Your Victory Garden

Last year our Government issued a call to put our gardens to work. The filled pantry shelves show that those gardens were a success. This year our Government is asking for more Victory Gardens and America will again respond.

Although food production is important, the lawn and flower garden should not be sacrificed as nothing can take the place of flowers—we need flowers to raise our spirits and build morale.

Our seed-stocks are now complete but we cannot promise how long they will remain so. Beckert's have been seed specialists since 1877 and will be pleased to have you drop in and inspect our stock of seeds and supplies and discuss with our experienced clerks your garden problems. We urge you not to buy more seed than you will need.
