Our Credit Plan Order Blank

BENTON COUNTY NURSERY COMPANY

ROGERS, ARKANSAS

On orders amounting to Ten (\$10) Dollars and up, we will be glad to make the following terms to responsible people, in order that you may buy and plant what Nursery Stock, Seeds and Plants you will need, while the season is on to plant them and pay the balance due on them after they are planted. This enables you to have the stock coming on while you are paying out the balance due.

In buying on our credit plan your order must amount to \$10 or more. To each dollar your order amounts to, add 6 cents. This is done to defray the extra expense of taking care of the Credit Plan orders.

One-half of the amount of the order is to be paid down with the order, or before shipment date. The balance due is to be paid in three equal payments, as follows: One-third of the amount due to be paid one month (30 days) from date of shipment. Second payment of one-third of the amount due is to be paid two months (60 days) after date of shipment. The third payment of one-third the amount due is to be paid three months (90 days) after date of shipment. You may if you prefer send a deposit of 20 per cent of the amount of the order and we will ship C. O. D. for the balance due on the first payment.

We prepay transportation charges on all orders amounting to \$10, and up, except Balled and Burlapped Evergreens. Be sure to give your Post Office and Express Office if your Express Office is not same as your Post Office.

We guarantee our stock to reach you in good condition. If found otherwise, return to us immediately by express or mail, and we will refund every penny paid to us and paid by you for express or postage. Weather and soil conditions, and the way stock is handled after it leaves us have much to do with stock growing off and doing well all these being beyond our control. You can see that we cannot guarantee anything to live and grow, because that depends entirely upon conditions beyond us, and in making this order you agree.

Find enclosed \$..... One-half of the amount of this order. Thirty days after shipment of this order I will send you one-third of the balance due and same amount each 30 days thereafter until the balance due is paid.

I submit the following statement of facts to induce you to extend credit on this easy payment basis:

I have lived here since.....(Own or rent home).....

My former address was.....Married or single.....

Age.....Occupation.....My average monthly income is \$.....

If working for wages, give name of employer.....

How long have you worked for him?.....

Please give here the names of two references:.....

Introduction

In presenting this catalogue, we desire to extend our thanks for the past patronage of our many customers, and to solicit your orders for the future. Our right to existence is based upon our service and no order is too large or too small to receive our careful attention.

We are always glad to consult with prospective customers and give them suggestions based upon personal knowledge of what others have found the most profitable and satisfactory under similar circumstances.

We strongly recommend that you buy NOW whatever you contemplate planting, and you will have that much more time to enjoy the satisfaction which comes from planting; and it is not well to lose sight of the fact that we will be dead a long time after we leave this earth, and satisfaction now is better than the anticipated satisfaction of someone else. For commercial returns, the early bird gets the worm and while there seems no possible failure of the fruit demand for the future, yet the quicker you get your plants into bearing, and learn to properly make the fruit, the greater your advantage over those who plant next year, or "after a while."

We cannot accept orders for less than \$1.00. Because of the heavy expense of packing and high rates on first pound by parcel post and express we can not fill orders for less than \$1.00, without a loss to us and will ask you to make your orders amount to \$1.00 and up.

C. O. D. Orders Must Have a Deposit Paid on Them. We are sorry that experience has taught us that it is a losing proposition to fill orders and make shipments unless a deposit has been paid on the order; our stock is perishable and must have prompt attention when it arrives at destination and we are compelled to ask a deposit of 25 per cent of the amount of the order as a guarantee of good faith. We guarantee satisfaction or your money refunded.

We feel confident, that all things considered, we can supply your wants better than anyone else, because of our knowledge of local problems you have to meet.

You can only have the highest quality of fruit if you grow it yourself because you can allow it to fully ripen on the trees before picking, where the last touch of rich and juicy goodness is added.

Plant this year; the only way to lower the cost of the fresh fruit you eat is to plant it yourself. Plant it right in your own dooryard; the more fruit your family eats the less calls your doctor will make, for good ripe fruit is nature's best regulator and appetizer.

You save from 75 to 100 per cent in buying direct from our Nursery through our Catalogue. Read what the U. S. Government Department of Agriculture says, in Farmers' Bulletin, about buying trees and plants: "If the farmer makes his purchase direct from the Nurseryman, he will save the expense of the middleman or agent, and is less liable to the mistakes and injuries that will occur through repeated handling."

THE SHIPPING SEASON generally begins about October 15th, and continues until up in May. The season is not regulated however, by any definite date, nor by the state of vegetation at the locality of the planter, but by condition of the trees when received. Parties south of us may receive our trees some weeks after their season has opened, yet when planted they will give entire satisfaction.

EARLY ORDERS—To one familiar with the rush at packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—place your orders as far in advance of shipping as you possibly can, stating when you would like the stock sent.

PACKING—We do not charge for packing, boxing or delivering to the Post Office, Freight or Express Companies at our station.

REFERENCES—Dun & Bradstreet Commercial Agents, American National Bank, or any business firm in Benton County.

Thirteen Reasons Why You Should Buy From Us . . .

- 1—Because we sell you the best trees, plants and vines that can be produced at prices far below what others will ask you for the cheap, worthless kind. Our nursery stock is grown by the best method known to nurseries and no better can be produced regardless of prices. We offer \$100.00 reward for improved method on how to grow better nursery stock.
- 2—Because we prepay the postage or express charges on all orders amounting to \$10.00 or more, except Balled or Burlapped Evergreens.
- 3—Because we sell direct to the fruit growers saving you the Agent's or middleman's commission.
- 4—Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.
- 5—Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.
- 6—Because all our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.
- 7—Because we use every caution to keep all our varieties true to name and should a mistake occur and any variety prove untrue to name we will replace it free of charge or refund the price paid for it.
- 8—Because we grow and offer for sale only varieties that are known to be good fruits and money makers.
- 9—Because Benton County, Arkansas, has many many acres of varieties of fruits, and we have under our close observation a greater variety of fruits and berries than our competitors.
- 10—Because Ozark Mountain, Arkansas Grown, Nursery Stock is now considered by Horticulturists to be the best that can be produced.
- 11—Because trees and plants must be well rooted if success is to be made with them. Ours are the best to be had.
- 12—Because our old customers send us repeated orders and their neighbors send us their orders; a proof that they are well pleased.
- 13—Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

Don't . . .

Don't Be Deceived by a high priced Salesman and Nurseryman into believing that their goods are better, because they are higher priced; he is only trying to make you pay him a large profit because he considers himself a smooth salesman, but get some of ours for comparison and you will be convinced that ours are as good as can be grown.

About Pedigreed Trees . . .

Some Nurserymen are making considerable noise and asking advanced prices for pedigreed trees. What are pedigreed trees? They are trees grown from buds and scions of bearing trees of select strains and from trees that have proven they are extra good of their sort. This is simply what we have been doing for years; our trees should naturally be superior to others because their ancestors have been grown in this ideal central mountain climate.

We offer you pedigreed trees for less than one-half what other nurserymen are asking you; you get the benefit of the large volume of our business, as we only figure a small profit on each order. And the reason why we are able to let you have pedigreed stock so cheap is due to the large number of orders we fill each year; growing and selling nursery stock will probably be our life time work, and it is our purpose to fill each order in a way that we will merit the good will and friendship of that customer for all time to come.

Who We Are . . .

We are a bunch of old fashioned, hard working, blue-eyed hill-billies, who grew up right here in these Ozark Mountains, on the farm, and made our living from what we could grow out of this mountain soil and all we know is to treat you exactly

like we would want you to treat us if we were in your place and you were in ours. We would be "tickled pink" to work hard all the year and come out with a ten per cent profit.

What We Are . . .

We are natives of Arkansas, born and reared on farms in the Ozarks and our forefathers as far back as we can trace, have all been agricultural people, and we do not know from which European country they formerly came. In fact, they have been in America for many, many generations.

Where We Are . . .

We are located in Arkansas—in the Northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south, of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal Highways 71 and 62, just south of Rogers, Arkansas.

IF YOU ARE UNABLE TO DECIDE just what varieties you want to plant, and will tell us about what time you will want your fruits to ripen, and the number of trees, we will select the varieties for you giving you the benefit of our knowledge as to best kinds for your section. We will guarantee you to be pleased with results.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Ark. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States, as well as being the best for Southern States.

Nursery Salesmen . . .

All try to sell stock at a much higher price than we ask you. Some will ask you three or four times as much. These salesmen are compelled to sell you something to try to make you believe they have better stock because they are asking you more. They tell you our trees will not bear, or that they are inferior in roots and growth. If this is true, why do the best fruit growers in Arkansas and America buy from us? We offer a list of thousands of satisfied customers and our guarantee is that you must be satisfied or your money refunded.

We guarantee our stock to be as good as the highest priced nurseries in the world, although some will ask you two to four times as much as we offer our stock for. We do not claim to have the best nursery stock grown, but we do claim to have as good as the best, and what we mean by the best is as good as the highest priced nurseries in America.

Two Things We Strive For . . .

1st. To grow as good stock and best varieties of all of Fruits, Berries and Ornamentals as are known to the Experiment Stations of America.

2d. To sell them at the lowest prices that we can possibly afford and we believe that we can produce the very best trees, plants, etc., as cheaply as any nursery in the United States, because there are many of the owners of this nursery constantly on the job and are personally overseeing all the growing of this stock, while many of the largest, highest-priced nurseries leave all this to hired help who have no interest

in the business, except their pay check each Saturday night. Many, many mistakes are made that prove very expensive to this class of nurseries and they are compelled to pass this expense on to the customer. We are always on the lookout for the very best and most competent help to be had and we keep our expenses down to the minimum and get the best results possible, and pass this on to the customer in our **HIGH QUALITY STOCK** at the **LOWEST POSSIBLE COST**.

Our Guarantee . . .

Is that you must be satisfied or your money will be refunded for any items you purchase from us that are not what we represent them to be. Upon receipt of any stock ordered from us, if you are not perfectly satisfied, return it to us by express or mail and we will refund to you all money paid us for the items returned and for all transportation charges paid by you.

All claims except stock not true to name must be made within 30 days after receipt of order.

Our Aim . . .

What we try our very best to do, is to grow as good trees, plants and vines as can be grown and to grow the latest and most highly improved varieties of fruits and ornamentals and produce them as economically as we can.

We are always on the lookout for something better in fruits and ornamentals. If you know of anything better than the varieties we offer, we want you to write us about what you have. If we are convinced that it is better than what we are offering, we will try to get your permission to let us propagate it and offer it for sale.

Clocking the Fruit . . .

Donald, Wash., May 12.—(AP)—Records kept by J. C. Childs, orchardist, disclosed Bartlett pears are ready for picking 113 days after the blossoms are in full bloom. Cherries take 64 days; Elberta peaches, 134 days and Jonathan apples, 144 days.

Special Bargains

(AS LONG AS THEY LAST)

APPLE, PEACH AND PLUM TREES, GRAPE VINES ORNAMENTAL SHRUBS AND EVERGREENS

APPLE TREES

Under 1 ft., 5c each; \$5.00 per 100. 1 to 2 ft., 8c each; \$7.50 per 100.

These trees were grafted and planted in the nursery very late in the Spring, thus not putting on the growth they would have made, had they been set earlier. They are well rooted trees and first class stock and will soon make very fine trees. We have in this small grade:

Yellow Transparent	Grimes' Golden	Delicious	Yellow Delicious
Ada Red	Jonathan	Stayman Winesap	Black Ben Davis

PEACH TREES

Under 1 ft. high, 5c each; \$5.00 per 100. 1 to 2 ft., 8c each; \$7.50 per 100; \$67.50 per 1,000.

These are No. 1 trees in every respect. They are June bud trees and were budded late. The summer drouth retarded the growth. They are well rooted and will grow like magic. We have in this grade:

Early Wheeler	J. H. Hale	Belle of Georgia
Mayflower	Early Elberta	Heath Cling
Red Bird Cling	Elberta	Krummel October

PLUM TREES

Under 1 ft., 10c each; \$7.50 per 100. 1 to 2 ft., 15c each; \$12.00 per 100

These are June Bud Plum Trees. They were budded late, same as the June bud peach trees described above, are well rooted and will grow into a fine tree very quickly. We offer in this grade:

Hanska	Shiro	America	Gold	Burbank	Red June
--------	-------	---------	------	---------	----------

GRAPE VINES

3c each; \$3.00 per 100; \$30.00 per 1,000

These are well rooted grape vines (not merely cuttings). They were set out late and the drouth this season kept them from making large vines. They will grow off well and make fine vines in one year. We only have in this grade: CONCORD.

ORNAMENTAL SHRUBS

10c each; \$1.00 per dozen; \$8.00 per 100

These shrubs are well rooted and will grow into an extra fine plant in one year. The few weeks of drouth this summer retarded their growth this season. They are first class in every respect and you are sure to be well pleased with them. This lot will range in height from 10 to 24 inches and extra good plants: ALTHEA (Rose of Sharon) double white, red or pink; DEUTZIA, Pride of Rochester; FORSYTHIA, Intermedia; HONEYSUCKLE, white or pink; MOCK ORANGE, white; PRIVET, (hedge plants), California, Amoor River and Ibolium; SPIREA, Van Houttei; SNOWBERRY, Red; WEIGELIA, pink; HYPERICUM, (gold flower), yellow.

EVERGREENS

25c each; \$2.50 per Dozen; \$18.00 per 100

These Evergreens are young trees, from 2 to 4 years old. They are well rooted and well shaped and will in very few years make a fine specimen evergreen. Young evergreens transplant as a rule better than older trees. We offer the following kinds that will range in height from 10 to 20 inches: Norway Spruce, Black Hill Spruce, Juniperus Virginiana, American Arborvitae, Chinese Arborvitae, Golden Arborvitae, Scotch Pine and Austrian Pine. These small mail order size evergreens are not balled and burlapped.

Our Lowest Wholesale Prices

**DIRECT FROM GROWER TO PLANTER
AT A SAVING IN PRICE FROM 75 TO 100 PER CENT**

APPLES

Our apple trees are whole root trees, propagated by experts who have spent many years in propagation of fruits for the largest nurseries in the world, and who know all the late methods of making the very best trees to be made. Our trees are made on French crab seedlings, which make the very best root systems that apple trees can be grown on. Our trees are not to be compared in value to the common piece root apple trees grown on any kind of apple seedlings that are produced by most all the nurseries today. We want you to know that when you order from us you are getting the best trees made regardless of price. Our apple trees in all grades under 4 to 5 ft., are one year tops and two year roots. Trees larger than 4 to 5 ft., are two year tops and three year roots.

In selecting the most important varieties for cultivation, it has been our constant aim to secure only those of standard excellence, and in no instance to recommend a novelty without ascertaining its history from a reliable source.

SUMMER APPLES

EARLY RED BIRD—The earliest apple on our list, fiery flaming red, from week to two weeks before the Yellow Transparent. The earliest apples always bring the top prices, this one being of a very fine flavor, of good size and one of the very best for quality of any early apple yet introduced; makes it a winner for a market apple. The trees bear young, annually, and immense crops. It has sold for twice as much as Yellow Transparent on the same market. This variety should be planted in every home and commercial orchard. It starts the ripening season earlier and assures you of best prices.

EARLY HARVEST—Tree healthy, vigorous and a good bearer. Fruit medium size, nearly round, somewhat flattened; surface smooth, clear, waxy yellow; rarely blushed; flesh tender, juicy, acid to sub-acid, flavor good. July.

YELLOW TRANSPARENT—A Russian apple. The tree is a hardy, upright grower; regular and early bearer, medium size. Color a rich, transparent yellow with a faint blush on sunny side; flesh melting, juicy, sub-acid.

RED ASTRACHAN—Tree vigorous, upright; hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish yellow; flavor acid.

Grimes Golden Apples

RED JUNE—Medium, red; flesh white, tender; juicy, good flavor. Abundant bearer. Last of June.

ADA RED—Large, red, summer apple; ripens July 25th. Is a brilliant red, fine cooking apple as well as eating apple; large size, and bears heavy annual crops; begins to bear when very young and ripens at a time when there are no other red apples on the market, and always commands the highest prices.

OLD FASHIONED HORSE—Large, pale yellow, shaded with red; tender, juicy, sub-acid. Tree vigorous and very hardy; upright grower; bears early and abundantly. An old apple, famous for its fitness for cider, pies, drying and all culinary purposes. When allowed to mellow to deepest gold, it is a delicious eating apple. We have the genuine old-fashioned Horse Apple. Ripens August 1.

SWEET BOUGH—A large, pale yellow apple, tender and sweet. Tree vigorous and long lived. August to early September.

AUTUMN VARIETIES

MAIDEN BLUSH—Large, smooth, regular, evenly shaped red cheeks or blush on a pale, yellow ground; flesh white; tender, sprightly, with a pleasant sub acid flavor; bears large crops. August.

JONATHAN—Medium size, roundish yellow nearly covered with red; flesh white, fine grained, juicy, tender and mild; a delicious and strictly dessert apple that always demands highest market prices.

Seedling of Spitzberg. Is a much better tree; vigorous and productive. November to April.

GRIMES GOLDEN—This is one of the most popular apple trees in cultivation. Tree strong thrifty grower. Fruit medium or above, cylindrical; regular surface; yellow veined; russeted; flesh yellow, firm, very fine grained, juicy, flavor sub-acid; quality rich. For dessert, cooking and market. November and December.

KING DAVID—October. Size medium to large, color, deep rich red with distinct stripe-like markings of very dark red. Originated in Arkansas where it began bearing at three years old. Resembles Jonathan in both tree and fruit. Surpasses that variety in every good quality.

Stayman Winesap

Delicious Apples

AUTUMN VARIETIES

DELICIOUS—Flourishes well in every state of Union. Bears annually; great yielder; hangs well on trees. Trees very thrifty, long lived and extremely hardy. Fruit very large, nearly covered with brilliant, dark-red, flesh fine grained, crisp, juicy, melting and delicious; splendid keeper and shipper, should be in every orchard.

YELLOW DELICIOUS—Large as the genuine Delicious, golden in color, delicious flavor; appears to be suited to all soils and climates; the trees bear very young and have heavy crops; the fruit is of the best quality and will bring highest prices. Ripens in October and will keep until spring.

RED DELICIOUS—(Blood Red) (Triple Red). This Delicious is identical with the Genuine Delicious in size and flavor, but is a rich red in color; it is a beauty and always brings the highest prices; the quality is of the very best.

Black Ben Davis Apple

WINTER VARIETIES

ARKANSAS BLACK—Vigorous, upright grower. Fruit medium to large; fine flavor; beautiful dark color, almost black; flesh yellowish, slightly sub-acid, crisp. One of the best for cooking. January to March.

BEN DAVIS—Tree thrifty, upright grower of almost perfect shape. Fruit large, round, sometimes variable in form; surface smooth; often paleish yellow, covered and splashed bright red; flesh white, tender, juicy, flavor sub-acid, not rich quality, only good for market and cooking. November to Spring.

BLACK BEN DAVIS—Fruit is bright red on yellow ground with no stripes; large oblong; surface smooth, polished, dots minute; basin shallow, sometimes deep; eye large, cavity deep; brown in color; stem medium to long; core medium. Tree healthy, vigorous, and prolific bearer. January to April.

MAMMOTH BLACK TWIG—Extra large size, round, skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic; of excellent quality in every way. Tree vigorous, healthy and bears when quite young; very prolific.

TALMAN SWEET—Medium size, pale yellow, slightly tinged with red; firm, rich and sweet; excellent for preserving; tree vigorous, very hardy and productive. November to April.

STAYMAN WINESAP—Large, roundish, deep red, medium quality; keeps well; tree a fair grower and good bearer. December to May.

WINESAP—Medium; dark red; sub-acid. Tree an abundant bearer. One of the finest cider apples grown, both on account of its over abundance of juice and its productiveness. November to April.

WINTER BANANA—A highly prized and valuable market sort. Beautiful yellow fruit; flavor exquisite and very tempting; highest quality. Productive. Reliable growers represent it to be hardy north. Very popular for dessert.

CORTLAND (Late winter keeper)—This new apple originated at the New York Experiment Station. Of the many thousands of new varieties originated there the Cortland is considered the best; it is a cross between Ben Davis and McIntosh and possesses the good qualities of both which makes it one of the most profitable apples to grow; the quality is similar to the McIntosh.

Five Promising Commercial Apples

2-4 ft., 25c each

LODI—Is a seedling of Yellow Transparent. The tree and the fruit resemble the Yellow Transparent but the fruits are much larger and makes the Yellow Transparent apples look like culls. The tree bears annually and ripens with the Yellow Transparent.

DELUX—Very early and large size fruit. A good cooking and eating apple with a light green color. Bears heavily.

BLOOD RED JONATHAN—Gets red all over, ripens same time as Jonathan, good size and quality.

BLOOD RED STAYMAN WINESAP—A large Stayman Winesap that is blood red, excellent quality, keeps well. The tree is a fair grower and good bearer.

TURLEY—A blood red Stayman Winesap that does not crack. We highly recommend this variety.

CRAB APPLES

Prices the same as other varieties with the exception of Dolgo.

Crab apples are especially desirable in the colder sections as only a few varieties of apples can be successfully grown; but they succeed well in all climates and their fruit is very popular for preserves, jelly and some sorts are excellent for eating.

FLORENCE—The finest of the Crab apples. Tree of rather small size; coming into bearing when very young and producing heavily; the fruit setting in clusters. The apples will measure about an inch or slightly more in diameter; golden yellow with a bright cheek, or almost entirely red. The flesh is firm, fine grained and exceedingly juicy, with that distinct snap-piness so relished in a crab apple.

RED SIBERIAN—Fruit about an inch in diameter, brilliant yellow with an attractive red cheek; very juicy and excellent for jellies, preserves and pickles. The tree becomes of very large size.

DOLGO—A handsome red crab apple. The fruit is full of juice, jells easily and makes a rich ruby red jelly of beautiful color and excellent flavor. Price: 2 to 4 ft., 50c each.

GUARANTEE

On proper proof, we will replace free of charge, any trees, shrubs, etc., that prove untrue to label, or refund the amount paid. Because of the many factors over which we have no control, we cannot be responsible for the crop. Nor for any amount greater than the purchase price. All claims, except stock not true to name, must be made within thirty days after receipt of order.

Our Trees Bear Young

Dear Sir:—On January 16, 1928, you sent me 10 Peach trees and 10 Apple trees, 4 Grape vines, 2 Apricot trees and in 1930 I gathered about a bushel and a half from each tree. In 1931 I got 2 bushels and 1 peck. In 1932 I got about 4 bushels and 1 peck from each tree. In 1933 I gathered 7 bushels from each tree. I did not keep any account of them in 1934. In 1935 I got 110 bushels from the 10 trees which I sold to the grocery in Yazoo City at \$1.50 a bushel. In 1932 I got from one-half to a bushel of apples from each tree and in 1933 each tree averaged from 1 bushel to 3 pecks; in 1934, from the 8 trees I sold 24 bushels. In 1935 I sold 42 bushels from the 8 trees. My grape vines were four years old before they began to bear and in 1932 I got 28 pounds, in 1934, I got 52 pounds which were sold at 12c a pound. My two plum trees were 4 years old before they began to bear. I only kept count of them for 2 years, 1934 and 1935. In 1934 I gathered 3 bushels from the 2 trees and in 1935 I got 3½ bushels

Yours, Albert Williams, Mississippi.

