CULTURAL GUIDE

Cacti and succulents are natives of arid regions, so try to maintain desert conditions; dry atmosphere, PLENTY OF LIGHT and not much water. They can go long periods without water.

Watering instructions: Set pot in saucer of water for $\frac{1}{2}$ minute, or just long enough for water to rise to top of pot. Do this once every ten days. Water very sparingly in winter.

REPOTTING: Remove all soil from roots, prune roots to $\frac{1}{2}$ their previous length. Plant in a mixture of equal parts of good garden loam and COARSE sand. Very little fertilizer, if any, is required. Rank growth is not desirable.
