in northerly sections where the old yellow-flowered Klondyke would not produce blooms. It will bloom within 5 months after sowing. Pkt. 25c; special pkt. 75c.

Cosmos ^(A)

Beautiful summer and autumn blooming plants. They produce thousands of artistic flowers, furnishing an abundance of cut blooms for autumn decorations. Should be sown in spring in the open ground, when danger of frost is past, or the seed may be started under cover and afterwards transplanted. Plant not less than 18 inches apart in rows or in masses in beds. When the plants are about a foot high the tops should be pinched out to induce a bushy growth. They prefer a rather light, not too rich soil, but do well almost anywhere. North of Philadelphia it is safer to use the early flowering type.

Dreer's Selected List of Newer and Better Vegetables

In each class of vegetables we find some that are superior to others in one or another characteristic. It may be extra earliness, particularly attractive appearance, superior flavor, or an ideal combination of many desirable factors. Such vegetables logically become leaders and among such leaders the finest strains are most eagerly sought by the growers.

On this and the following pages we offer what we know to be prize strains of distinctly worth-while leaders among the most useful vegetables. They are not necessarily novelties but rather specialties which have won their way to the top through meritorious performances in gardens of Dreer customers everywhere.

23 Bean—Bountiful

A most remarkable Bush Bean with bright green pods measuring 6 inches long and $\frac{3}{4}$ -inch wide. They are brittle, tender, perfectly stringless, and very tasty. Enjoys a tremendous popularity as it combines good appearance and choice flavor with vigorous growth and remarkable resistance to disease. It has proved of particular value on lighter soils where the Round-Pod varieties often fail to produce satisfactory crops. Bears the bulk of its crop within 75 days after planting with the first picking being ready in about 60 days. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 70c; 5 lbs. \$1.65.

61 Bean—Tendergreen

This is a most remarkable newer Bean which is bound to become a great favorite as soon as better known. Though only of recent introduction it already has made a record for itself for being not only of strong growth but also most prolific. The graceful, slender, round pods are remarkably meaty and tender. They are entirely stringless even when fully grown and measure 7 inches in length. Their bright green color makes them most attractive and the flavor of the thick fleshy pods is delightfully mild and pleasing. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 70c; 5 lbs. \$1.65.

110 Bush Lima—McCrea's

With so many good Lima Beans already in existence one may wonder as to the desirability of adding still another variety to the list. Those who will grow this new McCrea's Bush Lima will readily understand our reason for recommending this new variety. It is without question the sweetest of all Lima Beans. Though its sweetness is without doubt the most outstanding characteristic it has many other splendid features that will appeal to both home gardeners and canners. The habit of the plants is vigorous and strong. The growth is upright and there is an abundance of rich green foliage. The short stout pods are very thick. Each pod contains from 3 to 5 large, plump, bright green beans which are so tightly packed in the pod that many of them are almost square. Very productive and of good flavor.

Pkt. 15c; $\frac{1}{2}$ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.00.

The plant makes a quick growth with the leaves being ready in 3 to 4 weeks after sowing. For a continuous supply make succession sowings a week or 10 days apart. Pkt. 10c; oz. 20c; $\frac{1}{2}$ lb. 50c; lb. \$1.25.

Mustard Spinach, Tendergreen

587 Onion—Valencia

This is the best of the large sweet Spanish Onions. Valued for its exceptionally mild and sweet flavor. We consider it the best of the Spanish Onions because it will grow to truly enormous size if conditions are anywhere near favorable. In some ways it resembles the popular Prizetaker but the onions are considerably larger and consequently heavier in weight.

The onions are round and have a beautiful golden yellow skin and pure white flesh. With the proper culture they will develop into magnificent specimens of the prize-winning type. For exhibition start the seed indoors early and transplant to the garden at the proper season. Pkt. 15c; oz. 35c; $\frac{1}{2}$ lb. \$1.00; lb. \$3.50.

