CATALOGUE
OF

Lining Out Stock
and
Budded Two-Year
Field-Grown Roses

Season 1927-1928

TRADE MARK

The
Japanese Nursery
Company

GENOA, TEXAS

FOREWORD

Owing to the Federal Plant Quarantine having shut off practically all plant importations from foreign sources the scarcity of lining out stock which once was imported largely has been felt keenly in all parts of the United States for several years. To help satisfy the unfilled demand for this class of nursery stock we undertook last year for the first time to produce it on a large scale. Not satisfied to produce only a few things, we have striven to propagate a great variety of those plants which are valuable but under ordinary nursery conditions are hard to propagate. Following that policy we offered more varieties last year than any except the best established growers of lining out stock, but were able to fill hardly more than half the orders received.

Being gratified and encouraged by the extremely large number of orders and many complimentary letters received, we undertook production on a much larger scale this year. Our undertaking has been singularly successful. We have demonstrated the fact that our climate is ideal for this work. By careful painstaking methods of the Japanese in propagation we are able to produce plants that are in all respects superior to those produced in less favored localities.

We have endeavored to make the descriptions in this catalogue clear and accurate and to give a distinctive character to the booklet as a whole. It is sent out with the feeling that the trade will recognize it at once as a valuable guide in selecting and buying lining out stock. With it goes our earnest solicitation of your patronage and the assurance that we shall endeavor to serve you well.

Broadleaved Evergreens	7-17
Conifers	1-6
Deciduous Shrubs and Trees.....	7-17
Grasses	18
Palms	20
Roses	21-27
Vines	19

TERMS AND CONDITIONS OF SALE

Terms of payment:

1. Cash before shipment.—For cash with order or before shipment we allow 3% discount and pack free.

2. C. O. D.—One-fourth the amount of the order is required in advance on C. O. D. orders. When this rule is observed we ship C. O. D. and allow 2% discount and pack free.

3. Charge account.—Our terms are strictly 60 days net to those who have established credit with us. New charge accounts will be opened only upon receipt of satisfactory bank and trade references. These should be furnished in advance of date shipment is desired so that we may have time to investigate.

Packing:

All our lining out stock listed in this catalog is grown in open bed being transplanted from the sand beds, unless otherwise stated, to insure matured root system. The plants can be put in the field at once. They are shipped bare rooted packed in moss to save customer unnecessary transportation charges. We take pride in our thorough and careful packing. Packing material will be charged for at cost when goods are shipped on account.

Potting plants:

We can establish these field grown plants in pots by special arrangements at an advance of 10% to 25% above price as listed.

Transportation:

Please state whether you want shipment by parcel post, express, or freight. When no instructions are given we will use our judgment as to best method of shipping. Our responsibility ceases on delivery of goods to carrier, and shipment travels at the expense and risk of purchaser.

Shipping season:

With ordinary weather conditions the shipping season will extend from November 1 to April 15.

Claims:

If shortage, improper grading, or other errors or causes for complaint are found, please notify us immediately upon receipt of goods and we will adjust the matter fairly and squarely.

Conditions governing sale:

We accept all orders upon condition that they shall be voided by any injury that may befall our stock from causes beyond our control.

Samples:

In order to avoid misunderstanding as to grades or nomenclature of the plants we list and to show prospective buyers the quality of our product we will gladly send samples on request.

Prices:

We do not sell less than 10 plants of a kind and size. The 100 price may be applied to orders for 50, and the 1000 rate to orders of 500 of a kind. In some cases we do not have sufficient quantities to quote lower prices on 1000 lots and in these instances the 100 rate is our lowest price.

CONIFERS

Nearly all our lining out stock is cutting grown and once transplanted in the open field, unless designated as seedlings or grafted. These plants are hardened so as to stand distant shipment and can be planted directly into the field. They can be grown in pots or in flats, if customers so desire, at 10% to 25% advance in price. While the plants are of the same quality, it costs more to grow them that way. If you want plants from pots please let us know well in advance so that we may establish them in the pots before time for shipment, for except as noted, only those specially ordered can be furnished that way.

10 100 1000

Arborvitae (or Biota), see Thuja.

Cedrus deodara, DEODAR CEDAR—The most beautiful and stately of all cedars. Silvery green foliage. Grows as far north as Oklahoma.

4"- 6" (s) from seed beds 1 yr.....	\$ 7.50	\$ 65.00
6"- 8" (s) from seed beds 1 yr.....	\$1.50	10.00 90.00
8"-10" (s) transplanted 2 yr.....	2.50	20.00

One year seedlings should be planted in partially shaded beds during first summer and watered sparingly, but our two year stock can be planted in the open field with little risk.

Cupressus arizonica, ARIZONA CYPRESS—Very fast growing cypress with bluish foliage. Does well in dry regions but foliage has tendency to turn brown in humid climate. Specimens are hard to transplant and require very careful handling.

6"-8" (s) from seed beds.....	\$ 4.50	
-------------------------------	---------	-------

Cupressus lusitanica (glauca), BLUE PORTUGUESE CYPRESS—This specie is not so widely known as Arizona Cypress, its allied type, but is certainly very much superior. Has wonderfully beautiful silvery foliage and pinkish young stems during growing season. Owing to its variability when grown from seeds our plants are grown from cuttings. Therefore they are entirely uniform and true to type which is the most beautiful that we found among many trees grown from seeds. We have seen no such exquisite coloring in any other tree. Trees grown from these plants will make most beautiful and unique specimens. We have only a limited supply.

Cupressus lusitanica No. 100—This is horticultural variety of the above. Its foliage is of very distinct silvery gray like the above but the formation is very different, being flattened and frond-like.

