Gladioli in Mixtures

We build our mixtures to order, as we believe this is the only way a true mixture can be kept up to standard. We know perfectly well that mixtures can be bought at almost any price, but after testing most mixtures on the market we have come to the conclusion that our customers want and should have something better than the average. So we build our mixtures from named varieties and seedlings of merit.

Regarding our mixtures under color, we are most careful to have them true and pure, in fact, as well as in name; and they are mixed with great care from named sorts.

Our Guaranty

We are so very anxious to give our customers satisfaction, and we are so very sure that we have satisfactory goods, that we stand ready to "make good" by replacing anything that does not turn out as represented, from any fault of ours.

Our Prices

We plan our prices to cover cost of production and cost of handling and selling, which items have advanced considerably during the past five years in keeping with all other products.

In view of this we have been obliged to advance prices in some cases from time to time. We never lower the standard of bulbs, not even to meet competition.

Special Mixtures

Flowerfield Trial Mixture — In order to keep our stock up-to-date we make extensive trials of all varieties put on the market; some are very fine but slow producers, some fine but not strong enough in constitution for commercial purposes, some are good but too similar to varieties already on the market. As a result of these trials we have concluded to put the stocks of these trial lots together and offer them as the Flowerfield Trial Mixture. In this you are apt to get some very fine things.....	1 50	10 00

"Primulinus Hybrids"

In recent years these Hybrids have come to be extremely popular and they deserve every word of praise they get; they are graceful, easy to grow, moderate in price, artistic in colors, which range from sulphur-yellow to chrome-yellow, all shades of orange with now and then a cream and pink among them, but Nasturtium colors predominate; they are the last word in Gladioli for dainty decorations. Awarded the Gold Medal at the Panama-Pacific Exposition, 1915.

Bulbs, \$2.50 per 100; \$20.00 per 1000.

Lycoris Squamigera or Amaryllis Hallii

LYCORIS SQUAMIGERA (Magic Flower)

A perfectly hardy Amaryllis producing beautiful pink flowers.

Description — *Lycoris Squamigera* produces in early spring attractive green foliage which grows until July when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower stalks spring from the ground to a height of two or three feet, developing an umbel of large and beautiful lily-shaped flowers three to four inches across and from eight to twelve in number, of a delicate lilac-pink shaded with clear blue.

Culture — As the bulb is perfectly hardy without any protection it can be planted either in the fall or spring, but we consider fall the best time as the bulbs will have a chance to get established before flowering time. Cover the crown about four inches. Very useful for the border or among shrubbery.

CHILDS' PAEONIES ARE THE BEST IN THE LAND

Tritoma Pfitzeri

The greatest bedding plant ever introduced, surpassing the finest Cannas for attractiveness and brilliancy, equal to Gladioli as a cut flower and blooms incessantly from June until December, regardless of frost. Plants are perfectly hardy in the open ground all winter south of Philadelphia; further north they must be protected or wintered in a cellar like the ordinary Tritoma. Just bury the roots in sand; nothing more is required. Should be planted out early in spring, and will commence growth and bloom at once, growing larger and finer every day.

\$1.50 per doz.; \$10.00 per 100.