Grew Like Magic

Dear Sir:—I want to tell you about my fruit trees I ordered from you in April. I received them in fine condition, and I thank you for the extra one. They have grown like weeds. They were not one foot high when I ordered them in April, and by July 31st they measured four feet. You said they would grow like magic and they did. They have fall blooms on them and all of my neighbors are astonished at them since they were so small when I got them.

Yours very truly, Mrs. Cora Stewart, Texas.

PEACHES

A PEACH OF A PAIR

A youngster came into my garden while I was eating a peach. We made a happy pair. I gave the youngster a peach and after enjoying and eating the peach he asked for another. I gave him another, that made it a pair. The youngster pared the peach, making two pairs, and finished eating the pairs and said that he had a peach of a time eating the two peaches or one pair, so the pair of us had a peach of a time together.—Today's Magazine.

Everything that the name implies is expressed to the utmost in the word **Peaches**. Nothing can compare with a rich ripe peach and especially when you take them right from your own trees. The flavor and sugar are stored last by nature, and this is the quality so lacking in shipped-in fruit. Peaches thrive on clay and sandy soils and do their best on high ground. They grow quickly and are desirable fillers for the apple orchard, because they afford a quick wind protection for the young apple trees, and are usually out of the way before the apples need the room. One or two crops will more than pay for the trees and land. We have closely observed the good and the objectional qualities in many varieties and offer to our customers the varieties we have found to be the most hardy in fruit and bud and the most profitable for home and market, and which includes the earliest to the latest ripening sorts so that you can have ripe peaches for about five months of each year.

6 to 7 feet	40c	37c	35c

EXTRA EARLY

MAYFLOWER—Medium size, practically red all over; flesh firm and of good flavor; extremely valuable as a very early market sort especially in southern states. Tree blooms very late; upright and good grower; prolific bearer. Earliest known. S-Cling.

EARLY VARIETIES

EARLY WHEELER—Semi-cling. Ripens about a week after Mayflower. Of good size, flesh firm, meaty and of fine texture. Color pinkish white on under side and bright crimson next to sun. This is the best peach of its season, and is the first peach to ripen that really comes up to the standard of a first class peach.

ROCHESTER—Freestone. Originated in New York. A member of the Crawford group, and, in some respects, a marked improvement on the well known Early Crawford. The peaches are large, orange-yellow, with a handsome over-color of mottled red, and nearly round. A strikingly beautiful peach. The flesh is thick and firm, marbled yellow, tinted with red at the pit, juicy, and sweet. Tree is slightly spreading, productive, hardy; branches stocky. Valuable for both home and commercial orchard. 15 days before Elberta.

RED BIRD CLING (Very Early)—As large as Elberta, strikingly handsome and the first big peach that is ready for market. A sensation everywhere; bright glowing red on a background of creamy white; flesh firm making it an ideal shipper. Early in the season people are fruit hungry and these big handsome peaches bring prices that are almost unbelievable. W. A. Jeffers, a well known Arkansas orchardist, got as high as \$10.00 per bushel for Red Bird. The advent of this glorious peach makes possible tremendous profits. It is so superior to Sneed, Alexander and other poor quality, soft, watery peaches ripening same time.

MAMIE ROSS—Freestone, very early, white. The Mamie Ross is a large oval peach with a bright red cheek. The flesh is creamy white, juicy, very firm and the skin tough, making it an unusually good shipping peach for its season. The flavor is rich and extra good. The best quality, very early peach.

Champion Peach

ALTON, EARLY WHITE FREESTONE—Magnificent white fleeced freestone peach that is larger than Carmen, better quality than Champion and handsomer than any picture ever painted. One of the sweetest and most luscious peaches, and no tree will bear more or bigger crops. L. L. Coleman, a South Missouri Orchardist, says:

"They have borne every year since they came into bearing. I know one fellow who has had them eight or nine years and they have missed but one crop." E. A. Riehl, of Alton, always gets \$1.50 per bushel for his Altons. Calvin R. Clark, of Scott Co., Iowa, says: "Finest peach I ever saw; brought three times as much on the market as my other sorts. Everything considered, Alton is the best and most prolific white peach in propagation.

Elberta Peach

CARMEN (Freestone)—The originator says it is either a sister or a seedling of the Elberta; tree of same manner and habit of growth, only has a larger and darker colored foliage; hardy and productive, the fruit is practically rot proof, as original tree, standing in low, wet ground, has perfected its fruit while other varieties all about have rotted entirely. The fruit is broadly oval in form, large, pointed; skin a yellowish white, slightly tinged with red, of a sprightly vinous flavor. The "Rural New Yorker" first described it some years ago as an extra large yellow peach, like "Elberta" type, but it is not strictly a yellow peach, neither is it white. Size large; juicy, sweet and excellent; productive. Originated in Texas. Tree is a regular bearer. First of July.

EARLY ROSE (Clingstone)—Ripe middle of June. Fruit brilliant, beautiful red all over. Flesh fine grained, tender and of best quality. Tree vigorous, hardy and an early bearer. Tends to overload, and should be thinned. Where this is done, the most beautiful peaches can be grown. They carry well and bring the very top price in the markets.

CHINESE CLING—Cling. Ripe July 20 to 25. A favorite peach; of large size; creamy white with beautiful blush; flesh of the very highest quality; indeed the standard of richness among peaches.

MEDIUM

CHAMPION (Freestone)—A western peach of very large size and good quality, also noticeable for the regularity of its bearing. Skin is of a rich, creamy white with a red cheek; flesh creamy white, sweet and delicious, rich and juicy. A most profitable market peach. July 20th.

BELLE OF GEORGIA—Very large, skin white, with red cheeks; flesh white, firm and of excellent flavor; the fruit is uniformly large and showy, prolific. Chinese cling seedling. Freestone.

J. H. HALE—Genuine Hale Budded from Bearing J. H. Hale Tree—This new variety has been brought out with more advertising than any other sort for many years, and from reports is deserving of all that has been said. The fruit as we have seen it: Color is a deep yellow, overspread with carmine, except on the underside; the skin is smooth without much fuzz; the flesh firm fine grained and unusually solid; parts freely from the stone; the flavor is most delicious, much better than yellow peaches usually run. Ripens a few days before Elberta.

Pears Make Rapid Growth

Dear Sir:—I just received your special list of fruit trees offered. In the year 1933 I bought of you 6 Bartlett Pear trees and I never saw any trees grow as nice as these did. In 1933 and 1934 we had such dry weather that not even grass grew. So many young orchards died out. I bought the 6 pear trees for my daughters as a remembrance and set them out for them. One was chewed off about 1 foot from the ground. I trimmed it off in 1934; today it is as tall as the others and more husky. I have no place to plant trees, only a small lot and I am over 70 years old so there is not much chance for me to figure ahead any more.

Yours truly, Jno. Posekarry, Iowa.

ELBERTA CLING—Mid Season Yellow Clingstone—An immense size yellow peach that looks just like Elberta, but is a perfect clingstone. The tree is a sure and heavy cropper and the fruit is of superb quality. Flesh firm, excellent shipper; goes on the market in good condition and brings top prices.

EARLY ELBERTA—Freestone, mid-season; yellow. The Early Elberta is truly named. It is of the Elberta Type, large, golden yellow which is in beautiful contrast to the rich blush on the sunny cheek. The flesh is yellow like the Elberta but far better quality, sweeter and finer grained; better quality, higher color and a week earlier—going out as the Elberta is coming in. As a canning peach it has better flavor and color than the regular Elberta.

CRAWFORD'S EARLY—This magnificent large yellow freestone peach. Good quality and a beauty which makes it one of the most popular varieties. August.

ELBERTA—Large, yellow with red cheek, flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. Is doing well in all peach sections, North and South. One of the leading market varieties. August 1st.

LATE VARIETIES

LATE ELBERTA—Late yellow freestone. Best sort between Hale and Krummel. Looks just exactly like Elberta, but ripens 2 weeks after it. Better flavor. One of the best shippers, comes on market when yellow peaches bring top prices. Tree satisfactory in growth, bearing and hardiness. It has been one of our most satisfactory varieties. Late peaches are profitable. 14 days after Elberta. Cooking, eating, canning, market.

MAMMOTH HEATH CLING—Very late, white. Best strain of the well known White Heath. Fruit tender, melting, juicy, luscious, firm; does not bruise easily and ships well. Tree good grower, hardy, 40 days after Elberta. Cooking, eating and market.

OLD FASHIONED RED INDIAN—Very highly colored, red as blood to the seed, very large. Fruit so large that it would not go into a pint tin cup. There are many strains of Red Indian peaches on the market and a great many are very small and undesirable. Our buds from which our Red Indian were grown were cut from a tree. We believe that this strain is the very best of all the strains.

WHITE ENGLISH—Cling, ripe latter part of September. Of good size, skin between white and yellow; flesh white, firm, fine

texture, juicy and of excellent flavor. There are several types of the White English peach, as is well known. All have their merits, but none will measure up to the one we are now offering. There has been a strong demand for many years of the true white English peach, and after looking over the field for nearly 40 years, we have found it.

VERY LATE VARIETIES

STINSON'S OCTOBER—Cling. Ripe October 1 to 15. Large white, with showy red cheek; flesh white and of fine flavor. One of the best and most popular peaches.

KRUMMEL OCTOBER—Best Late Peach—Latest yellow freestone. Gloriously red and gold—handsomest, best of all late peaches. Hangs on after all others—till frost. Of great size, almost round, deep yellow, covered with carmine cheeks; luscious, sweet, no bitterness next to the pit. Flesh firm and it ships perfectly. A general favorite for sweet pickles. Tree is a strong grower, extremely hardy, bears young and seldom fails. Everywhere—East, West, North, South, the queen of all late peaches. Late varieties always pay, and Krummel leads in big profits. It comes on the market after all other good freestones are gone and peach lovers gladly pay highest prices for them. 40 days after Elberta. Cooking, eating, canning, market.

Crawford's Early Peaches

PROMISING NEW PEACHES

We offer a few hundred each of the following most promising new peaches:

	Each rate	10 rate	100 rate
2 to 3 feet	14c	13c	12c
3 to 4 feet	19c	18c	17c
4 to 5 feet	27c	26c	25c
5 to 6 feet	35c	32c	30c
6 to 7 feet	40c	37c	35c

OCTOBER BEAUTY—Clingstone. Ripens from 1st to 10th of October. Creamy yellow with red blush. Large; prolific; high quality.

JUNE ELBERTA—Semi-cling. Ripens about 30 days before Elberta. Yellow with red blush. High quality. Very productive.

SOUTH HAVEN—Freestone. Ripens about 10 days before Elberta. Will bear full crop almost every year when Elbertas fail. Large yellow peach. Good quality.

HILEY—Freestone. An early Belle of Georgia peach. Good quality; white with pink blush.

MURRY BEAUTY—Freestone. Ripens about 10 days before Elberta. Large, creamy white with deep red blush, yellow meat, good quality and shipper.

GOLDEN JUBILEE—Freestone. Ripens about 20 days before Elberta. Yellow peach with deep pink blush. One of the hardiest peaches known.

IF YOU ARE UNABLE TO DECIDE just what varieties you want to plant, and will tell us about what time you will want your fruit to ripen, and the number of trees, we will select the varieties for you giving you the benefit of our knowledge as to best kinds for your section. We will guarantee you to be pleased with results.

J. H. Hale Peaches

We also have a few hundred trees of the following varieties to offer as follows:

	Each rate	10 rate	100 rate
3 to 4 feet	21c	20c	20c
4 to 5 feet	30c	30c	30c
5 to 6 feet	45c	45c	45c
6 to 7 feet	50c	50c	50c

LATE BELLE OF GEORGIA—In the recent year in which the temperature dropped suddenly to 22 below zero, this tree produced the only peach in our orchard and in Benton County as far as we knew. The cold was so severe that a great many apple and peach trees were killed outright, roots and all, while this tree was not damaged even on the most tender twigs.

This peach resembles a Bell of Georgia and is a heavy bearer, the fruit is of medium size and excellent quality. It seems to be an exceptionally hardy tree, bearing a good crop when others bear a very light crop or none at all on account of cold winters or springs. Fruit is white with a pink blush. It is a freestone and ripens 20 days after Elberta.

GOLDEN SWEET—Clingstone. Ripens ten days before Elberta. Larger than Elberta. Yellow or gold flesh. Prolific, fine quality.

PALM SEEDLING—Freestone. Ripens 20 days after Elberta; white peach with pink blush. Unusually attractive blossoms with long blooming period.

Excellent Growth. Well Pleased.

Dear Sir:—I bought stock from you in 1933. Two Siberian Crab Apples bore fruit the first year. Had one dozen good apples on it. Four Montmorency Cherry trees bore the first year. The trees were two feet in height and were extra well rooted and in A-1 condition when received. They lived through the drouth in flying colors, when trees we bought elsewhere and paid five times as much for died the same year they were put out. I intend to buy more from you as soon as possible. I am more than pleased with your trees.

Yours for success, Mrs. Homer F. Carter, Missouri.

Arkansas Black—Another Brand New Peach

The Arkansas Black is the earliest peach known in this section. It ripens before the Mayflower; it is much larger than Mayflower and the most beautiful color we have yet seen for a peach. They are a very dark red getting almost black; clingstone and of good quality. They have a good color for several days before they are ripe, and for the time they are ripe the fine appearance they have and good quality make them sell like hot cakes.

No home can afford to be without a few trees of this wonderful extra early, fine quality, large size, and very attractive peach. Our attention was called to this new peach growing near Rogers. This variety is a late bloomer and escapes some of the last frost that often kills peach crops. The tree is very hardy and will stand much colder weather without being damaged than most any other variety. The winter of 1929-30, the coldest on record here, more than 25 below zero, did no damage to this tree, while many trees of other varieties were killed, roots and all, by the hard freeze.

Prices: 1 to 2 ft., 10c each; \$9.00 per 100. 3 to 5 ft., 35c each; \$3.50 per doz.; \$25.00 per 100.

Madison County Mammoth

The largest peach we have ever known. The giant of the peach family. This peach originated in Madison County, Ark., and always took first prize when put on exhibition at fairs and fruit shows. The peach is yellow, overlaid with carmine. The texture is fine-grained and firm; the flavor is very pleasant, rich and juicy, which makes it one of the very best in quality. Ripens

about 20 days after Elberta. Only a few trees for the market this season. 3 to 5 ft. trees, 40c each; \$4.00 per dozen.

Improved Elberta

Rogers, Ark.
Sept. 6, 1930

This exceptional Elberta peach tree was an old tree when we came to Arkansas twelve years ago. It has produced heavy crops every year that any Elberta has fruited.

The fruit is almost round, with a deep red blush on the side, it is easily 4 to 5 inches in diameter with excellent flavor.

Two years ago a local fruit man gave me \$5.00 for a bushel (when he could and was buying ordinary Elbertas for \$1.50 to \$2.00 per bushel) which was presented to the president of the Frisco Railroad Co. This fruit dealer was informed by the railroad officials that they could place a car load of that quality of Elbertas and pay the grower \$5.00 per bushel if they could be had.

(Signed) H. W. Doty, M.D.

Dr. Doty for a number of years had the largest peach orchard in this locality and this tree was outstanding for its productiveness.

	Each rate	10 rate	100 rate
3 to 4 feet	21c	20c	20c
4 to 5 feet	30c	30c	30c
5 to 6 feet	45c	45c	45c
6 to 7 feet	50c	50c	50c

Bliss Everbearing Peach

A freestone. Red in color, good size and fine quality; begins to ripen about June 10th and continues until September 15th. A fine peach for home or commercial use.

Prices: 40c each; \$4.00 per dozen.

GUARANTEE

On proper proof, we will replace free of charge, any trees, shrubs, etc., that prove untrue to label, or refund the amount paid. Because of the many factors over which we have no control, we cannot be responsible for the crop. Nor for any amount greater than the purchase price. All claims, except stock not true to name, must be made within thirty days after receipt of order.

5c Trees Bear in Three Years

Dear Sir:—Three years ago I ordered a bill of fruit trees and vines from you and included were some Krummel October peaches and a few American and Golden Plums in your small size under 1 foot. In fact, the whole order was for small trees and vines. My means were limited and this enabled me to get several trees for the price that one formerly cost me from high priced nurseries. A friend of mine received his shipment of trees the same day that I did mine. He got a fewer number and they cost him ten times as much as my trees cost me. He laughed at me and said that he would treat me if I ever got any fruit from my little sprouts. I told him that great oaks from small acorns grow. I was not discouraged but planted all of my little trees in good ground and hoed them regularly. They grew faster than weeds. They bore their first crop of fruit this year. It looked as if every limb would break under such heavy loads of fruit. The trees are on my farm for anybody's inspection. I have both plum and peach trees that are four and five inches in diameter and they have a limb spread of twelve to fifteen feet in diameter. My friend's \$1.50 trees are pretty, but he hasn't a tree that will excel my 5c and 10c Benton County Nursery trees.

Yours very truly, S. H. McIntosh, Kentucky.

CHERRIES

Cherry culture has been a success when proper attention has been given to the selection of varieties and their culture. The hardy, thrifty varieties of the Morello type may be freely planted with confidence of profitable results. The cherry tree should be planted in a naturally dry soil or the soil should be well drained, so that water may not remain near the roots for any considerable time.

Montmorency Cherries

	Each rate	10 rate	100 rate
2 to 3 feet	50c	46c	45c
3 to 4 feet	60c	57c	55c
4 to 5 feet	70c	68c	65c
5 to 6 feet	80c	77c	75c

DYEHOUSE—This variety partakes both of the Morello and Duke, wood and fruit. A very early and sure bearer; ripens a week before Early Richmond, is of better quality and productive. Free. May.

EARLY RICHMOND—Everywhere the most popular. Tree strong, thrifty grower, making a large, symmetrical head; fruit medium size, dark red, melting, juicy, sprightly, acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

ENGLISH MORELLO—Tree moderate grower, hardy; an early and great bearer; the most valuable of the late varieties. Fruit large, round; skin dark red, becoming nearly black when fully ripe; flesh dark red, tender, juicy and of a pleasant sub-acid flavor when fully ripe. July.

LARGE MONTMORENCY—A fine large, light red cherry of the Richmond class but larger and more solid; a more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

WRAGG—Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the prairie regions of the Northwest. Appears identical in tree and fruit with English Morello, but is claimed to be a new variety. Valuable late cherry. July.

CHERRIES (Sweet)

SCHMIDT'S BIGARREAU—Very large, bright glossy black; half tender, juicy, rich and fine. Tree a rapid grower and good bearer. Last of June and first of July.

YELLOW SPANISH—Tree very large and vigorous, upright spreading. Fruit mid-season, color bright amber-yellow with a reddish blush. Flesh white, with tender aromatic sweet flavor. Freestone. Bears abundantly.

Peaches Bring Top Price

Dear Sir:—I ordered nursery stock from this company in February, 1933, set them out. In the spring of 1934 I gathered a few peaches off the trees. In 1935 I picked a full crop of peaches and I never saw anything like it in this country. I got \$2.00 a bushel for them. I put them on the market with my strawberries at a local price. The only thing I regret is I haven't yet enough of them, so I am going to order more trees and berries this winter from your company. I sold my raspberries at Henryetta, Okla., for 15c a pint as fast as I could pick them.

Yours truly, C. C. Wood, Oklahoma.

Zumbra Cherries

HYBRID CHERRIES

2 to 3 ft., 30c each; \$3.00 per dozen.

3 to 4 ft., 40c each; \$4.00 per dozen.

COMPASS CHERRY-PLUM—Originated in Minnesota through a cross between the native Sand cherry and the Miner plum.

APRICOTS

PRICES ON APRICOTS SAME
AS ON PLUMS

Superb Apricots

SUPERB—Medium in size, light salmon color with numerous red or russet dots. Flesh yellow, firm and good. Fairly early.

MOORPARK—One of the largest and finest apricots. Yellow with red cheeks; flesh orange, sweet, juicy and rich; parts from the stone. Very productive.

NECTARINES

2 to 3 ft., 25c each; \$2.50 per doz.

3 to 4 ft., 30c each; \$3.00 per doz.

The Nectarine resembles a peach in shape, size and flavor. They are fuzzless as a plum, excellent in quality and a valuable fruit to grow. We handle only the two best varieties, **RED ROMAN** (red); **NEW WHITE** (white).

Like the Hansen hybrid plums, it possesses remarkable hardiness combined with enormous productiveness. In appearance the fruit resembles the plum more than the cherry but it has the bright red color of the cherry and the prolific fruiting habit of the Sand cherry. Ripens the last of June.

ST. ANTHONY—A Sand cherry hybrid of the breeding of Zumbra cherry. Fruit small to medium, round, dark purplish black; excellent for preserving. Ripens last of July.

ZUMBRA—Sand cherry hybrid produced by the Minnesota Experiment Station. The tree is a dwarf grower and produces its fruit in thick clusters along the limbs. Fruit small to medium, dark purplish black, round, crisp, juicy. Ripens last of July. Valuable for home and market.

QUINCES

2 to 3 ft., 50c each; \$5.00 per doz.

3 to 4 ft., 60c each; \$6.00 per doz.

ORANGE—Large, roundish, yellow; cooks tender and is of excellent flavor. Valuable for preserves and flavoring. Productive. September and October.

CHAMPION—Fruit large, fair and handsome. Tree bears abundantly while young. Flesh cooks as tender as an apple and without hard spots or cores, flavor delicate. The most valuable of all.

WE ALLOW 10 PER CENT OFF THE
100 RATE PRICES ON LOTS OF 1,000
AND UP ON APPLES, PEACHES,
PLUMS, CHERRIES AND PEARS.

Champion Quince

Two of the Best Blackberries

Everbearing Blackberry

EVERBEARING BLACKBERRY

This new everbearing blackberry is one of the latest creations in blackberries. They bear enormous crops for three months, beginning to ripen just after the Early Harvest and continue almost until frost; the berry is very large, of fine quality, melting in your mouth and does not have the large core that is so common in so many kinds of blackberries. The canes are husky growing plants, standing erect, resembling small trees from 6 to 8 feet high and branch heavily. We have only a very few for the market this year.

Price: 10c each; \$1.50 per dozen; \$7.50 per 100.