Prices of these two:

4"-6" transplanted	\$2.00	\$15.00	
--------------------------	--------	---------	-------

Cupressus torulosa majestica, MAJESTIC CYPRESS—A grand pyramidal cypress, broad at base gradually tapering to top. Ultimate height about 8 to 10 feet. We have two varieties, one with dark green foliage, the other with light yellowish green. Prices are the same. Please designate color desired.

4"-6"	\$1.00	\$8.00	
-------------	--------	--------	-------

Cupressus sempervirens, ITALIAN CYPRESS—We have a very fine strain of this popular cypress. Narrow, very columnar and compact. Our plants are grown from cuttings of uniformly true type stock.

4"-6" transplanted	\$1.00	\$7.00	\$65.00
--------------------------	--------	--------	---------

Cupressus sempervirens horizontalis, HORIZONTAL CY-PRESS—Similar to Italian Cypress but the branches grow out horizontally giving the tree a very stately appearance when planted singly as a specimen. Seedlings do not come true to type, hence we grow our stock from cuttings taken from the best selected trees.

4"-6" transplanted\$1.00 \$8.00 \$75.00

Juniperus chinensis albo-variegata, WHITELEAF CHINESE JUNIPER—The type we are offering is somewhat different from the original kind in that its variegation is more pronounced and is yellowish rather than white. Some nurserymen designate this as Variegated "Greek" Juniper, but we believe it entirely distinct from the Greek species for we have developed the entirely green variety from this one and find it quite different from the Greek Juniper. Specimens are dwarf, slender and pointed in center.

4"- 6" transplanted\$2.50 \$20.00 \$175.00

6"- 8" transplanted 3.50 25.00

8"-12" twice transplanted..... 7.00 50.00

12"-15" B&B15.00

Juniperus chinensis femina, REEVES JUNIPER—Also known as *Juniperus sylvestris* (or *Juniperus japonica* which we believe is erroneous). An upright, loosely pyramidal tree with spreading branches and light green foliage. Medium height, growth very unique. Makes fine specimen. One of the best junipers.

4"-6" transplanted\$2.00 \$15.00 \$140.00

Juniperus chinensis mascula—Similar to the femina but more dense and with darker blue-green foliage. A fine tall pyramidal tree and like other forms of *Juniperus chinensis* it stands both heat and cold which adapts it to both North and South.

4"-6" transplanted\$1.50 \$12.00 \$100.00

Juniperus chinensis pfitzeriana, PFITZER JUNIPER—One of the best low growing junipers. Forms a broad dense head of bright green foliage. Thrives well in the hot summers of the South and equally well in the cold winters of the North. Very popular in all sections and supply hardly ever equals the demand.

4"- 6" transplanted \$ 9.00 \$ 80.00

6"- 8" transplanted\$1.50 12.50 115.00

8"-10" twice transplanted..... 2.00 15.00 140.00

10"-15" twice transplanted..... 3.00 25.00

Juniperus chinensis globosa (No. 102)—Another one we cannot positively identify. A Japanese kind introduced by us from its native land some years ago. Growth upright, many stemmed and inclined to form a globe shape, rather dwarf, not higher than three feet. Dark green foliage of scale-like leaves. Stands extremes of temperature. A very satisfactory ornamental conifer.

4"-6"\$1.75 \$15.00

Juniperus chinensis globosa aurea (No. 103)—Same form as above but foliage is light or yellowish green. Plant is more open in center than above.

4"-6"\$1.75 \$15.00

Juniperus communis, COMMON JUNIPER or English Juniper—A fast growing, bushy, upright tree forming a broad pyramidal shape with grayish green foliage. Quite hardy in either North or South. Our stock is grown from selected pyramidal type only.

4"-6"\$1.10 \$8.50 \$75.00

Our stock is transplanted in open beds unless otherwise indicated. Our careful packing makes it as reliable as pot-grown stock, although it costs less.

Juniperus communis aurea, GOLDEN ENGLISH JUNIPER—A dense and compact juniper growing about 5 to 6 feet. Broad in form, canary-yellow foliage during spring growing season.

4"-6"\$1.25 \$10.00 \$90.00

Juniperus communis hibernica, IRISH JUNIPER—Forms a heavy bright green column. Foliage glaucous green. Dimensions usually not more than 6 to 8 feet high and 1½ feet in diameter.

4"-6"\$1.50 \$10.00

Juniperus excelsa stricta, GREEK JUNIPER—A popular dwarf variety making a compact, conical plant with silvery, glaucous foliage. Very hardy.

4"-6"\$1.50 \$12.00 \$100.00

Juniperus horizontalis (J. Sabina Prostrata), CREEPING JUNIPER—Has long trailing branches not over one foot high. Very hardy.

4"-6"\$1.50 \$12.00 \$110.00

Juniperus horizontalis douglassi, WAUKEGAN JUNIPER—Very low and compact making a dense mat. Soft and pleasing blue in spring and summer changing to a rich purple color in late fall.

3"-5"\$1.75 \$15.00 \$130.00

5"-8"2.50

Juniperus japonica (or *Juniperus Chinensis*), TRAILING JAPANESE JUNIPER—"This is the best known of the prostrate junipers which Japan has sent to the gardens of the West. It is a plant with wide spreading procumbent stems, blue green, sharply pointed leaves marked on the upper surface by two little white lines. It is perfectly hardy." Spreads 10 to 15 feet in diameter.

4"-6"\$1.75 \$14.00 \$120.00

6"-8"2.50 18.00

Juniperus sabina, SAVIN JUNIPER—A semi-spreading, much branched shrub with dark green foliage. Very satisfactory under extremes of temperature making it valuable for both North and South.

