HARDY NATIVE EVERGREENS—

FOR NURSERY AND REFORESTATION

The trees listed below are carefully collected from the northern Green Mountains of Vermont. All are selected, well-rooted trees, protected from wind and sun as gathered and immediately puddled in clay.* Shipments are made at once with stock carefully packed in sphagnum moss.

With proper care a reasonable percentage is guaranteed to live.

The usual spring shipping season begins April 10th† and extends through to June 10th. Fall shipping is from about August 20th to December 1st. We ship earlier or later if weather permits.

Orders are filled in the order received unless otherwise arranged.

We gladly book orders in advance for this coming fall or next spring.

Evergreen seedlings up to 9 inches should be bedded for one year with shade through the summer months. Larger sizes are suitable for lining out in the open field.

* Transplantone Applied.

† Balsam Fir—May 10th.

TREES FOR REFORESTATION

For reforestation we suggest Hemlock, Spruce, Balsam, White Pine, Sugar Maple, Yellow Birch and White Cedar.

† RE—ORCHIDS, CERTAIN PLANTS AND FERNS

Due to conservation laws recently enacted in Vermont and other states, most ORCHIDS and certain PLANTS and FERNS are nursery grown or imported from states not affected. To meet our standards we have been forced to raise our prices and reserve the right to refuse orders if circumstances require.

We urge that orchids be sold only to persons who are familiar with their culture.

FERNS

Ferns are very hardy, easy to handle and to grow. Very useful as a perennial foundation plant. We have several collections of varieties selected for their best situations that have proven their reliability. Write for this list.