OZARK BEAUTY

Superior to any blackberry grown where it has become known, this blackberry is hardy, stands drouth. It is almost free from seeds and has no objectionable core. It has little or no juice, the pits being filled with thick syrup or flesh of the berry. Ripens just after Early Harvest. The berries are very large and best quality. You will make no mistake in ordering Ozark Beauty. **Price: 10c each; \$1.00 per dozen; \$3.00 per 100; \$25.00 per 1,000.**

Ozark Beauty Blackberry

Favorites Everywhere

GEM EVERBEARING

Gem plants are usually medium to small, but make a very vigorous growth. Care should be taken to set Gem plants early and under good conditions. Once started they grow vigorously and make lots of plants. Thin severely for best results. Our records for two years show Gem about as productive as Mastodon in 1934 and considerably more productive in 1935. The berries average large in size, are light in color, very showy, attractive and firm enough to ship. Quality is somewhat tart but fine when sweetened. They sell for top prices.

GEM
3c Each
\$2.00 per 100
\$17.50 per
1000

BLAKEMORE

This strawberry sensation, originated by the U. S. Department of Agriculture, is a cross of Premier and Missionary. Berries are slightly blunted, conic with broad shoulders, slight neck, much firmer than Premier or Klondike. Blakemore has proven considerably superior as a market variety. Berries are bright red color, tough skin, firm flesh, solid center, with excellent flavor; very productive, fine shipper and earlier than Klondike; blooms later and stands light frosts. **Price: 85c per 100; \$5.50 per 1,000.**

BLAKEMORE

PEARS

The soil should be rich and well cultivated. A pear orchard should not be permitted to "go to grass." They should be pruned ever year, dwarf especially. Dwarfs should have low heads and be trained in a pyramidal form, one-half of the previous season's growth being cut off each spring.

Pears succeed best on rather steep hill-sides. Plant pears midway on the slope, putting something else on the upper and lower sections. Cultivate sparingly, so as to induce a very low growth, and let blue grass take the land before the trees come into fruitage. When blight appears cut off the affected parts at once and burn them; cut six inches below the lowest blight, to insure taking all infested sap.

	Each rate	10 rate	100 rate
2 to 3 feet	30c	28c	25c
3 to 4 feet	40c	38c	35c
4 to 5 feet	50c	47c	45c
5 to 6 feet	60c	58c	55c
6 to 7 feet	65c	62c	60c

EARLY VARIETIES

BARTLETT—Large size, with beautiful blush next to the sun; buttery; very juicy, and highly flavored; bears early. August and September.

Wilder Early Pears

WILDER EARLY—One of the very earliest pears. Size medium; greenish yellow, with a brownish red cheek and numerous dots; flesh white, fine grained, melting, excellent. Always finds a ready sale in market. Largely grown by commercial orchardists. Tree bears good crops early and annually. August and September.

AUTUMN VARIETIES

FLEMISH BEAUTY—Large, beautiful, juicy, melting, rich and fine; good bearer; one of the hardest and does well nearly everywhere. September and October.

GARBER—Very large, oval, narrowing at both ends; yellow as an orange; flesh whiteish, juicy, sweet and very pleasant. Tree an upright grower with heavy, dark green foliage. September.

KEIFFER—Large, golden yellow, often blushed in the sun; juicy and melting. One of the best for preserving and canning; the most profitable to grow. Tree healthy, hardy and vigorous. Does not succeed on quince therefore no dwarfs should be planted. Keiffer receives more praise and condemnation than any other. It is liable to overbear, therefore special pains should be taken to thin the fruit.

PINEAPPLE or BLIGHT PROOF—This pear is very attractive; yellow with conspicuous brown specks, is very beautiful and has a distinct, pleasing odor which has been suggested by some as resembling that of pineapple. For this reason the name "Pineapple Pear" has been adopted for it. The tree is a vigorous grower, has beautiful glossy foliage and is very prolific. Ripens last of August.

DOUGLAS—Blight proof; will bear fruit second year after planting; is very productive. The fruit is larger than Keiffer or Bartlett. The color is golden yellow, often with pink shading. The flesh is white, very tender and juicy and excellent flavor.

Finest He Has Seen

Gentlemen:—I have ordered trees and vines from you twice and they are the best trees for this country that I ever saw. Your Mammoth Black Twig Apples is one of the finest apples I ever saw. This past spring I grafted a limb of a Mammoth Black Twig on a Haw and it is growing fine. Some of the 2-4 feet Apple trees that I ordered two years ago bore this year, and the Strawberries were the best in this section of the country. I am sure to order my trees from you.

Yours very respectfully,

C. C. Baker, Okla.

SELECTED PLUMS

Burbank Plums

Big Gorgeous Colored Plums!—Appealing to the eye and satisfying to the appetite. Plums of Gold! Red Plums! Blue Plums! Plums of Royal Purple! Plums "big as little peaches"! Plums for everyone—everywhere. Be sure to plant some in your home orchard.

The plums listed on these pages are the best we have found in our test.

	Each rate	10 rate	100 rate
2 to 3 feet	22c	21c	20c
3 to 4 feet	32c	31c	30c
4 to 5 feet	42c	41c	40c
5 to 6 feet	55c	53c	50c

ABUNDANCE—Large, roundish, freestone, amber, turning to a rich cherry color with a whitish bloom; flesh light yellow, juicy, tender, sweet and excellent, vigorous, and very productive. July.

BURBANK—Large, nearly globular, clear cherry red with thin lilac bloom; flesh deep yellow; rich, very sweet, with a peculiar and agreeable flavor. Vigorous and a very early bearer. Last of July.

RED JUNE—The best Japan plum, ripening before Abundance. Medium to large; deep vermilion red, with handsome blooms, flesh light lemon-yellow, firm; moderately juicy; fine quality. Tree upright, spreading, vigorous and hardy; productive.

HANSKA PLUM—The color of the Hanska when fully ripe is a deep bright red, with

firm flesh and of high quality. When fully ripe they are fragrant like the apricot and when cooked the strong apricot flavor is brought out to perfection, entirely unlike any native plum. The fruit has a small pit. The tree is a profuse bloomer, grows tall and is of rapid growth. The trees often bear when they are only two and three years old. Freestone.

HYBRID PLUMS

Waneta Plum

WANETA—Cross between Terry and a Japanese plum. Regarded as the largest and best all around newer sort. Bright red, delicious quality, small pit, skin free from acidity, very productive and an early bearer, often producing fruit 2 inches in diameter. This is Prof. Hansen's masterpiece in plums and you will make no mistake in planting them liberally.

AMERICA—Very early, hybrid. A full **Brother of Gold**, the sensational \$3,000 plum. Same parentage—a cross between Burbank (Japanese)—and Robinson (Native). From the far-reaching experimental hybridizing of 20,000,000 crossbred seedlings by the great scientist, Luther Burbank, came two grand plums—Gold and America; it was then plum growing received its greatest impetus. America is large, glossy, coral red, one of the most beautiful and delicious plums ever grown. In our orchard it is the one variety that can always be depended upon for a crop. Tree large, very vigorous, thoroughly hardy, bears extremely young, and bears enormous crops every year. Succeeds everywhere. Eating, cooking, market.

"\$4.00 per bushel. Heads the list as usual. Bent to the ground with large handsome fruit. Visitors can scarcely believe their own eyes. Eight year trees bore 3 bushels each that brought \$4.00 per bushel. Good quality and does not rot. Sturdy grower and exceptionally hardy."—E. H. Riehl, Ill. Exp. Sta.

ITALIAN PRUNE — (Europe) — Medium large; purplish-black; blue bloom; free; flesh greenish-yellow, juicy, sweet and of good quality; will hang on tree after ripening; splendid for drying and market. Tree very productive. September.

GOLDEN (Gold)—From twenty million native, hybrid and cross-bred seedlings, grown by himself, Luther Burbank made this his first choice. This was also his first great origination; and though since he has produced many, many fruits, never has he produced one that can surpass or equal in all respects the Golden. Though a small dwarf-like tree, with small slender limbs, this is one of the hardiest, strongest trees. The finest plums and one of the most beautiful, a light transparent golden yellow, almost covered with a lovely blush. In nearly every state of the Union this plum has been fruited and from them all come fine reports. This plum is at its best on dry, thin or clay soil. Leave it on the tree until it becomes highly colored and then it is delicious.

SATSUMA or BLOOD—Flesh firm, juicy dark red or blood color, well flavored and brought \$4.00 per bushel. Good quality and firm; keeps well, pit small. Unsurpassed in quality for canning. Tree very vigorous. One of the most valuable varieties of this section and adapted to the middle and northern states. Middle of July.

GERMAN PRUNE—Mid-season. Ours is the largest, handsomest and best strain, excellent for dessert and preserving; large,

dark blue, juicy and delicious. Tree satisfactory; widely planted. Cooking, canning, drying and market.

SIX WEEKS—One of the best productive plums grown; ripens early; of fine flavor; red in color; good to eat; fresh and fine for cooking or preserving; best all around plum for the South.

WILD GOOSE (Tenn.)—Medium to large; red with purplish bloom; cling. The flesh is yellow, juicy and sweet and is highly recommended for kitchen and market. The tree is vigorous and a good bearer. July.

EARLY GOLD (Shiro)—Very early. Hybrid. A pure transparent golden yellow plum, large and handsome—a huge, honey drop; sweet excellent quality. Tree hardy, bears regularly, immense crops, and is satisfactory in every way. A tree loaded with this golden fruit is a wonderful sight. Propagated from a heavy bearing strain on our own grounds. Another Burbank production that has made good. It is a great favorite in the South because of its high resistance to fungus diseases.

German Prune Plum

DAMSON—A medium sized, dark purple variety which is very productive; esteemed for preserving and good for eating out of hand. Ripens late August to early September.

SAPA—A rich glossy dark purple skin variety, a very fine perfectly hardy new plum. Every home orchard should have some of these.

OPATA—A rich dark red oblong plum that is very delicious. Bears prolifically. Tree is tall upright growing. An excellent variety for home and market use.

LEE'S BLUE—Very rich in color and quality. Freestone. Ripens the same time as the America. Be sure to try this one.

THE NUT FAMILY

Paper Shell Pecans

The pecan is fast becoming the most popular of all nut bearing trees. A first class pecan tree one year old from graft, 3 to 4 feet, on roots 3 to 4 years old, when carefully planted, fertilized and cultivated, will begin bearing from 4 to 6 years. Pecans succeed on many kinds of soil, especially on rich bottom or basin soils that are dry.

They can be successfully grown on hills and hillsides and many other places around homes and barnyards where no other trees can be profitably grown. In planting trees for shade I would suggest the pecan; since they make an attractive shade and are at the same time the most profitable of all trees.

	Each	Per Doz.	Per 100
2 to 3 feet	\$.75	\$ 7.50	\$50.00
3 to 5 feet	\$1.00	\$10.00	\$75.00

Pecan

STUART—Very large, oblong, marked with dark color, shell medium thickness, flavor rich and sweet; nuts averaging 40 to 60 per pound. One of the earliest and heaviest bearers. No one will make a mistake in planting largely of this variety as it succeeds on the different soils, especially on the clay soils of the northern portion of the cotton belt.

SUCCESS—Size large, oblong, tapering to the apex. Color reddish brown, purplish markings, shell thin, cracking quality good; partitions thin; kernel large, full, plump, yellow; flavor sweet, quality very good. The tree is a good grower. A fine variety. Success usually is one of the latest to start growth in spring.

The two varieties named are considered the best of all pecans. They have been recommended by the United States Department of Agriculture as being immune to scab and other diseases to which most varieties are susceptible.

English Walnuts

2 to 3 feet, \$1.00 each; \$10.00 per doz.
3 to 5 feet, \$1.50 each; \$15.00 per doz.

Walnut

JAPAN WALNUT

2 to 4 ft., 80c each; \$8.00 per doz.

Fast growing tree; a beauty for ornamental tree; perfectly hardy and valuable for its delicious nuts.

BUTTER NUT (or White Walnut)

2 to 4 ft., 80c each; \$8.00 per doz.

The nuts are large, long, oily and nutritious. Trees are lofty and spreading with a tropical appearance.

BLACK WALNUTS

2 to 4 ft., 75c each; \$7.50 per doz.

Selected from good strain of large nuts, and fine kernels. Trees are fast growing and good for shade trees as well as the nuts.

ALMONDS

2 to 4 ft., 50c each; \$5.00 per doz.

Soft shell, rich and deliciously flavored, rapid growing trees and bear very young.

FILBERTS (or Hazelnuts)

2 to 4 ft., 75c each; \$7.50 per doz.

Good quality and bear almost every year and very young.

Butternut

Berries Very Productive

Dear Sir:—Would like to send you a bigger order, but on account of money matters I cannot. I have three rows of Dewberries, rows 20 yards long, that I got from you and I got 48 gallons of berries off of them.

Yours very truly, W. H. Whitlow, Texas.

Downy Mulberries

FIGS

Figs should be planted more extensively. Do not let the sprouts or suckers grow, but prune the trees so as to have clean bodies at least two feet high. Cut tops back to six or twelve inches above the ground when planting. Such trees will bear full and will stand much colder weather than if the sprouts are allowed to grow.

2 to 3 ft., 50c each; \$5.00 per doz.
3 to 4 ft., 75c each; \$7.50 per doz.

BROWN TURKEY—July, August and September. Very large, bluish purple.

MAGNOLIA—July, August and September. Large pale green or white; shape varies from ordinary fig shape to very short or flat; always bears at one year old, and if frozen will bear on the young wood the first year. In some sections it is called Neverfail.

JAPAN PERSIMMONS

Some of these should be planted by every family. The fruit often measures ten inches in circumference. They ripen in August, September and October. The trees bear young, and are very ornamental.

Price: 75c each; \$8.00 per doz; \$60 per 100.

HACHIYA—Very large, oblong, pointed, flesh yellow, skin red.

HYAKUME—Large, round; skin orange red; flesh brown or dark; very sweet.

EVERBEARING MULBERRY

2 to 3 ft., 25c each; \$2.50 per doz.
3 to 4 ft., 35c each; \$3.50 per doz.
4 to 6 ft., 45c each; \$4.50 per doz.

DOWNING—Fruit of rich, sub-acid flavor, lasts six weeks. Stands winter of western and middle states.

HICKS—Wonderfully prolific; fruit sweet, excellent for poultry and hogs. Fruit produced during four months.

STUBBS—Originated in Laurens County, Georgia. A tree of fine growth, beautiful foliage; fruit is of enormous size, frequently two inches in length; quality excellent. Lasts about two months; extremely rare variety.

If your order calls for any varieties we do not have we will send nearest to the variety asked for that we possibly can, and will do our best to send something as good or better for your locality; unless you tell us not to substitute.

OUR GUARANTEE: All stock is guaranteed to be true to name, up to grade and free from disease and insects. If found otherwise, we will, upon proper proof, refund the amount paid us for the stock or replace the stock in question free of charge. It is agreed between buyer and seller that we are not liable for any greater amount than was paid us for the stock. All shipments will be accompanied by a certificate of nursery inspection.

Hachiya Persimmon

CURRENTS

White Grape

The currant is one of the most valued of the small fruits. They mature just before Raspberries and can be used either raw or cooked. Being very hardy, they do not winter kill and are easy of cultivation, requiring little care. They can be grown in any good garden soil.

25c each; \$2.50 per dozen.

PERFECTION (Red)—This truly wonderful new currant has both large size and extra good quality. Perfectly healthy; a vigorous grower, and in fact an extra fine red currant in every way. Widely advertised all over the country.

WHITE GRAPE—Very large yellowish white. The finest of the white sorts. Very distinct from White Dutch, having a low spreading habit and dark green foliage. Very productive.

New Logan

GOOSEBERRIES

Gooseberries should be planted in good, rich soil and well manured once a year. Prune regularly, thoroughly cutting out all dead wood and surplus branches. Plant in rows 4 feet to 6 feet apart in row. It is well to mulch heavily in the fall. Plants are hardy, rugged and easily grown.

25c each; \$2.50 per dozen.

OREGON CHAMPION GOOSEBERRY —

Berries very large, brownish red color, very sweet and fine for table use and pies. Bush a strong grower, healthy, not very thorny and a prolific bearer. One of the best berries for the market.

DOWNING—Fruit larger than Houghton, roundish, light green with distinct veins; skin smooth, flesh rather soft, juicy and very good. Vigorous and productive. The most popular variety for market growing.

HOUGHTON—A medium sized American variety which bears abundant and regular crops and never mildews; fruit smooth; red, tender, and very good; valuable.

Downing

RASPBERRIES

Plant three and a half feet apart in rows seven feet apart. Thin to four or five good canes in a hill; cut out old canes as soon as through fruiting. 1800 plants to set one acre.

3½c each; \$2.50 per 100; \$20.00 per 1,000.

RED VARIETIES

KING (Early King)—Red. Very hardy and fine for cold climates. Ripens early, light red; soft; fine for home growing.

FLAMING GIANT—The largest of all red Raspberries; a very rank grower, and will produce enormous crops of excellent quality berries.

ST. REGIS EVERBEARING—The new everbearing variety. It gives a crop of fruit all summer and autumn, fruiting on the old canes in generous quantities until late in August. By this date berries begin to ripen on the young canes and continue un-

Chief

til late in autumn. Berries are a bright crimson of large size and of surpassing quality, sugary with full raspberry flavor. It succeeds upon all soils, whether light and sandy or cold, heavy clay and the canes are absolutely hardy.

Records Made with Red Raspberry

One acre St. Regis produced 186 crates that sold for \$630.00, and the same acre produced 75 crates in the fall that sold for more than \$200.00. Grown and sold by Austin Cline, Garfield, Arkansas.

Two acres of King Raspberry produced for George Eden, Garfield, Arkansas, \$997.00 worth of marketable berries.

BLACK VARIETIES

CUMBERLAND—The largest of all the blackcaps; coal black berries; very firm and the quality of the very best; excellent shipper. Bush is a strong grower, stocky canes and unusually prolific. Mid-season.

NEW LATE QUILLEN—Prolong your Black Raspberry season and make money until the end. The NEW QUILLEN (late) is an extra large glossy appearing Black Raspberry of high quality. It is very rich in flavor and is a fancy table berry. The plants are strong growers and highly resistant to diseases; also easy to grow.

NEW LOGAN BLACKCAP—The best dependable early Black Raspberry grown. In some localities where it has been grown for the past few years it has almost displaced the other standard varieties. Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some really good money. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases. We have a fine lot of thrifty plants to offer.

PURPLE VARIETIES

CARDINAL—An excellent home use berry, delicious for dessert, canning, preserves, jelly, etc. A very large, juicy fruit, a fruit that is easily grown and

very hardy; adapted to cold and dry weather; does not have many briars, and yields very heavily; have picked as high as 17 crates in one day from one-half acre, grown by L. R. Kimmon, Garfield, Ark.

LATHAM (Red Raspberry)

LATHAM (Minnesota No. 4)—A new introduction from the Minnesota State breeding farm. A very firm, large and most prolific red raspberry yet introduced. It is extremely hardy and of the very best quality. It has been largely planted in Minnesota and has given the best results. It stands shipping well and tops the market. It is mosaic-free, a disease that attacks raspberries sometimes. Plant some in your garden. You will never regret it. It is claimed that many fruit growers are averaging \$1,000 per acre a year.

Price: 5c each; 50c per dozen; \$2.50 per 100; \$20.00 for 1,000.

CHIEF (The New Red Raspberry)—Here is a wonderful Red Raspberry that is forging ahead as fast as did its illustrious ancestor, Latham, and it has just as important a place to fill for it is ten days earlier than Latham, ripening at a time when Red Raspberries bring the most on all markets. Chief was originated at Minnesota State Fruit Breeding Farm and is a selection from 4,000 seedlings of Latham. It is immensely productive, even surpassing Latham in that respect; the berries are of good size and excellent quality and the bushes are absolutely hardy and resistant to disease. We consider Chief the most outstanding Red Raspberry that has been produced in years and believe these two, Chief and Latham, will make more money for fruit growers than any other two they can grow, combining as they do, a long fruiting season, extra heavy yield and fruit of such size, color and quality as to command top prices at all times. Our supply of Chief is quite limited.

Price: 5c each; 50c per dozen; \$2.50 per 100; \$20.00 per 1,000.

Latham Raspberries (Natural Size)

BLACKBERRIES

HOW TO GROW THE McDONALD BERRY

Plant two rows of McDonald and one row of Dewberries or Blackberries to pollenize, for every two rows of McDonald planted. Set rows six or seven feet apart and plant every eighteen inches or two feet in the row. The McDonald berry will yield about 200 crates per acre when properly cared for and people have found them to be very profitable.

After you get the McDonald started the third year mow them off and rake and burn. Do this every third year. Blackberries are a great deal cheaper grown than the Strawberry. They do not require the cultivation that the Strawberry does and any kind of ground is good enough for the Blackberry and they will sell in any market.

BLACKBERRIES PAY BIG DIVIDENDS

There is a great and increasing demand for blackberries. There is no fruit capable of yielding greater profits. There will usually be from 150 to as high as 250 cases of 24 quarts from an acre, and that is usually consistent to figure on an average of \$100 to \$150 per acre after paying for picking, boxes and express.

For field culture plant three feet apart in rows six feet apart. For garden culture, plant four feet apart in rows five feet apart.

If planted between the rows of young trees in an orchard to maturity, they will produce fruit first season after planting.

3½c each; 35c per dozen; \$2.50 per 100; \$20.00 per 1,000.

Early Harvest

BLOWER BLACKBERRY—"The giant of all blackberries." The fruit is exceedingly sweet. This is a first-class shipper. The season of ripening is from the middle of July until frost, with the bulk of the crop maturing in the month of August. It is a hardy variety. It has endured 20 degrees below zero.

EARLY HARVEST—One of the earliest blackberries in cultivation, a compact dwarf grower, fruit rather small and of good quality, heavy bearer.

McDONALD—Enormously productive; outyielding any other known variety of blackberry. Ripens two weeks before Early Harvest, and is the earliest ripening of all blackberries. Can be sold for extra price before any other varieties are on the market.

ROBINSON Blackberry—Large, delicious berries, very prolific, and a valuable berry for the Southwest.

DALLAS BLACKBERRY—A Texas berry, large, black, firm and a strong grower. Ripens in mid-season.

ELDORADO—For many years Eldorado was the first main-crop variety to ripen; it has, with other notable virtues, great hardiness and freedom from the blackberry-rust in the plant, and handsome appearance and exceptionally high quality in the fruit. Although an old sort, it is still much prized for home and market east of the Rocky Mountains, and in this great region very seldom fails.

DEWBERRIES

A variety of blackberry that trails on the ground. In size and quality the fruit excels the Blackberry; very profuse bearer and reasonably hardy. Vines should be covered with straw or earth over winter in cold climates. The fruit of the Dewberry is highly prized as a market fruit, owing to its large size and quality.

5c each; 50c per doz.; \$2.50 per 100; \$15.00 per 1,000.

PREMO—Much like Lucretia, but very distinct, and exceedingly early, being seven to ten days ahead and all cleaned off when Lucretia is beginning. Quality and size uniform. Was found in a Lucretia patch.

AUSTIN—Berries much larger than those of any other Dewberry or Blackberry. It requires no trellis or stakes. The fruit is jet black and of very superior quality and flavor. For productiveness it out rivals all Dewberries.