3"-5"\$1.25 \$10.00 \$ 90.00

5"-8"1.50 12.00 110.00

Juniperus sabina cupressifolia—A horticultural variety of Savin Juniper. Procumbent with ascending branchlets. Leaves usually imbricate or scale-like and bluish green. Very satisfactory in hot or cold climate.

4"-6"\$1.25 \$10.00 \$90.00

Juniperus sabina tamariscifolia, TAMARIX SAVIN JUNIPER—One of the best creeping varieties. Forms a dense, compact carpet of grayish green which changes after heavy frost. Limit of height about two feet.

4"-6"\$1.25 \$10.00 \$90.00

Juniperus virginiana glauca, BLUE CEDAR or Silver Red-cedar—Fine subject in any style of landscaping. The entire young growth is of almost silvery whiteness which changes to beautiful bluish green in winter. It stands pruning perfectly. Grows to 15 to 20 feet. This is one of the most beautiful junipers that do well in both North and South and is now found in every section of the country. On account of its being hard to propagate from cuttings only a few nurserymen can supply young plants. Ours are grown by grafting and will be ready for delivery during the spring only.

Grafts from 3" pots, 6"- 8".....4.50 40.00 350.00

Grafts from 3" pots, 8"-12".....\$5.00 \$45.00 \$400.00

Our stock is transplanted in open beds unless otherwise indicated. Our careful packing makes it as reliable as pot-grown stock, although it costs less.

Juniperus virginiana elegantissima, GOLDTIP REDCEDAR or Lee's Goldtip Juniper—This is one of the most interesting junipers. In the spring when the new growth comes out the tips are a rich golden color which gradually darkens to bronze and green as the season advances. It will grow 10 to 15 feet high but can be kept down by pruning. Adapted to both North and South. Like Blue Cedar it is hard to grow from cuttings and hence is high in price. Grafts from 3" pots. \$5.00 \$45.00 \$400.00

Pinus pinea, ITALIAN STONE PINE—Compact and symmetrical when young and picturesque when older, with parasol like head. Hardy in the South.

4"-6"	\$1.00	\$ 7.50	
6"-8"	1.25	10.00	

Podocarpus elongata, FERN PINE—A new introduction and a tree that is a valuable addition to the evergreens adapted to the South and West. The narrow leaves and drooping branchlets are unique and very attractive.

4"-6"	\$1.25	\$10.00	\$90.00
-------------	--------	---------	---------

Podocarpus macrophylla (P. longifolia), YEW PODOCARPUS—Horizontally spreading branches with pendent branchlets. Leaves are pinkish when unfolding later turning lustrous green, under side paler. Stands pruning well and makes a fine pyramidal tree suitable for formal gardens, etc. This and the one below can be pruned to any desired shape. They do well in full sun or very dark shade where few plants will grow successfully. The growth is not so slow as other yews. They are used extensively in some sections of Florida as pot plants for hotel lobbies, porches, etc. Adapted to the South.

4"- 6"	\$1.50	\$10.00	\$ 9 1/2
6"- 8"	2.00	15.00	12
8"-12"	2.50	20.00	

Podocarpus maki (P. japonica)—A variety of the above. Branches and leaves more upright with distinct mid-rib on upper side of leaves. Foliage dark outside, pale underneath. More compact in form and hence more desirable in locations where space is limited.

3"- 5"	\$1.50	\$12.00	\$110.00
5"- 7"	2.00	15.00	125.00
7"-10"	2.50	20.00	
10"-15"	3.00		

Podocarpus microphylla—A horticultural variety of the above. Very similar to its parent except leaves are small and rather compact.

3"-5"	\$1.50	\$12.00	
-------------	--------	---------	-------

Podocarpus nagi (or nageia), JAPANESE PODOCARPUS—Not well known to the trade yet but destined to be one of the most popular evergreen trees. Branches spreading and pendulous with leaves unusually broad, bright green, and glossy. A fine ornamental subject for South and West. This is also trained in Japan to formal shapes such as pyramids, globes, etc.

2"- 4"		\$10.00	\$ 80.00
4"- 6"	\$1.50	12.00	110.00
8"-12"	2.50	20.00	
4"- 8" seedlings	1.25	8.00	75.00

Retinospora leptoclada, ANDELY RETINOSPORA—Forms a compact round head of feathery foliage which is bright green in summer and purplish bronze in winter. We find this small conifer does not burn inside like the Rosedale Arborvitae and is less subject to attacks of insect enemies. Fast grower, easily cared for. Highly recommended.

3"-4"		\$6.00	\$50.00
4"-6"	\$1.00	7.00	60.00

Retinospora plumosa, GREEN JAPAN CYPRESS—This and the other Retinosporas are hardy in the Gulf States and Atlantic Coast. The feathery foliage and irregular outline make it a very fine ornamental shrub.

4"-6"	\$ 8.00	\$70.00
6"-8"	\$1.25	10.00

Retinospora plumosa aurea, GOLDEN JAPAN CYPRESS—Similar to the above but new growth is decidedly yellow.

4"-6"	\$ 8.00	\$70.00
6"-8"	\$1.25	10.00

Taxus cuspidata nana (or *brevifolia*), DWARF JAPANESE YEW—Very dwarfish and compact. The foliage is dark green and very glossy. Irregular and picturesque in outline. Grows to three feet in height. Hardy North or South but slow in growth.

2"-4" transplanted, 2 yr.....	\$10.00	\$90.00
4"-6" transplanted, 2 yr.....	\$2.00	15.00

Thuja orientalis compacta, COMPACT CHINESE ARBORVITAE—The plants here offered being seedlings will naturally produce some variants but a large percentage of them are true to type while some may be found that will make specimens of fine type.