611 Parsnip—Short Thick

Many gardeners find that harvesting the long Parsnips is quite a task particularly when grown on heavy soil and this new half-dwarf white variety is therefore bound to become very popular. "The Dreer" Lawn Grass

An Unequalled Mixture for a Beautiful Lawn

The Dreer Lawn Grass has been carefully prepared in accordance with our own formula which has proved to give a rich green, smooth, velvety lawn of fine texture altogether free from grasses which are inclined to produce clumps or knots. Such a lawn is bound to give to the home grounds a beautiful rich green setting that cannot be achieved in any other way. The grasses included in the Dreer Lawn Grass are all permanent, fine bladed, and of a rich deep green color. They are strictly lawn grasses.

The advantages of using the Dreer Lawn Grass are very obvious since the first and most important requirement for the establishment of a really good lawn is the correct choice of grass seed varieties which make a dwarf compact growth and have a rich deep green color. Due to its many components it is bound to produce a desirable smooth and even effect under varying conditions of soil and climate.

Each variety of grass in its composition is included to serve a special purpose. The strong fibrous roots of certain ones take a good hold of the soil and contribute considerably toward the permanence of the sod. Other grasses in the mixture are of a creeping habit. They are most essential as they quickly cover the entire surface and weave the sod into a thick carpet of rich green. Yet there are other grasses that also help the density and protect the lawn against rain damage and undue wear.

All the seed included in this mixture is of heavy weight. It has been cleaned by modern machinery to reduce foreign worthless substances to a minimum. Considering the value of the lawn as a permanent improvement of the home grounds the gardener cannot be too particular in selecting the very finest.

Pt. 25c; qt. 45c; 2 qts. 85c; 4 qts. \$1.50; peck \$2.75;

Dreer's "Evergreen" Lawn Grass

A Fine Mixture of Good Permanence

This special mixture, though less expensive than "The Dreer" Lawn Grass, produces a beautiful and permanent lawn. It is made according to our own formula and is composed of choice grasses which will produce a lawn that retains its rich green color and velvety appearance throughout the entire summer and fall. In making up this brand we are careful to use only seed that has been thoroughly re-cleaned.

Pt. 20c; qt. 35c; 2 qts. 65c; 4 qts. \$1.25; peck \$2.25, $\frac{1}{2}$ bu. (10 lbs.) \$4.25; bu. (20 lbs.) \$8.00; 100 lbs. \$38.00 prepaid.

"Shady Place" Lawn Grass

Its composition is such as to blend perfectly with any of the other lawn grass mixtures we offer. Success with it is certain if the lawn is properly fed and watered. Pt. 30c; qt. 55c; 2 qts. \$1.00; 4 qts. \$1.80; peck \$3.00; $\frac{1}{2}$ bu. \$5.75; bu. (25 lbs.) \$11.00; 100 lbs. \$52.00.

Our Popular Low-Priced Mixture

This popular, low-priced mixture is well suited to various soil conditions, giving good results even on small city grass plots, where the soil is frequently stiff and heavy. It will form a thick turf in a very short time and is most satisfactory for lawns and other spaces receiving considerable hard wear. It is also valuable for use on embankments and terraces, and for renovating old worn-out lawns.

Pt. 15c; qt. 25c; 2 qts. 50c; 4 qts. 95c; peck \$1.80; $\frac{1}{2}$ bu. (10 lbs.) \$3.50; bu. (20 lbs.) \$6.50; 100 lbs. \$30.00 prepaid.

"Terrace" Lawn Grass

The ordinary lawn grass mixtures are bound to be somewhat disappointing if planted on terraces or steep slopes because a special mixture of grasses that will hold the soil in position and prevent it from being washed away during heavy storms is needed. The grasses in this special Terrace mixture are deep rooting and of compact vigorous growth. Pt. 25c; qt. 35c; 2 qts. 85c; 4 qts. \$1.50; peck \$2.75; $\frac{1}{2}$ bu. \$5.25; bu.