LUCRETIA—Fruit very large, luscious and sweet; perfectly hardy, healthy, enormously productive; a very prolific market fruit; the vines should be allowed to re-

Lucretia

main on the ground during the winter and staked up early in the spring. Fruit ripens early, is often one and one-half inches long.

THORNLESS DEWBERRY

Perfectly free from thorns; berries are of very best quality, large in size, rich and juicy, and early. Price: 5c each; 50c per dozen; \$4.00 per 100.

YOUNGBERRY

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle; it is very attractive, ships well, keeps well and cans well. It has so many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry culture.

Youngberries are universally liked and

easily grown. They are among the largest berries; of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberry bushes than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

Price: 5c each; 50c per dozen; \$3.00 per 100; \$25.00 per 1,000.

We Allow 10 per cent off the 100 rate prices on lots of 1,000 and up, on Apples, Peaches, Plums, Cherries and Pears.

THE NEW BOYSENBERRY

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing blackberries, raspberries, and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and soft seeds. The plant is very vigorous and hardy, coming through in good condition, without in-

jury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and over one inch in diameter.

Price: 10c each; 10 for \$1.00; 100 for \$6.00; 1,000 for \$50.00. All prices are for strictly first class, well-rooted 1 year plants.

Early Senator Dunlap Strawberries

STRAWBERRIES

Price: 1c each; 60c per 100; \$5.00 per 1,000.
Except where otherwise noted.

EARLY ST. LOUIS—Profitable by reason of its productiveness and earliness; requires deep, heavy soil, plant exceedingly vigorous and healthy; fruit large, handsome and good, rather long in shape and of a bright, glossy crimson; early.

SENATOR DUNLAP—This is a great producer and a money maker and a good all purpose variety. Easy to grow, just the thing for the beginner. Will grow a full crop on most any kind of soil. Is considered one of the very best for canning and home use. Exceedingly productive, plants small but have long roots that make it a sure cropper and a drouth resister. We have a wonderful productive strain of Dunlap that never fails to please.

COOPER—Large, light crimson, flesh of firm, good quality. Plants vigorous but should be planted in swamps or moist, clay soils. Perfect; late.

AROMA—An old standby that we have been growing for over thirty years. The demand for Aroma plants is tremendous, there is never enough to supply the demand.

In matters of productiveness, quality, flavor and market value, the Aroma is so

much superior to the other old standard late varieties that we urge our customers to plant Aroma heavily and increase their profits by prolonging their berry season. Aroma does well wherever grown and no matter where you are located you can safely plant heavily to Aroma.

KLONDIKE (Improved)—This is the standard berry for the southern and middle states and does fairly well in the northern states. Productive, brilliantly colored and so firm that on the northern market it classes as a re-shipper; that is, a berry firm enough to re-ship to the smaller tributary markets and therefore commands top-notch prices.

BLAKEMORE—The new strawberry that is creating a sensation among strawberry growers everywhere it has been grown. This berry originated by the U. S. Department of Agriculture and is a cross of Premier and Missionary. The berries are slightly blunted, conic with broad shoulders, slight neck, much firmer than Premier or Klondike. Blakemore has proven considerably superior as a market variety. Berries are bright red color, tough skin, firm flesh, solid center, with excellent flavor; very productive, fine shipper and earlier than Klondike; blooms later and will escape frost when Klondikes are killed.

MISSIONARY—A very well established variety. Leading the commercial sorts in central Florida. Earliness is its chief commercial asset, although the berries stand shipment well, and the plants are free from disease. Very vigorous, hardy grower.

DORSETT—A sister variety to Fairfax. Excels Aroma. Berries are large, finest quality, very firm. Perfect flowering so can be planted alone. Strong grower, very productive. Price: 85c per 100; \$6.50 per 1,000.

Aroma

PREMIER—The premier is one of the most popular varieties that we offer and it well deserves all the praise that can be given it, for several reasons: 1. Premier is among the first to ripen. 2. Fruit large size and deep red color. 3. Firm flesh and excellent quality. 4. Heavy yielder and makes thrifty growth. 5. You can depend on Premier for a good crop when other varieties are a failure. 6. Foliage is not susceptible to the leaf spot which has ruined many strawberry patches. We unhesitatingly recommend the Premier for either home or commercial planting.

Price: 85c per 100; \$6.50 per 1,000.

EVERBEARING VARIETIES

Price: 2c each; \$1.50 per 100;
\$12.00 per 1,000.

GEM—The universal everbearer, an old favorite; succeeds in all soils and climates, except in the extreme south; fruits heavily the first season the plants are set; very heavy cropper of medium large, sweet mild, and beautifully colored berries. Grow it in hills or narrow rows.

CHAMPION—A heavy fruiter of medium large, choice berries; begins fruiting three or four months after plants are set and fruits until freezing weather. Resembles Progressive in every way. Champion is a dependable everbearer; grow it in hills or narrow rows.

MASTODON, The Jumbo Everbearer—From all indications and reports, Mastodon will hold first place among the everbearers. It's a very beautiful and strong grower, a heavy fruiter, and the berries are as large as strawberries grow.

We have had several year's experience with the Mastodon and the more we see of it the better we like it, and I honestly believe you will like it. Anyway, I advise you to try some Mastodon plants this year. I want you to see a real heavy fruiting everbearer which produces jumbo berries of very good quality.

In order to get you interested we are going to make the price on Mastodon plants just as low as possible.

Champion

Mastodon

Planting Distance for Trees and Plants

	Feet Apart
Apple	25 to 35
Pear	20 to 25
Cherry	18 to 25
Peach	18 to 25
Plums	15 to 20
Quince	10 to 12
Figs	12 to 15
Mulberry	25 to 30
Japan Persimmon	15 to 25
Pecans	40 to 60
Grapes	8 to 10
Blackberry, 3 feet apart in row	7
Dewberry, 2 feet apart in row	6
Raspberry, 3 feet in row	7
Strawberries, 2 to 3 feet in rows	4

NUMBER OF TREES PER ACRE AT DIFFERENT DISTANCES

Rule: Multiply the distance in feet between the rows by distance the plants are set apart, in the row, and the product will be the number of square feet for each plant; or hill which divided into the number of square feet in an acre (43,560) gives the number of trees or plants per acre.

Distance apart	No. of Trees
10 feet by 10 feet	435
11 feet by 11 feet	360
12 feet by 12 feet	302
13 feet by 13 feet	257
14 feet by 14 feet	222
15 feet by 15 feet	193
16 feet by 16 feet	170
17 feet by 17 feet	150
18 feet by 18 feet	134
19 feet by 19 feet	120
20 feet by 20 feet	108
25 feet by 25 feet	69
30 feet by 30 feet	48
33 feet by 33 feet	40
40 feet by 40 feet	27

ARKANSAS STRAWBERRIES

Yield Better Crops in Florida

Plant City, Fla.—Strawberry plants obtained from Arkansas yield about 29 per cent more picked fruit and 38 per cent more packed fruit in field around Plant City than do plants obtained from Maryland, says Dr. A. N. Brooks, plant pathologist in charge of the strawberry laboratory of the State Experiment Station here.

"LOW PRICES AND HIGH QUALITY" IS WHAT KEEPS US BUSY

NOVELTY FRUITS

Different from ordinary fruits and should be planted by everyone loving rare specimens. Plant in a small way only as Novelties and they will surprise and well repay you.

ARKANSAS NATIVE PERSIMMON

A very large seedling variety. Price: 25c each; \$2.50 per dozen.

THE NEW BRAINARD BERRY

A new tremendously heavy yielding berry for the Central, Southern and Pacific Coast States. A trailing type much hardier and better in all other respects than the Himalaya. It is very productive and has large clusters of high quality berries which contain relatively smaller seeds than any other berry of this type. The Department of Agriculture has recommended it as a very worth-while variety and worthy of introduction. Price 10c each; \$1.00 per dozen; \$7.50 per 100.

STRAWBERRY - RASPBERRY

Valuable for the extreme North, as the fruit is borne on the young growth, and is of course hardy in any climate. This is an entirely new fruit, both in habit of growth and form of fruit. Bushes grow one to three feet high and are covered with Raspberries in the shape of strawberries. Price: 10c each; \$1.00 per dozen.

JAPANESE WINEBERRY

This interesting plant belongs to the Raspberry family. The fruit is borne in large clusters and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving it is without equal. Price: 15c each; \$1.50 per dozen, by mail postpaid.

OZARK HUCKLEBERRY

This delicious little berry is a native of the Ozark Mountain range, remarkable for its fine flavor, is a choice fruit for jams, pies, and fruit cake. Grows luxuriant, very hardy; a prolific bearer, and when given a small amount of attention produces regular annual crops. Will

grow on almost any kind of soil, and when once set is there permanently never having to be renewed. Each 10c; \$1.00 per dozen.

CRYSTAL WHITE BLACKBERRY

Strange as it may seem, this is a real creamy white Blackberry. Mixed with jet black ones for dessert, it makes a most wonderful dish. The fruit is about the same size of Snyder, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. Price: 10c each; \$1.00 per dozen.

IMPROVED DWARF JUNE BERRY

A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters, and is reddish-purple in color and changing to a bluish-black. In flavor it is a mild, rich sub-acid, excellent as a dessert fruit or canned. Price: 15c each; \$1.50 per dozen.

PAW PAW or "ARKANSAS BANANA"

A small tree with purplish or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first class trees: 50 cents each; \$5.00 per dozen.

BLUEBERRIES

Resembles our common huckleberry in flavor, shape and color; is much larger, as large as a good sized grape. The new commercial berry in New Jersey, Florida and other states; produces from \$550 to \$1500 worth per acre; ships better than any berry; demand for the berries unlimited; supply very, very limited. Price: 25c each; \$2.50 per dozen; \$17.00 per 100.

GOLDEN QUEEN RASPBERRY

A yellow Raspberry that is desirable for both as a novelty, and for the big, luscious fruit; is wonderfully productive and one of the finest for jams, jellies, etc., as well as dessert. Price: 10c each; \$1.00 per doz.; \$6.00 per 100.

Favored Our Trees

Dear Sirs:—Our order of trees and shrubs arrived o. k., and we have it all out in the orchard. We are well pleased and expect to show them to our neighbors and try to get them to order from you. When I get ready for more goods, we will sure remember your favors.

Thanking you for your promptness, beg to remain,

Yours respectfully, F. B. Mallory, Missouri.

ADAM'S IMPROVED ELDERBERRY

(Originated and introduced from the N. Y. Experiment Station)

A new fruit perfected from the common elderberry. The small white flowers come in large, handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse; ripening in August. Grows 6 to 8 feet high. Berries

are highly esteemed for pies, sauce, cordials, and highly flavored wine which is very refreshing. Everybody likes these improved Elderberries; they are easy to grow and do well everywhere. Price: 50c each; 3 for \$1.00; 6 for \$1.75.

SAGE

HOLT'S MAMMOTH—plant very robust, perfectly hardy, ornamental. Large leaves, finest flavor, used for seasoning sausage,

meat dressing, etc. Also for medical purposes. Should be in every garden. Price, 10c each; \$1.00 per dozen.

RHUBARB OR PIE PLANT

Burbank's Rhubarb

This deserves to be ranked among the best early vegetables of the garden. Scarcely has the grass begun to grow when your table can be supplied with this earliest of all vegetables. Excellent for sauce, pies, cakes, jellies, puddings, wine, etc. It continues long in use and is valuable for canning for winter use. Succeeds everywhere. Easy to grow and should be in every garden or lot as you get more value for your money than any other vegetable grown.

Culture—Good plants are easily grown in any good soil. Plant 4 feet apart each way, in deep, warm and very rich soil. The more manure the better the stalk. For winter forcing, take up two-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark.

GIANT VICTORIA—This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright, crimson color, very tender, crisp, and of mild, delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 10 to 24 inches long; broad, thick and solid; stalks will weigh on an average one-half pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money maker and in great demand. Try a dozen or two, our word for it, you will never have cause to regret your purchase and you will never be without some of this variety. Price: strong roots, 10c each; \$1.00 per dozen; \$7.50 per 100.

LINNAEUS or MAMMOTH—Heavy one or two year seedling plants. 12 plants for 65c; 50 plants for \$2.50; 100 plants for \$4.00.

Less Than Half of Price Elsewhere

Gentlemen:—We have just finished planting the Altheas, also the Shade trees we ordered from you. Orders No. 1313 and 1328. They are noticed by everybody for their fine appearance and size and could not have been purchased anywhere else at double your price.

Your very truly, B. Handschiegl, Indiana.

Small Profits and Many Sales is How We Get Our Expense Money

CHOICE GRAPES

BIG JUICY-LADEN GRAPES—Fine for Grape Juice, Jellies, Jams, and Fresh

The grape is the easiest of all fruits to grow. The plants take little room, they thrive despite neglect and every year they produce their wealth of beautiful, health-giving fruit. With its roots in any old nook you can lead it away in any direction to provide a grateful shade for the pump, or for a restful seat, a border for a walk or climbing on the wall or house—East, West, North or South, on hill or in valley on poor soil or rich, the grape grows, thrives, bears, it never disappoints. Plant a few vines or a large vineyard—make your own grape juice—jams, marmalade, jelly; and have plenty to eat fresh from your own vines.

	Each	10	100	1000
	rate	rate	rate	rate
1-year-old Vines	12c	10c	9c	6½c
2-year-old Vines	18c	15c	12½c	10c

RED VARIETIES

DELAWARE—The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little be-

fore; vine is hardy, productive and a moderate grower.

BRIGHTON—Bunch large, shouldered; berries medium to large, round, dark red, tender, very little pulp, sweet, juicy, slightly aromatic and very good. Ripens early.

CATAWBA—Berries round and of good size; skin rather thick, pale red in shade, but a pretty deep red in the sun, covered with a lilac bloom; flesh slightly pulpy, juicy, very sweet.

BLACK OR PURPLE VARIETIES

CAMPBELL'S EARLY—Great big, fine colored, juicy, black grapes, full of the richest sweetness. The seeds are very small and part readily from the flesh. A heavy annual bearer and should be included in every collection.

MOORE'S EARLY—The best early purplish black variety, ripening three weeks ahead of Concord. It has a most pleasing taste whether eaten fresh from the vine or made into grape butter.

WORDEN—A most meritorious Concord type variety that ripens about a week earlier than its parent, and is just a little larger.

CARMAN—Vines very thrifty, in fact, just as hardy as vines can be. The grapes are large and thick on the cluster. A cluster of these is solid nearly as a ball. Bears from one to two bushels per vine and the best eating grape I have ever seen. If you have been planting grapes that would not sell plant some Carman. They outsell anything else on the market. The Carman grape begins to get ripe about August 10th and will hang on the vines after getting ripe, for several days.

CYNTHIANA—The best red wine grape known. We say the best because red wine made from this variety, grown at Bushburg, Mo., about 25 miles south of St. Louis on the Mississippi River, won first prize at the World's Exposition at Vienna, Austria, as the best red wine from all nations. This grape originated right here in Benton County, Arkansas. A very vigorous grower; for making grape arbors it is without an equal. For high, dry countries it appears to be at home as well as on the creek and river bottoms. It does not require a rich soil, but prefers a dry soil of moderate fertility. It is so sweet it is almost too rich to eat out of hand. It has a higher content of sugar than any grape known. The berries are about the size of the Delaware while the clusters are large; color is black covered with blue bloom.

Moore's Early Grapes

WHITE VARIETIES

POCKLINGTON—Seedling from the Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildews in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

NIAGARA—Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord.

OUR FOUR BEST GRAPES

	Each rate	10 rate	100 rate
One-year-old Vines	20c	18c	16c
Two-year-old Bearing Size.....	30c	28c	26c

CACO GRAPE—A Grand Novelty

(Called by some the "Delicious")

This excellent grape is one of the most beautiful in color of any grape grown. The color is a deep red wine color; the berries are large and bunches of good size; ripens a week or ten days before Concord.

It is so rich in sugar that it has an excellent flavor two weeks before it is fully ripe. The vine is a very strong, vigorous grower, healthy and prolific; the most productive of any grape grown in our experimental vineyards.

It produces more bushels per acre than Concord and will sell for much more for a table grape; and for a wine grape it is claimed by some who know the value of grapes for wine to be the very best grape grown for wine and champagne. Very few varieties of grapes grown in America will make good champagne. This grape never cracks on the vines as many others do.

FREDONIA—The new, very early Black grape. Earlier than the Eclipse, larger and better quality. Earlier than Campbell's or Moore's Early; originated at the New York Experiment Station; has been thoroughly tested in their vineyards where over 75 varieties are fruiting and has proven superior in every way to any other early Black grape. It is fruiting at the Arkansas Experiment Station along with many other varieties where it appears to be the best of all early grapes. Flavor excellent, juicy, retaining its fine quality long after it has become fully ripe; hangs on for weeks after fully ripe. Very large, compact clusters, covered with a heavy, blue bloom; vigorous grower, very productive and the earliest black grape grown.

PORTLAND GRAPE—(New.) This is a new white grape, originated at the New York State Experiment Station, Fredonia, New York. The earliest of all grapes, which means high prices on the market, with large bunches and also berries. Flesh sweet, juicy and of fine flavor and superior quality. The vine is a vigorous grower, healthy and hardy. I have never tried this grape; just planted one last spring in my

garden, but the experiment station speaks very highly of it. Try a few and I am sure you will not be disappointed.

EVERBEARING CYNTHIANA—This new Everbearing grape begins to ripen about the time the Concord does, and continues until frost. Has ripe grapes, green ones and blooms on it all the time after they begin to get ripe until the growing season is ended by frost. The grapes are same size and quality as the Cynthiana.

MUSCADINE CLASS

35c each; \$3.50 per dozen

SCUPPERNONG—Large, whitish yellow, good quality; bunches small, very productive and is considered one of the best wine grapes.

THOMAS—Muscadine type; color reddish purple; excellent flavor; tender and sweet; ripens in June.

You Plant

**Bearing Size
Grape Vines**

WHY YOU SHOULD PLANT "BEARING SIZE" GRAPE VINES

You can realize your desire to have grapes from your own vines, a lot of them next year, and a few this year, too, by planting "Bearing Size" Grape Vines.

"Bearing Size" Grape Vines are simply selected vines that are properly cultivated, sprayed and pruned for two years. They would bear their first crop this fall if left where they are.

They are grown especially for gardeners who want vines that will bear in as short time after planting as practical.

"Bearing Size" Grape Vines have vigorous canes, and a heavy mass of roots to correspond. They are dug, handled and packed with extreme care, so as to save all the roots, preserve the canes without injury, and get the vines into your hands in perfect condition to plant.

If carefully planted, spreading the roots naturally in moist, rich soil, and cutting the canes back about one-half they will bear some grapes the same season planted, and produce nearly a full crop the next.

—AND THEY ARE GRAPE VINES OF SUPERIOR QUALITY

These "Bearing Size" Grape Vines are produced by planting cuttings taken from vineyards that are famed for their production of quality grapes. The cuttings are sent down to our planting grounds in the Mountains. In that fertile soil, with its bracing atmosphere and long growing seasons, and with the best of care and cultivation, these develop into extremely hardy, vigorous stock that makes rapid growth and produces wonderful crops of grapes, wherever planted.

Order at least a few vines of each variety described in this catalog. This will give you an assortment of red, white, blue and black, as well as early, midseason and late. A vineyard that will prove a source of pride, pleasure and profit to you as long as you live.

"BEARING SIZE" GRAPE VINES ARE NOT EXPENSIVE

As they are shipped direct to you from the packing house at the Nursery where they are grown, the cost of "Bearing Size" Grape Vines is not high. At these prices we pack and ship to you.

Grow Concord Grapes!

CONCORD

C. J. Pfaff, 4 miles N. W. Springdale, Ark., netted more than \$100 per acre from his 14 acre Concord vineyard in 1930, the driest year on record and prices the lowest.

J. A. Maxwell, 2½ miles S. W. Lowell, Ark., netted from his 11 acre Concord vineyard \$133 per acre in 1930.

**Pick Grapes
Next Fall**

Everybody likes Grapes! But, in the popular mind there still exists the impression that three years must elapse between the planting the vines and picking grapes from them. This period between planting and harvesting grapes can be cut down to one year, by planting carefully grown "BEARING SIZE GRAPE VINES."

CONCORD The King of Grapes. This variety grows and bears well on any kind of soil, high or low lands, stony or smooth lands, sandy or gumbo lands, the most widely known, most popular of grapes, bunches large and compact, berries are large and round, almost black covered with blue blooms, begins to get ripe about July 25 and continues for about three weeks. Skin is thin, flesh sweet, pulpy and tender, quality good, very prolific and a good grower. This is the leading variety that is making the grape growers rich, it is grown extensively in Arkansas and Missouri for table grapes; is grown in Iowa, Michigan, and New York extensively and sold to grape juice factories. You will not make a mistake in planting largely of this variety; vines do well on arbors, walk shades, back yard fences, etc. Planted 6 to 8 feet apart, around your home, in back yard, etc., a few vines are valuable for quick and everlasting shades and for a perpetual source of fine grapes. The commercial planting of this variety in North Arkansas and South Missouri is just getting started; the oldest vineyards have begun to demonstrate what can and is being done in the Ozark country with this variety of grapes (CONCORD). Some vineyards are producing more than \$150 worth per acre, before they are out three years, in many instances the first crop will yield enough fruit to pay for the land they are growing on, for the vines and for all the cultivation and hoeing that has been done on the vineyard. Grape vines are said to be longer lived than apple trees. It is claimed from good authority that grape vines will grow and produce valuable crops from 50 to 75 years. They bear full crops when other fruits fail, when long drouths cause a failure in grain and cotton crops. In fact, they are the most dependable for paying crop of anything in the agricultural line. The larger part of the vineyards planted and being planted in North Arkansas and South Missouri are being set 8 feet in the rows and making the rows 10 feet wide requiring 545 vines to plant an acre. Vines begin to bear within one year after planting them, the two year vines often bear fruit in the nursery rows.

Modern Rose Collection No. 1, for \$3.48

We will send prepaid 12 two-year, field grown, everblooming of the most modern variety, some of each, Red, Pink, White and Yellow, all Bush Roses, no Climbers, an ideal selection for a fine rose garden.

HORSERADISH

It is as easy to grow as a weed, and every good housewife knows its great value in the making of sauces and seasoning. Once used in pickle it will never be done without. Horseradish sauce is one of the chief appetizers of the golden old-time Southern cuisine.

It is also one of the few sauces or condiments that is pronounced by the best authority to be perfectly wholesome. A dozen plants will supply a large family for a lifetime, and it grows and multiplies very fast. 10c each; \$1.00 per dozen.

ASPARAGUS

Asparagus

Is of the easiest culture and is one of the first good things you may have from your garden. The plants, when once established, last for years and grow better with age. Care should be taken not to pick asparagus the first season planted. The

ground should be well drained and well encircled with barnyard manure; give liberal dressing of manure each year.

30c per dozen; \$1.45 per 100; \$10.00 per 1,000.