4"-6" transplanted seedlings.....	\$4.00	\$30.00
6"-8" transplanted seedlings.....	5.00	45.00

Thuja orientalis aurea nana, BERCKMAN'S GOLDEN ARBORVITAE—The most popular dwarf arborvitae grown. Compact, globular, and deep golden in color. Truly a beautiful plant. Grown from cuttings of our own fine specimens.

4"- 6"	\$10.00	\$ 90.00
6"- 8"	\$2.00	17.50
8"-10" twice transplanted.....	3.00	25.00
10"-12" twice transplanted.....	4.00	35.00

Thuja orientalis "Baker's", BAKER'S ARBORVITAE—A tall compact pyramidal type. The foliage is bright green and the inside never turns brown. Introduced by Baker Brothers of Fort Worth.

4"- 6"	\$1.00	\$ 8.00	\$ 75.00
6"- 8" from field.....	1.25	10.00	
8"-12" from field.....	1.50	12.00	
12"-15" from field.....	2.00	15.00	

Thuja orientalis bonita, BONITA ARBORVITAE—Very compact and perfect globe shaped. Lustrous dark green in color throughout the year. Inside does not turn brown. Foliage of fine texture. Easily cared for and we have failed to find a better medium sized green arborvitae that is so well adapted to the South. Introduced by Otto Locke of New Braunfels, Texas. Ultimate height and diameter about 4 feet.

4"- 6" once transplanted.....	\$10.00	\$ 90.00
6"- 8" twice transplanted.....	\$1.50	12.00
8"-10" twice transplanted.....	2.00	17.50
10"-12" twice transplanted.....	3.00	25.00

Thuja orientalis aurea conspicua, GOLDSPIRE ARBORVITAE—Tall and erect with intensely golden foliage. Somewhat more open than elegantissima or beverleyensis. It is used largely in the vicinity of Dallas and in Oklahoma, and all in the South.

4"- 6"	\$12.00	\$110.00
6"- 8"	\$2.00	15.00
8"-10"	2.50	20.00
10"-12"	3.00	25.00
12"-15"	3.50	30.00

Thuja orientalis columnaris, COLUMNAR ARBORVITAE—Very slender, not exceeding one foot in diameter and reaching 6 feet in height.

4"- 6"	\$10.00	\$ 90.00
6"- 8"	\$1.50	12.00
8"-10"	2.00	15.00
10"-12"	2.50	20.00
12"-15"	3.00	22.50

Thuja orientalis beverleyensis, GOLDEN COLUMNAR ARBORVITAE—A very fine specimen conifer. It grows more rapidly than the other pyramidal types. Stands heat and cold/as well as the Berckman's. The pronounced golden color is retained during all the year.

4"-6"	\$1.50	\$12.00	\$110.00
-------------	--------	---------	----------

Thuja orientalis pyramidalis, PYRAMIDAL CHINESE ARBORVITAE—Medium broad at base but tapering to the top. Straight and symmetrical. Foliage always bright green.

4"- 6"	\$10.00	\$ 80.00
6"- 8"	\$1.50	13.50
8"-10"	2.00	17.50
10"-12"	2.50	22.50

Thuja orientalis elegantissima, GOLDEN PYRAMIDAL ARBORVITAE—A golden pyramidal form with broad base. Grows slower and not so tall as beverleyensis. Rather bronze in coloring.

4"-6"	\$2.00	\$15.00	\$140.00
-------------	--------	---------	----------

Thuja orientalis meldensis—A beautiful, compact, and medium-sized arborvitae with soft green foliage all through the year. Does not burn inside. One of the best kinds of medium height.

4"-6"	\$1.25	\$10.00	\$90.00
-------------	--------	---------	---------

Thuja orientalis filiformis stricta, JAPANESE THREAD-LEAVED ARBORVITAE—Medium height, broad at base tapering towards tops. Leaves long and stringy like threads. Stands same climatic conditions as other oriental arborvitaes. Unique and very beautiful. Resembles the Threadleaved Cypress but is better adapted to our climate. We got this from Japan some years ago and have thoroughly tried it but have not been so fortunate as to have any to offer the trade before now. This year we succeeded in growing a large quantity from cuttings and are able to list it here.

4"-6"	\$2.00	\$17.50	\$155.00
6"-8" grafted	3.50	25.00	

Thuja orientalis texana glauca—Foliage of silvery blue. A tall and strong upright grower but not so compact as the pyramidalis. A distinct type found in Texas recently.

4"- 6"	\$ 8.00	\$ 70.00
6"- 8"	\$1.25	10.00
8"-10"	1.50	12.50
10"-12"	2.00	15.00

Thuja orientalis Rosedale, ROSEDALE HYBRID ARBORVITAE—A beautiful little compact plant when young but it gets straggly and becomes burnt inside after a few years.

4"- 6"	\$.75	\$ 5.00	\$ 45.00
6"- 8"	1.00	7.50	
8"-12"	1.25	10.00	

Thuja orientalis Ramsey, RAMSEY'S HYBRID ARBORVITAE—A tall fast growing evergreen of distinct type. Leaves are dark green, long and drooping. Rather open when young as it grows larger it becomes quite stately and handsome. Ultimate height about 15 feet. Stands drought and heat as well as cold.

4"-6"	\$10.00	\$ 90.00
6"-8"	\$1.50	13.50

Broadleaved Evergreens and Deciduous Trees and Shrubs

Plants under this heading are also nearly all cutting grown and transplanted once or more unless otherwise noted.

