DESCRIPTIVE CATALOGUE

OF A CHOICE COLLECTION OF

FLOWER SEEDS;

COMPRISING, IN ALL, UPWARDS OF

FIVE HUNDRED SPECIES AND VARIETIES,

AND AMONG OTHERS,

SOME SPLENDID ASSORTMENTS OF

German Asters, Balsams, Ten Week Stocks, Poppies, Rocket Larkspurs, Candytufts, Zinnias, Hollyhocks, &c.

AMONG THE SEEDS ARE MANY NEW, RARE AND SPLENDID VARIETIES, WELL WORTHY THE ATTENTION OF FLORISTS AND AMATEUR CULTIVATORS.

FOR SALE BY

HOVEY & Co.,
SEEDSMEN AND NURSERYMEN,
7, Merchants Row...Boston.

Hallworth's Press....8 Congress street, Boston.

REMARKS.

THE increasing interest manifested in the cultivation of flowers, and the demand for new varieties of flower seeds, has induced us to give particular attention to this branch of our business; and no pains have been spared to render our collection the most extensive and varied to be found in this country. All the new and choice kinds that have been introduced to notice in Europe and also many improved varieties of favorite old sorts, have been added to the assortment. The double German Asters, double Balsams, double Rocket Larkspurs and many other choice varieties, which require so much care to keep them perfect, have been as usual raised by ourselves, and are of the finest description. The varieties of large Pansies, Carnations, Picotees, Cinerarias, Calceolarias, German Stocks, &c., have been imported from the same sources in London and Germany, as those we have usually sold, and which have been so much admired.

The value of a descriptive Catalogue in the selection of flower seeds will at once be perceived. The kinds are so numerous, their habits so unlike, their colors so dissimilar, and the height to which the different kinds attain, so varied, that to individuals unacquainted with them, a descriptive catalogue will be of great value in making their selections, either for a small or large garden. The explanatory notes will give the necessary information in regard to the abbreviations of the columns.

Purchasers, in giving orders, will notice that it is unnecessary to mention the names; as by giving the numbers, and date of the Catalogue, perfect correctness will be insured.

A variety of splendid seeds, put up in *assortments*, (page 11,) comprising only the *finest* varieties, are enumerated, and are particularly recommended to the attention of amateur cultivators.

* Orders for seeds will receive particular attention, and will be carefully packed and forwarded to any part of the country.

We keep constantly for sale a very extensive collection of the choicest plants for the Green-house, Hot-house and Flower Garden, embracing the finest Roses, Camellias, Geraniums, Ericas, Azaleas, Cactuses, Verbenas, Fuchsias, Carnations, Picotees, Lilies, Gladioluses, Hardy perennial flowering Plants, Dahlias, Bulbous flower roots, &c., &c.; also, Ornamental Trees and Shrubs and an immense variety of Fruit Trees.

Purchasers of Trees, Plants, &c., will find at our Nurseries the newest and finest varieties which have been introduced to notice, and they are invited to call before making their selections. The Nurseries are situated on the Cambridge Road to Mount Auburn, half a mile east of Harvard College, and two miles from Boston. Omnibus coaches pass every fifteen minutes during the day.

In the month of June, a splendid collection of upwards of four hundred varieties of hardy roses will be in flower;—during autumn, an unrivalled collection of Perpetual, Bourbon, Bengal, Tea, and Noisette Roses, and in September, a magnificent display of Dahlias. In the Conservatory, the Camellias will be in flower in January and February—the Azaleas in February—the Roses in March and April—the Geraniums in April and May—the splendid Japan Lilies in June—and the Fuchsias in July and September.

All orders for trees or plants should be directed to "HOVEY & CO., Boston. All packages delivered in Boston free of expense.

Catalogues of *Vegetable and Agricultural Seeds, Fruit Trees, Flower Seeds, Dahlias, Bulbous Roots, Forest Trees and Ornamental Shrubs, Roses, Green-house Plants, &c., &c.*, may be had separately on application, (*post paid*.)

EXPLANATIONS.

The number under which each species or variety of seeds is sold—the Scientific Name—the Common Name—the Period of Duration of the Plant—Color of the Flowers—Height of the Plant—Period of Blooming—and Price per Packet, are all given in the eight columns of the Catalogue, as follows:—

1st Column.—Number under which each variety is sold—and under which orders are executed; the detail of the names being unnecessary.

2d Column.—Scientific or common name of the plants, agreeably to the remarks at the head of each alphabetic list.

3d Column.—The same.

4th Column.—Hardiness and duration of each plant, viz:—h, *hardy*; hh, *half hardy*; t, *tender*; F, *frame*; G, *green-house*; a, *annual* (1 year); b, *biennial* (lasts 2 years); p, *perennial* (lasts many years.) They are thus applied in the Catalogue:—ha, *hardy annual*; hha, *half hardy annual*; ta, *tender annual*; hb, *hardy biennial*; hhb, *half hardy biennial*; hp, *hardy perennial*; hhp, *half hardy perennial*, &c.

5th Column.—Color of the flower. The abbreviations are as follows:—var., *various*; sc., *scarlet*; cr., *crimson*; pur., *purple*; str., *striped*; yel., *yellow*; va., *variegated*; or., *orange*; b. & w., *blue and white*, &c., &c.

6th Column.—Usual height in feet the plants generally attain under good cultivation.

7th Column.—Usual months of flowering.

8th Column.—Price of the seeds per single packet.

A star, *, added to the letters of the fourth column, denotes that the biennial and perennial plants flower the first year as well as the second.

A double star, **, following the scientific name, signifies that the plants are climbing, and suitable for an arbor, or trellis work.

Dots, ., in the fourth column, indicate a repetition.

TIME OF SOWING.—Hardy annuals from April to June, and many of the kinds in the autumn. Half hardy annuals in May, or earlier, in a *green-house* or a *hot-bed*. Tender annuals in a *hot-bed*, and transplanted to the border in June. Biennials and perennials from April to July.

CATALOGUE.

THE following plants, being best known by their common or English names, they are thus arranged in alphabetical order, and the scientific name given in the third column. A collection may be ordered, by merely giving the numbers, and date of the catalogue.

The following seeds, with very few exceptions, have no popular or English name, and in consequence, the scientific names are arranged in alphabetical order. The names in the second column, by which they are often called, are mostly literal translations of the specific name: Example—*Clarkia elegans*, "elegant" *Clarkia*, &c. A dash, —, indicates a variety; parentheses, (), that the word is not literally translated, or is super-added.