Non-Warranty—In the event any Nursery Stock, Seeds or Plants sold by us should prove untrue to name, we will refund the price paid us or replace the same free of charge, and it is agreed that we are not liable for any greater damages.

Our rule on paying the Parcel Post, Express or Freight Charges on all orders amounting to \$10.00 and up, except evergreens balled and burlapped, gives you advantage of having our high-grade nursery stock delivered to your door for the extreme low prices quoted in this catalog, by making your order amount to \$10 or more. If you are thousands of miles away from us you have the same advantage of these very low prices as one living very near us.

ROCK GARDENS

AN ENTHRALLING PERSONAL HOBBY

Nature actually started this fascinating gardening feature; but modern gardeners, both professional and amateur, are developing the subject with much enthusiasm, ingenuity and delightful effect. "Rock Gardens" may embrace acres of land broken up naturally in ridges, hummocks, valleys, pools and waterfalls, with outcropping stones and picturesque existing trees. These natural settings in the right place are, unfortunately, rare; consequently we have to create such effects by artifice.

See Hardy Perennials, page 40.

CONSTRUCTION

Location must, of course, be what have you. Liberal sunshine is much preferable; good drainage is essential. If your land is flat, dig a valley and build a mound. If there is an uneven corner spot, take advantage of it.

Get together the best stones you can find; some uneven boulders, more of uneven, irregular flattened pieces. Uniformity in size and shape should be avoided. Go easy on both very small stones and massive boulders. No bricks or concrete fragments.

Soil is important. Mix a good porous garden loam with equal portions of both sharp, gritty sand and vegetable fiber—which may be leaf-mold, or decayed wood-turf, or Michigan peat.

Distribute this soil on your basic construction, first; then crown in and solidly anchor the stones, naturally commencing at the outer base, and working up a graduated slope towards the crest. In order to catch rainfall, dew or applied moisture and direct its drainage downward without loss

into the thirsty soil, tilt the outer edges of slabs upward at least 10 degrees. In building rock walls, there can be no vertical face but a graduated slope in successive tiers, its stones uptilted as above for the same reason. Wherever convenient, pack in the roots of plants designed to creep across and trail over the stones, as you go along.

In apportioning relative stone and dirt areas, always bear in mind that this is not a stone-pile to be screened but a garden in which the occurring stones are merely helpful, picturesque incidents.

Tufted plants with rosetted foliage and moderate upstanding flower stalks, are best suited to filling the narrower crevices. The creeping, trailing types spread densely over the flat surfaces, eventually cascading downward over the edges in mossy trails of varied hue. In exterior supplementing groups, in occasional clumps of liberal area midway of the ascent, and prominently massed along the crest, there are many thrifty, colorful and dependable types. More ambitious plans at greater expense, with less restricted space and more emphatic topographical features, welcome the enrichment of such units as *Cotoneaster Horizontalis*, *Daphne*, *Tamariscifolia* and other creeping Juniper, *Azalea Mollis*, *Euonymus Vegetus*, *Yews*, *Savin* and *Pfitzer Juniper*, *Mugho Pine*, *Ilex*, and an occasional accent at balanced locations achieved by the slender, upright Junipers and *Arbor-vitae*s.

The usual good watering at time of planting must be vigilantly repeated until you can be sure Nature is providing ample moisture.

Modern One-Acre Home Fruit Orchard

Since acreage is being cut in your cash crops to keep away from overproduction, let's put one acre of this idle land in orchard that will produce all the fruits, berries, grapes, rhubarb, asparagus, etc., that one family will consume in their home. Just think for one moment what it would be worth each year to have all the fine fresh, ripe fruits of all the different kinds included in this MODERN HOME ORCHARD.

It means fully one-half of the cost to buy your foods saved to you, and you know the more good, dead ripe, juicy fruits you eat the better your health and if each family will have all they can use and use it in the many ways it should be used, it will almost keep your table supplied with food of the most wholesome sorts. Besides having the pleasure of enjoying all this rich, luscious, ripe fruit you want, it saves you many dollars, for your table must be supplied with good things to eat and by growing this you are having the best to be had for the least possible cost.

This MODERN HOME ORCHARD comes in good trees (3 to 5 ft.) and the largest size (2-year bearing size) grape vines and plants of all kinds are of the best size, so that you will have much of this assortment into bearing within a few months after it is planted in your orchard, and the second year most all of it will be into bearing and will bear each year continuously thereafter.

The list of varieties we have selected for this Modern Orchard are of the best sorts to be had, regardless of prices paid for them. They are varieties that we know to be of best quality and to come into bearing at an early age, and this selection can not be beat for real good qualities and most productive varieties.

Now, since this MODERN HOME ORCHARD is going to supply one-half the foods for your table, you must make up your mind to give it an ideal location, on as good land as you have and if it is not real good soil you must make it so by applications of barnyard manure (no danger of getting it too rich), for the better your soil is, the finer your trees, plants and vines will be and the larger your fruits will be. If the location where you would like to have this orchard is not already good orchard land you can soon make it good by applications of barnyard manure. Be sure that your location is well drained, that water does not at any time stand over or near the top of the soil for several days in succession. After you have this location on good soil make up your mind again to give this lot of trees, plants, and vines the very best of care and attention same

as you do your garden when you plant it in the spring. See that this HOME ORCHARD gets as good attention as any spot on your place and we will guarantee that it will pay more for this special attention than anything you can grow and this one acre will produce more, in what it would cost you in cash to buy, than any other four or five acres you can grow of any other crops. TELL YOUR NEIGHBOR, WHO DOES NOT HAVE AN ORCHARD, ABOUT THIS OFFER, and confer a favor on both of us.

For this ONE ACRE HOME ORCHARD we have selected the following kinds and numbers of fruits, and of the larger size trees and plants, we will ship to you this lot, which would cost at our catalog prices over Fifty Dollars.

26 APPLES, 3 to 5 ft.—2 Early Red Bird, 2 Maiden Blush, 5 Blood Red Delicious, 5 Yellow Delicious, 2 Red June, 2 Ada Red, 4 Jonathan, 4 Stayman Winesap.

26 PEACHES, 3 to 5 ft.—2 Stinson's October, 3 Arkansas Black, 4 Early Elberta, 4 Belle of Georgia, 2 White English, 2 Early Wheeler, 3 Altons, 4 J. H. Hale, 2 Red Indian.

8 PLUMS, 3 to 5 ft.—2 Early Gold, 2 Italian Prune, 2 America, 2 Hanska.

12 CHERRIES, 3 to 5 ft.—6 Large Montmorency, 3 Early Richmond, 3 English Morello.

6 PEARS, (Blight-Proof), 3 to 5 ft.—3 Douglas, 3 Pineapple.

2 QUINCE, 3 to 5 ft.—1 Champion, 1 Orange.

12 GOOSEBERRIES—3 Oregon Champion, 6 Houghton, 3 Downing.

200 BLACKBERRIES—100 Ozark Beauty, 100 Early Harvest.

200 RASPBERRIES—100 St. Regis, 100 Latham.

150 DEWBERRIES—50 Lucretia, 50 Austin, 50 Premo.

250 STRAWBERRIES—100 Blakemore, 100 Premier, 25 Early St. Louis, 25 Cooper.

25 YOUNGBERRIES.

6 JUNE BERRIES

18 RHUBARB (Pie Plant)—18 Burbank Giant Crimson.

25 ASPARAGUS—25 Washington Rust Proof.

5 HORSE RADISH.

30 GRAPES—12 Concord, 6 Moore's Early, 4 Caco, 4 Niagara, 4 Delaware.

In order to help the people on the farms who have been so hard hit for the last few years, we are offering this entire lot, delivered to your nearest express office for—

ONLY \$32.00, By Prepaid Express

DAHLIAS

DECORATIVE VARIETIES

Jersey Beauty

DAHLIAS

Mixed varieties of many colors and good sorts. 5c each; 50c per dozen.

DAHLIAS—In this lot we can supply the color wanted of white, yellow, pink, and dark red, of real good kinds for 10c each; \$1.00 per dozen; \$7.50 per 100.

FANCY DAHLIAS

25c each; \$2.50 per dozen.

Jersey Beauty — Flowers are perfect Esoine Pink. Stems and plants are very hardy and strong and are immune from defects.

Jane Cowl — Flowers are glistening bronzy buff and salmon shade. Dark green leatherlike foliage, stems are long and very sturdy.

Mrs. Ida De Ver Warner—Large flowers of clear lilac-rose on strong stems, an easy grower and plants tall.

Margaret Woodrow Wilson — Large creamy white, suffused pink, darkened reflex on petals. Blooms freely.

Judge Marean—Flowers are beautiful combination of salmon red, orange and apricot; very prolific, stiff wiry stems.

Fort Monmouth (Cactus Type)—Giant rich crimson or maroon-twisted petals. Stiff stems on tall vigorous bush.

The Commodore — Large clear canary yellow. Prolific bloomer. Does well in any soil.

Jersey Beacon—Bright scarlet with petals twisted to show reverse of lighter shade, two-tone effect, large and massive.

Sagamore—Blooms freely, finest amber-gold. Bush is sturdy, fine stems, excellent commercial variety.

Pride of Stratford—A big flaming ball of color with all the beautiful hues, and streaks of orange, red and yellow you can imagine.

Le Toreador—Large flowers of brilliant red. Good form, perfect stems. Probably the best red cut flower on the market.

A. D. Livoni (Ball Shaped)—A beautiful soft pink flower, quilled petals.

Maude Adams (Ball Shaped)—A pure snowy white, very effectively overlaid clear delicate pink.

Yellow Duke (Ball Shaped)—A splendid primrose-yellow of good form and strong stems.

Sagamore

Excellent Production

Dear Sir:—On March 16, 1934, I received my order of two Concord, four Niagara, and two Portland Grape vines. I think they are the best ever. During July, 1935, I gathered one bushel of delicious fruit from them. I sold four gallons at 25c per gallon and made one gallon of jelly for home use and it is grand too, far better than any I've made from other fruit. I have ordered from two other nurseries for many years and neither can equal your nursery at Rogers. I intend to send in a larger order for myself in the near future.

Yours very truly, Mrs. Pauline Brent, Louisiana

PERENNIALS

Bleeding Heart (*Dicentra*)

BLEEDING HEARTS—35c each; \$3.50 per dozen.

CHRYSANTHEMUMS—10c each; \$1.00 per dozen. A good assortment of colors of the very best outdoor, hardy kinds.

CHRYSANTHEMUM KOREAN—2 to 2½ feet. Single flowers in lovely pastel colors, appearing in the fall. 20c each.

PINK DOTY—One of the earliest large blooming. Blossoms clear bright pink. Very choice. Quite hardy. 20c each.

WHITE DOTY—White blossoms, creamy at center, clustered on tall stems. 20c each.

COLUMBINES—20c each; \$2.00 per dozen. Can furnish many shades of the very best varieties.

CROCUS—Yellow, blue or white. 4c each; 40c per dozen; \$3.00 per 100.

DAFFODILS—10c each; \$1.00 per dozen.

DAISY SHASTA—1½ to 2 ft. White. 15c each; \$1.50 per doz. Spring through summer.

DELPHINIUMS—20c each; \$2.00 per doz. The best of all blue flowers and hardy.

FERNS—25c each; \$2.50 per dozen. This is a hardy fern that will live and grow to perfection outdoors in climates where it gets 20 degrees below zero, and very fine ferns and of good size sent to you.

GOLDEN GLOW—15c each; \$1.50 per dozen.

GOLD LODE—Early blooming, blossoms bright clear yellow. Choice variety. 20c each.

HOLLYHOCKS—Furnish a wealth of color throughout the summer; from 3 to 7 ft., in height. Colors pink, red and white, in

single blossoms. Double white, double yellow and double red mixed, 3 for 35c.

HYACINTHS—10c each; \$1.00 per dozen. Mixed Varieties and colors not known.

15c each; \$1.50 per dozen. In this lot we have bright sky blue, rosy pink, pure white and yellow.

HYBISCUS—20c each. Red, white and pink.

IRIS—5c each; 50c per dozen. This lot is a mixture of real good kinds and of fine colors.

For 15c each; \$1.50 per dozen, we offer the late high grade named varieties: Queen of May (Lilac Pink); Mad. Chereau (white); Caprice (early red purple); Juanita (deep blue); Kochii (deep purple); Honorabilis (yellow with brown); Archeyegus (purple); Rhein Nixi (white and plum).

LUPINE—Conspicuous, lovely pea shaped flowers on spikes a foot long. 3 for 55c; \$2.00 per dozen.

LILIES

DAY LILY—Blooming size. 10c each; \$1 per dozen.

REGAL LILY—Blooming size. 45c each; \$4.00 per dozen.

MADONNA LILY—Blooming size. 25c each; \$2.50 per dozen.

LILY OF THE VALLEY—Blooming size. 5c each; 50c per dozen.

LEMON LILY—Blooming size. 15c each; \$1.50 per dozen.

TIGER LILY—Blooming size. 25c each; \$2.00 per dozen.

PHILIPPINE LILY—A new beautiful variety. The slender stem is covered with the same grassy foliage as the Regal Lily. Flowers are long, white trumpetlike shape with a beautiful pale emerald-green throat. They commence blooming in August and flower until stopped by frost. Very easily grown. Price: 45c each; \$4.00 per dozen.

Regal Lilies

Fragrance

NARCISSUS—5c each; 50c per dozen; \$3.00 per 100.

PEONIES—Mixed varieties. All are good kinds. 25c each; \$2.50 per dozen.

PEONIES—Named varieties. 35c each; \$3.50 per dozen.

The varieties named below are very large, double and fragrant.

Fragrance—Beautiful shade of red.

Festiva Maxima—Very large white.

San Foin—Fine shade of pink, very large.

PHLOX—Mixed varieties of good sorts. 10c each; \$1.00 per doz.; \$7.00 per 100.

PHLOX—Named varieties of the best sorts. 25c each; \$2.50 per doz.; \$20 per 100.

PHLOX, Scotch—Variety of colors.

B. Comte: Brilliant crimson.

Dawn: Blush pink.

R. P. Struthers: Salmon pink.

Stella: White.

TULIPS—Mixed, but all good varieties. And blooming size. 4c each; 35c per dozen; \$2.50 per 100.

Phlox

TULIPS—Named varieties, large bulbs. 5c each; 50c per dozen; \$3.00 per 100.

Bartigon: 2 ft. Red with white base.

Centenaire: 2 ft. Violet rose.

Francombe Sanders: 2 ft. Rose scarlet.

Princess Elizabeth: 2 ft. Beautiful pink.

Wm. Copeland: 2 ft. Sweet lavender.

Inglescombe Yellow: 2 ft. Beautiful yellow.

SWEET PEAS—2 varieties. 15c each; \$1.50 per dozen. White and pink.

SWEET WILLIAMS—10c each; \$1.00 per dozen.

YUCCA—(Adam's Needle) — 25c each; \$2.00 per dozen.

BULBS AND TUBERS

CANNAS—Mixed varieties. Of the very best kinds and colors. 4c each; 40c per dozen; \$3.00 per 100.

King Humbert Canna

CANNAS—Named varieties. 7½c each; 75c per dozen; \$5.00 per 100.

City of Portland: 2½ feet. Green foliage and the most beautiful of pinks.

Eureka: 2½ feet. Green foliage and the best white Canna grown.

King Humbert: 5 feet. Finest bedding variety with bronze foliage, orange scarlet.

President: 6 feet. Green foliage, beautiful red flowers that bloom until frost.

Wyoming Yellow: 6 feet. Bronze foliage, excellent for bedding, deep orange yellow.

Yellow King Humbert: 5 feet. Green foliage with golden yellow flowers, a profuse bloomer.

Gaiety: 4 feet. Scarlet orange, mottled with carmine and edged in clear yellow.

Robusta: 8 feet. Red or bronze foliage, small red blooms, grows to enormous size, the very best for hedge or screen plantings. Price: 5c each; 50c per dozen; \$3.50 per 100.

Gladiolus

GLADIOLUS

Mixed varieties of good sorts and many colors. Each 2c; 20c per dozen; 100 for \$1.50.

Alice Tiplady—Orange-saffron blossoms; strong spike. 5c each; 50c per dozen.

Catherine Coleman—Clear salmon-rose; 7-8 large flowers, open, tall, strong plant. Extra good. 5c each; 50c per dozen.

Dr. Moody—Early, light lavender. Produces several flowers from one corm. 8c each; 80c per dozen.

Dr. Nelson Shook—Ruffled tyrian rose. Late bloomer; very showy; tall, heavy spike. 6c each; 60c per dozen.

Excellence—Brilliant red, very early, extra good cut flowers. 6c each; 60c per doz.

Geraldine Farr—True lavender with darker splotches in throat, larger blossom. 5c each; 50c per dozen.

Giant Nymph—One of the most vigorous pink with deep cream throat. 6c each; 60c per dozen.

Golden Dream—The largest and best of all yellows, very clear, deep yellow. Tall, strong stems. 5c each; 50c per dozen.

Highland Laddie—Large pink blossoms, strong stems. 5c each; 50c per dozen.

Jack London—Light salmon with red markings and yellow throat. 5c each; 50c per dozen.

Los Angeles—Brilliant clear shrimp-pink of large size and produces several flower stems from one corm. Vigorous grower. 6c each; 60c per dozen.

Mrs. F. C. Peters—Large, late flowers of orchid-pink; very outstanding variety. One of best commercial lavenders. 5c each; 50c per dozen.

Mrs. Leon Douglas—Salmon-rose, striped flame, very tall with very large flowers, very showy, good exhibition. 5c each; 50c per dozen.

Mormora—New variety of gray lavender; dark blotch on petals. Sometimes called a smoky lavender. Good exhibition. 10c each; \$1.00 per dozen.

Nancy Hanks—Apricot, shaded with orange-pink; blossoms large with several open at same time. Becoming very popular. 5c each; 50c per dozen.

Pfitzer's Triumph—Bright orange salmon-red with dark red blotch. Immense wide open flowers. Best results cut as bud begins to open. 5c each; 50c per dozen.

Richard Diener—Brilliant geranium pink, strong stems. One of the best. 5c each; 50c per dozen.

Tiffany—Large, pure white blossoms. Very fine. 5c each; 50c per dozen.

White Giant—Large, clear white blossoms. 5c each; 50c per dozen.

W. H. Phipps—LaFrance pink, overlaid with light, rose-salmon, which is lighter toward the center and has ruby speckled throat markings. More florets open at one time on this variety than any other we know about. A wonderful Glad. Popular everywhere. 5c each; 50c per dozen.

1910 Rose—Large, flowering rose-pink. 5c each; 50c per dozen.

TUBEROSE—The very fragrant flower. 5c each; 50c per dozen.

CALADIUM (Elephant Ear)—The large type, leaves grow to be 6 feet in diameter. Medium size bulbs, 15c each; \$1.50 per dozen. Large size bulbs, 25c each; \$2.50 per dozen.

Our Trees Grow

Gentlemen:—I purchased from you twelve peach trees last April. When they came my wife laughed at them, called them switches and said they would not grow, but I planted them on high rich soil, and they certainly did grow. Since I gave 3 times as much for 1 tree from another nursery as I gave for the 12 from your nursery, when I need more fruit trees, I know where to get them.

Yours very truly,

Noble Baker, Michigan. Tuberose

ORNAMENTAL TREES

Mountain Ash

At the President's conference on home building and home ownership, the topic of landscape planning and planting occupied a prominent place in the discussion. In fact, in the report of this conference, released in December, 1931, the following is given: "The expenditure for planting of any lot of an amount equal to five per cent of the cost of the dwelling will add twenty per cent to the sales value of the property."

*However little I may be,
At least I too can plant a tree.*

*And some day it will grow so high,
That it can whisper to the sky.*

*And spread its leafy branches wide
To make a shade on every side.*

*Then on a sultry summer day,
The people resting there will say,—*

*"Oh, good and wise and great was he
Who thought to plant this blessed tree!"*

Imagine if you can what a bleak and barren place this country of ours would be without shade and ornamental trees. Have you ever noticed that the homes which look the most attractive to you invariably are those with a few well placed ornamental trees around them? There is a growing appreciation of trees. More people are

learning to know and love them every day. It is well recognized that shade trees around the farm or city home not only add to its beauty and comfort, but greatly increase the value of the property. Truly, "It's not a home until it's planted." We do not advise planting big, overgrown ornamental trees. They do not transplant as successfully as the sizes offered herein.

AILANTHUS (or Tree of Heaven)—The large pinnate leaves of this tree give it a tropical appearance, a very rapid grower, withstanding smoke and dust better than most any other kind of tree. Price: 4 to 6 ft., 50c each; 6 to 8 ft., 75c each.

ASH, Mountain—A handsome little lawn tree growing 20 to 30 feet high, with long dark green foliage and clusters of bright red berries. Price: 4 to 5 ft., \$1.00 each.

ASH, White—(*Fraxinus Americana*)—One of the best native trees; leaves dark green and effective throughout our long summers. Native throughout America. 5 to 6 ft., 75c; 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.25.

BIRCH, Red (*Betula Rubra*)—This tree is typical Birch. Its bark is a dark hue and its leaves are purple in color; its branches follow the general Birch habit of drooping gracefully. This tree likes wet soils and along streams. Price: 4 to 6 ft., \$1.00 each; 6 to 8 ft., \$1.25 each.

Catalpa Bungei

Dogwood (Cornus)

BLACK GUM—A native that adapts itself to all kinds of soils and one of the most beautiful trees that grow in the Ozark Mountains. It is a close, compact growing tree, from 20 to 40 feet in height; the foliage is thick and dark green, making a very dense shade early in the fall. This foliage turns blood red, making it a thing of beauty for weeks before the leaves fall off. 4 to 6 ft. trees, \$1.00 each; 6 to 8 ft., \$1.50.

BOX ELDER (Acer Negundo)—A large rapid growing native tree of spreading habit, belonging to the Maple family. Price: 4 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., \$1.00.

CATALPA BUNGEI—A remarkable species forming a dense, round umbrella-like head; makes a beautiful lawn tree when grafted or budded on a high stem. 4 to 5 ft., \$1.00; 5 to 6 ft., \$1.50; 6 to 7 ft., \$1.75.

CATALPA SPECIOSA—Broad, deep, green foliage, with large, fragrant trumpet flowers in clusters in the spring. The Catalpa is a native of most part of the South and is valued for its durable timber and for ornamental purposes. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

COTTONWOOD (Populus Deltoides Canadensis.)—One of the best of the poplar family. Large and spreading and used where the effects of the Poplars are desired. Does exceptionally well in the plains country. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

CHESTNUT, HORSE—A large tree of regular outline, 60 to 80 feet tall, completely

covered in May with great upright spikes of white flowers. Satisfactory either as a street or lawn tree, particularly desirable where dense shade is required. Prices: 3 to 4 ft., \$1.00; 4 to 5 ft., \$1.25.

CRAB APPLE, Bechtle Double Flowering—A handsome bush or little tree seldom over 20 feet in height. One of the finest for lawn decoration. Produces in profusion double, delicate pink flowers resembling at a distance dainty little roses. Blooms when young and is very fragrant. 2 to 3 ft., 75c; 3 to 4 ft., \$1.00.