	10	100	1000
Abelia grandiflora, GLOSSY ABELIA.			
4"- 6"		\$ 5.00	\$ 40.00
6"- 8"		8.00	70.00
8"-12" field grown.....	\$1.50	10.00	
12"-18" field grown.....	1.75	15.00	

Azalea indica—Single large flowering kinds which are hardy. Many different colors. Cutting grown.

From 2" pots.....	\$1.50	\$12.00	
-------------------	--------	---------	-------

Azalea hinodegiri—This belongs to the famous Kurume family and is the most popular of all. Literally covered with fiery red flowers in spring. Hardy to coast of New Jersey.

From 2" pots.....	\$2.00	\$15.00	\$140.00
-------------------	--------	---------	----------

Bay—Sweet Bay tree, see *Laurus nobilis*.

Eottlebrush—See *Calistemon speciosa*.

Buddleia officinale, BUTTERFLY BUSH—Flowers pinkish lilac, fragrant. Good subject for florists.

4"-6"		\$6.00	\$50.00
-------------	--	--------	---------

Buddleia magnifica—See general wholesale catalog.

Bougainvillea glabra sanderiana—An evergreen vine with very showy purple flowers in great masses. Can be made to bloom almost all the year round if grown in pots and protected from temperatures below 35 degrees. Have it root-bound to make it bloom.

2¼" pots.....	\$1.00	\$ 8.00	\$ 70.00
2½" pots.....	1.50	10.00	90.00
3 " pots.....	2.00	15.00	135.00
4 " pots.....	4.00	30.00	
5 " pots.....	5.00	40.00	

Bougainvillea, CRIMSON LAKE—Introduced by the U. S. Department of Agriculture. Flowers are a little larger than the above and in coloring none can compare with its richness and brilliancy. On first opening it is a brilliant crimson-lake which color it retains for three or four weeks after which it gradually passes to a crimson-carmine. Of easy culture, blooms when small. It blooms profusely the year round and thrives in greenhouse or any frost free location. This is destined to be one of the best subjects for florists everywhere to grow in pots. Better than Azaleas or Camellias.

2¼" pots.....	\$ 2.00	\$ 17.50	\$150.00
2½" pots.....	2.50	20.00	180.00
3 " pots.....	3.00	25.00	200.00
4 " pots.....	7.50	50.00	400.00
5 " pots.....	12.50	100.00	

For larger specimens see our General Wholesale Catalog.

Buxus japonica, JAPANESE BOXWOOD—Leaves are small, roundish, green, and lustrous. Medium in height, spreading branches, naturally globe form. Not a fast grower. Makes good low hedge or specimen tree. Very hardy.

4"-6" well branched 2 yr.....		\$6.00	\$55.00
6"-8" bushy 2 yr.....	\$1.00	7.00	65.00

	10	100	1000
Buxus sempervirens, COMMON BOX TREE —This is an evergreen shrub of rather fast growth and is used largely for hedges or shaping into different forms by shearing.			
4"- 6" field grown.....		\$ 5.00	\$ 45.00
6"- 8" field grown.....		6.00	55.00
8"-10" field grown.....	\$1.00	7.00	65.00
10"-12" field grown.....	1.50	10.00	90.00
12"-18" field grown.....	2.00	12.50	

Buxus suffruticosa, DWARF BOX TREE—Truly very dwarf and slow grower.

4"-6" 3 yr.....		\$10.00	
-----------------	--	---------	--

Camelia japonica, JAPANESE CAMELLIA—Well known, mid-winter flowering camellia. The flowers suffer from exposure to sun and must be grown in shade, especially in the South. All from cuttings, no seedlings. We offer only double flowering kinds, white, pink, red and variegated.

3"- 5" from cutting bed.....	\$2.00	\$15.00	
8"-12" from pots, once transplanted..	6.50	50.00	
12"-15" from pots, once transplanted..	10.00	75.00	

Camellia olifera, CHINESE CAMELLIA—Fast grower with leaves larger than the Japanese Camellia which, in other respects, it resembles. Try this where the Japanese sort fails. Cannot guarantee color of flowers.

4"-6" seedlings	\$2.00	\$15.00	
6"-8" seedlings	2.50	20.00	

Camellia sasanqua—Similar to *Camellia japonica* but mostly single flowering. Blooms earlier and more freely. Seedlings.

3"- 5" from seed bed.....	\$1.50	\$10.00	
6"-10" (s) once transplanted.....	2.00	17.50	

Camellia thea, TEA PLANT—Sweet scented flowers in late fall. A fine evergreen which ought to be more used.

6"- 8" from seed bed.....	\$1.00	\$ 8.00	
8"-10" once transplanted.....	1.25	10.00	

Camphora officinalis (or Cinnamomum camphora), CAMPHOR TREE.

4"-6" from seed bed.....		\$3.00	
6"-8" from seed bed.....		5.00	

Citrus trifoliata—Used extensively for understock for cultivated orange trees in cooler regions.

6"- 8"	\$2.50	\$20.00	
8"-12"	3.00	25.00	
12"-15"	4.00	30.00	

Quotations on larger quantities and larger sizes on application.

Codiaeum variegatum, CROTON—Highly ornamental hot-house plants for florists. We have a dozen named varieties.

3" pots	\$4.00	\$35.00	
4" pots	5.00	45.00	

Cotoneaster pannosa, SILVERLEAF COTONEASTER—A fine shrub that is adapted to a wide range of the country, standing cold and heat as well as drought very well. Silvery leaves and an abundance of red berries which are very beautiful. We have tried many species of this genus but this seems the best for our climate.

4"- 6"		\$ 8.00	\$70.00
12"-15" twice transplanted, well branched	\$2.50	\$20.00	

Nearly all our stock is grown from cuttings and is transplanted at least once in field. It is not to be compared with seedlings or rooted cuttings from sand beds, of which the former rarely run true to type and the latter is usually too weak to stand planting in open field.

Cuphea hyssopifolia—A small evergreen plant with tiny leaves and pinkish flowers. Used extensively as border plants in California. Does not need shearing as *Alternanthera* does. Easily propagated from cuttings. A good pot plant also.

4"-6" \$5.00 \$40.00

Daphne odora marginata, YELLOWEDGE DAPHNE—"D. odorata is a common misprint in catalogs for *D. odora*", Bailey. Shrub 4 feet in height, branches smooth, leaves dark green and shiny with white band around edges. Flowers pink and very fragrant. Should be grown in shady situation. Blooms in winter and spring. Very rare in the trade.

From 2½" pots.....\$2.50 \$20.00

Elaeagnus—There are two horticultural classifications in this genus, viz.; deciduous, and evergreen. The evergreen kinds are highly ornamental and most of them stand the cold as far north as Oklahoma. Their range extends into Southern Florida. Their distinct foliage makes them almost indispensable for color effect among other plants. Propagation is the only hard part of their culture for they are easy to transplant and thrive under varied conditions. We list only evergreen varieties.

Elaeagnus fruitlandi—A horticultural variety of *E. pungens*. Leaves large to medium, dark green above, silvery beneath. Compact and fast grower. A medium sized evergreen shrub worthy of planting more extensively as are all of the evergreen *Elaeagnus* we list.

4"-6" seedlings\$1.00 \$ 8.00
6"-8" seedlings 1.50 12.00

Elaeagnus pungens—Spreading shrub with brown branchlets and oblong leaves smooth and silvery with brown scales. About 6 feet. Hardy.

4"-6"\$1.25 \$10.00 \$90.00

Elaeagnus pungens simoni, SIMON ELAEAGNUS—Leaves rather large oblong with few or none of the brown scales beneath. Has a few unpointed spines among branches.

4"-6"\$1.25 \$10.00 \$90.00

Elaeagnus pungens reflexa, BRONZE ELAEAGNUS—Branches drooping or weeping and spreading in character, leaves scaly beneath when young. Distinct variety and very useful in landscape work.

4"-6"\$1.25 \$10.00 \$90.00

Elaeagnus pungens variegata (argentea-variegata), YELLOWEDGE ELAEAGNUS—We find this variety has leaves margined with yellowish white. Very vigorous and hardy. Grows compact and bushy, 6 feet in height.

4"-6"\$1.75 \$15.00

Erica carnea, SPRING HEATH or Heather—A low growing variety with numerous upright branches. Blooms in late spring and fall. Flowers rosy pink. Very hardy. Should not be cultivated deeply close to the trees for they are shallow rooted.

From 2½" pots.....\$1.50 \$12.00

Erica mediterranea, MEDITERRANEAN HEATH—A compact bushy plant, 4 feet with stiff stems. Very hardy. Has purplish pink flowers from March to June. Easy to grow.

From 2½" pots.....\$1.50 \$12.00

See our General Wholesale Catalog for larger sizes and specimens.

8"-12" seedlings	2.00	15.00
12"-18" seedlings	2.50	20.00
18"-24"	3.00	

Ligustrum japonicum macrophyllum (Sometimes called **Ligustrum japonicum lucidum**)—Superior to Japan Ligustrum in having very glossy and larger leaves. Is also a faster grower and taller.

12"-18" seedlings	\$3.50	
18"-24" seedlings	5.00	

Ligustrum lucidum, WAX LEAF PRIVET—In the South this plant is offered under many different trade names, such as "Griffing's Wax", "Wax Ligustrum", "Ligustrum lucidum compactum", etc., and many different types including seedlings which are extremely variable in character are offered under these names. No matter what name is applied to them, plants without character are practically worthless. Our stock is grown from cuttings of selected type, dwarf specimens, growing to about 6 feet high, compact, and with thick, very glossy, dark green leaves. Largely used in the South for foundation planting and almost indispensable in southern landscape work.

4"- 6" once transplanted.....	\$ 4.50	\$ 35.00
6"-10" branched, from field.....	10.00	80.00
10"-12" well branched, twice transp.....	\$1.75	15.00
12"-18" well branched, twice transp.....	2.50	20.00

Seedlings from true **Lucidum**:

6"- 8"	\$ 4.00	\$ 35.00
8"-10"	5.00	40.00
8"-12"	8.00	70.00

Ligustrum lucidum cordifolium—Leaves are extremely dark and glossy, large, heart shaped. Medium or dwarf in height.

4"-6"	\$5.00	\$40.00
-------------	--------	---------

Ligustrum lucidum pyramidalis, UPRIGHT WAX LEAF PRIVET—The growth is decidedly erect and narrow in form. Leaves dark green and glossy but not so thick as the usual form. Indispensable as background planting.

Ligustrum lucidum repandum, CRINKLY LEAF LIGUSTRUM—Shiny pointed leaves are crinkly. Growth is erect giving it a unique appearance.

Prices of the above two kinds:

4"-6"	\$4.50	\$35.00
6"-8"	7.00	65.00

Ligustrum lodense—Very dwarf variety, fine for low hedges.

4"-6"	\$4.00	\$35.00
-------------	--------	---------

Ligustrum nepalense—Seedlings. Leaves are very waxy and dark green but are pointed and narrow.

6"-8"	\$2.00	\$12.50
8"-12"	2.50	15.00
12"-18"	3.00	20.00

Ligustrum ovalifolium, CALIFORNIA PRIVET.

12"-18"	\$2.00	\$15.00

15"-18" 2 yr.....	1.80	15.00	

Ulmus pumila, CHINESE ELM—Very fast growing variety. Adapted to semi-arid region because it stands drought so well. Recently introduced but already well known.