DOGWOOD, RED FLOWERING (Cornus Florida Rubra)—Similar to White Flowering Dogwood except that the flowers vary from pink to light red. Grows 10 to 20 feet high. Prices: 2 to 3 ft., \$2.00 each.

DOGWOOD, WHITE FLOWERING (Cornus Florida)—A slow growing dwarf tree with abundant, large, white flowers appearing very early in the spring before the grayish-green leaves, and followed by attractive red berries. Leaves turn to deep red in autumn. Grows 10 to 20 feet high. Price: 2 to 4 ft., 50c each; 4 to 6 ft., 75c each.

ELM, AMERICAN—In our opinion the handsomest and most dignified of all the native trees. Probably more largely planted and better known than any other. A tall growing stately tree reaching 60 feet, with a wide arching top and vasselike form. Extensively used for street planting where its wide-sweeping branches form perfect Gothic arches over the streets. Prices: 5 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., \$1.00 each.

ELM, CHINESE—A native of China; a noble, rapid growing tree, forming a very dense head with smaller, darker leaves than the American Elm. Leaves stay on the

American Elm

tree much longer in the autumn; the branches project from the trunk almost at right angles. A real beautiful shade tree for lawn and street plantings. Prices: 4 to 6 ft., 50c each; 6 to 8 ft., 75c; 8 to 10 ft., \$1.

HAWTHORNE—This charming little tree often attains a height of 20 feet and is a bower of beauty when in bloom; it is equally ornamental when loaded with its crimson fruits that hang on until late in the winter; grows on great variety of soils and is perfectly hardy. 4 to 6 ft., \$1.50 each.

JUDAS TREE (*Cercis Canadensis*) (Red bud)—A small growing tree of irregular form, with heart shaped leaves. It is covered with delicate pink blossoms early in spring before the leaves appear. A charming association among the tender greens and bronzes of young foliage. 3 to 4 ft., 75c; \$6.75 per 10; 4 to 5 ft., 90c; \$8.50 per 10.

LARCH (European)—Tall, slender trees of light, feathery foliage; resembles the foliage of an evergreen (Spruce or Fir). It is very hardy and grows rapidly and is a real beauty. 3 to 4 ft., \$2.00 each.

LINDEN, AMERICANA (*Basswood*)—A tall growing, stately tree, growing 60 to 80 feet tall, with large shining green leaves

and light yellow fragrant flowers in July. A splendid tree for lawn and street planting. Valuable for its beautiful white wood. Prices: 5 to 6 ft., \$1.50 each; 6 to 8 ft., \$2.00 each; 8 to 10 ft., \$2.50 each.

LOCUST, Black (*Robinia Pseudacacia*)—Popular for both shade and avenue tree, as well as for windbreaks and timber belts, white sweet-scented flowers in spring. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

MAPLE, NORWAY (Hard Maple)—Is without a doubt one of the most desirable shade trees for street and lawn planting. Of fairly rapid growth, reaching a height of 60 feet at maturity. Sturdy, compact and vigorous, forming a round head of stout branches and broad, deep green leaves. Prices: 6 to 8 ft., \$2.75 each; 8 to 10 ft., \$3.50 each.

MAPLE, SUGAR (Rock Maple)—One of the most useful of all maples, excellent for street and lawn planting and used extensively in the production of maple sugar. A tree of magnificent proportions, often 80 feet in height, straight, spreading and symmetrical in shape. Long lived. It roots deeply, allowing grass to grow close about its trunk. Dark green leaves turning to scarlet and gold in autumn. Prices, 5 to 6 ft., \$1.00 each; 6 to 8 ft., \$1.50 each; 8 to 10 ft., \$2.00 each.

MAPLE, SILVER LEAVED (Soft Maple)—Leaves white underneath; of rapid growth; very ornamental and one of the best trees we have. 4 to 6 ft., 25c; 6 to 8 ft., 50c; 8 to 10 ft., \$1.00.

MULBERRY, RUSSIAN—A very hardy low growing tree. 20 to 30 feet high with beautifully cut foliage and an abundance of fruit which attracts the birds. Not one of the edible varieties. 4 to 5 ft., 50c each.

OAK, RED—A massive tree with light grey bark and green, round lobed foliage that turns a beautiful red in the autumn. Excellent for parks and large lawns. Grows 60 feet and upwards. Price: 5 to 6 ft., \$2.00 each.

OLIVE, RUSSIAN—Becomes a wide spreading tree of moderate height, conspicuous because of its silvery foliage; prized for planting in groups with other trees, the contrast in foliage makes a beautiful effect. It also makes a beautiful specimen tree. 4 to 5 ft., 50c each; 5 to 6 ft., \$1.00 each.

PEACH, RED—Double flowering—A beautiful small tree rarely over 20 feet tall; at its blossoming time in May every twig and branch bright with beautifully formed flowers, rendering the tree showy and attractive at a distance. 3 to 4 ft., 50c; 4 to 5 ft., 60c.

Maples, Sugar

Poplar, Lombardy

PEACH, Red Leaf—A very ornamental tree for its foliage. The leaves are blood red from early in the spring until frost. 2 to 3 ft., 25c; 3 to 4 ft., 40c; 4 to 6 ft., 60c.

PERSIMMON, American—This is the puckery persimmon, an inch or more in diameter, orange yellow, with a bright cheek when touched by frost. The tree is very ornamental, with a round topped head and handsome shining foliage. 4 to 6 ft., 75c.

PLANE TREE, ORIENTAL—A hardy rapid growing shade tree that does well in smoky cities, near the seashore, or in unfavorable situations where other varieties would not flourish. Excellent for street planting. Beautiful, dense foliage. Grows 60 feet and upwards. 6 to 8 ft., \$1.50 each; 10 for \$12.50.

POPLAR, CAROLINA—A very rapid growing tree, giving shade in a very short time. Very easy to transplant and does well on any kind of soil. Desirable for roadside planting, in parks and along rivers and streams for the protection of the banks. Used extensively for screen to hide unattractive buildings. Attains a height of 60 feet at maturity. Bright, heart shaped, glossy green leaves, silvery white underneath. 6 to 8 ft., 50c each; 10 for

\$4.00; 100 for \$30.00; 8 to 10 ft., 75c each; 10 for \$7.00; 100 for \$55.00.

POPLAR, LOMBARDY—A tall, narrow tapering tree, 60 feet high at maturity, a striking feature in any landscape. Fine for planting in groups, along driveways, or to make boundary lines. Sometimes used for tall screen hedges. 5 to 6 ft., 50c each; 10 for \$4.50. 6 to 8 ft., 75c each; 10 for \$7.00; 8 to 10 ft., \$1.00 each; 10 for \$9.00.

POPLAR, SILVER (*Populus alba* Boileana)—A tall, columnar tree, resembling Lombardy Poplar in growth, but more widely spreading and with silvery leaves. 4 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., \$1.25.

PRUNUS Pissardi (*Purple Leaved Plum*)—A distinct and handsome little tree, covered with a mass of small white single flowers in spring; later with showy pinkish purple leaves that deepen in color to the end of the season. 3 to 4 ft., 50c each; 4 to 5 ft., 75c each.

SYCAMORE, AMERICAN—A well known tree, very common throughout the United States; leaves heart shaped at base; the short lobes, sharp pointed, branches are wide spreading. 4 to 6 ft., 50c; 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

SWEET GUM (*Liquidambar styraciflua*)—A native tree that is perfectly hardy. The glossy foliage in summer, the brilliant color in the fall and the unusual appearance of the young branches with corky bark in the winter are considerations that make it especially valuable. 4 to 6 ft. trees, \$1.50 each; 6 to 8 ft., \$2.00 each.

Sycamore

TULIP TREE (Whitewood)—One of the grandest of our native trees, of tall pyramidal habit, with broad, glossy, fiddle-shaped leaves and beautiful tulip-like flowers; allied to the Magnolia. Leaf color is clean, rather bluish-green shade which in fall turns brightest yellow. Flowers are 1½ to 2 inches long, light greenish yellow marked at inside base with orange; appearing in May or June. 4 to 6 ft., \$1.25; 6 to 8 ft., \$1.50.

UMBRELLA CHINA TREE (or Texas Umbrella)—A sub-variety of the China tree. It assumes a dense, spreading head, resembling a gigantic umbrella, and is of unique appearance. 4 to 5 ft., \$1.00; 5 to 7 ft., \$1.50; 7 to 9 ft., \$2.00.

WALNUT, BLACK—Valuable for nuts and timber. It is hardy and succeeds best on a rich, deep, moist soil. Too well known for long description. 4 to 6 ft., 50c; 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

WILLOW, GOLDEN—A very showy yellow-barked tree reaching a height of 60 feet at maturity. A handsome tree at all seasons, but particularly conspicuous in winter and early spring before the leaves appear. Prices: 6 to 7 ft., 50c each; 10 for \$4.50; 100 for \$40.00.

WILLOW, WEeping, BABYLON—Our well-known weeping willow. A large, graceful tree, especially effective when planted near water. Grows 30 to 60 feet high. Price: 4 to 6 ft., 75c; 6 to 8 ft., \$1.00 each.

His Orchard Was Very Profitable

Gentlemen:—In the fall of 1930 I bought 50 Belle of Georgia and 50 Elberta Peach trees from you. They were June buds and were under 1 ft. high. I set them out soon after they were received that same fall. I find, to plant some crop like peanuts or peas between the rows of trees to be cultivated, is best. The second summer, 1932, after these trees were set out they bore say from three to six peaches to the tree. They were very fine and good. The next spring, 1933, they were full of blooms and had a heavy crop of fruit but on the 22nd of May, 1933, we had a heavy hail which knocked all of the peaches off except just a few and marked the trees very badly on one side. The next spring, 1934, these trees had overcome the effects of that hail storm, bloomed and bore a full crop of as fine peaches as I ever saw. We canned and dried about 50 bushels and sold about 150 bushels at from \$1.00 to 75c per bushel. This year, 1935, the same trees bloomed and bore a full crop which was about 250 bushels. We sold these at from \$1.00 to 60c per bushel except what we used at home. I began pruning and spraying these trees the third year after they were set out and have kept that up every year since. The same year that I set the peach trees, I ordered a selection of apple trees from you, 10 Delicious, 10 Stayman Winesap, 10 Old Fashioned Horse, 12 Early Harvest, 10 Ben Davis and 10 Yellow Transparent, 60 in all. These trees were badly injured by the 1933 hail storm. Practically all fruit was knocked off. By 1934 these trees had come out of the injuries of the hail storm considerably. They bore about 30 bushels of very nice fruit. We had all that we needed for canning and drying. This year, 1935, the trees were full of blooms but it rained almost, if not every day of the blooming season. They could not pollinate properly and therefore did not bear but six bushels. We had many calls for apples, but we needed them all for home use. This orchard not only helped to keep us out of debt during this depression but we had all of the nicest fruit that we wanted to use. If I had it to do over, I would buy and set out a bigger variety and more of each.

Noah L. Houser, North Carolina.

200 Bushels From 30 Peach Trees

Dear Sir:—I want to thank you for the healthy and nice trees I got from you about five years ago. I didn't expect to get such nice trees from you for so little money. I bought some trees from another nursery about six years ago and I never got half of the fruit as I got from the ones I bought from you and your trees. I bought from you are one year younger and I will say that they are the best peaches and cherries and apple trees I have ever bought from any nursery at the price. I bought from you and the best fruit I should say it is. I got about thirty peach trees and I got about 200 bushels out of them this past summer. I got about ten apples but we got just a few apples but they are sure nice and big apples and they are sweet too. I got a few cherries, but they are sure large and sweet. The trees are still too young to give lots of fruit but it's sure nice fruit. If I order another lot of trees this spring I will order from you. I will tell my neighbors and friends too. You can feel sure that I will send you my future orders.

Very truly, Ermo Sanchez, New Mexico.

Best Uniform Roots and Tops

Gentlemen:—I am glad to thank you for my order of fruit trees of last year, which I received well packed and in good condition. I do not remember the amount of all varieties, but am glad to say I have been ordering and planting trees from other nurseries for twenty-five years, and the trees and vines I bought from you had the most and best uniform roots and tops I ever have purchased from anyone. I have some Elberta, Mayflower and many other varieties of peaches, five feet high and a foot in diameter, grown from your two to three foot grade. I shall give you all my future orders. My neighbors have been to look my orchard over and they all want to know where I ordered from. With the best of good luck for your future, I am,

Willie Stallings, Alabama.

Another Satisfied Customer

Gentlemen:—I want to tell you about the success I have had with your small size fruit trees. I set out a small family size orchard of Peach, Plum, Apple, Cherry and Apricot trees in the spring of 1933. I used your 1 to 2 ft. trees. True, they were small but you ought to see them now, October, 1935. They bore a few specimens this past summer. I never saw finer cherries than the 2 or 3 dozen I let stay on the trees. 1933 and 1934 were extremely hard summers to take trees through, but I never watered a tree and I never lost a tree. A good root system and good cultivation did the job. The beauty of these small trees is that I can trim and shape to suit.

Yours truly, J. H. Hutchins, Oklahoma.

ORNAMENTAL SHRUBS

Abelia, Grandiflora

The planting of ornamental shrubs is very largely on the increase, and this is as it should be, for with a good selection the lawn can always be beautiful. They are mostly of medium size, enabling one to plant a great variety on a small plot, and the wonderful assortment of foliage from the darkest green and purple to light orange and silvery tints. This in addition to the great variety in the blossoms, all unite to keep up a never failing interest. We have selected the very best for our climate.

ABELIA GRANDIFLORA—An attractive dwarf shrub, suitable for a sunny sheltered position where the winters are not extreme; with small shiny foliage which is almost evergreen. The flowers are small, but very pretty and numerous, in loose terminal panicles; color, white flushed with pink. This shrub is rarely without some blooms from May into November. 2 to 3 ft., 40c.

ALMOND — Early spring flowering shrubs, gaily in full bloom before the leaves appear, with beautiful double flowers of rose or white, snuggling tight to the twigs.

Double White and Double pink. 1½ to 2 ft., 40c each.

ALTHEA (Rose of Sharon)—Bloom late in June until frost, with a profusion of large and brightly colored flowers much like the tender Hibiscus in form. These are the color spots of fall, as Lilac and Wiegels are of spring. The late appearing foliage is extra good and valuable for its beauty alone. Grown in standard form, they attain 10 to 12 feet in height and make attractive specimens. Planted more compactly and occasionally pruned, they are both serviceable and showy as hedges.

Double Rose, Double White, Double Purple and Double Red—2 to 3 ft., 25c each; 3 to 4 ft., 35c each.

ARROWWOOD (*Viburnum Dentatum*).—Attractive green leaves turning to red in fall, white flowers in May followed by small black berries. Endures shade, dry or moist soil and grows 6 to 8 feet. 2 to 3 ft., 40c each.

BARBERRY, Thunbergi (Japan Barberry).—There is no shrub in existence so generally planted or more practical for all purposes where beautiful foliage effect is desired, than this. It is dwarf growing, uniformly bushy and rounded in form, susceptible to formal pruning, with small, numerous leaves densely covering the thorny twigs. These give it paramount importance for use as a filler and edging for shrubbery groups; as a foundation screen in front of porches and, above all, as a compact, impassible, hardy, low hedge for confining lawns in accordance with seasonable conditions. Autumn paints the foliage scarlet or bronze, and studs the branches with crimson fruits. 12 to 18 inches, 20c each; 18 to 24 inches, 25c each; 24 to 30 inches, 40c each.

THE NEW RED LEAF BARBERRY—About same as Japan Barberry only the foliage is blood red. The foliage is a bright red when it appears in the spring and will grow into a darker red as the season advances. It should be grown in places with as much exposure to the sunshine as possible, as the sunshine is what makes the bright red color of the foliage more distinct. For many purposes it has no equal. 12 to 18 inch, 25c each; 18 to 24 inch, 40c each.

Latham

Portland

Fredonia

BASTARD INDIGO (*Amorpha fruticosa*)—

Of spreading habit, with fine feathery foliage; flowers in long panicles, dark purple in color. 25c each.

BEAUTY FRUIT (*Callicarpa purpurea*)—A

pretty shrub of low growth, blooming profusely in mid-summer followed by large clusters of violet berries, which persist until after frost; flowers lilac-violet. 25c each.

BUTTERFLY BUSH—Flowers resembling

Lilac in color and shape appear in great profusion from mid-summer until frost. Of a delightful fragrance that is attractive to butterflies. Will invariably bloom the first year. 25c each.

BUTTON BUSH (*Cephalanthus*)—A very

hardy, vigorous shrub with large glossy foliage; flowers in dense, ball-like heads; creamy white and fragrant; does well in shady places and moist locations. 2 to 3 ft., 25c each.

CALYCANTHUS (*Carolina All Spice*)—A

unique shrub growing upright to 6 feet, clothing its straight, strong, reddish brown shoots with large glossy leaves, from the axils of which spring odd double, spicily fragrant flowers of chocolate red. 18 to 24 inches. 25c each.

CARAGANA (*Siberian Pea Tree*)—A

large shrub with beautiful leaves of bright green color; flowers yellow in small clusters in late spring; splendid for massing; does well on most all soils and in partly shaded places. 2 to 3 ft., 25c each.

Beauty Bush

Deutzia, Pride of Rochester

GRAPE MYRTLE (*Lagerstroemia*)—The

most gorgeous of all blooming shrubs for the Southwest. Blooms throughout the entire summer; withstands drouths wonderfully. Grape Myrtle is very effective for hedges, and is at its best when pruned every winter and not allowed to grow in tree form. We can furnish pink, red and white. 2 to 3 ft., 25c each; 3 to 4 ft., 40c each.

CYDONIA, Japonica (*Flowering Quince*)

—A popular dooryard shrub, growing from 3 to 6 feet high. The scarlet flowers appear before the leaves, giving a brilliant glow to the bush even from a distance, excellent in shrub groups or as a hedge. 2 to 3 ft., 25c each.

DEUTZIAS

2 to 3 ft., 25c each; 3 to 4 ft., 30c each.

DEUTZIA (*Crenata*)—A very hardy shrub

with luxuriant foliage and a profusion of double white flowers tinged with rose, produced in late June, on long racemes.

DEUTZIA (*Lemoinei*)—A spreading

grower, 3 to 6 feet, with showier and later white flowers than *Gracilis*. Endures partial shade.

DEUTZIA (*Pride of Rochester*) (*Deutzia*

***Scabra*)**—Upright, fast grower, 6 to 8 ft. Flowers in large panicles are pinkish white in late May.

DEUTZIA (*Gracilis*)—Called slender or

dwarf Deutzia. Dense, upright growth, 2 to 3 ft., with abundant white flowers in April or early May. Very hardy. Useful as edging for walks and for garden borders and in front of shrub masses. Endures partial shade. 1 to 2 ft., 25c each.

Golden Elder

DOGWOOD, SIBERIAN (Cornus Alba Sibirica)—Valued especially for coral red stems. Some of the older stems should be cut out each spring to encourage new growth that shows color best. It has white flowers in May and white berries in winter. It is fast growing, 6 to 8 ft., and is used for screen effects. Endures partial shade. Other varieties have grey, green and yellow bark or twigs. 2 to 3 ft., 25c.

DOGWOOD (Red Osier)—A spreading shrub; branches in winter are a dull purplish red color; leaves dark green above, whitened beneath; flowers creamy white in dense flat topped clusters, followed by white berries. 2 to 3 ft., 25c.

DOGWOOD (Golden Twig)—A form of the Red Osier having yellow branches and canes, effective when massed with the red stemmed kinds. Dogwood makes beautiful plantings along streams and water pools. 2 to 3 ft., 35c each.

ELDER (Sambucus)—Although the Elders are attractive in flower and fruit, they are chiefly grown for their beautiful leaves. They grow well in all soils, and must have vigorous pruning to keep them in shape.

Acutiloba (Cut Leaved Elder)—Great handsome cymes of delicate white, fragrant flowers in June and July, followed by large clusters of fruit. 2 to 3 ft., 25c; 3 to 4 ft., 40c.

Aurea (Golden Elder)—Contrasted with other shrubs, the golden yellow leaves of this European Elder give heightened effects in tone and color. Flowers white, in flat topped cymes. Grows naturally 10 to 15 feet, but can be pruned into a neat, compact little bush. 2 to 3 ft., 30c each.

EXOCHORDA GRANDIFLORA (Pearl Bush)

—It grows vigorously to a height of 6 to 10 feet; the early buds look like pearls strung on slender threads, May opening them up to long, gleaming sprays of pure white, is one of the showiest of shrubs. 2 to 3 ft., 30c; 3 to 4 ft., 40c.

FORSYTHIA (Golden Bell)—These splendid old shrubs growing 8 to 10 feet tall eventually light up the garden with glinting masses of yellow very early in spring before leaves appear. The upright forms make excellent tall hedges, and are bright hued fillers for massed shrub groups.

Intermedia—The earliest blooming.

Fortunei—The most upright in growth.

Suspensa—Slender, limply drooping branches, strung with bright rosettes of yellow blooms and shiny leaves. These are airily graceful, swaying loose from trellis top or garden wall; or mingle pleasantly with the trailing growth of Honeysuckle. 2 to 3 ft., 25c each.

FRINGE, Purple (Smoke Tree) (Rhus Cotinus)—A conspicuous spreading shrub or small tree with large clustery round leaves, overhung in midsummer by mist-like clouds of tiny flowers. These billowing panicles are a light lavender when fresh, very persistent and give the impression of smoke at a distance. 2 to 3 ft., 40c each; \$3.00 per 10.

HONEYSUCKLES

2 to 3 ft., 25c; 3 to 4 ft., 35c.

The upright Honeysuckles have bright pretty flowers followed by showy berries that last through the fall. Make very desirable bulky screening hedges, and the nucleus of tall shrub groups. First of the shrubs to clothe themselves in spring verdure.

WINTER HONEYSUCKLE—The white flowers of this variety often open before the snow has gone in spring, and are deliciously fragrant. The foliage is of a very attractive shade, and remains green until hard freezing weather.

MORROWI HONEYSUCKLE—This is one of the most vigorous of the white flowered kinds, becoming from 6 to 8 feet tall. The foliage is of dark restful green and held until late in the season. In early spring the bush is like a ball of snow, because of the profusion of blooms. During mid-summer the bright red berries contrast strikingly with the foliage and give the bush great attractiveness.

TARTARIAN HONEYSUCKLE—The most extensively used of the older varieties of Bush Honeysuckles. There are a number of varieties, some having flowers of distinctly reddish hue, some pink and some white. All bloom very freely and in mid-summer carry loads of brilliantly colored berries, usually of bright red. We can supply Tartarian Honeysuckle in pink, red or white flowers.

HAMAMELIS VERNALIS—Is one of the most desirable shrubs ever grown. This species of Witch Hazel (6 to 8 ft.) has broad dark green leaves and, in this section, blooms profusely in January and February. The blooms are small and delicate and are usually reddish orange with some showing yellow. Very fragrant, hardy and easily transplanted. 2 to 3 ft., 25c each.