2'-3' seedlings	\$1.00	\$ 7.50	
3'-4' seedlings	1.50	10.00	

Viburnum macrocephalum, CHINESE VIBURNUM—An evergreen shrub attaining sometimes 20 feet, widely spreading, with thick leathery, pale green leaves of rather large size. White flowers in clusters. Hardy in the South only. Does well in shady location.

4"-6"	\$1.00	\$ 8.00	
6"-8"	1.25	10.00	

Viburnum odoratissimum (V. awafuki)—An upright evergreen shrub with large, thick, glossy dark green leaves. Flowers white and fragrant. Has clusters of red berries in winter. Does well in partially shaded place and moist soil. Ultimate height 10 feet.

4"-6"	\$1.25	\$10.00	\$80.00
6"-8"	1.50	12.00	

Viburnum suspensum (V. sandankwa)—Another Japanese Viburnum. Leaves thick, leathery, dark green. The fragrant pinkish flowers borne during winter or early spring make this one of the most desirable ornamental shrubs. Quite hardy here. Height 6 feet.

4"-6"	\$1.25	\$10.00	\$ 90.00
6"-8"	1.50	12.00	100.00
6"-8" from field, twice transplanted....	2.50	20.00	

Viburnum tinus (Laurustinus, formerly)—A fine ornamental shrub reaching 8 feet in height. Flowers pinkish white, slightly fragrant, borne in clusters in spring. A fine subject for florists to grow as pot plants. Does well in the South.

4"-6"		\$4.00	\$35.00
6"-8"		5.00	45.00

Yucca glauca—A very hardy yucca with glaucous leaves.

1 year seedlings.....	\$1.00	\$6.00	
-----------------------	--------	--------	-------

Zizyphus Jujuba, CHINESE JUJUBE—Sometimes called Chinese Date because the appearance and texture of the fruits is similar to that of the dates. These seedlings may be used as stocks for grafting improved varieties.

10"-12" seedlings from Chinese seeds..	\$1.00	\$6.00	
12"-18" seedlings from Chinese seeds..	1.50	7.50	

For improved varieties see Wholesale Catalog.

See our General Wholesale Catalog for larger sizes and specimens.

BAMBOOS

Although Bamboos have not attracted much attention from landscapers in the coast country, most of the varieties make fine ornamentals for small gardens.

Bambusa argentea—This bamboo has green leaves and plain green canes that grow to 30 ft. high, forming dense clumps.

See prices at bottom of list of bamboos.

Bambusa argentea striata—A variety of the above, but the foliage is striped with white which is especially noticeable on the young leaves.

Bambusa aurea—A cane bamboo that grows to 15 feet. Very strong and straight which makes it fine for fishing poles, furniture, etc.

Bambusa falcata—Dwarf bamboo with fine fern like leaves. It grows in clumps and reaches a height of 10 to 12 feet. Stands shearing well so that it makes a fine hedge plant.

Bambusa falconeri—Very much like the above but grows a little taller and the leaves are not so crowded.

Bambusa metake—A handsome bamboo that is adapted for pot culture. Has large leaves a foot long, slender and straight stems. Does best in a shady situation.

Bambusa nigra—The canes are black and are used in furniture work. Makes unique appearance in extensive landscape. Height 15 feet.

Bambusa verticillata—The canes of this bamboo are marked with longitudinal stripes of green and yellow. Forms a dense, compact clump. Height 15 to 20 feet.

Prices of all bamboos:

Small division	\$2.00	\$17.50	
Medium division	3.00	25.00	

GRASSES

Cortaderia argentea, Silvery Pampas Grass—4 to 6 feet high. White plume-like flowers.

Small division	\$1.00	\$ 7.50	
Medium division	1.50	12.00	

Cortaderia Roi des Rosea, Pink Pampas Grass—Same as above except that plumes have pinkish color when they first appear.

Cortaderia phoenicea, Purple Pampas Grass—Same as the *argentea* except that the plume-like flowers are of purplish hue which is quite pronounced when they first appear. Very beautiful, and rare.

Prices of these two:

Small division	\$1.50	\$12.00	
Medium division	2.50	20.00	

Ophiopogon japonicus, Dragons Beard—Erroneously called Snakes Beard. Hardy evergreen low growing grass. Especially good as border plant for beds. Does well in almost any location.

Small division	\$3.00	\$20.00	
Medium division	5.00	40.00	

Nearly all our stock is grown from cuttings and is transplanted at least once in field. It is not to be compared with seedlings or rooted cuttings from sand beds, of which the former rarely run true to type and the latter is usually too weak to stand planting in open field.

VINES

Antigonon leptopus, ROSA DE MONTANA—Called locally, Coral Vine, Mountain Rose, etc. One of the most conspicuous and beautiful of climbers grown in the South. Always in flower from spring to late fall. Flowers light pink, gradually changing to deep rosy pink.

2 yr. tubers.....	\$1.25	\$10.00	\$ 80.00
3 yr. tubers.....	1.75	15.00	120.00

Bignonia speciosa, LOVE CHARM—A splendid evergreen vine with glossy green leaves. Flowers, lavender, trumpet shape, borne in great profusion in spring. Hardy.

One yr.	\$1.25	\$10.00	\$90.00
Two yr.	2.00	15.00	

Bignonia venusta, FLAMING TRUMPET VINE—Tender evergreen vine literally covered with orange red trumpet shaped flowers during winter. Must be protected from frost.

4"-6" pot grown.....	\$1.25	\$10.00	
6"-8" pot grown.....	1.50	12.00	

Bougainvillea, see under SHRUBS AND TREES.