HYDRANGEA

2 to 3 ft., 25c each.

The massiveness of bloom on these valuable shrubs and their long blooming season, assures them a place in every grouping where solid white effects are required.

ARBORESCENS GRANDIFLORA (Hills of Snow)—The flowers are, in a large way, similar to the familiar "Snowball" in appearance; conspicuously white and imposing. July to September. By cutting back to the crown each spring, the bushes may be kept round and dense at a normal height of three to five feet. They are excellent for solid low borders or in foundation plantings which will allow for about four feet.

PANICULATA GRANDIFLORA—Fine tall hedges, or if planted in rich soil and severely pruned every spring before the leaf buds open, will get to be very dense, dwarf clumps of compact form, wonderfully attractive when laden with their massive white plumes. Large beds kept at a uniform development, are extremely showy, first snowy white, then pink, then reddish-bronze and green. August till autumn. Planted rather well back in the intervals between other shrubs, the projecting flower wands arching from the ground are extremely conspicuous and effective.

FRENCH HYDRANGEAS — In gorgeous colors. These most beautiful hydrangeas that grow can be grown out doors in this section where it gets 20 degrees below zero by mulching them in the late fall for the winter with old straw, leaves or manure. Lay the tops down and cover with this mulching so they will be well protected

from the hard freezes. In the spring remove some of this mulching and straighten the tops up and they will bloom nicely for you. 2 year plants, 75c each.

BOUQUET ROSE (Rose and Pink)—Large trusses of well formed flowers, rosy amber, turning to bright pink.

MAURICE HAMAR (The famous Blue Hydrangea)—With us a beautiful plumbago blue, large flowers and profuse bloomer.

HYPERICUM (St. John's Wort)—An attractive useful class of hardy shrubs now becoming popularized for dwarf and medium location in shrub groups and foundation planting. Their dense, rounded construction of fine twigs and small, usually shiny leaves are well adapted to this purpose; the abundance of fully distributed bloom providing an otherwise difficult display of yellow. 25c each.

KERRIA JAPONICA Fl. Pl. (Double Japan Corchorus)—A very bright and cheerful dwarf to medium shrub, particularly adapted to sunny foundation plantings; its very numerous branches are graceful, slender, shiny, arching; its leaves serrated; stems and foliage alike a brilliant green. Its abundant double flowers like half open rose buds, rich yellow, 1½ to 2 ft. 50c each.

RHODOTYPOS KERRIODES — A very graceful shrub of medium height with small light green foliage and white flowers in the spring, followed by small bunches of glistening black berries carried throughout the summer and winter. 1½ to 2 ft., 30c; 2 to 3 ft., 40c each.

Hydrangea Arbor

Lilac, Persian

KOLKWITZIA

BEAUTY BUSH (K. amabilis)—A recently introduced shrub which bids fair to become one of the very best. Growth upright in the center, with outer branches arching. Bell-shaped flowers borne in pairs forming a cluster of 25 or so, pink with orange veins. Buds darker pink. Somewhat resembles the Weigelia. 2 to 3 ft., 50c each.

LESPEDEZA (Desmodium)

Half shrubs, the long canes of each season's growth usually winter killed. The stools become stronger, throwing up more shoots and forming a thick shrub 3 to 7 feet high, in showy, late summer bloom.

SIEBOLDI (Desmodium Pendiflorum)—Arched branches and long, close, drooping racemes of purple magenta flowers. 2 year plants, 25c each.

LILACS (Syringa)

PURPLE (Common)—It is the well known purple fragrant variety.

WHITE (Common)—Is also fragrant but flowers are white.

2 to 3 ft., 30c each.

PERSIAN LILAC—A graceful shrub with finely cut foliage; and delicate lavender blossoms, blooms not so large as the common purple, but it is a more graceful shrub. Also have Persian Lilac in white. 2 to 3 ft., 40c each.

MOCK ORANGE (Philadelphus)

MOCK ORANGE (Philadelphus avalanche)

—Grows to only about one-half the height of the old fashioned "Sweet Syringa." Its slender arching branches make it probably the most graceful of the species. Flowers frequently cover the entire length of the branches and are very sweet scented. Blooms in late spring. 2 to 3 ft., 25c each.

MOCK ORANGE (Philadelphus coronarius)—The old fashioned "sweet syringa" with fragrant white flowers. The long branches covered with a profusion of starry white flowers are exceedingly beautiful; blooms in early spring. Suitable for massing with other shrubs or planting as specimens. 2 to 3 ft., 25c each.

MOCK ORANGE (Virginalis)—One of the most beautiful, new, ever-blooming varieties. This new *Philadelphus* which is being used so much in hedge planting also makes a wonderful individual specimen plant for the lawns. A vigorous, tall-growing plant with very large, double crested flowers with round petals. Pure white, sweetly scented; clusters of five to seven. 1 to 2 feet, 35c; 2 to 3 feet, strong plants, 50c each.

GUARANTEE

On proper proof, we will replace free of charge, any trees, shrubs, etc., that prove untrue to label, or refund the amount paid. Because of the many factors over which we have no control, we cannot be responsible for the crop. Nor for any amount greater than the purchase price. All claims, except stock not true to name, must be made within thirty days after receipt of order.

Philadelphus Virginal

NANNY BERRY (*Viburnum lentago*)—A large shrub or small tree, flowers white in flat topped clusters. 2 to 5 inches broad; fruit oval, bluish black. 2 to 3 ft., 30c each.

Prunus Pissardi (Purple Leaved Plum)—A distinct and handsome little tree, covered with a mass of small, white, single flowers in spring; later with showy pinkish purple leaves that deepen in color to the end of the season. 3 to 4 ft., 50c each.

Triloba (Double Flowered Plum) — A charming shrub of vigorous growth, very early in spring, before its leaves appear, the whole tree is decked in a fleecy cloud of very double, light pink blossoms. Its effect on a still leafless landscape is very bright. 2 to 3 ft., 50c each; 3 to 4 ft., 75c each.

RHAMNUS Catharticus (Buckthorn) — A dense twiggy bush, 6 to 10 feet high, with dark foliage relieved by masses of attractive white flowers in June and July. Makes a good prunable hedge. 2 to 3 ft., 40c; 3 to 4 ft., 50c.

RHUS (Sumac) — Picturesque, gnarly, wind bent rows of Sumac blazing redly in autumn are familiar landmarks in every country side.

RHUS CANADENSIS — Aromatic shrub growing to 3 feet. A good cover plant for dry, rocky banks; conspicuous in early spring by its yellow flowers. Used extensively by the Federal Government in roadside beautification projects. Very hardy. Price 2 to 3 feet, 25c.

Glabra (Smooth Sumac)—Grows to a small tree with beautiful leaves which color brightly in autumn; flowers in July followed by crimson or brown fruits. 2 to 3 ft., 25c each; 3 to 4 ft., 30c each.

Typhina (Stag Horn Sumac) — Picturesque and rugged in all stages of development to its small tree maturity of about 30 feet. Its flowers are borne during June and July in dense terminal panicles, followed by impressive red fruits. 2 to 3 ft., 35c; 3 to 4 ft., 45c.

SNOWBALL (*Viburnum opulus sterile*)—An old time favorite. Rather tall growing; foliage large and coarse; showy flowers in large white "balls" in April. 1 to 2 ft., 30c each; 2 to 3 ft., 50c each.

SNOWBALL, JAPAN (*Viburnum tomentosum plicatum*)—A strong vigorous growing shrub with spreading branches and large dark green rough leaves. Flower clusters are white and globose. The fall coloring of the foliage is especially fine. 2 to 3 ft., 50c each; 3 to 4 ft., 75c each.

SPICE WOOD BUSH (Benzoin)—Flowers yellow and blossom in the spring before the foliage appears. The berries are scarlet in the late summer and early fall. The foliage is attractive and very aromatic; it thrives in moist places. 2 to 3 ft., 25c each.

Snowball

SPIREA

All the Spireas bloom with a riotous extravagance; style, color and habits of growth differing so markedly that a collection of varieties will insure blooms the entire season and still evade repetition.

TRICHOCARPA (Korean Spirea) — A handsome new introduction favoring Van Houttei in character but with interesting differences. The flowers are larger than Van Houttei with a distinct eye, in dome shaped clusters, these appear a short space following the older Bridal Wreath, and thus prolong the showiness of this type. Thrifty and hardy. 1½ to 2 ft., 35c each.

ARGUTA—A slender upright shrub. The first Spirea to bloom in the spring, its branches being covered with a snowy mass of blossoms before the leaves appear. 1 to 2 ft., 35c each.

ANTHONY WATERER—Dwarf, bushy, of spreading type with large corymbs, brilliantly colored rosy crimson. Very free flowering, at its best in late summer. This is one of the very good showy red flowered shrubs sufficiently dwarf to be used in foundation plantings or the low front of shrub groups. 15 to 18 inches, 35c each.

SPIREA, Billardi—Tall, erect shrub with canes terminated by feathery plumes. 5 to 6 inches long, of dainty pink color. 2 to 3 ft., 25c each.

Spirea Van Houttei

BUMALDA—A spreading, low bush with dark leaves brightened by corymbs of pretty light pink flowers in May, and at intervals all summer. 15 to 18 inches, 25c each.

DOUGLASI—Upright in growth to 7 feet with reddish brown branches and narrow, oblong leaves. Bears spikes of beautiful deep rose colored flowers in July. 2 to 3 ft., 25c each.

FROBELLI—Dwarf and similar to A. Waterer, but a trifle taller, with broader leaves. Bright crimson flowers in dense corymbs during July and August. 1½ to 2 ft., 25c each.

OPULIFOLIA—Growth upright, attaining 8 to 10 feet, although the heavy white flower umbels in June make the branches droop; old flower heads turn to dark red, making a striking variety of colors. 2 to 3 ft., 25c each.

OPULIFOLIA AUREA (Golden Spirea)—Of similar habit to above, with young foliage of bright yellow changing to golden bronze in the fall. 2 to 3 ft., 35c each.

PRUNIFOLIA FL. PL. (Bridal Wreath)—Plum leaved foliage turning in autumn to very brilliant red. Earliest; with small double white clustered flowers. 2 to 3 ft., 30c each.

Thunbergi—Forms a dense, fluffy bush, 3 to 5 feet high, the feathery foliage which is a peculiar but pleasing shade of yellowish green, changing in autumn to bright red and orange. 2 to 3 ft., 25c each.

Van Houttei—Grandest of Spireas. One of the best of shrubs; complete foundation of pure white bloom in May and June. The foliage and bush shape is ornamental the year around.

18 to 24 in., (2 year) 20c each.

2 to 3 ft., 25c each; 3 to 5 ft., 40c each.

SYMPHORICARPUS—3 to 5 ft. Highly valued for use in densely shaded situations, and for the striking beauty of their bright persistent fruits.

Snowberry (S. Racemosus)—Inconspicuous rose colored flowers in June and July; followed by large clustered, milk white fruits which remain far into winter. The combination of pink flowers and white berries on the same twig is charming. Foliage is rounded clean and fresh looking, a glaucous green. 2 to 3 ft., 30c each; 3 to 4 ft., 40c each.

Indian Currant (S. Vulgaris)—Similar to the Snowberry except that its fruits are dull red, and that the smaller berries cluster in thick ropes along the weighted down stems. The foliage is small, close-set and dark which with the uniform spread of its branches compares favorably with the Privets in mass effects. Mail size, 10c each; 2 to 3 ft., 20c each; 3 to 4 ft., 30c each.

TAMARIX

TAMARIX—Tall growing shrubs, 8 to 12 feet high, with fine feathery foliage like that of the Juniper; small, usually pink flowers from April on. Splendid for sea-side planting, or equally good in dry sand. 2 to 3 ft., 40c.

Odessana (Caspian Tamarix)—2 to 6 feet. Exquisitely feathered foliage of silvery green, blooming in July and August with large loose panicles of lavender-pink flowers. Dwarfier growing, more bushy and spreading than the others. 2 to 3 ft., 40c; 3 to 4 ft., 50c.

Dear Sirs:—Our order of trees and shrubs arrived O. K., and we have it all out in the orchard. We are well pleased and expect to show them to our neighbors and try to get them to order from you. When I get ready for more goods, we will sure remember your favors. Thanking you for your promptness, beg to remain,

Yours respectfully, F. B. Mallory, Missouri.

WEIGELIAS

Coarse, thrifty shrubs for medium and back rows up to 8 feet, their delightful blooming period ranging from May into July. The flowers are stemless bells strung along the arching canes in clustered profusion.

Candida—4 to 6 feet, a choice variety blooming in profusion, during June and to some extent all summer. Pure white, 2 to 3 ft., 30c each; 3 to 4 ft., 40c each.

Eva Rathke—The most distinct and one of the most attractive varieties; flowers deep carmine red. 2 to 3 ft., 60c each.

Hendersoni—One of the strongest growing varieties with large flowers of deep rose. 2 to 3 ft., 30c each.

Rosea—Most popular of all; tall growing, vigorous, with deep pink flowers in the greatest profusion during June, and more sparsely at intervals thereafter. 2 to 3 ft., 30c each.

Rosea Nana Variegata—Leaves broadly margined creamy white; flowers pink. Dwarf; one of the most useful and choice variegated leaved shrubs. 1½ to 2 ft., 40c each.

WINTER BERRY (*Ilex decidua*)—In the late fall and early winter this shrub is very showy when the naked branches are heavily burdened with bright red berries, grows on great variety of soils and partially shaded places. 2 to 3 ft., 45c each.

WITCH HAZEL (*Hamamelis*)—This beautiful shrub will grow under favorable conditions 10 to 12 feet high; ribbon like, yellow flowers in the late autumn; large attractive foliage, good for natural planting and shady places. 2 to 3 ft., 40c each.

PRIVET HEDGE PLANTS

AMUR RIVER PRIVET (North)—A very hardy northern type, vigorously upright and tall growing. The leaves are dark green and somewhat lustrous; tardily deciduous, makes a strong, bold hedge and quite conspicuous bloom in erect white panicles.

	Each	10	100
1 to 2 ft.	\$.10	\$.60	\$ 5.00
2 to 3 ft.	.12	1.00	7.00
3 to 4 ft.	.15	1.25	10.00

AMUR PRIVET (South) (*L. Amurense*)—Fine leaf type. Fine large shrub for specimen or screen planting, the horizontal, feathery, fernlike method of branching being exceedingly beautiful. Foliage is light green, small leaves, practically evergreen in this country. Groups of 3 to 5 in backgrounds give very pleasing effect. Economical, quick growing, attaining a height of 20 feet in remarkably short time.

For sheared hedges, Amur River is by far the best and most practical for the South. We can suggest and supply many other varieties for special kinds of hedges such as informal and flowering. Plants should be placed in loose, very rich soil at

intervals of 10 to 12 inches. To give more density to the hedge, plant in two rows 15 inches apart, zigzagging from one row to the other. Cut plants back to within 8 or 10 inches of the ground, so they will branch out thick at the bottom; shear hedge often.

	Each	10	100
1 to 2 ft.	\$.06	\$.55	\$ 5.00
2 to 3 ft.	.10	.90	7.00
3 to 4 ft.	.15	1.25	10.00

PRIVET, California (*Ligustrum ovalifolium*)—Of upright growth, rapid. Foliage of lighter green than the Amur. Most popular for hedging purposes, as well as single specimen plants. Holds its foliage through to spring in mild winters, but a severe freeze will cause its leaves to drop.

	Each	10	100
1 to 2 ft.	\$.05	\$.45	\$ 4.00
2 to 3 ft.	.07	.60	5.00
3 to 4 ft.	.10	.90	6.00

PRIVET, Ibolium—With leaves larger than in California, perfectly hardy.

	Each	100
18 to 24 inches	\$.10	\$ 8.00
2 to 3 ft.	.12	10.00
3 to 4 ft.	.15	12.00

ORNAMENTAL VINES

AMELOPSIS Veitchi (Boston Ivy)—This is one of the finest hardy climbers we have for covering walls, as it clings firmly to the smoothest surface, covering closely with overlapping foliage, giving appearance of shingles. The color is a fresh deep green in summer, changing to the brightest shades of crimson and yellow in autumn. 2 year, 40c each.

Quinquefolia (American Ivy)—Virginia Creeper, etc. Deeply cut leaves which turn to a beautiful crimson in fall; fine for covering trees, rocky slopes, walls, etc. 2 year, 40c each.

Englemanni—Similar to above, but with smaller, denser foliage. 2 year, 50c each.

ARISTOLOCHA Sipho (Dutchman's Pipe)—Although the brownish pipe-shaped flowers are interesting, the immense heart-shaped leaves are the important feature, furnishing as they do the most complete screening leafage of any cultivated trellis vine. Of thrifty growth, uniform, shingle like arrangement and dependable hardiness, they serve conspicuously for shade or ornament, in either sun or shade. 50c each.

BIGNONIA Radicans (Trumpet Flower)—A robust woody vine, twining tightly with numerous roots along stems. Its orange scarlet, trumpet shaped flowers cluster at tip of branches. Leaves light green. Will climb to great heights on trunks of trees, and for every purpose is one of the best vines. 2 year, 40c each.

CELASTRUS Scandens (Bitter Sweet)—Handsome, glossy foliage and large clusters of beautiful, orange crimson fruits retained all winter. Its graceful sprays of berries make charming winter house decorations. 2 year, 35c each.

CLEMATIS—Grand for pillars and trellises, pegged down for bedding and for running over rock work, old trees, and stumps. They delight in rich soil and sun.

Large Flowered Varieties

Henryi—Creamy white.

Jackmani—Velvety violet-purple.

Mad. E. Andre—A distinct crimson red.

Ramona—Deep sky blue.
2 year, 75c each.

Small Flowered Varieties

Paniculata (Sweet Scented Japan Clematis)—The flowers are of medium size, fragrant, pure white, borne in immense sheets in September. 2 year, 25c each.

EUONYMUS Radicans—One of the finest evergreen vines, with small, rich green foliage and pink fruits. For covering rocky banks, rough walls, tree trunks, etc., also for vases, baskets and border of beds. 18 to 24 inches, 25c each.

KUDZU VINE—Large foliage and dense shade, growing 50 feet in one season. Flowers plentiful in August, rosy purple; pea-shaped; in small racemes. A truly remarkable, handsome, and serviceable porch vine wherever it is hardy enough to withstand the cold winters. Not reliably safe north of the Ohio River. 1 year, 25c each.

LONICERA (Honeysuckle)—Their vining qualities are excellent, but the delightful fragrance of their flowers makes their strongest bid for favor.

Aurea Reticulata (Golden Leaved Honeysuckle)—Flowers yellow and fragrant. 50c.

Halleana (Hall's Japan Honeysuckle)—Color, an intermingling of white and yellow; extremely fragrant and most satisfactory. Gets along fairly well in partial shade and is used extensively as a ground cover. 25c each.

Sempervirens (Scarlet Trumpet Hskl.)—Trumpet shaped flowers of bright scarlet. 50c each.

LYCIUM CHINESE (Chinese Matrimony Vine)—A general utility hardy climbing vine that will overcome any obstacle to growth and flourish everywhere. Every new shoot produces handsome purple flowers and later a prodigious crop of scarlet berries nearly an inch long. Is a practical carpet vine and highly efficient as a bank retainer on reasonable slopes; each joint that presses into the soil, taking firm hold and establishing a colony of deep and spreading roots. 40c each.

WISTERIA—One of the handsomest subjects for use on pergolas, porches and trellises; with attractive foliage and magnificent dense cropping clusters of pea shaped flowers crowning the top.

Sinensis—Blue. Panicles about 12 inches long. 40c each.

Alba—White. 40c each.

Magnifica—Lavender purple. 50c each.

Honeysuckle, Hall's Japan

EVERGREENS

Balled and Burlapped—(F. O. B. Rogers, Arkansas)

Pyramidal Arborvitae

Due largely to their regular and very pleasing outlines and the fact that they retain their foliage and color all the year, evergreens have become exceedingly popular for private and public planting. Their varied shades of blue, silver, golden and green permits a most attractive combination of colors. Planted about the foundation of a home they hide the sharp outlines of dwellings and form a very pleasant and striking background for shrubs and perennials, and in winter give an appearance of coziness and warmth not attained by any other class of trees.

Balled and Burlapped means that these Evergreens are taken up with a ball of dirt around the roots and then burlap is pinned or sewed around them. By doing this assures you of receiving them in first class condition. These are not prepaid.

ARBORVITAE

AMERICAN ARBORVITAE — A splendid native that grows well anywhere and thrives over a wide range of climate. The habit is erect, and pyramidal, the foliage soft and light green in color. This Arborvitae should be included in groups and all evergreen plantings. They are unequalled as tall hedges to form screens from unsightly objects or for shelter belts or as a blind about clothes yard, etc. They grow quickly and if planted closely in hedges give

the desired effects promptly. They may be kept at any height and made more dense and bushy by trimming, which they endure readily. 1 to 2 ft., 75c; 2 to 3 ft., \$1.25; 3 to 4 ft., \$2.00; 4 to 5 ft., \$3.00.

AMERICAN PYRAMIDAL ARBORVITAE—

This exceedingly beautiful Arborvitae is the most compact and erect of the entire species, being in form almost a counterpart of the Irish Juniper. Foliage a deep green, retaining color remarkably well through the entire season and perfectly hardy. 1 to 2 ft., \$1.00; 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00.

GLOBE ARBORVITAE—A new variety that is very handsome. In shape it is absolutely round or globular, very dense in growth, and does not require shearing. It does not grow over 4 to 5 feet tall; foliage is deep, dark green, its little branches being of unusual delicacy. Be sure to order one or more of these beautiful and attractive species and we will guarantee that it will please you. This is one of the most rare of the dwarf evergreens. Our trees are well rooted, transplanted and root pruned. 18 to 24 inches, \$1.50; 24 to 30 inches, \$2.00.

BERCKMAN'S GOLDEN ARBORVITAE (Tr.

Orientalis Aurea Nana)—A perfect gem for gardens, cemetery lots, formal plantings, window boxes and tubs. It is of dwarf, compact and symmetrical growth, with golden yellow foliage. 18 to 24 inches, \$2.00; 24 to 30 inches, \$3.00; 30 to 36 inches, \$4.00; 3 to 4 ft., \$5.00.

CHINESE COMPACT ARBORVITAE

(*Baker's Golden*)—A low, formal, and very compact variety with bright green foliage, attractive and a great favorite. 3 to 4 ft., \$2.00; 4 to 5 ft., \$3.00; 5 to 6 ft., \$4.00.

CHINESE PYRAMIDAL ARBORVITAE (T.

Orientalis Pyramidalis)—One of the tallest and hardiest varieties; of pyramidal habit and bright green foliage; 3 to 4 ft., \$2.00; 4 to 5 ft., \$2.50; 5 to 6 ft., \$3.00.

Globe Arborvitae

Silver Juniper

CEDARS

CEDRUS DEODARA (Himalayan Cedar)—

A broad growing pyramidal tree to 30 feet in height; of rapid growth with wide spreading drooping branches. The foliage is beautiful bluish-green. 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00.

CYPRESS

CYPRESS, Arizona (*Cupressus Arizona*)—

Brilliant silvery-blue foliage; growth rather compact, with branches somewhat stout; red bark. 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00; 5 to 6 ft., \$5.00.

FIR

DOUGLAS FIR—Large, conical form, branches spreading, horizontal. Leaves light green above, glaucous below. 2 to 3 ft., \$3.00; 3 to 4 ft., \$4.00; 4 to 5 ft., \$5.00.

THE JUNIPERS

SILVER JUNIPER—Compact, conical form becoming 20 feet tall at maturity, and one third as broad. Foliage of attractive, glaucous blue. 3 to 4 ft., \$4.00; 4 to 5 ft., \$5.00.

JUNIPERUS VIRGINIANA — Green or bronze green foliage; a tall growing, hardy tree of great beauty. At home almost anywhere in the South and now being largely used in landscape planting; the tree from which the pencil wood is obtained. 3 to 4 ft., \$2.00; 4 to 5 ft., \$3.00.

JUNIPER, Hill Dundee—This outstanding juniper is upright growing, is bluish-gray in the spring and summer and changes to a plumlike color in the fall and winter. To create new interest in your evergreen planting you should include this most excellent new juniper. Price: 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.50.

JUNIPER, Blue (*Juniperus Virginiana glauca*)—This is one of the best trees offered today. It grows pyramidal but has

graceful spreading branches if left untrimmed. When sheared, a perfect column may be had. In color a light blue and a distinct contrast from any other of this group. 2 to 3 ft., \$3.00; 3 to 4 ft., \$4.00.

JUNIPER, Pfitzer's (*Chinese pfitzeriana*)—

This is the most popular of all the spreading types. Its habit of growth, its pendulous branches and attractive foliage is strikingly beautiful. The branches are horizontally spreading and the terminals slightly drooping. It lays close to the ground and for edging larger plantings there is nothing superior. Flowering lines are especially valuable in landscape planting and this Juniper seems to fill this requirement better than any other. The foliage is a grey green both summer and winter and because of its ability to withstand the soot and dust of cities will thrive where others fail. 2 to 3 ft., spread, \$2.50; 3 to 4 ft., spread, \$3.50.

JUNIPER, Irish—Erect, slender, and formal in habit; column or pyramidal form, foliage sage green, very compact; perfectly hardy and a real beauty in combination with other forms and colors of evergreens. Price: 1 to 2 ft., \$1.50; 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.50.

JUNIPER, Savin—Handsome, moss green foliage; main branches protruding from the crown at a 45 degree angle; a fine dwarf ground cover, or filler, in evergreen groups, very hardy and suited to most all soils. Price: 1 to 2 ft., \$1.50; 2 to 3 ft., \$2.50.

JUNIPER, Andora—One of the finest spreading Junipers of recent introduction. Grows closer to the ground than the Pfitzer. During summer it has a silver reflex to the otherwise green foliage, in winter it turns a purplish cast, which is unusual in evergreens. 24 to 30 inches, \$2.00 each.

Pfitzer's Juniper

Scotch Pine

THE PINES

PINE, Mugho, *Pinus montana mugho*—

This is an excellent dwarf pine, being globe shaped and erect branching. It is very attractive, especially in spring, when the new growth which seems like miniature candles completely covers the bush. 12 to 18 inches wide, \$2.00; 18 to 24 inches wide, \$2.50.

AUSTRIAN PINE—From Central Europe.

Leaves or needles stiff and dark green, hardy everywhere and one of the most valuable conifers for specimen trees or windbreaks, etc. 2 to 3 ft., \$1.50; 3 to 4 ft., \$2.00.

NORWAY PINE (Red Pine)—A two-leaved

pine, native to Newfoundland; one of the most ornamental; extremely hardy and adaptable; suitable for clay soil; handsome foliage; excellent for bold effects. Price: 2 to 3 ft., \$1.50; 3 to 4 ft., \$2.00.

SCOTCH PINE—A rapid grower, very

hardy from central portion of Europe, with short, rigid, light green leaves, very valuable for masses, specimens and screens. 2 to 3 ft., \$1.50; 3 to 4 ft., \$2.00.

WHITE PINE—An old and well known

native tree, of rapid growth and entirely hardy. On account of government quarantine this variety can not be shipped west of Arkansas. 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00.

SPRUCE

COLORADO BLUE—The queen of the spruce family; the color is a beautiful blue, which holds well all through the year; this is one of the most valuable of ornamental evergreens. 1 to 2 ft., \$3.00; 2 to 3 ft., \$5.00; 3 to 4 ft., \$7.00.

BLACKHILL SPRUCE—A compact, shapely tree of a dark green color. It will endure cold and dry weather and consequently thrives under most trying conditions. It transplants very easily and because of its dense, sturdy growth, it makes beautiful foundation planting, 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00.

NORWAY SPRUCE—Becomes a tall tree of majestic, conical shape. One of the most rapid growing and shapely of the tall dark green spruces. 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.50; 4 to 5 ft., \$4.50.

WHITE SPRUCE—One of the very best conifers, especially for cold climates. Compact, upright growing, long lived, retaining its branches to the ground, aromatic, drought-resisting; varies in color from light green to glaucous blue. Price: 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00.

Juniperus Virginiana Glauca

BROAD LEAVED EVERGREENS

ABELIA (*Abelia rupestris grandiflora*)—A beautiful low growing evergreen flowering shrub; leaves a glossy dark green contrasting effectively with the red tinged bark. The numerous small white tinged pink flowers resemble miniature Arbutus, having comparatively deep, slender throats though the individual flower is only about three-quarters of an inch in length. Blooms from June until frost; delicately sweet scented. Occasionally a "wild" vigorous growing shoot appears which should be pinched off when a dense shrub is desired. 2 to 3 ft., \$1.00; \$10.00 per dozen.

AZALEA AMOENA—A bushy, dwarf grower with small green leaves that deepen to a lustrous coppery hue in winter. In April or May the whole plant is covered with a mass of brilliant, claret-colored flowers that retain their beauty for several weeks. Very ornamental and desirable for edging of drives and walks or for bordering beds of *Kalmia*, *Ilex*, etc. 10 to 12 inches, \$2.50; 12 to 15 inches, \$3.00.

BOXWOOD, *Buxus sempervirens*—Every one is familiar with Boxwood and its good qualities. There is hardly a plant that can be used in quite so many positions. For edging as specimens for urns, window boxes, it is very useful. The foliage is always a shining dark green even through the winter. It is a heavy feeder and should never be planted in soil unless it can get plenty of fertility and moisture. 12 to 18 inches, \$1.00; 18 to 24 inches \$2.00; 2 to 3 ft., \$3.00.

CAPE JASMINE (*Gardenia jasminoides*)—Medium height; foliage thick, dark green in color; large, white wax-like flowers, with extremely sweet odor; blooms in early spring and occasionally again late in fall. 2 to 3 ft., \$1.50 each, \$15.00 per dozen; 18 to 24 inches, \$1.00 each, \$10.00 per dozen.

EVERGREEN EUONYMUS (*Euonymus Japonicus*)—One of the best broad leaf evergreens for the Southwest. Luxuriant of growth and naturally symmetrical in shape, is as well adapted for a hedge as for a specimen plant or a background for a shrub group; may be kept in almost any desired shape by pruning; leaves occasion-

ally followed by bright red berries. 2 to 3 ft., \$1.00; \$10.00 per dozen.

HOLLY AMERICAN, *Ilex opaca*—Every one certainly knows the native holly with its large, glossy leaves and red berries. Nursery grown plants are comparatively easy to transplant provided the leaves are clipped off at planting time. This native is not half appreciated as it can be sheared into as compact specimens as Boxwood or if left to develop naturally makes a bush or small tree that is wonderful at all seasons of the year. 2 to 3 ft., \$3.00; 3 to 4 ft., \$4.00.

MAGNOLIA GRANDIFLORA—The grandest of evergreens and flowering trees. Has large, glossy bright green leaves. Succeeds throughout Texas and Oklahoma, as well as in other Southern states. By clipping off all but a few of the tip leaves when taken up, and treated as in our handling, they are readily transplanted. 12 to 18 in., 75c; 18 to 24 in., \$1.00; 24 to 30 in., \$1.50; 30 to 36 in., \$2.50.

MAHONIA (*Berberis aquifolia*) (**Oregon Grape**)—Dense, low spreading shrub, beautiful holly like foliage, glossy green, bluish-purple and bronze, moderate growth, 3 to 5 feet, exceedingly hardy; blossoms yellow racemes. March to May, followed by blue grape like berries. Fine for low shrub-beries, mass planting, individual specimens or groups equally good in shade or sun. 10 to 12 in., 50c; 12 to 18 in., bushy, 75c; 18 to 24 in., \$1.50.

RHODODENDRON, *Maximum*—Foliage very large and smooth; flowers are white with rosy blush. This shrub grows naturally in certain parts of Pennsylvania, Virginia and North Carolina. Very attractive for natural effects along walks and drives. Price: 2 to 3 ft., \$3.00 each.

NANDINA—Upright in habit of growth, medium height, narrow pointed foliage which is a rich red when young, turning to dark green when fully matured, and which takes on bright colors during the fall. Flowers are white followed by red berries in the fall, which remain on well into the winter. Thrives in rich soil with good drainage. 18 to 24 in., \$1.25 each.

Your Stock Is Good—Your Price Is Good

Dear Sir:—In the year 1932 I bought some Raspberry plants and Grape vines from you. They were fine. Do not know the amount of fruit gathered but I can say they were fine and just the exact kind I ordered and the best of all while your stock is good the price is good in the reach of the people.

Thanking you, I am, Albert Garrett, Tennessee.

NATIVE EVERGREENS

JUNIPERUS VIRGINIANA—Our native of the Ozarks is one of the most beautiful of all the Cedar types. It adapts itself to most all soils and climates. It is a very fast grower. It is one of the most useful and characteristic trees of our American landscape, because of its beautiful form and dark green bluish foliage. In season the trees bear bright blue and silvery berries, containing the seeds, which require, under natural conditions, two years to germinate. The berries are a great attraction for the birds. The Red Cedar can be trimmed into any shape or size which makes it desirable for hedges as well as for specimen trees and for windbreaks. Plenty of Red Cedar

about your home planting will always give entire satisfaction.

PINES—Our native. We desire to advise the planting of a pine wherever a strong, hardy evergreen is wanted. In groups or for avenues in particular situations it is one of the most available trees at our command. Taking into account its rapidity of growth, and the certainty with which it will speedily produce an effect, its beautiful light green foliage, its excellence for windbreaks, and landmarks, we consider it one of the best of the Pines.

2 to 3 ft., 40c each; \$30.00 per 100.

3 to 4 ft., 50c each; 40.00 per 100.

4 to 5 ft., 75c each; 60.00 per 100.

ROSES

Beyond question the rose is the most beautiful and satisfactory of all flowers. In the South we are particularly fortunate in being able to grow outside many varieties not hardy enough to withstand the rigid northern winters.

We believe that we know Roses, know those varieties best adapted to southern culture and conditions. We grow annually great quantities of Roses, numbers of which are not suitable to southern culture, but the list we offer in this catalog we offer with the assurance that each and every one of them is the best of its class and color.

Your Rose garden should be located where the plants will have plenty of sunlight and where the roses will not be affected by large trees or shrubs, either shading them or drawing nourishment from the soil. Clay or sandy soil is best and there should be plenty of well rotted manure worked into the soil before planting. The plants should be cultivated frequently and kept absolutely free from weeds and grass. All old and decayed branches should be cut off as the flowers are borne only on the new growth. Protect in winter by covering with at least six inches of leaves or coarse manure, which may be removed or worked into the soil in the spring.

Hardy Hybrid Tea Roses—Fragrant and everblooming. 1 year old, field grown, 25c each; \$2.50 per dozen. 2 year old, field grown, 40c each; \$4.00 per dozen.

AMERICAN BEAUTY — Large, globular, crimson buds. A very popular variety which always wins admiration with its beauty and perfume.

BETTY UPRICHARD — Copper-red buds, opening to semi-double, large blooms of delicate salmon-pink, with reverse carmine having coppery sheen. One of the best bloomers.

BRIARCLIFF—Very much like Columbia but a deeper rose-pink. Good growth and free flowering.

COLUMBIA—Beautiful peach-pink, deepening as it opens. Superior shaped buds on very long and nearly thornless stems of good length. Very hardy.

CRUSADER—Rich, crimson buds of moderate size and excellent shape.

DAME EDITH HELEN—A beautiful shade of clear pink, freely produced on long stems. Pointed blossoms. Grows well.

American Beauty Roses

Claudius Pernet

ETOILE DE HOLLANDE—Very large, well built, brilliant red blooms, fragrant. One of the best new garden roses.

FRANCIS SCOTT KEY—One of the largest reds. Color is a beautiful crimson-red shading to cerise, and has a profusion of petals opening to a higher center. Thrifty grower. Very hardy. Beautiful foliage.

FRAU KARL DRUSCHKI—The "White American Beauty." Large flowers of waxy paper white in June, yielding their final outburst with the first snow of fall.

GRUSS AN TEPLITZ—Brilliant deep red with velvety-crimson sheen. Its hardiness, beautiful foliage and great blooming qualities make this one of the finest roses for massing.

HADLEY—A rich crimson-red flower with velvety texture. Moderate in bloom and growth. Highly recommended for cut flowers.

J. L. MOCK—Rosy pink, almost silver-white, reverse of petals deep carmine-pink. Blooms of magnificent size on long erect canes.

KAISERIN AUGUSTA VIKTORIA—Queen of white roses. Pure pearly white with splendid large buds and superb, full double blooms. A profuse and continuous bloomer.

KILLARNEY, Pink—One of the finest pink roses ever introduced. Especially beautiful in coloring.

LADY HILLINGDON—Deep apricot-yellow to orange. Long, slender pointed buds. A very free flowering variety and strikingly decorative. Thrifty, sturdy growth.

LOS ANGELES—Flowers of pale salmon-pink richly shaded with deep rose and gold.

LUXEMBOURG—Flowers deep orange, with long pointed buds on graceful stems. Beautiful foliage. Strong, thrifty grower.

MARGARET MCGREDY—Orange-vermilion blooms with light green healthy foliage. One of the best for home gardens.

MISS ROWENA THOM—Blooms of brilliant satiny pink, with orange-flame center.

MME. EDOUARD HERRIOTT—Semi-double blossoms of bronze and copper. The original of all the bright orange-pink varieties.

MRS. AARON WARD—Fine, fawn-colored buds and open blooms. An excellent buttonhole variety.

MRS. CHAS. BELL (Shell Pink Radiance)—A sport of Radiance and like it except in color; a very, very even shade of soft, clear shell-pink.

MRS. E. P. THOM—The fine, long buds open into perfectly shaped flowers of rich, lemon-yellow.

PADRE—Flowers of copper-scarlet with bright yellow at base of petals. Erect growing with light yellow foliage. One of the best new roses.

PAUL NEYRON—One of the largest and hardest roses ever grown. Excellent bloomer. Has long, smooth, thornless stems. A bright, ruddy pink.

PRES. H. HOOVER—A glorious new multi-colored rose, unfolding its broad, thick petals unhurriedly from the beautiful pointed bud. Vivid, cerise-pink, softly flamed with yellow, orange, and scarlet; this combination most emphatic on the reverse. The perfume is exquisite; the foliage ornamental.

RADIANCE, PINK—One of the most magnificent garden varieties with large pointed buds which are rosy-carmine on the outside of petals and light, silvery-pink on inside. Very beautiful. Very vigorous.

RADIANCE, RED—Beautiful red sport of Pink Radiance and like it except in color. Stands second among the best twelve roses of its class in America.

REV. E. PAGE ROBERTS—Double golden-yellow; blossoms stained with copper and reddish-buff on outside. Free bloomer. One of the most popular of all roses.

SENSATION—Long, pointed blooms of scarlet-crimson. Plant strong and very active.

SUNBURST—Flowers of golden-orange and deep yellow, varying at different stages of development.

TALISMAN—A gorgeous assemblage of colors, exhibiting mostly gold, apricot-yellow, blood-orange, deep pink and old-rose. The bud is long and shapely, developing into medium-size, compactly double-flowers. Free bloomer; glossy foliage.

WILLOWMERE—Coral-red buds open into rich, shrimp-pink flowers, shaded yellow in the center and toning as they develop into other hues, always attractive. Very hardy; free bloomer.

NEW ROSES

2-year old field grown, 60c each, \$6.00 per dozen.

AUTUMN—Burnt orange buds, opening to medium size; very double flowers of bright yellow, streaked with red. Strongly upright growth and free-flowering habit.

DAVID O. DODD—The long looked for Crimson Bush Rose. The new rose that is causing a sensation everywhere. It produces in marvelous profusion, flowers 5 to 7 inches across with as many as 50 or 60 petals, on a strong bush, growing to the

height of 3 to 4 feet. The magnificent, deep, dark crimson flowers, flushed deep scarlet, are borne on long, stiff stems. Hardy in all sections of the country. A gorgeous new rose with the most fragrant perfume.

GOLDEN DAWN—Large pointed buds of bright yellow, tinged with red. Flower large, well shaped, deliciously fragrant. Fine foliage.

JULIAN POTIN—A clear yellow rose of vigorous, erect habit, with very shapely flowers of good yellow.

LADY MARGARET STEWART—Immense copper buds opening to bright golden flowers of wonderful form and color.

SOUV. de CLAUDIUS PERNET—The sensation of the day in yellow roses. Large, sunflower-yellow blooms, perfectly formed; very fragrant. Dark, glossy foliage. Vigorous growth.

EVERBLOOMING CLIMBERS

2-year old field grown, 40c each; \$4.00 per dozen.

CL. AMERICAN BEAUTY—Brilliant carmine flowers of especially fine form and rich perfume, borne in clusters on a moderately strong, fairly healthy plant. Perfectly shaped flowers.

CL. COLUMBIA—Pointed vivid pink blooms. A sport from Columbia bush rose, comparatively thornless and blooms throughout the season.

CL. KAISERIN AUGUSTA VIKTORIA—The best white climbing rose. Pure white, shading at base of petals to a light cream; very fragrant.

CL. RED RADIANCE—A sport of the bush Red Radiance and like it except that it is a vigorous climber.

CL. TALISMAN—Same shades, same qualities as Talisman bush rose, except its climbing habit.

DR. VAN FLEET—Pale pink buds and flowers equal in form and size to the finest

POLYANTHA ROSES

Polyanthas are bushy little everblooming Roses, scarcely ever out of flower during the whole season. They are seldom more than 18 inches high, even hardier than Hybrid Teas, and bear small flowers in enormous, many-flowered clusters. **Prices: 2-year-old field grown, 40c each; \$4.00 per dozen.**

The Best RED—Medium to small, bright flowers borne in large clusters. Continuous blooming and hardy.

The Best PINK—Shining, bright pink blooms of fairly large size. The strong bushy plants, 2 ft. high, are almost always in bloom.

The Best WHITE—Round, egg-shaped buds and fairly large, round flowers of pure white. Very dwarf and blooms in compact clusters.

hybrid teas. Borne on long individual stems. Undoubtedly the best of the climbers. Supreme in vigor.

JACOTTE—Large, semi-double flowers of orange-yellow, tinted copper red. Borne in clusters. Strong, profusely blooming plants. Holly-like foliage.

MARY WALLACE—Large, very bright, pink flowers illumined with shining gold double, cup-shaped, moderately fragrant. Plant of splendid vigor, 10 to 15 feet high and has superb foliage.

PAUL'S SCARLET—Intense scarlet flowers of excellent shape and moderate size, borne in small trusses. Plant of moderate growth, foliage good, blooms very liberally at its season.

SILVER MOON—Silver-white blossoms with golden stamens. Nearly single, saucer shaped, gigantic flowers. Produced in small sprays. Plant of extraordinary vigor, growing 15 to 20 feet in a season. Foliage perfect.

LILY POOL OR WATER GARDEN

Informal Pool

Nowhere in the United States can we grow to better advantage the ever-blooming water lilies, and the moisture—true loving water margin plants, our long summers with plenty of bright sunshine, affords a wealth and brilliance of bloom unapproached in the cloudier sections.

A concrete pool with overflow and drain can be constructed at little expense. With proper plantings of aquatic mosses and lilies and with gold fish to keep down mosquitoes, the water will remain clear and pure. It is only necessary to replace the water loss from evaporation and to clean once or twice a year.

HARDY WATER LILIES—AQUATIC PLANTS

Hardy Lily—Paul Harriot (Yellow)

ROSE AREY—Stary cerise pink, intensely fragrant flowers of exceptional size, profuse bloomer. One of the most popular lilies. \$1.50.

PINK OPAL—Graceful, cup shaped flowers of deepest pink and quite fragrant. Good bloomer and one of the best of the pinks. \$1.00.

ROSEA—Lovely light pearl pink. Good bloomer and a very desirable lily. 50c.

CHROMATELLA—Bright, sulphur yellow with broad curving petals. Blooms in great profusion through the entire season. The leaves are handsomely splotted with maroon. Extremely hardy, very vigorous and the most satisfactory of the yellow lillies. 50c.

PAUL HARRIOT—On the opening day, the petals are clear yellow suffused with rose, becoming orange pink on the second day and deepening to red on the successive days. We consider it one of the best all around varieties, blooming profusely and being a sturdy, hardy plant. \$1.00

GLADSTONE—Large, dazzling, white flowers with broad, waxy petals and sulphur yellow heart. Its pure, snowy white makes it a perfect contrast with the colored varieties. Free blooming variety, opening early in the morning as well as early in the season. Very hardy and prolific. \$1.00.

ALBIDA—Waxy, white flowers with yellow centers. Profuse bloomer and very hardy. 50c.

WATER HYACINTHS

The plants float in water but like the roots in a cool place, particularly among the lily pads where they do not drift about. Delicate spikes of lavender flowers. 10c each.

JAPANESE ARROWHEAD—Spikes of butterfly like blossoms and arrow shaped leaves. Thrives well in shallow water, very thrifty. 5c each.

WATER POPPY—Each plant throws out many floating runners bearing large blossoms all summer. Yellow flowers very similar to the California Poppy. 10c each.

WATER IRIS—These plants are among the most beautiful of the garden flowers, extremely easy to grow, thriving in shallow water. Pale blue blossoms in abundance. 10c each.

SIBERIAN IRIS—Excellent margin plant, rich, violet-blue. 10c each.

AMERICAN LOTUS—This beautiful Lotus has large, umbrella like leaves, borne on tall stems. The flower buds rise above them in a waxy white with large yellow centers, very showy. 50c each.

PARROT FEATHER—Long trailing stems soon grow over the edges. 10c each.

CAT TAIL—An excellent boggy plant, foliage of straight spike form. Large, heavy round spikes borne in July. 10c each.