Campsidium—A dwarf evergreen trumpet vine. Has dark glossy green leaves with bright orange red flowers in clusters all through the year. Visited by yellow butterflies make them very attractive, especially in late fall when other flowers are scarce. While somewhat tender in frosty region it springs up again quickly if frost-bitten. An excellent pot plant also.

1 year old vine.....	\$1.50		
2 year old vine.....	2.00		

Ficus repens, CLIMBING FIG.

2½" pots		\$ 8.00	
3 " pots	\$1.25	10.00	

Gelsemium sempervirens, CAROLINA JASMINE.

6"- 8"		\$ 8.00	\$75.00
8"-12"		10.00	90.00

Hedera helix, ENGLISH IVY—Either Big Leaf or Small Leaf variety. Please specify which is desired.

3" pots	\$1.50	\$10.00	
---------------	--------	---------	-------

Jasminum, see under SHRUBS.

Millettia Japonica, FORMOSA WISTERIA—This is a variety of *Millettia Japonica*. An evergreen climber closely related to Japanese Wisteria. Blooms all through the summer and fall till frost. Hardy and of easy culture. Flowers pea-shaped, dark purple, in clusters. Very rare. Introduced by us from Japan.

10"-15"	\$1.50	\$10.00	
15"-24"	2.00	15.00	

Plumbago, see under SHRUBS.

Trachelospermum jasminoides (*Rynchospermum jasminoides*), CONFEDERATE JASMINE or Star-Jasmine.

4"-6"	\$1.25	\$10.00	\$90.00
-------------	--------	---------	---------

Small Leaf variety—Makes very fine ground cover. Flowers white, star shaped, fragrant.

8"-12"	\$1.50	\$12.00	
--------------	--------	---------	-------

Nearly all our stock is grown from cuttings and is transplanted at least once in field. It is not to be compared with seedlings or rooted cuttings from sand beds, of which the former rarely run true to type and the latter is usually too weak to stand planting in open field.

See our General Wholesale Catalog for larger sizes and specimens.

PALMS

Cocos australis, PINDO PALM—The best all round Palm, bears very palatable fruit. Very hardy.

1 yr. seedlings..... \$8.00

Cycas revoluta, SAGO PALM—An excellent plant for outdoor planting or for porch or interior decoration. The dark green, glossy leaves are shaped like an ostrich plume. Hardy in the South and West.

1 year bulb (leaves cut back) ..\$2.00 \$15.00

2 year bulb (leaves cut back) 2.50 20.00

Prices of plants with leaves established in pots on application.

Latania borbonica (Livistona chinensis), CHINESE FAN PALM—Two year plants from seed bed.

8"-10" \$10.00 \$ 80.00

10"-12"\$1.50 12.00 100.00

Sabal blackburniana, THATCH PALM—Two year plants from seed bed.

6"-10" \$8.00 \$70.00

Phoenix canariensis, CANARY ISLAND DATE PALM.

1 yr. seedlings..... \$5.00 \$40.00

Trachycarpus excelsa (Chamaerops excelsa), JAPANESE WINDMILL PALM—Slow grower but very hardy against heat, drought, and cold. Best adapted to heavy soil. May be used as a tub plant.

Trachycarpus fortunei (Chamaerops fortunei), JAPANESE DWARF WINDMILL PALM. Same as above except dwarf in height.

Prices of these two:

1 year seedlings..... \$5.00 \$45.00

Nearly all our stock is grown from cuttings and is transplanted at least once in field. It is not to be compared with seedlings or rooted cuttings from sand beds, of which the former rarely run true to type and the latter is usually too weak to stand planting in open field.

Field Grown Budded Roses

For the Trade.

All the roses offered in this list are budded on *Rosa canina* (Dog Rose) which stands heat, drought, or cold and is especially adapted to sandy soil, doing well in the sandy regions of Florida and other sections having similar soil conditions. Every bush has strong roots and a well branched heavy top and is far better than required by standard grades.

We usually begin shipping about November 1.

No charge is made for packing roses.

Terms:

For cash before shipment is made we allow 3% discount. If shipment is to be made C. O. D. we require a deposit of 25% of the amount of the order in advance and allow 2% discount.

Credit will be extended only to those who either have established credit with us formerly, or have given satisfactory trade and bank references far enough in advance that we may have time to investigate before shipment is desired. Payment of invoices is due in 60 days, net.

Prices:

These prices apply to no less than 10 of a kind and in multiples of 10. Our roses are graded and tied in bunches of 10 and we charge ten cents extra for each bundle broken. Thus, 5 bushes of a kind listed at \$2.50 will be invoiced at \$1.35 instead of at \$1.25. This charge applies to broken multiples of 10 also, thus, 25 of a kind listed at \$2.50 will be charged for at \$6.35, there being a charge of 10c for the one broken bunch.

Quantity Discounts:

We offer special discounts as follows on quantity orders for the starred varieties only: 10% on order for 50 or more of a kind, 15% on order for 100 or more of a kind, and 20% for orders of 500 or more of a kind. These discounts do not apply to orders for mixed or assorted kinds aggregating the numbers specified and will apply only so long as we have sufficient numbers to completely fill the orders. No discount except the cash discount of 3% will be given on quantity orders for varieties not starred.

Grades:

Our prices are for No. 1 grade. Customers who are in the market for No. 1½ or No. 2 grade should write us stating their requirements and we will make special quotation, if we can supply.

Conditions:

All orders are received subject to cancellation in case of damage to our stock by contingencies beyond our control. Shipments travel at purchaser's risk when properly delivered to carrier. Complaints and claims for shortage, etc., must be made promptly on examination of goods.
